Average compensation per animal paid in connection with each breed referred to in question four, during each of the above years. 6. Total compensation paid in connection with each breed in each province during each of the three years referred to. 7. Number of veterinary inspectors employed by the health of animals branch of the Department in connection with the health of animals during each of the three years referred to. 8. Total amount paid in salaries to inspectors under the health of animals branch during the years above-mentioned. Presented April 24, 1922. Mr. Sutherland.
Not printed.
118. Return to an Order of the House of the 24th April, 1922, for a Return showing: 1. Names, positions and salary of the employees of the Chief Architect's branch, Public Works Department, who worked on the three classifications which were posted in the branch. 2. Which of the three classifications was approved by the Deputy Minister and recommended to the Commission. 3. On what date, month and year reports or cards for classification from Chief Architect's branch were received by the Commission. 4. Whether after such reports or cards for classification were received by the Commission, there were any other special ones issued. 5. If so, on what date, month and year they were issued. 6. By whom they were requested. 7. Names, positions and salary of the persons to whom they were issued. 8. Whether all the employees were informed. If not, why. 9. Duties of those who received these cards. 10. For what position and salary each of them was requested to fill in these cards. 11. To what positions and salaries they were classified. 12. Position and salary of each when the first and second classifications were posted. 13. Amount of back pay each received. 14. Their position and salary, also the year they were appointed in the service. Presented April 24, 1922. Mr. Fournier.....*Not printed.*
119. Return to an Order of the Senate, dated 22nd March, 1922, for a Statement showing:—The number of soldiers who were established on land in the different provinces, the amount of money expended by the Government for that purpose, and whether any part of that money was reimbursed, and how many after a certain time left the farms upon which they had commenced to work. Presented April 26, 1922. Hon. Mr. David.
Not printed.
120. Return to an Order of the Senate, dated March 31, 1922, for a Return showing: 1. How much money has been expended to date by the Lignite Utilization Board experimenting in carbonizing lignite near Bienfait, Sask. 2. Names of Commissioners and amount paid to each. (a) for salaries; (b) for expenses. 3. When active work was stopped. 4. Names of Engineers now employed or who have been employed, and amount paid to each. (a) for salaries; (b) for expenses. 5. What did buildings cost. 6. How many houses have been built for Officers and Engineers, and cost of same. 7. How many houses have been built for workmen, and cost of same. 8. What has been cost of water supply. (a) for plant; (b) for houses. 9. What is the estimated cost of completing the experiments. 10. How many officers, engineers and workmen were on the pay list for February, 1922. 11. Who owns the land in which the plant and houses are built. 12. Who is the directing head in connection with the above experiments. 13. Is the National Research Council of Canada in any way connected with the above-mentioned experiments. 14. What payments, if any, have been made, or are to be made to the National Research Council or any member thereof. Presented April 26, 1922. Hon. Mr. Turriff.....*Not printed.*
121. Return to an Order of the House of the 26th April, 1922, for a return showing: 1. The names of the Trustees, under The Bankruptcy Act, for the district of Montreal. 2. When they were appointed, and their respective occupations before appointment. Presented April 27, 1922. Mr. Archambault.....*Not printed.*

 CONTENTS OF VOLUME 9—*Continued.*

153. Return to an Order of the House of the 19th April, 1922, for a copy of Timber License issued to the Union Bank of Canada or any other parties to cut timber on Indian Lands in the Township of Laird, District of Algoma, together with a copy of all correspondence, letters, memoranda, telegrams and other documents, passing between the Indian Agent at Sault St. Marie, the Licensees or any other parties, and the Department of Indian Affairs, in connection therewith. Also a statement of all dues paid the Department in respect to said License. Presented May 11, 1922. Mr. Simpson. *Not printed.*
154. Return to an Order of the House of the 1st May, 1922, for a return showing: 1. Whether it is the intention of the Government to operate the greater production farms on the Blackfoot Indian Reserve at Gleichen, Alberta, this year. 2. If not, how does the Government intend disposing of them. 3. Whether proper precautions will be taken to prevent the country being seeded with weeds from these neglected farms. 4. Number of acres broken by the Government on these farms. 5. The cost per acre. 6. From whom, at what place, and at what price the seed wheat for these farms was purchased. 7. From whom, at what point, and at what price the feed oats were purchased during the first and second years of operation. 8. Average yield each year of operation. 9. Net price received per bushel for wheat grown. 10. To whom this wheat was sold. 11. Net profit per acre each year. Presented May 11, 1922. Mr. Garland (Bow River) *Not printed.*
155. Return to an Order of the House of the 8th May, 1922, for a Return showing:— 1. Whether it is a fact that appeals made by many Civil Servants who are dissatisfied with their classification never reach the Board of Hearing. 2. Whether it is true that such appeals are from the decisions of heads or chiefs of branches who declined to recommend the classifications claimed to be in accord with the character of the work done by such Civil Servants. 3. Whether it is true such appeals fail to reach the Board of Hearing because they are so prevented by the heads or chiefs against whose decisions such appeals are made. 4. If so, whether the Government intends taking any steps to see justice done such Civil Servants, by having their appeals reach the Board of Hearing notwithstanding the opposition of such heads or chiefs against whose decisions such appeals are made. 5. If not, why not. Presented May 11, 1922. Mr. Lanctot.....*Not printed.*
156. Return to an Order of the House of the 11th May, 1922, for a return showing:— 1. In what countries Canada is represented by trade agents. 2. Names of said agents, and salary each receives. Presented May 11, 1922. Mr. Prevost...*Not printed.*

Return to an Address to His Excellency the Governor General of the 3rd April, 1922, for a copy of all correspondence, telegrams, reports and other documents exchanged between the Department of the Interior or any of its officers or employees, and the Gold Commissioner of Yukon Territory, or any other person or official, concerning the application to Yukon Territory of the Order in Council which provides that the Mining Recorders shall not receive for record, transfers of interests in mineral claims, when such interests are less than one quarter interest. Also a copy of the said Order in Council. Presented May 15, 1922. Mr. Black (Yukon).....*Not printed.*
158. Return to an Order of the House of the 1st May, 1922, for a return showing a list of the names of the permanent employees of the Montreal Harbour Commission, the salary of each, date of appointment and salary on appointment, age, occupation, and the respective previous occupations of said employees. Presented May 15, 1922. Mr. Archambault*Not printed.*
159. Return to an Order of the House of the 26th April, 1922, for a copy of all correspondence, telegrams, letters, agreements, contracts, claims, memoranda and other documents between the Caraguet and Gulf Shore Railway Company and the Government of Canada, relating to the purchase of the said railway. Presented May 15, 1922. Mr. Hanson. *Not printed.*
- 159a. Supplementary Return to an Order of the House of the 26th April, 1922, for a copy of all correspondence, telegrams, letters, agreements, contracts, claims, memoranda and other documents between the Caraguet and Gulf Shore Railway Company and the Government of Canada, relating to the purchase of the said railway. Presented May 19, 1922. Mr. Hanson*Not printed.*
160. Return to an Address to His Excellency the Governor General of the 3rd April, 1922, for a copy of all correspondence, telegrams, reports, and other documents exchanged between the Department of the Interior, or any of its officers or employees, and the Gold Commissioner of the Yukon Territory, or any other person, during the years 1919, 1920 and 1921, concerning the imposition of a Royalty tax or Government charge upon the output of minerals, other than gold, for the Yukon Territory. Also a copy of the Order in Council in this connection. Presented May 16, 1922. Mr. Black (Yukon)*Not printed.*

 CONTENTS OF VOLUME 9—*Continued.*

161. Return to an Order of the Senate of the 16th May, 1922, for a Return showing:—
 1. The total cost of construction and repairs of each canal in Canada. 2. Between what points is each canal situated and the mileage of each. 3. The total expenditure for upkeep and operation of each canal during each of the years since 1910. 4. What income has been received from each of the canals each year since 1910. Presented May 16, 1922. Hon. Mr. McDonald.....*Not printed.*
162. Return to an order of the Senate, dated March 29, 1922, for a Return showing:—
 1. A list of all licenses issued by the Government, now in force, for timber berths and the right to cut timber on Crown Lands in the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia. 2. The names and residence of the holders of such licenses and the area contained in each berth. 3. On what terms and conditions were such licenses granted. 4. What is the area and location of timber berths in said provinces still unlicensed and the estimated quantity and description of timber in each berth. Presented May 16, 1922. Hon. Mr. Proudfoot.....*Not printed.*
163. Return to an Order of the House of the 10th April, 1922, for a Return showing: 1. Amount of bonds (a) of the Canadian Northern, (b) of the Grand Trunk Pacific guaranteed by any of the provinces, and which province in each case. 2. Whether the guaranteeing provinces have been relieved of liability by the Federal Government taking over these railway systems. 3. Bonds or other securities in connection with railways in (a) New Brunswick; (b) Nova Scotia; (c) Prince Edward Island guaranteed or assumed by the Federal Government. 4. Terms under which the Department of Railways operates the Valley Railway, so called, in New Brunswick. 5. Whether this railway is operated as part of the Intercolonial or under what jurisdiction it has been placed. 6. Whether its operation entails any loss to the Federal Government. If so, to what amount and of what it consists. 7. Whether the Government is considering the taking over of the Valley Railway, so called. Presented May 17, 1922. Hon. Mr. Baxter.*Not printed.*
164. Return to an Order of the House of the 17th May, 1922, for a Return showing:—
 1. The consumption of binder twine and rope, in the various provinces of Canada, during the year 1921. 2. How much of this was manufactured in Canada. Presented May 17, 1922. Mr. Gordon.....*Not printed.*
165. Return to an Order of the Senate dated May 10, 1922, for a Copy of the different leases between the Government and the Montreal Dry Dock Company. Presented May 18, 1922. Hon. Mr. Boyer.....*Not printed.*
- 165a. Supplementary Return to an Order of the Senate, dated May 10, 1922, for a Return for a Copy of the different leases between the Government and the Montreal Dry Dock Company. Presented June 16, 1922. Hon. Mr. Boyer.....*Not printed.*
166. Return to an Order of the House of the 1st May, 1922, for a copy of all correspondence, letters, telegrams, contracts, tenders and other documents, relating to the employment or use of the tug *Pekin*, and any other tug or tugs hired or used by the Government in connection with the Government dredges, in and around Prince Edward Island, from June, 1911, to March 31, 1922. Presented May 19, 1922. Mr. MacLean (Prince)*Not printed.*
167. Return to an Order of the House of the 27th March, 1922, for a copy of all letters, telegrams, reports, memoranda, informations and warrants, minutes of evidence and convictions, and all other Court proceedings relating or in anywise appertaining to the trial and conviction of Clyde Heath and Gurney Young, of Tancook, Nova Scotia, for a violation of the Migratory Birds Convention Act. Also a copy of the Order in Council dated on or about the 19th day of November, 1921, authorizing and empowering the remission of all fines and forfeitures occasioned by the conviction of said Clyde Heath and Gurney Young. Presented May 19, 1922. Mr. Martell.
Not printed.
168. Return to an Order of the House of the 1st May, 1922, for a Return showing:—
 1. Names of the employees of the Department of Customs and Excise, Montreal. 2. Salary paid to each of said employees. 3. Respective dates of employment of said employees. Presented May 22, 1922. Mr. Archambault.....*Not printed.*
169. Return to an Order of the House of the 4th May, 1922, for a Return showing:—
 1. The cost of the trips to Europe of the Ministers of the Canadian Government during the war period and since. 2. The cost for each Minister who attended any of the after war conferences held at Paris, Geneva or elsewhere in Europe. 3. How much, if any, each one of such Ministers has returned to the Treasury of the amounts allowed for such trips over and above their actual expenses. 4. The names of such Ministers and the respective amounts allowed to each, as well as the amounts returned by each. Presented May 22, 1922. Mr. Lanctot.....*Not printed.*

CONTENTS OF VOLUME 9—*Continued.*

170. Return to an Order of the House of the 8th May, 1922, for a Return showing:—
1. Number of multigraph machines in use in the various departments of the Government. 2. Volume of work done on these machines, by departments, during the fiscal year 1921-1922. 3. Whether this work is under the control of the Editorial Committee. Presented May 22, 1922. Mr. McDonald (Timiskaming).....*Not printed.*
171. Return to an Order of the House of the 26th April, 1922, for a copy of all petitions or memorials from residents of the County of Charlotte, New Brunswick, made to the Department of Marine and Fisheries, asking that a minimum price per hoghead be placed on all sardines sold for export during the present fishing season, and for a copy of all correspondence and other documents relating thereto. Presented May 22, 1922. Mr. Grimmer.....*Not printed.*
172. Return to an Order of the House of the 22nd May, 1922, for a copy of all letters, telegrams, correspondence and other documents that have passed between the officials of the Grand Trunk Railway, the officials of the Brotherhood of Railway Trainmen, and the Order of Railway Conductors, and all agreements signed between the officials of the Grand Trunk Railway and officials of the Brotherhood of Railway Trainmen and the Order of Railway Conductors, regarding the strike on the Grand Trunk Railway System, of trainmen and yardmen, in 1910, and particularly the correspondence and agreements affecting the seniority rights of the men who worked during this strike. Presented May 23, 1922. Mr. King (Huron).....*Not printed.*
173. Return to an Order of the House of the 11th May, 1922, for a Return showing:—
1. How many acres of School Lands have been sold in Saskatchewan, Manitoba, and Alberta, during the four years of 1918, 1919, 1920 and 1921. 2. Amount of money overdue in respect to the above sales in (a) principal, and (b) interest. Presented May 29, 1922. Mr. Spencer.....*Not printed.*
174. Return to an Order of the House of the 15th May, 1922, for a return showing:—
1. Number of Civil Servants in Canada receiving salaries of eight hundred dollars and less per annum. 2. Number receiving nine hundred and sixty dollars or less. Presented May 29, 1922. Mr. McQuarrie.....*Not printed.*
175. Partial Return to an Order of the House of the 5th April, 1922, for a Return showing in detail the amount of money paid by the Government of Canada or any department thereof, to barristers and solicitors of the Supreme Court of Nova Scotia, between the 1st day of October, 1911, and the 30th day of January, 1922, both inclusive, for professional or other services. Also a copy of all bills of costs, expenses and charges of every kind rendered by said barristers and solicitors to the Government, showing the amount or amounts paid in each instance. Also showing the names of barristers and solicitors employed during the aforesaid period, the work performed and the amount paid for every item of said work to each of said barristers and solicitors. Presented May 29, 1922. Mr. Martell.....*Not printed.*
- 175^{a-b-c}. Supplementary Returns to an Order of the House of the 5th April, 1922, for a Return showing in detail the amount of money paid by the Government of Canada or any department thereof, to barristers and solicitors of the Supreme Court of Nova Scotia, between the 1st day of October, 1911, and the 30th day of January, 1922, both inclusive, for professional or other services. Also a copy of all bills of costs, expenses and charges of every kind rendered by said barristers and solicitors to the Government, showing the amount or amounts paid in each instance. Also showing the names of barristers and solicitors employed during the aforesaid period, the work performed and the amount paid for every item of said work to each of said barristers and solicitors. Presented June 5, 15, 19, 1922. Mr. Martell....*Not printed.*
176. Return to an Order of the House of the 6th April, 1922, for a Return showing:—
1. The total area in acres in the provinces of Alberta and Saskatchewan sold to settlers as Pre-emptions, as provided by Dominion Lands Act, 1908. 2. What area of said Pre-emptions has been patented. 3. The total revenue received from: (a) Pre-emptions for which patent has been issued, (b) Pre-emptions which have not been patented. 4. The amount remaining unpaid on all pre-empted lands in said area. 5. The revenue received from pre-empted lands in said area in the years 1920 and 1921. 6. How much land in said area was sold as purchased homesteads since 1908, and the revenue received therefrom. 7. The amount remaining unpaid on said purchased homesteads. 8. How much land was pre-empted south of Weyburn-Lethbridge railway since 1908. 9. How much revenue was received therefrom. 10. How much was received in the years 1920 and 1921. Presented May 29, 1922. Mr. McTaggart *Not printed.*
177. Return to an Order of the House of the 15th May, 1922, for a Return showing:—
1. Names of the postmasters, and the location of their offices, in the county of l'Assomption and Montcalm who were dismissed from the service from the twenty-first of September, 1911, to January first, 1922, and the names of persons replacing them. 2. Who recommended the dismissals and appointments. Presented June 1, 1922. Mr. Seguin*Not printed.*

CONTENTS OF VOLUME 9—*Continued.*

178. Return to an Order of the House of the 8th May, 1922, for a Return showing:—
1. Number of postmasters who have been appointed in the constituency of Richmond and Wolfe, from the 21st September, 1911, to the 1st of January, 1922. 2. Names of said postmasters, the location of post offices and the names of the persons who recommended the appointment in each case. Presented June 1, 1922. Mr. Tobin. *Not printed.*
179. Return to an Order of the House of the 8th May, 1922, for a Return showing:—
1. Number of postmasters dismissed from office, in the constituency of Richmond and Wolfe, from the 21st day of September, 1911, to the 1st day of January, 1922. 2. Number of postmasters who resigned their offices in the constituency of Richmond and Wolfe during the same period. 3. Number of postmasters who died in the said constituency during the same period. 4. What were, in each case, the names of the postmasters and the names of the post offices. 5. Cause of dismissal in each case where the postmaster was dismissed, during the said period. Presented June 1, 1922. Mr. Tobin. *Not printed.*
180. Return to an Order of the House of the 31st May, 1922, for a Return showing:—
1. Cost for operation and maintenance of the Fisheries of British Columbia annually, for the years 1917-1918, 1919-1920 and 1921, in the nature of office staff, buildings, upkeep and rentals, patrol, boats and upkeep, field work, hatcheries, and any other such items that may be charged against this department. 2. Amount of revenue collected from the Fisheries of British Columbia by the Dominion Fisheries Department, annually, for the years 1917-1918, 1919-1920 and 1921, in the form of license fees, royalties on canned salmon, prosecutions and fines, sale of confiscated boats and gear, and any such revenue as may be collected by the department. Presented June 5, 1922. Mr. Neill. *Not printed.*
- 180a. Return to an Address to His Excellency the Governor General of the 22nd May, 1922, for a copy of all letters, telegrams, correspondence, reports, and other documents, exchanged between the Government of Canada or any Minister thereof, and the Government of British Columbia or any minister thereof, or received from any person, relative to the advisability of transferring the control or administration of the Canadian fisheries of the Pacific coast, to the province of British Columbia. Presented June 20, 1922. Mr. McQuarrie. *Not printed.*
181. Protocols embodying Amendments to Articles 4, 6, 12, 13, 15, 16, and 26 of the Covenant of the League of Nations, as adopted by the Second Assembly of the League at Geneva on the 3rd, 4th and 5th October, 1921; together with letter dated the 24th November, 1921, from the Secretary General of the League to the Prime Minister of Canada, transmitting certified copies of the Protocols. Presented June 7, 1922. *Printed for Sessional Papers and distribution to Senators and Members.*
- 181a. Return to an Order of the Senate of the 8th June, 1922, for a Return showing:—
1. Whether the Government has received any report from the representatives of Canada as to the Second Assembly of the League of Nations held in Geneva in September and October, 1921, and if so, whether this report will be laid on the table for the information of members. 2. Whether the Government has received the printed reports of the Council of the League of Nations made to the first and second Assembly, and if so, whether copies of these reports will be laid on the table for the information of members. 3. Whether the Government has received the printed monthly summary and supplementary reports of the League of Nations and whether copies of these reports will be brought down. Presented June 8, 1922. Rt. Hon. Sir Geo. E. Foster. *Not printed.*
- 181b. Copy of Draft Conventions and Recommendations adopted by the International Labour Conference at its Third Session, held at Geneva, 25th October-19th November, 1921. Presented June 24, 1922. *Not printed.*
182. Return to an Order of the House of the 15th May, 1922, for a copy of all correspondence, telegrams, letters, tenders and other documents, exchanged between the Government and Hector Chevrier, regarding the contract for carrying the mails between Rigaud and St. Redempteur, Quebec. Presented June 8, 1922. Mr. Ouimet. *Not printed.*
183. Return to an Address to His Excellency the Governor General of the 10th April, 1922, for a copy of all letters telegrams, memoranda, reports to Council, Orders in Council, accounts and other documents, relating to the Indian Agency at Bear River, Digby County, Nova Scotia, including a list of all supplies of every description supplied for the use of Indians under the control of said agency. Also a statement showing a list of the supplies, consisting of clothing, food, seed and other materials, to whom supplied and what quantity in each case, during the period from the first October, 1911, to and including the first of January, 1922. Presented June 8, 1922. Mr. Lovett. *Not printed.*
184. Return to an Order of the House of the 15th May, 1922, for a copy of all correspondence, letters, telegrams, memoranda and other documents, regarding the establishment of a Tobacco Experimental Station at l'Assomption, Quebec, and the purchasing of the college farm for this purpose. Presented June 9, 1922. Mr. Seguin. *Not printed.*

CONTENTS OF VOLUME 9—*Continued.*

185. Return to an Order of the House of the 1st May, 1922, for a copy of all letters, telegrams, correspondence and other documents exchanged between the Post Office Department at Ottawa, and the officers of the said department at Montreal, and the Civil Service Commission, regarding the appointment of Mr. Taylor as Assistant Superintendent at Montreal Post Office. Presented June 12, 1922. Mr. Parent.
Not printed.
186. Return to an Order of the House of the 24th April, 1922, for a copy of all correspondence, letters, telegrams and other documents regarding the appointment of one or more appraisers for Paris and London, made by the Civil Service Commission. Presented June 12, 1922. Mr. Parent.....*Not printed.*
187. Return to an Order of the House of the 19th April, 1922, for a Return showing:—
1. Total amount of bonus paid to civil servants up to April 1, 1921. 2. Total amount paid to civil servants on account of annual statutory increase for the fiscal years 1918, 1919, 1920 and 1921. Presented June 12, 1922. Mr. Lanctot.....*Not printed.*
188. Return to an Order of the House of the 20th April, 1922, for a Return showing:—
1. The total Customs collections received by the Port of Parry Sound, Ontario, during each year, from 1911 to 1921, inclusive. 2. What towns or cities in Canada, having equal or less average Customs collections, have public buildings used for Customs purposes. Presented June 12, 1922. Mr. Arthurs.....*Not printed.*
189. Return to an Order of the House of the 17th May, 1922, for a Return showing:—
1. Cost, in each Military District, of transportation, in connection with the Army Service Corps. 2. Number of horses, automobiles, motor trucks and other vehicles in the Army Service Corps. 3. Number of officers and men in this section of the Militia. 4. Total value of all equipment of the Army Service Corps, and amount spent on upkeep and repairs to equipment, including forage, sickness, etc., during the year ending March 31, 1922. 5. Whether this service would cost less to the country if the forage, supplies, and transportation were given by contract each year to an individual, according to lowest tender, or done by day work. Presented June 13, 1922. Mr. Lanctot.....*Not printed.*
190. Return to an Order of the House of the 31st May, 1922, for a Return showing:—
1. What buildings were occupied, as offices, at Ottawa, by the Department of Militia and Defence, for the year ending March 31, 1911, and for the year ending March 31, 1922, (a) for the General Headquarters, and (b) for each service of this department. 2. What buildings were occupied, as offices, in each Military District, (a) for the District Staff; (b) for the Army Pay Corps; (c) for the Veterinary Corps; (d) for the Medical Corps; (e) for the Engineers Corps; (f) for the Ordnance Corps; and (g) for the Army Service Corps. 3. Strength of the Permanent Force in each Military District for the year ending March 31, 1911, and for the year ending March 31, 1922. 4. During the above years, the number of officers of the Army Pay Corps, the respective rank and salary of each, and the number of clerks employed in this service, in each district. 5. Whether the department in future intends to keep more than one officer of the Army Pay Corps in each district, and to continue the Auditor Branch which was organized in each Military District during the war. Presented June 13, 1922. Mr. Lanctot.....*Not printed.*
191. Return to an Order of the Senate, dated May 18, 1922, for:—A Copy of the different letters, telegrams and other documents exchanged between the Government and the Northern Explosive Company, concerning the erection and operation of the Rigaud plant belonging to this company. Presented June 13, 1922. Hon. Mr. Boyer.
Not printed.
192. Return to an Order of the Senate, dated June 6, 1922, for:—Copies of all correspondence exchanged between the Minister of Agriculture of the Dominion of Canada, and the Minister of Agriculture of the province of Ontario, on the subject of extending to Cold Storage Warehouses, owned by co-operative companies of fruit growers, the system of subsidies to public Cold Storage Warehouses now provided for by the Cold Storage Act, 1907, chapter six. Presented June 13, 1922. Hon. Mr. Laird.
Not printed.
193. Return to an Order of the House of the 15th May, 1922, for a Return showing:—
1. Number of Generals on active service in the Canadian Militia. 2. How many in Ottawa. 3. Respective salaries, including allowances, of each General stationed at Ottawa. 4. Number of Colonels, Lieutenant-Colonels, Majors, Captains and Lieutenants at Headquarters, Ottawa. 5. Number of non-commissioned officers and privates employed as clerks or messengers at Headquarters, Ottawa. 6. Total amount paid in salaries to the above-mentioned officers and men. Presented June 15, 1922. Mr. Lanctot.....*Not printed.*
194. Return to an Order of the House of the 15th May, 1922, for a Return showing:—
1. Number of Military Districts in Canada during the year ending March 31, 1922. 2. Where they were located, and the rank of the Commanding Officer of each district. 3. Their respective ranks on March 31, 1914. 4. Number of officers on the General Staff of each of the said districts during the year ending March 31, 1922. 5. The

CONTENTS OF VOLUME 9—*Continued.*

rank, and the respective duties of each of the said officers, including the Commanding Officer. 6. Number of non-commissioned officers and privates employed as clerks in the offices of the General Staff of each of the said districts. 7. Number of officers, non-commissioned officers and men employed in each of the said districts, during the year ending March 31, 1922, in connection with the Medical Corps, Engineering Corps, Pay Corps, Army Service Corps, Veterinary Corps and Military Stores, and rank of these officers. 8. On what date the new schedule for salaries and allowances came into force. 9. Who is authorized to fix the schedule for salaries and allowances of the Militia. 10. Maximum salary, including allowances, for Colonels, Lieutenant-Colonels, Majors, Captains, Lieutenants, non-commissioned officers and privates, of the Permanent Militia, according to both the new and old schedules. 11. Salaries, including allowances, of Generals who are stationed at Headquarters, Ottawa, according to the new and old schedules. 12. Number of privates in the Permanent Militia on March 31, 1922. 13. Number of Generals, Colonels, Lieutenant-Colonels, Majors, Captains and Lieutenants, on active service in the Canadian Militia on March 31, 1922. 14. Strength of a company and regiment of the Militia in peace time. Presented June 15, 1922. Mr. Lanctot.....*Not printed.*

195. Return to an Order of the House of the 22nd May, 1922, for a Return showing the origin of all goods purchased by the Purchasing Commission, distinguishing such as are of Canadian manufacture from those of foreign origin, from the first of April, 1921, to date. Presented June 16, 1922. Mr. Raymond.....*Not printed.*
196. Return to an Order of the House of the 8th May, 1922, for a Return showing:—
1. Whether the Government is aware that there are instances of officials in the public service subordinate to Deputy Ministers who are in receipt of salaries more than those paid to such Deputy Ministers. 2. If so, whether it is the policy of the Government to continue this custom. 3. Deputy Ministers or other officials in the public service receiving more than six thousand dollars per annum from any Government source. Presented June 16, 1922. Mr. Chisholm.....*Not printed.*
197. Return to an Address to His Excellency the Governor General of the 31st May, 1922, for a copy of all letters, telegrams, memoranda, reports to Council, Orders in Council, and other documents passing between the Government and any other parties relating to the internment, deportation, return, and claims for compensation of Robert DeBeaux. Presented June 16, 1922. Mr. Neill.....*Not printed.*
198. Return to an Order of the Senate, dated May 17, 1922, for a Return showing:—
(a) The aggregate number of acres of land located within the present territorial limits of the province of Saskatchewan granted by way of subsidy or bonus for the construction of railways beyond the boundaries of the said province. (b) The names of the persons and companies receiving such grant and the amount in each case, and date. (c) The dates or approximate dates of selections of land by the persons and companies receiving the bonus or grant. (d) The locations of the land so selected or finally selected by the grantees. Presented June 16, 1922. Hon. Mr. Willoughby.
Not printed.
199. Annual Report of the Canadian National Railways for the year ended 31st December, 1921. Presented June 19, 1922.....*Not printed.*
200. Third Annual Report of the Board of Directors of Canadian Government Merchant Marine, Limited, for the year ended 31st December, 1921. Presented June 19, 1922.
Not printed.

The number of civil servants in the employ of the Government on the first of January, 1912, and the total amount of salary paid to them. 2. The number of civil servants in the employ of the Government on the first of January, 1922, and the total amount of salary paid to them. Presented June 19, 1922. Mr. Seguin.....*Not printed.*

CONTENTS OF VOLUME 9—*Continued.*

205. Return to an Order of the House of May 22, 1922, for a copy of all letters, telegrams, correspondence and other documents exchanged between the Government of Canada and any other parties, relative to the claims of H. W. A. Page. Presented June 19, 1922. Mr. Neill.....*Not printed*
206. Return to an Order of the House of May 10, 1922, for a copy of all correspondence between the Minister of Marine and Fisheries or any official of that department, and the Minister of Justice or any official of his department, in reference to judgment given by Mr. Justice Morrison, of British Columbia, in regard to the mode of appointment of persons to act as nautical assessors to assist the Dominion wreck commissioners in an investigation of wrecks and other marine casualties. Presented June 19, 1922. Mr. Church.....*Not printed.*
207. Return to an Order of the House of the 22nd May, 1922, for a copy of all letters, telegrams, correspondence and other documents exchanged between the Government of Canada and any other parties, relating to the appointment and residence in the County, of Junior County Court Judge, for the County of Nanaimo, British Columbia. Presented June 20, 1922. Mr. Neill.....*Not printed*
208. Return to an Address to His Excellency the Governor General of the 5th June, 1922, for a copy of all correspondence, letters, telegrams, and other documents exchanged between the Dominion Government or any minister or officers thereof, and the Government of British Columbia, or the Premier of the said province or any minister or officer thereof, regarding the assumption by the Dominion Government of an issue of Canadian Northern bonds (estimated \$40,000,000) guaranteed by the province of British Columbia and the releasing of the British Columbia Government of all liability in regard to the same. Presented June 21, 1922. Hon. Mr. Stevens.
Not printed.
209. Return to an Order of the House of the 12th June, 1922, for a copy of all letters, telegrams and documents or correspondence passing between the Order of Grain Buyers and the Board of Grain Commissioners, or passing between the Order of Grain Buyers and the Government or between the Board of Grain Commissioners and the Government or officials thereof respecting the said Order of Grain Buyers. Presented June 21, 1922. Hon. Mr. Stevens.....*Not printed.*
210. Return to an Order of the Senate dated June 8, 1922, for a Return showing:—
1. The road projects in respect to which the Federal Government has made payments to the Government of Nova Scotia. 2. The amount paid in respect to each of the projects and the dates of payment. 3. The balances, if any, claimed by the Government of Nova Scotia in respect to each of the projects. 4. All other road projects which have been submitted by the Government of Nova Scotia to the Federal Government, the mileage of each, the proposed cost of each; and the projects respectively that have been approved by the Federal Department. Presented June 21, 1922. Hon. Mr. Tanner.....*Not printed.*
211. Return to an Order of the Senate dated June 8, 1922, for a return of copies of all agreements between the Government or any department of the Government and the Acadia Coal Company in respect to the railway between New Glasgow and Thorburn in Nova Scotia. Presented June 21, 1922. Hon. Mr. Tanner.....*Not printed.*
212. Copy of Treaty of Peace between the Allied and Associated Powers and Hungary, and Protocol and Declaration, signed at Trianon, June 4, 1920. Presented June 22, 1922
Not printed
213. Copy of Treaty of Peace with Turkey, signed at Sèvres, August 10, 1920. Presented June 22, 1922.....*Not printed.*
214. Return to an Order of the House of the 15th June, 1922, for a Return showing:—
1. The amounts paid by the Government, and to whom, for auditing public expenditure since the Civil Service Act of 1918 became effective. 2. The total amount of the claims of the Clarkson Commission for inquiry and audit in the Militia Department in respect of the sterling exchange payments to returned soldiers and others. 3. Whether any or all of the sterling exchange payments made by the Chief Accountant were audited by the Audit Staff of the Militia Department. 4. The total amount computed or estimated to have been fraudulently obtained in exchange transactions by or on behalf of returned soldiers or others. 5. Whether any of the officials or employees of the Accounts Branch, Militia Department, who were connected with or responsible for handling sterling exchange payments to returned soldiers or others, received any increase in pay or were classified in a higher grade by the Civil Service Commission after undertaking this sterling exchange work. 6. If so, the names of such officials or employees. 7. At what rate of pay Messrs. Allen, Lowe and Hubbell were paid each fiscal year since their appointment, and on what dates increases of pay by reclassification or otherwise became effective. 8. Before being permanently appointed, whether these men passed any examination prescribed by the Civil Service Commission. Presented June 23, 1922. Mr. Vien.....*Not printed.*

 CONTENTS OF VOLUME 9—*Concluded.*

- 215.** Return to an Order of the House of the 1st May, 1922, for a Return showing:—
1. The amount of money the Canadian Government advanced to the Imperial Government each year, from the declaration of the late war up to the present date, and on what dates the said amounts were advanced. 2. How much, if any, the Government of Canada has received as reimbursement for these advances. 3. Whether this reimbursement was made in cash or in kind. 4. If in kind, what articles were received, and of what value. Presented June 23, 1922. Mr. Vien.....*Not printed.*
- 216.** Return to an Order of the House of the 10th April, 1922, for a copy of all letters, telegrams, correspondence, rulings of the department, and all other documents regarding the claim for compensation to the owners of Crown Patents to lot two hundred and twenty-five, Hudson Bay Company's survey, in the parish of St. John, Manitoba. INTERNATIONAL CODE OF SIGNALS.

This list is prepared for the purpose of enabling officers at signal stations on shore, and masters of ships at sea to signal and report passing ships. It contains the name and distinguishing signal of every ship registered in Canada to which a code signal has been allotted to the 31st December, 1921. The particulars of each ship are given both in the order of the signal letters and in the alphabetical order of their names.

Applications for the allotment of a code signal for the purpose of making ship's name known at sea should be made on form C.C.S.I. to the Registrar of Shipping at the port to which it belongs.

THE ENSIGN TO BE SHOWN AT THE PEAK, OVER THE CODE PENNANT,
WHEN THE SIGNAL LETTERS ARE HOISTED.

12 GEORGE V, A. 1922

BRITISH SHIPS Registered in Canada to which distinguishing signals have been allotted, arranged in alphabetical order.

Name of Ship.	Port of Registry.	Signal letters.	Name of Ship.	Port of Registry.	Signal letters.

OTTAWA, May, 1922.

Hon. ERNEST LAPOINTE,

Minister of Marine and Fisheries.

SIR,—I have the honour to submit the Supplement to the Fifty-fourth Annual Report of the Department of Marine and Fisheries (Marine Branch) or the fiscal year 1920-21, being the Report of the Chairman of the Board of Steamboat Inspection.

I have the honour to be, sir,

Your obedient servant,

A. JOHNSTON,

Deputy Minister of Marine and Fisheries.

OTTAWA, Mai 1922.

HON. ERNEST LAPOINTE,

Ministre de la Marine et des Pêcheries.

MONSIEUR,—J'ai l'honneur de vous soumettre le rapport du président du Bureau d'inspection des bateaux à vapeur, publié en supplément au cinquante-quatrième rapport annuel du ministère de la Marine et des Pêcheries (Direction de la Marine marchande) pour l'exercice financier 1920-21.

J'ai l'honneur d'être, monsieur,

Votre obéissant serviteur,

A. JOHNSTON,

Sous-ministre de la Marine et des Pêcheries

BOARD OF STEAMBOAT INSPECTION.

OTTAWA, February 28th, 1922.

To the Deputy Minister of
Marine and Fisheries,
Ottawa, Ontario.

SIR,—I have the honour to submit, as follows, the annual report of the Steamboat Inspection Service, for the fiscal year ended March 31, 1921.

STAFF

I have to report the retirement, at his own request, of Mr. John Dodds, Inspector of Boilers and Machinery at the Port of Toronto, on July 31, 1920. Mr. Dodds entered the service in the year 1891.

I also regret to have to report the death of Mr. George M. Arnold, Inspector of Boilers and Machinery at the Port of Toronto, on November 2, 1920. Mr. Arnold entered the service in the year 1912.

To fill the vacancies resulting at the port of Toronto, Mr. P. W. Lyon Steamship Inspector at the port of Collingwood, was transferred to Toronto and by Order-in-Council dated December 8, 1920, Mr. William Logie MacKenzie was appointed Inspector of Boilers and Machinery and Hulls and Equipment.

Under the Civil Service Retirement Act of 1919, Mr. I. J. Olive, Inspector of Hulls and Equipment at the port of St. John, was retired on December 31, 1920. Mr. Olive entered the service in the year 1894.

Owing to the increase in work in the Vancouver Division it was found necessary to appoint a third inspector at that port. By Order in Council dated May 26, 1920, Mr. Thomas McConnachie Stephen received appointment as Inspector of Boilers and Machinery and Hulls and Equipment.

It was decided that, as the number of inspections in the Prince Rupert district did not warrant the maintenance of an inspector at that port, the Prince Rupert office should be closed and inspection in that district administered from the port of Victoria. Mr. A. Farrow, Steamship Inspector at Prince Rupert, who had been temporarily transferred from that port to Vancouver in January, 1919, has been permanently stationed at the latter port.

In line with the policy of having inspectors, where found qualified, act both as Inspectors of hulls and equipment and boilers and machinery, two appointments of machinery inspectors to the position of Inspector of hulls and equipment were made. Mr. J. A. Samson, Inspector of Boilers and Machinery at Quebec, and Mr. P. W. Lyon, Inspector of Boilers and Machinery at Collingwood (later transferred to Toronto) receiving appointments as inspectors of hulls and equipment by Orders in Council dated April 23, 1920, and June 16, 1920, respectively.

BOARD MEETINGS

Board meetings for the purpose of dealing with questions arising out of the administration of the regulations governing steamboat inspection, for considering the qualifications of candidates for the position of steamboat inspector, and for the approval of machinery, boilers and equipment for use in ships coming under inspection were held during the year.

CASUALTIES

The following are the casualties reported from the several divisions during the year ended March 31, 1921.

HALIFAX DIVISION

On July 23, 1920, the ss. *Diamond* became a total loss on Fire island. No lives lost.

On March 6, 1921, the ss. *Pemanencia* became a total loss off the south west extremity of Little Miquelon island, St. Pierre. No lives lost.

ST. JOHN DIVISION

On December 5, 1920, the ss. *R. R. Call* while at Carleton, Quebec, caught fire and was destroyed, afterwards sinking. No lives lost.

On February 21, 1921, the ss. *Stadium* was reported as having been wrecked on St. Pierre island. No lives lost.

QUEBEC DIVISION

On May 12, 1920, the ss. *Atikokan* grounded on Madame island. She was afterwards floated and towed to Quebec for repairs. No lives lost.

On August 26, 1920, the ss. *J. A. McKee* ran ashore at the entrance to the Saguenay river. She was floated two days later and towed to Quebec for repairs. No lives lost.

SOREL DIVISION

No casualties reported.

MONTREAL DIVISION

On November 17, 1920, the ss. *Jeanne d'Arc* sank at her dock at Valleyfield, Que. No lives lost.

KINGSTON DIVISION

On May 12, 1920, the ss. *Samuel Marshall* while making a landing at Ogdensburg, N.Y. rammed the U.S.S. *Liberty* the latter ship receiving extensive damage. No lives lost.

On August 17, 1920, the ss. *T. P. Phelan* went ashore at Iroquois point and sustained damage to the hull. The vessel was released shortly afterwards and brought to Kingston. No lives lost.

On January 23, 1921, the ss. *Ontario No. 2* while on her regular trip from Charlotte, N.Y., to Cobourg, Ont., ran ashore about six miles east of Cobourg, receiving bottom damage which necessitated the docking of the vessel for repairs. No lives lost.

TORONTO DIVISION

No casualties reported.

COLLINGWOOD DIVISION

No casualties reported.

PORT ARTHUR DIVISION

No casualties reported.

SESSIONAL PAPER No. 23

EDMONTON DIVISION

In April, 1920, the ss. *Naseo* was damaged by ice on Lesser Slave lake and sank.

On April 30, 1920, the ss. *Pine Pass* was totally destroyed by fire at Peace river, Alta.

In May, 1920, the ss. *St. Gabriel* was damaged by ice in Buffalo river, N.W.T. and sank. The boiler and machinery were salvaged.

On August 9, 1920, the ss. *D. A. Thomas* sustained engine damage while proceeding to Vermilion Chutes, Peace river. Temporary repairs were made.

VANCOUVER DIVISION

On May 18, 1920, the ss. *P. W.* caught fire whilst in the Skeena river and was sunk to avoid total loss and afterwards raised and repaired. No lives lost.

On October 29, 1920, the ss. *Ella White* caught fire and was totally destroyed off Warke island, in the Fraser river. No lives lost.

On November 13, 1920, the ss. *Ballena* whilst moored at her wharf at Vancouver caught fire and sank. The fire was presumed to have been caused by a blow back from one of the furnaces, oil being used as fuel. A fireman who returned to the ship after being ashore lost his life.

On January 11, 1921, the ss. *Morris* was sunk in Vancouver harbour after colliding in a fog with a loaded scow in tow of the tug *Earl*. The vessel was afterwards raised. No lives lost.

On February 2, 1921, ss. *Cheakamus* whilst entering the harbour at Whaletown, Cortez island, struck a rock and sustained damage to stern and bow plating. The vessel was brought to Vancouver and repaired.

VICTORIA DIVISION

On September 4, 1920, the ss. *Charmer* whilst en route from Powell river to Vancouver grounded in Vancouver narrows, afterwards floating off and proceeding to Vancouver, and examination disclosed slight bottom damage and the vessel was docked at Victoria for repairs.

On September 26, 1920, the ss. *Beryl* whilst engaged in towing from Nitinat lake to sea was observed to be settling by the head when passing over Nitinat bar. As the cause of leak could not be ascertained and no means taken to stop the inrush of water the ship was abandoned and sunk. No lives lost.

On September 29, 1920, the ss. *Prince Rupert* whilst en route from Vancouver to Prince Rupert, touched the easterly shore of Graham reach, three miles north of Swanson bay. As the vessel was making water rapidly she was beached at Swanson bay and the passengers landed. The ship has since been repaired. No lives lost.

On October 16, 1920, the ss. *Monobel* whilst endeavouring to save a scow ashore on James island caught fire and was burned to the water's edge. The vessel was abandoned. No lives lost.

On November 6, 1920, the ss. *Princess Royal* whilst on a voyage from Vancouver to Prince Rupert collided in Grenville channel with the ss. *Marmion* towing the barge *Louisiana*. All three vessels sustained hull damage above the water line.

On February 10, 1921, the ss. *Princess Beatrice* en route Vancouver to Prince Rupert struck on Jedidiah island sustaining extensive damage. The passengers were landed and the ship floating almost immediately proceeded to Tucker bay where temporary repairs were made. The ship afterwards proceeded to Victoria for permanent repairs. No lives lost.

CHANGES IN LAW

An important change in policy has been made in carrying on the Steamship Inspection Service. Section 578 of the Canada Shipping Act was repealed and a subsection (*h*) added to provide for the establishment of a scale of fees for inspection other than the statutory annual inspection, such as inspection during construction of hulls, boilers, machinery and equipment, etc., and for the examination of plans of hulls, boilers, machinery and equipment. Sections 643 and 644 were also repealed and amended to provide for the establishment of a scale of annual inspection fees. Under the terms of these amendments which are set out in Chapter 6, 1920, Orders in Council dated May 31, 1920, Nos. P.C. 1236 and 1237 have issued, and collections have been made for all inspections on and after June 1, 1920.

In order to bring ships of other than Canadian registry under the terms of Order in Council P.C. 1236, Order in Council P.C. 2711, issued November 6, 1920, making the scale of fees for annual inspection applicable to such ships.

Whilst the late date at which this change in the law came into effect prevented collections for the year now under report being sufficient to cover expenditures yet a very good showing was made and there is every reason to believe that in succeeding years the appropriation voted by Parliament will be covered.

I have the honour to be, Sir,

Your obedient servant,

FRANK McDONNELL,

Chairman.

SESSIONAL PAPER No. 23

BUREAU D'INSPECTION DES BATEAUX À VAPEUR.

OTTAWA, le 28 février 1922.

Au sous-ministre de la
Marine et des Pêcheries,
Ottawa, Ont.

MONSIEUR;—J'ai l'honneur de vous soumettre le rapport annuel du service chargé de l'inspection des bateaux à vapeur et ce, pour l'année financière terminée le 31 mars 1921.

PERSONNEL

Je dois faire rapport qu'à sa demande, le 31 juillet 1920, M. John Dodds, inspecteur des chaudières et des machines, au port de Toronto, a quitté le service. M. Dodds était à l'emploi de notre service depuis 1891.

Je regrette aussi d'avoir à faire rapport que M. George M. Arnold, inspecteur des chaudières et des machines au port de Toronto, est mort le 2 novembre 1920. M. Arnold était à l'emploi de notre service depuis 1912.

Afin de combler les vacances d'emplois survenues au port de Toronto, par ordre en conseil rendu le 8 décembre 1920, M. P. W. Lyon, inspecteur des bateaux à vapeur au port de Collingwood, a été transféré à Toronto; où, aussi M. William Logie McKenzie a été nommé inspecteur des chaudières, des machines, des coques et des équipements.

En conformité de la loi des retraites pour le Service civil, sanctionnée en 1919, M. I. J. Olive, inspecteur des coques et des équipements, au port de Saint-Jean, a été mis à la retraite le 31 décembre 1920. M. Olive était à l'emploi de notre service depuis 1894.

Vu l'augmentation du mouvement maritime dans les eaux de la division de Vancouver, on a été obligé de nommer un troisième inspecteur à ce port. En conséquence, par ordre en conseil, rendu le 26 mai 1920. M. Thomas M. McConnachie Stephens a été nommé inspecteur des chaudières, des machines, des coques et des équipements audit port.

Etant donné que le nombre des inspections à faire dans le district de Prince-Rupert, ne motivait pas le maintien d'un inspecteur à ce port, on a décidé de fermer le bureau de Prince-Rupert et de confier les inspections à faire dans ce district au personnel de notre service attaché au port de Victoria. Dans cet ordre d'idées il est à noter que M. M. A. Farrow, inspecteur des bateaux à vapeur à Prince-Rupert, que de ce port l'on avait provisoirement transféré au port de Vancouver en janvier 1919, a été permanentement attaché dans ses fonctions à ce dernier port.

Afin de suivre la ligne de conduite adoptée et d'après laquelle on tient à ce que, lorsqu'ils possèdent les aptitudes nécessaires, les inspecteurs agissent à la fois comme inspecteurs des coques, des équipements, des chaudières et des machines; par ordres en conseil rendus respectivement le 23 avril 1920 et le 16 juin 1920, on a nommé inspecteurs des coques et des équipements: M. J. A. Samson, inspecteur des chaudières et des machines à Québec, et M. P. W. Lyon, inspecteur des chaudières et des machines à Collingwood (lequel fut ultérieurement transféré à Toronto).

12 GEORGE V, A. 1922

ASSEMBLÉES DU BUREAU

Au cours de l'année les membres du bureau d'Inspection des bateaux à vapeur ont tenu un certain nombre d'assemblées, dans le but de considérer des questions soulevées par l'application de règlements concernant l'inspection des bateaux à vapeur; ainsi que la compétence des candidats aux postes d'inspecteurs de bateaux à vapeur; et l'approbation de machines, de chaudières et de dispositifs d'équipement devant être employés sur des navires sujets à inspection.

ACCIDENTS

Ci-après nous signalons les accidents survenus, dont rapport a été fait par le personnel des nombreuses divisions que comporte notre service au cours de l'année terminée le 31 mars 1921.

DIVISION D'HALIFAX

Le 23 juillet 1920, le vapeur *Diamond* a été complètement perdu sur l'île Fire. Aucune perte de vie.

Le 6 mars 1921, le vapeur *Pemanencia* a été complètement perdu en face de l'extrémité sud-ouest de l'île Petite Miquelon, Saint-Pierre. Aucune perte de vie.

DIVISION DE SAINT-JEAN

Le 5 décembre 1920, le vapeur *R. R. Call* prit feu pendant qu'il se trouvait à Carleton, P.Q., fut détruit par l'incendie et coula à pic par la suite. Aucune perte de vie.

Le 21 février 1921, le vapeur *Stadium* passait pour avoir fait naufrage sur l'île Saint-Pierre. Aucune perte de vie.

DIVISION DE QUÉBEC

Le 12 mai 1920, le vapeur *Atikokan* s'échoua sur l'île Madame. Il fut renfloué et remorqué à Québec pour y être réparé. Aucune perte de vie.

Le 26 août 1920, le vapeur *J. A. McKee* s'échoua à l'entrée du fleuve Saguenay. Il fut remorqué deux jours après et ramené à Québec pour y être réparé. Aucune perte de vie.

DIVISION DE SOREL

Aucun accident à signaler.

DIVISION DE MONTRÉAL

Le 17 nov. 1920, le vapeur *Jeanne d'Arc* coula à pic dans son bassin à Valleyfield, P.Q. Aucune perte de vie.

DIVISION DE KINGSTON

Le 12 mai 1920, le vapeur *Samuel Marshall* fut abordé par le vapeur E.U. *Liberty* pendant qu'il manœuvrait pour accoster à Ogdensburg, New-York. Ce dernier navire subit de fortes avaries. Aucune perte de vie.

Le 17 août 1920, le vapeur *T. P. Phelan* s'échoua sur la pointe des Iroquois et avaria sa coque. Peu après ce navire fut renfloué et conduit à Kingston. Aucune perte de vie.

Le 23 janvier 1921, le vapeur *Ontario No. 2* s'échoua à environ 6 milles à l'est de Cobourg, pendant qu'il faisait un de ses voyages réguliers entre Charlotte, New-York et Cobourg, Ont. Ce navire avaria tellement son fond de coque qu'il fallut le mettre sur cale-sèche pour le faire réparer.

SESSIONAL PAPER No. 23

DIVISION DE TORONTO

Aucun accident à signaler.

DIVISION DE COLLINGWOOD

Aucun accident à signaler.

DIVISION DE PORT-ARTHUR

Aucun accident à signaler.

DIVISION D'EDMONTON

En avril 1920, le vapeur *Nasco* fut avarié par la glace sur le petit Lac de l'Esclave et sombra.

Le 30 avril 1920, le vapeur *Pine Pass* fut totalement détruit par le feu dans la Rivière de la Paix, Alberta.

En mai 1920, le vapeur *St-Gabriel* fut avarié par la glace dans la Rivière Buffalo, Territoire du Nord-Ouest et sombra. On put sauver la chaudière et les machines de ce navire.

Le 9 août 1920, le vapeur *D. A. Thomas* subit des avaries de machines pendant qu'il se rendait aux chutes Vermilion, Rivière de la Paix. On lui a fait subir des réparations temporaires.

DIVISION DE VANCOUVER

Le 18 mai 1920, le vapeur «*P. W.*» prit feu pendant qu'il se trouvait sur la rivière Skeena; on fut obligé de l'immerger pour éviter sa perte totale. Puis il fut renfloué et réparé. Aucune perte de vie.

Le 29 octobre 1920, le vapeur *Ella White* prit feu et fut complètement détruit par incendie en face de l'île Warke, dans le fleuve Fraser. Aucune perte de vie.

Le 23 nov. 1920, le vapeur *Ballena* prit feu et coula à pic pendant qu'il se trouvait amarré à son quai à Vancouver. On a supposé que l'incendie avait été causé par un retour de flammes de l'un des foyers de chauffe dans lequel on brûlait du pétrole. Un des chauffeurs qui se rendit à bord après avoir été à terre, perdit la vie.

Le 11 janvier 1921, le vapeur *Marvis* coula à pic dans le havre de Vancouver après être entré en collision par temps de brouillard avec un chaland chargé, que remorquait le remorqueur *Earl*. Ce navire fut renfloué par la suite. Aucune perte de vie.

Le 2 février 1921, le vapeur *Cheakamus* toucha la roche et subit des avaries à son arrière et à son bordé de l'avant pendant qu'il entraînait dans le havre à Whaletown, île Cortez.

DIVISION DE VICTORIA

Le 4 septembre 1920, le vap. *Charmer* s'échoua dans la passe de Vancouver pendant qu'il se rendait de la rivière Powell à Vancouver. Ce navire se renfloua par ses propres moyens et se rendit à Vancouver où un examen de ses œuvres vives permit de constater de légères avaries à la partie inférieure de sa coque. Ce navire fut mis en cale sèche à Victoria pour y être réparé.

Le 26 septembre 1920, le vap. *Beryl* commença à couler par l'avant alors qu'il franchissait la barre Nitinat et qu'il faisait du remorquage du lac Nitinat à la mer. Comme il était impossible de s'assurer de la nature de la voie d'eau, et, qu'on ne prit aucune mesure pour aveugler celle-ci, le navire fut abandonné et sombra. Aucune perte de vie.

Le 29 septembre, 1920, le vap. *Prince Rupert* toucha la côte est de Graham Reach à trois milles au nord de la baie Swanson, pendant qu'il se rendait de Vancouver à Prince Rupert. Comme le navire faisait eau très vite, il fut jeté sur la côte de la baie Swanson, où l'on débarqua les passagers. Depuis ce navire a été réparé. Aucune perte de vie.

Le 16 octobre 1920, le vap. *Monobel* prit feu et brûla jusqu'à la ligne de flottaison et fut abandonné, alors qu'il s'efforçait de sauver un chaland qui avait été jeté à la côte sur l'île James. Aucune perte de vie.

Le 6 nov. 1920, pendant qu'il se rendait de Vancouver à Prince Rupert, le vap. *Princess Royal* entra en collision dans le chenal Grenville avec le vap. *Marmion* qui remorquait la barge *Louisiana*. Les coques de ces trois navires furent avariées au-dessus de la ligne de flottaison.

Le 10 février 1921, le vap. *Princess Beatrice* qui se rendait de Vancouver à Prince Rupert toucha le fond sur l'île Jedidiah et subit des avaries très considérables. Les passagers ayant été débarqués, le navire se renfloua presque immédiatement et se rendit à la baie Tucker où on le répara temporairement. Ce navire se rendit ensuite à Victoria pour subir des réparations permanentes.

MODIFICATION DE LA LOI

Le service d'inspection des bateaux à vapeur a modifié de façon importante sa ligne de conduite, quant à l'accomplissement de ses devoirs. C'est ainsi que l'article 578 de la loi de la Marine Marchande du Canada a été abrogé, et que l'on a ajouté un paragraphe (h) pourvoyant à l'établissement d'une échelle de droits: pour les inspections autres que l'inspection annuelle exigée par les Statuts, et telles par exemple, que les inspections faites durant la construction des coques, des chaudières, des machines, des dispositifs des équipements, etc.; comme aussi pour les examens des plans des coques, des chaudières, des machines et des équipements. Les articles 643 et 644 ont aussi été abrogés et remplacés par de nouveaux articles rédigés de façon à pourvoir à l'établissement d'une échelle de droits relatifs à l'inspection annuelle. En conformité de ces modifications de la loi qui figurent au chapitre 6, 1920, on a rendu des ordres en Conseil datés du 31 mai 1920, Nos. 1236 et 1237 C.P., et procédé à l'encaissement de tous les droits d'inspection exigibles à partir du 1er juin, 1920, y compris ce jour même.

Afin de pouvoir appliquer l'ordre en conseil N° 1236 C.P., aux navires autres que ceux armés (enregistrés) au Canada, le 6 novembre, 1920, on a rendu l'ordre en conseil N° 2711, C.P., qui spécifie que l'échelle des droits d'inspection annuelle, applicable aux navires enregistrés au Canada, est aussi applicable aux navires qui n'y ont pas été enregistrés.

Bien que la date tardive de la mise en vigueur de la loi, telle que modifiée, ait empêché, pour l'année sous revue dans ce rapport, que la perception des droits suffise à équilibrer les dépenses, on a cependant obtenu de bons résultats à cet égard, et tout porte à croire qu'au cours des prochaines années, l'allocation votée par le Parlement sera couverte par les fonds à encaisser.

Votre obéissant serviteur,

FRANK McDONNELL,

Président

SESSIONAL PAPER No. 23

INSPECTEURS DES CHAUDIÈRES ET MACHINES

Noms des inspecteurs	Bureaux principaux	Divisions
N. A. Currie.....	Halifax, N.-E.....	Nouvelle-Ecosse.

Non-accounting offices, with revenue of each office	62 to 106

REPORT

OF THE

DEPUTY POSTMASTER GENERAL

1920-1921

POST OFFICE DEPARTMENT,

OTTAWA, January 4, 1922.

To the Honourable

Charles Murphy, K.C.,

Postmaster General of Canada.

I have the honour to submit the following report of the operations of the Post Office Department for the fiscal year ended March 31, 1921, as shown in summarized statements covering the various branches of the department.

I have the honour to be, sir,

Your obedient servant,

R. M. COULTER,

Deputy Postmaster General.

NUMBER OF POST OFFICES

STATEMENT showing the number of post offices in operation in the several provinces of the Dominion on March 31, 1920, the number of post offices established and the number of post offices closed during the year from March 31, 1920, to March 31, 1921, and the number in operation on March 31, 1921.

Province	Number of Post Offices in operation at end of fiscal year, 1920	Number of Post Offices established from 31st March, 1920, to 31st March, 1921	Number of Post Offices closed from 31st March, 1920, to 31st March, 1921	Number of Post Offices in operation on 31st March, 1921
Ontario.....	2,572	39	29	2,582
Quebec.....	2,288	28	23	2,293
Nova Scotia.....	1,845	14	15	1,844
New Brunswick.....	1,145	5	16	1,134

N. W. Territories.....	5			5
	12,256	176	180	12,252

12 GEORGE V, A. 1922

Total number of post offices in operation on March 31, 1920.. ..	12,256
Number of offices established from March 31, 1920, to March 31, 1921.. ..	176
Number of offices closed to March 31, 1921.. ..	180
Total number of post offices in operation on March 31, 1921.. ..	12,252
Net decrease.. ..	4

NOTE.—The closing of post offices has in most cases been due to the fact that the establishment of rural mail delivery routes has rendered the offices unnecessary; consequently, although there are fewer post offices in operation than at the end of the previous fiscal year, the postal service has been considerably extended.

PACIFIC CABLE TRAFFIC

The cable traffic between Canada and Australia and New Zealand by Pacific cable during the fiscal year 1919-20 was as follows:—

	Number of paying words transmitted
From Canada to Australasia.. ..	273,487
From Australasia to Canada.. ..	170,113
Total.. ..	443,600

RURAL MAIL DELIVERY

There were 13 additional rural mail delivery routes established during the year ended March 31, 1921, and the number of boxes served was increased by 5,709.

GENERAL FINANCIAL STATEMENT, 1920-21

The net revenue for the year, *including war tax*, amounted to \$26,331,118.97 and the expenditure to \$24,661,262.26, increases of \$1,881,202 and \$3,886,877.06 respectively. The surplus of revenue over expenditure for the year was \$1,669,856.71. *Excluding the war tax, calculated at \$7,872,962.38, the expenditure exceeded the actual postal revenue by \$6,203,105.67.*

The following statements show in detail the revenue and expenditure for the year:—

REVENUE

Balance due by postmasters on revenue account on March 31, 1920..	\$ 27,161 61
Postage stamps, post cards, etc., sold.. ..	28,117,722 79
Postage paid in cash on newspapers.. ..	474,881 35
Postage paid in cash on third-class (printed) matter.. ..	704,601 69
Rent of letter boxes and drawers.. ..	239,559 93
Commission received on money orders.. ..	1,451,434 76
Commission received on postal notes.. ..	132,393 74
Profit in exchange on money order business with other countries..	818,919 03
Commission received from the United Kingdom on postal order business.. ..	649 15
Transit charges on correspondence from other countries.. ..	97,764 02
Postage on parcels from other countries.. ..	137,917 53
Void money orders, that is money orders issued between January 1 and December 31, 1919, payment of which had not been claimed up to December 31, 1920.. ..	41,446 57
Collections for rural mail boxes.. ..	25,548 00
Miscellaneous revenue.. ..	60,379 89
	\$32,330,380 06

SESSIONAL PAPER No. 24

DEDUCTIONS

Salaries, forward allowances, allowances toward rent, fuel and light, compensation on money order and postal note business, and commission on box and drawer rents..	\$5,618,469 30	
Discount to stamp vendors and postmasters, and compensation to messengers for special delivery of letters..	198,912 06	
Losses by fire, burglary, etc..	6,037 48	
Balance of commission paid to other countries on money order business..	54,998 75	
Transit charges on correspondence to other countries	17,595 69	
Postage on parcels to other countries..	74,834 56	
Loss in exchange on British postal order business..	1,251 64	
Balance due by postmasters on revenue account on March 31, 1921..	27,161 61	
		\$ 5,999,261 09
		<u>\$26,331,118 97</u>

Owing to the fact that the Public Accounts were closed before the Accounts of the Post Office Department could be finally adjusted, the amount transferred to the Consolidated Fund as Post Office Revenue was \$26,706,198.46 instead of \$26,331,118.97.

Attention is drawn to the fact that the item "Commission received on Money Orders" includes premium charged on Orders issued on the United States, less premium paid on Orders issued by the United States on Canada.

EXPENDITURE

Paid by cheque from Parliamentary Appropriation

Conveyance of mails by land..	\$ 5,768,511 84
" " railway	4,069,696 87
" " steamboats..	368,303 90
Making and repairing mail bags, locks, etc..	348,625 25
Total mail service expenditure..	<u>\$10,555,136 86</u>
Salaries paid by cheque..	12,854,118 17
Travelling expenses..	49,946 75
Manufacturing postage stamps, etc..	158,506 21
Stationery, printing and advertising..	452,337 83
Miscellaneous disbursements..	408,992 06
Maintenance of the service in the Yukon District..	182,224 38
Total..	<u>\$24,661,262 26</u>

Postal Notes.—During the year 5,927,791 postal notes, amounting in value to \$12,792,855.86, were paid—increases as compared with the previous year of 97,673 in the number and \$670,135.75 in the value. The revenue derived from the sale of postal notes amounted to \$191,671.65.

British postal orders were paid as follows: number, 46,717; value, \$115,355.14—decreases of 18,030 in number and \$82,733.77 in value.

A statement showing the gross postal revenue of each accounting and non-accounting post office in the Dominion will be found at the end of this report.

12 GEORGE V, A. 1922

The following table shows the net revenue, expenditure and deficit or surplus, as the case may be, of the post office for each fiscal year since Confederation.

MONEY ORDER TRANSACTIONS

The number of money order offices in operation on March 31, 1921, was 5,197, an increase of 91 over the previous year.

The total number of orders issued during the year was 11,013,167, as against 9,947,018 for the previous year. The aggregate value was \$173,523,321.96, as against \$159,224,936.53 for the previous year.

SESSIONAL PAPER No. 24

9,736,967 of the orders issued during the year with a value of \$155,916,231.88 were payable in the Dominion of Canada.

1,276,200, with a value of \$17,607,090.08, were payable abroad.

The number of orders issued abroad and payable in Canada was 464,266, with an aggregate value of \$6,680,970.91.

The number of orders issued in Canada on the United States was 643,503, and the value \$6,550,967.54.

The number of orders issued in the United States on Canada was 368,058, and the value \$4,839,109.41.

The following statement shows the number and value of Canadian money orders and postal notes paid in the United States:—

	Number Year 1920	Amount Year 1920	Number Year 1921	Amount Year 1921
Money Orders..	826,062	\$12,219,064 42	643,503	\$6,550,967 54
Postal Notes..	359,942	622,288 85	409	612 70
	<u>1,186,004</u>	<u>\$12,841,353 27</u>	<u>643,912</u>	<u>\$6,551,580 24</u>

The average of money orders issued during the year was \$15.76, and the average commission received from the public was 13.170 cents.

The total receipts from all sources amounted to \$2,311,800.36, and the total expenditure, including the salaries of the inside service at Ottawa, to \$1,166,303.75, leaving an excess of receipts over expenditure of \$1,145,496.61.

The following statement shows the receipts and expenditure for the year ended March 31, 1921:—

SESSIONAL PAPER No. 24

POST OFFICE SAVINGS BANK

The aggregate balance to the credit of depositors on March 31, 1921, was \$29,010,619.23, a decrease during the year of \$2,594,975.15. The average to the credit of each depositor was \$327.57, as compared with \$325.31 on March 31, 1920.

The new accounts opened during the year were 11,651, and 20,242 accounts were closed, leaving the number open at the close of the year 88,563, or a decrease of 8,591.

The deposits were 80,117 in number, with a total amount of \$6,631,684.58. The average amount of each deposit was \$82.77 as compared with \$84.96 for the previous year.

Repayments numbered 42,322 and amounted to \$10,699,748.72, the average withdrawal being \$252.11 as compared with \$317.78 in the preceding year.

Transfers from the Post Office Savings Bank of the United Kingdom (included in deposits) were 480 and amounted to \$125,408.99. Deposits transferred to the P.O. Savings Bank of the United Kingdom (included in repayments) numbered 88 and amounted to \$56,437.77.

Balances numbering 386, amounting to \$279,256.81 at Lunenburg, N.S., and balances numbering 1,370, amounting to \$309,989.71 at Winnipeg, Man., were transferred to the Post Office Savings Bank from the Dominion Government Savings Bank of the Finance Department.

The interest paid to depositors during the year was \$89,225.05, and the interest accrued and made principal was \$794,617.42, making a total of \$883,842.47.

The number of offices authorized to transact business increased from 1,323 to 1,328.

Claims to moneys of deceased depositors examined into and finally disposed of numbered 871.

Annexed is a tabular statement of the annual operations of the Post Office Savings Bank since its organization in April, 1868.

STATEMENT (in accordance with the Revised Statutes of Canada, 1906, chapter 30, section 16) of the Post Office Savings Bank transactions for the year ended March 31, 1921, and of the total amount due to depositors on that date.

ANNUAL REPORT

OF THE

DEPARTMENT OF THE INTERIOR

FOR THE

FISCAL YEAR ENDED MARCH 31, 1921

PRINTED BY ORDER OF PARLIAMENT

OTTAWA
F. A. ACLAND
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1922

*To His Excellency The Right Honourable Lord Byng of Vimy, G.C.B., G.C.M.G.,
M.V.O., etc., Governor General and Commander in Chief of the Dominion of
Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

The undersigned has the honour to lay before Your Excellency the report of the transactions of the Department of the Interior for the fiscal year ending March 31, 1921.

Respectfully submitted,

C. A. STEWART,

Minister of the Interior.

OTTAWA, August 16, 1921.

REPORT
OF THE
DEPARTMENT OF THE INTERIOR
1921

OTTAWA, December 22, 1921.

Hon. CHARLES STEWART,
Minister of the Interior,
Ottawa.

SIR.—I have the honour to submit the 48th Annual Report of the Department of the Interior for the year ending March 31, 1921.

In the three Prairie Provinces, the department has surveyed to date 200,280,209 acres of land, of which 35,572,128 acres are in Manitoba, 79,025,551 in Saskatchewan and 85,682,530 in Alberta. Of the surveyed area, 25,649,800 acres were available for entry on January 1, 1921. A large portion of the unsurveyed area has not yet been explored.

An analysis of the land situation shows that 2,892 soldier land grant entries, alienating approximately 462,720 acres, were made during the year. In addition, 458,925 acres have been withdrawn from forest reserves and handed over to the Soldier Settlement Board since the Forest Reserves Amendment Act became law in July, 1919.

The number of free homestead entries has decreased slightly, but, on the other hand, the railway companies during the year sold nearly 8,000,000 acres of land at an average selling price of over \$20 per acre. The Hudson's Bay Company sold 178,300 acres at an average price slightly in excess of \$17 per acre, whilst over 200,000 acres of school lands were disposed of by the department at about \$15 an acre.

Irrigation surveys in the more southerly portions of Alberta and Saskatchewan, where irrigation is most needed, have been practically completed and attention is now being given to the more northerly areas. A drainage division of the Reclamation Branch was organized during the past year and the department is now in a position to make surveys for applicants and prepare plans for reclaiming low and flooded areas. The Waterhen Lake project, in which the drainage of a large area of Crown lands is involved, is now in course of construction.

During the year a Dominion Hydrometric Survey was organized. Survey work of this description in Alberta and Saskatchewan had formerly been carried on by the Reclamation Branch, and this was transferred to the Water Power Branch, which now has supervision over a Dominion-wide service for measuring water resources.

Prospecting and mining operations have been active. Northern Manitoba is coming into prominence as a mining area and shipments of ore in quantity are being made to western smelters. Discovery of high-grade silver-lead ore in the Yukon is

12 GEORGE V, A. 1922

attracting attention. An indication of the value of this ore is found in the fact that it is shipped about 5,000 miles and undergoes five transshipments, before it reaches the smelter.

Great activity has prevailed in prospecting and drilling for oil in the Mackenzie District, Northwest Territories, and the western provinces, following the bringing in of the Discovery well near Fort Norman. The department has established a staff of technical officers at Calgary to close wells that the operators are unable to control and to furnish technical advice generally. Coal mining operations have assumed large proportions, the output increasing to approximately 7,000,000 tons.

The department has perfected an organization for the supplying of information on natural resources which is proving of great assistance to those interested in development. A record is being made of unoccupied privately-owned lands in every province to assist in bringing these under cultivation.

The publicity which has been given to the National Parks and the improving of the roads has resulted in a large increase in the number of visitors. During the year approximately 150,000 visitors entered the parks. Of these, fully one-third were from foreign countries.

The herds of buffalo owned by the Dominion Government in Alberta have increased to such an extent that about 1,000 buffalo will be slaughtered. This will bring in considerable revenue.

Splendid progress is being made in the work of preserving historic sites of national importance. A Dominion-wide historical survey is being made to decide which sites are of national importance. To date forty-six sites have been selected to receive attention. Over thirty historical societies are co-operating with the department in this work.

New features are being introduced for the protection of forests. While more fires started during the past year than during any previous year, the more efficient fire-fighting service prevented any increase in losses. A novel feature is the introduction of aeroplane patrols, provided in co-operation with the Air Board.

Increasing numbers of farmers in the Prairie Provinces are availing themselves of the facilities of the Forest Nursery Station at Indian Head in supplying seedlings for shelter belts.

The Forest Products Laboratories at Montreal are supplying useful information in the utilization of wood and wood products. Manufacturers and builders are enabled to put each wood to its best use and new uses are being discovered for woods formerly thought to have a narrow range of utility.

The total revenue of the department from all sources during the year was \$10,189,596.52, an increase of \$286,875.30 over 1919-20.

Immediately following, you will find a synopsis of the work of the various branches to preface the more detailed statements submitted by the heads of branches.

I have the honour to be, sir,

Your obedient servant,

W. W. CORY,
Deputy Minister.

SESSIONAL PAPER No. 25

REPORT OF THE CONTROLLER OF THE LANDS PATENT BRANCH,
N. O. COTE

LETTERS PATENT

The number of letters patent issued during the last fiscal year was 17,957, covering an area of 2,753,494 acres, being an increase of 215 letters patent and a decrease in the area patented of 35,403 acres as compared with the total area of the previous year. Made up by provinces as follows:—

Province	Patents	Acres
Manitoba.. . . .	2,601	397,426
Saskatchewan.. . . .	8,550	1,333,332
Alberta.. . . .	6,370	979,662
British Columbia.. . . .	376	37,902
Yukon Territory.. . . .	40	70
Northwest Territories.. . . .	10	102
	<u>17,947</u>	<u>2,753,494</u>

HOMESTEAD ENTRIES

Five thousand three hundred and eighty-nine entries were granted during the year, aggregating an approximate area of 862,240 acres, being a decrease of 1,343 in the number of homestead entries granted as compared with the previous year.

By Provinces—	Homestead entries
Manitoba.. . . .	725
Saskatchewan.. . . .	1,670
Alberta.. . . .	2,874
British Columbia.. . . .	120
	<u>5,389</u>

There were 2,892 soldier grant entries made during the year, aggregating approximately 462,720 acres, made up by provinces as follows:—

	No. of entries	Acres
Manitoba.. . . .	475	76,000
Saskatchewan.. . . .	1,188	190,080
Alberta.. . . .	1,171	187,360
British Columbia.. . . .	58	9,280
	<u>2,892</u>	<u>462,720</u>

There were 373 sales made during the fiscal year for 15,239.42 acres of land, with an average for each sale of about 40½ acres.

ACCOUNTS AND REVENUE

During the fiscal year \$1,704,412.27, including \$319,491.25 interest on deferred payments, was received on account of purchased homesteads and pre-emptions and ordinary sales, being a decrease of \$1,014,651.45 as compared with the payments received during the previous year.

One hundred and twenty-one thousand eight hundred and twenty-nine dollars eighty-nine cents has also been received for entry fees, improvements and sundries, making a total revenue for the fiscal year of \$1,826,242.16.

Refunds were made amounting to \$76,324.02, as follows:—

Value of improvements collected on cancelled homesteads.. . .	\$60,083 12
Overpayments on sales; and of moneys paid on account of purchased homesteads and pre-emption sales, entries for which had been cancelled.. . . .	\$16,240 00

12 GEORGE V, A. 1922

SCHOOL LANDS DIVISION, W. T. ROLLINS

During the fiscal year ended March 31, 1921, school lands were disposed of by sale at public auction: to the Soldier Settlement Board, to railway companies, and to school districts as follows:—

Province	Area	Value	Average per acre
Manitoba.. . . .	10,462.55 acres	\$ 130,975 42	\$12 51
Saskatchewan.. . . .	84,404.77 "	1,234,057 69	14 62
Alberta.. . . .	122,536.44 "	2,165,850 05	17 67

The net revenue derived for the three provinces for the fiscal year was as follows:—

Manitoba.. . . .	\$ 408,349 99
Saskatchewan.. . . .	2,830,172 05
Alberta.. . . .	1,204,723 23
Total.. . . .	<u>\$4,443,245 27</u>

The amount paid to the Government of each province, after deducting the expenditure, was as follows:—

Manitoba.. . . .	\$ 76,711 36
Saskatchewan.. . . .	627,631 45
Alberta.. . . .	338,261 63
Total.. . . .	<u>\$1,042,604 44</u>

The expenditure incurred was as follows:—

Manitoba.. . . .	\$ 15,874 61
Saskatchewan.. . . .	47,967 94
Alberta.. . . .	38,504 76
Total.. . . .	<u>\$102,347 31</u>

The amount standing to the credit of the fund of each province as on March 31, 1921, was as follows:—

Manitoba—	
Total amount at credit of fund.. . . .	\$ 5,497,538 31
Amount invested in Debenture Stock.. . . .	5,497,000 00
Balance at credit of fund.. . . .	<u>\$ 538 31</u>
Saskatchewan—	
Total amount at credit of fund.. . . .	\$10,985,410 99
Amount invested in Debenture Stock.. . . .	10,984,000 00
Balance at credit of fund.. . . .	<u>\$ 1,410 00</u>
Alberta—	
Total amount at credit of fund.. . . .	\$ 6,159,146 38
Amount invested in Debenture Stock.. . . .	6,159,000 00
Balance at credit of fund.. . . .	<u>\$ 146 38</u>

NATURAL RESOURCES

INQUIRIES REGARDING NATURAL RESOURCES

Inquiries and communications on all kinds of natural resources and collateral subjects were received and dealt with in the Natural Resources Intelligence Branch to the number of 20,304; and 184,423 pieces of printed matter, including booklets and maps, were distributed in the same connection.

Replies are handled with increasing speed and in fuller detail owing to the up-to-date information carefully accumulated in a card index, which also serves as the basis

SESSIONAL PAPER No. 25

of the technical memoranda, special reports and pin-maps. The Natural Resources Intelligence Branch continues to receive valuable aid from the many federal and provincial departments with which it constantly co-operates.

By the courtesy of the organizers of the "Imperial Press Conference," which represented the leading journals throughout the Empire, two members of the branch, fully competent to give information on Canadian resources, accompanied the trains conveying the delegates in the tour of 1920. All the maps and much of the printed information in use were prepared in the branch.

The branch in the course of its service prepared for the Canadian Pacific Railway the nineteen-foot electrically illuminated map of Canadian resources which was a leading feature of the National Chemical Exposition in New York in September, 1920, and has since been exhibited at Glasgow and at the Canadian National Exhibition in Toronto. The increasing volume of departmental work included the completion of the "Resources Map of the Dominion," the first edition of which is already exhausted.

The Natural Resources Intelligence Branch has been entrusted with the printing and development of the photographic films of the Canadian Air Board. Besides routine and mosaic work, special research was involved in correlating negatives taken from airplanes with the precise geodetic survey. Three hundred decorative panels were prepared for the new Houses of Parliament.

NORTHERN ALBERTA AND THE MACKENZIE BASIN

Of outstanding importance has been the oil strike at Oil Creek in August, 1920. The great activity in the Norman, Great Slave and Pouce Coupe fields that is expected to follow this discovery will direct attention to the other opportunities for development in these northerly regions.

Land can be farmed successfully in by no means a small way throughout a large portion of the Mackenzie basin as far north as Great Slave lake. Operations over a number of years at such trading posts as Resolution, Fort Smith and Fort Vermilion have proved that the same agricultural success will prevail in these areas as in those lying more southerly, such as Peace River, Waterhole, Pouce Coupe, Spirit River, and Grande Prairie, which have been much favoured by returned soldiers.

Interest was also directed in 1920 to the zinc and lead ores near Great Slave lake and a shaft was sunk. More active development is expected in the summer of 1921 in this field. Among other mineral deposits occurring in northern Alberta and the Mackenzie district of the Northwest Territories are gypsum, coal, salt, copper, gold and bituminous sands. The drilling operations in 1920 at McMurray by the Alberta Government revealed thick beds of excellent salt.

In addition to oil and other minerals the abundant supplies of excellent food fish and the wealth of fur-bearing animals give to this new north a further potential value.

NORTHERN SASKATCHEWAN

In 1920 exploratory work was conducted by the Provincial Government in the northern part of Saskatchewan. Coal outcrops were found on Bowtree river, flowing into lae la Ronge, and cliffs of white sand along the south shore of Wapawekka lake. Many of the collected mineral specimens showed gold, silver, copper and asbestos. The area near the interprovincial boundary west of Flin Flon lake promises to be a rich mineral zone. In 1920 considerable interest was shown in the Pasquia Hills oil shale district. This was largely as a result of a reported oil strike.

From Prince Albert to The Pas the country is thickly wooded, though merchantable timber is very scattered. The large lumber mill at The Pas, Manitoba, depends upon Saskatchewan for nearly all its timber.

12 GEORGE V, A. 1922

The fisheries company at Big River, 90 miles northwest of Prince Albert, made excellent progress in 1920 and has already established a great market for its white-fish in eastern Canada and the United States.

NORTHERN MANITOBA

In keeping with general conditions prevalent in the Dominion there has been comparatively little activity.

The abnormal prices for fur obtained by trappers in 1919-20 no longer prevailed and fishermen, prospectors and strangers who had in the past season joined the hunt returned to their regular occupations. The production of fur is estimated, however, at a million dollars.

With a return of fishermen, fishing is again on the increase, and for the first time a sturgeon industry on a commercial scale has been undertaken on the Churchill river.

The mineral production has been comparatively small. Copper shipments to Trail were mainly products of the previous year and are for the present discontinued while the question of railway and smelter for The Pas district is under consideration. Much development has been done in blocking out large bodies of ore, the result of which will appear in time.

EASTERN CANADA

Canada west of lake Ontario is an increasing subject of inquiry and the department is in constant co-operation with the Provincial Governments in helping to develop their resources by correspondence, lectures, slides and various publications. The work progressing in the hinterland of Quebec, north of the St. Lawrence especially, is becoming widely known, and the exploitation of the oil shales of New Brunswick and Nova Scotia is a matter of a narrowing distance of time.

The members of the Imperial Press Conference, to which two members of this department were attached for service, could not fail to carry away with them much up-to-date information about the eastern part of the Dominion, which, though earliest settled, is perhaps less familiar in detail to the resident abroad. The industrial possibilities of the east with its large supplies of water, coal, iron and lime, its oil shales, lumber, pulpwood, fisheries and a specialty in asbestos, when considered in relation to its unequalled facilities for shipment to all countries on the Atlantic seaboard, ensure that its present output and population will be multiplied manifold.

LAND RESOURCES

The area of the Dominion is nearly three and three-quarter million square miles, divided into nine provinces and the Yukon and Northwest Territories. Water surfaces cover 3.37 per cent of the total area. Large areas are underlaid by coal and other mineral deposits, but the total surface area required for their operation is limited.

It is usual to consider our land resource of chief value so far as it forms the basis for agriculture, and in this connection a great many influences, outside of the natural fertility of the soil, have to be taken into consideration. There is a prevalent belief that farms will always follow the destruction of forest areas, but while it is true that the fine agricultural soils of the older provinces were at one time covered by forests, Canada has reached the stage where only a small percentage of the land now covered by timber growth is of any agricultural value.

The area suitable for cultivation is at present estimated at only about one-eighth of Canada's total area, or around three hundred million acres. This amount, however, is so great as to provide abundance of farm lands for millions of new population and to make agriculture always the nation's chief factor of wealth. During last year

SESSIONAL PAPER No. 25

the value of the field crops was four times the combined value of the raw products of the mines, forests and fisheries, yet only one-sixth of these three hundred million acres are under cultivation. With more intensive cultivation the area now being utilized would alone support a much larger population. Canada has a rural population of probably four and one-half millions, including those engaged in mining, fishing, lumbering and other activities. This means that every man, woman and child can draw on over sixty acres of land for subsistence. In Northern Europe the rural population with far less widespread occupation is attending to three acres per head.

The estimated area of three hundred million acres suitable for agricultural purposes may be greatly extended as conditions change and land now considered unfit for general farming may yet be found suited for the production of food. For instance, the large area of northwest Manitoba and the Northwest Territories now forms the feeding grounds for vast herds of caribou and musk ox. The introduction of reindeer may also serve to make this inhospitable area of great value in the matter of food production.

UNOCCUPIED AND UNCULTIVATED LANDS

Her vast areas of agricultural land make Canada one of the richest countries in the world in the matter of natural resources, but lacking development a great part of this wealth is practically non-existent. One of the chief economic questions needing emphasis is the useful occupation of our idle lands and the conversion of this natural resource into form for human use.

In this connection a great deal of basic work has been done by the department through investigations as to the location, extent and ownership of privately-owned lands that are lying unoccupied and uncultivated owing to the non-residence of the owners. These investigations showed that tens of millions of acres of land, particularly in Western Canada, were lying idle within easy distance of the railways, which, if put to proper use, would to a large extent effect a remedy of the railway situation and other national problems.

In view of the advisability of extending settlement on the vacant areas not too far removed from transportation facilities, certain particulars of practical use, such as area, character of soil, distance from markets, prices, terms, etc., have been obtained and the information issued in booklet form for general use with the object of enabling the prospective purchaser to select land suitable to his means and requirements. This information is also being co-ordinated with other data relative to land development such as climate, precipitation, transportation, market and communal facilities and other factors that determine the economic suitability of land for agricultural purposes.

A large proportion of the unsurveyed area has not yet been explored, except in a very partial way, and the area suitable for agriculture cannot be estimated with any degree of accuracy.

RECLAMATION

IRRIGATION

In 1920 the semi-arid belt of Alberta and Saskatchewan experienced the fourth successive dry year. Before 1917 there were a number of comparatively wet years and irrigation had few supporters in the west: in fact there were many who believed that settlement in the Prairie Provinces was being retarded by those who advocated irrigation as a necessity in the semi-arid tract. The period of dry years caused a strong reversal of opinion in favour of irrigation, which has already been responsible for the enactment of improved provincial irrigation district laws and the erection under these of irrigation districts embodying a considerable area. Two of these districts, the Lethbridge Northern and the United and Lone Rock, are expected to commence construction early in 1921, and others are rapidly reaching the construction stage.

Men who had made a careful study of the semi-arid region, realizing that except in abnormal years the precipitation of the district would be insufficient for crops, predicted many years ago the irrigation development which is now taking place. Officials of the department were among the first to realize the possibilities of irrigation and in accordance with a far-sighted policy they organized and completed, well in advance of the demand for development, extensive surveys of irrigable tracts.

Hand in hand with the survey of the land has gone, since 1909, the systematic and periodic measurement of rivers, creeks and springs, until now sufficient data have been secured to enable the department to determine how much water is available and to dispose of it in the most economical manner. With this latter end in view, an amendment to the Irrigation Act, effective from September 1, 1919, was passed, empowering the Governor in Council to reserve unappropriated water and to allocate it among the applicants as he may deem best in the public interest. Under the authority of this amendment the unappropriated waters of the St. Mary, Milk, Belly, Oldman, and Waterton rivers and their tributaries are now reserved pending the completion of surveys, from which it will be possible to ascertain what are the largest areas which can be most economically served by these streams.

Still with the idea of conserving the limited water supply, departmental experts have, for several years, been conducting investigations at experimental stations at Brooks and Ronalane, Alberta, having as their object the approximate determination of the amount of water required by various crops to produce the best results.

Having practically completed surveys in the more southerly parts of Alberta and Saskatchewan, where irrigation is most needed and most insistently demanded, the department is now turning its attention to more northerly areas where, although irrigation does not seem to be an absolute necessity in most years, its practice would make more intensive farming possible and cause greater and more valuable yields to be produced, particularly in the region to the northeast of the Canadian Pacific Railway Company's Irrigation Block. The need for irrigation, while really considerable, has not yet caused a strong sentiment in its favour to be created. The department, however, in accordance with past policy, which has proved to be sound, is planning next year to make extensive surveys to determine the feasibility and desirability of irrigating these areas.

HYDROMETRIC SURVEYS

In order that all of the hydrometric survey work of the department might be done by one branch the responsibility for stream measurements in Alberta and Saskatchewan, which formerly belonged to the Reclamation Service, was transferred to the Dominion Water Power Branch.

SESSIONAL PAPER No. 25

WATER SUPPLY INVESTIGATIONS

Very little progress was made with investigations of domestic and stock-watering supplies on account of the pressure of other more important work. Inspection of these supplies were made when the duties of engineers brought them in the vicinity.

DRAINAGE

Following the organization of the Drainage Division of the Reclamation Service in February, 1919, a few parties were sent into the field that year and considerable preliminary work was done. It was not, however, until 1920, when the staff of engineers had been considerably augmented and an extensive programme of work had been planned, that drainage surveys and investigations got fully under way. The field-work in 1920 was commenced in the middle of May and was continued well into December. In some respects the season was very favourable for drainage investigations as, on account of the series of dry years, considerable areas were accessible which, in ordinary years, would have been too wet to reach.

One hundred and twenty-seven applications for small private drainage projects were received during the year, of which fifty-five, having reached the stage where investigation was required, were inspected. Six of these projects were found to be infeasible and four were voluntarily abandoned.

About twenty-five of these small projects, which are being dealt with under the provisions of Part I of the Drainage Regulations, have been authorized and are now under construction. As the procedure under the new drainage regulations becomes more widely known it is expected that an increasing number of small owners who wish to reclaim their own or adjacent vacant land will avail themselves of the privileges which they offer, and that much benefit will in time accrue to whole districts whose development is at present retarded by periodic floods.

For the convenience of applicants, departmental engineers make surveys and prepare plans of these small projects, for which the bare cost is charged against them. At the same time other engineers with bigger parties make comprehensive surveys of large flooded areas where most of the land which is likely to be benefited by drainage is still vested in the Crown. Several such projects have been thoroughly investigated; one, the Waterhen Lake project, is now being constructed under a contract let by the department, and three or four others, having been found to be desirable, have been strongly recommended for construction in the near future. A number of projects have been found to be too costly, while investigation has shown others to be infeasible.

Reconnaissance surveys of each project are first made and if the engineer's report is favourable intensive surveys are made the following season with a view to determining the probable cost of the project and the advantages to be derived as a result of drainage. In these surveys every factor bearing upon the question is given very careful consideration and only those projects are recommended which are demonstrated to be eminently suitable for governmental enterprise. There is so much Crown land which needs drainage that it is incumbent upon the department to give first consideration to those areas which are likely to be soonest settled and which can be most economically drained.

INTERNATIONAL WATERWAYS TREATY

The flow of the St. Mary and Milk rivers was apportioned during the year, as in 1919, under the provisions of an interim order made by the International Joint Commission.

MINING

During the year prospecting and mining operations in the western provinces and territories have shown very pronounced activity. In northern Manitoba the mining industry has now become firmly established and shipments of ore in quantity are being made to the western smelters. The silver-lead ore deposits in the Mayo District, in the Yukon Territory, are attracting very general attention, and a number of mines are being rapidly developed. Some three thousand (3,000) tons of high-grade ore, taken from one of the Keno Hill mines, have been made ready for shipment by water with the opening of navigation. This ore is hauled a distance of about forty-five miles to the Stewart river, and taken down the Stewart and Yukon rivers to tide-water, thence by ocean steamer to the smelter, a distance of about five thousand miles, involving at least five transshipments. Only very high-grade ore could stand so high an initial charge.

OIL

Active boring operations for the discovery of oil are being continued in Alberta, Saskatchewan, British Columbia, and the Northwest Territories. Wells are being drilled in Viking, Czar, Monitor, Willow Creek, Pincher, Pitt Meadows, Windy Point, and other fields.

In the autumn of 1920 discovery was reported to have been made by the Northwest Company of oil in quantity about forty-five miles north of Fort Norman, and an inspection of this discovery will be made during the summer.

A staff of technical officers has been established at Calgary, with all necessary appliances, to close wells which the operator is unable to control, to supervise drilling operations, to furnish technical advice, and to insure the conservation of the natural resources of the western provinces and territories.

COAL

In the province of Alberta 269 coal mines are in active operation, with a production amounting to almost 7,000,000 tons, the increase being largely due to the extension of the market for high-grade coal to Saskatchewan and Manitoba. The fields which are now in active operation include Estevan, Crownsnest, Drumheller, Carbon, Brazeau, and Yellowhead. In the province of Saskatchewan seventy-two coal mines are being operated.

THE DOMINION PARKS

Travel to the Dominion Parks continue to show a steady increase, last year's being the heaviest yet recorded. The total number of visitors approximated 150,000, of whom one-third were from foreign countries. This increase was not confined only to the great resorts like Banff and Lake Louise, which were crowded to capacity for practically all the season, but extended to smaller and less widely known parks as well. Waterton Lakes park in southern Alberta, which can be reached only by a long motor drive, had nearly 14,000 visitors, or 5,000 more than during the previous year.

Following the policy laid down in previous years development work in the parks was concentrated on road construction. The Castle-Lake Louise road, an extension from the Banff-Windermere highway, which will open up the beautiful Lake Louise and Moraine lake districts to eastern motorists, was completed at the close of the season and will be thrown open for travel early during the season of 1921. The distance from Calgary to Lake Louise is approximately 110 miles and owing to the easy grades the trip can be made in about seven hours, so that a large motor travel from the prairies may confidently be looked for in the immediate future.

SESSIONAL PAPER No. 25

Work was also continued on the Vermilion-Sinclair division of the Banff-Windermere highway. About eight miles of new road were completed and twenty-one miles of clearing. Work on this section is very heavy owing to the extensive rock cutting involved. Much of it is solid rock excavation with cuts ranging from twenty to sixty feet. The long distance from the base of supplies combined with the labour stringency have also added to the difficulties of the work, but considering the conditions, good progress has been made. About fifteen miles of clearing and 42 miles of grading remain to be completed, but with favourable conditions it is hoped the road may be ready for traffic by the close of the season of 1922. Its importance as a scenic highway can scarcely be overestimated. It will provide a direct route from Banff to Spokane, Vancouver and California, and make possible a motor journey of several hundred miles through the heart of the Canadian Rockies, a trip which can scarcely be paralleled for scenic magnificence.

The number of buffalo in the Government herds now totals 5,393—5,152 of which are in Buffalo park, Wainwright, 230 at Elk Island park, Lamont, and 11 at Banff. The proportion between the sexes is about even, which means that there are about 1,000 more males in the herd than are required to keep it in good condition. It has therefore been decided to slaughter about that number of buffalo during the coming winter when the animals are in prime condition and to dispose of the meat, heads and hides, from the sale of which it is expected a considerable revenue will be obtained.

The very dry season was the cause for much anxiety on account of the danger of forest fires, but although a number of fires started in the parks, owing to the vigilance of the warden service and the improved equipment with which all the parks are now provided, it was possible to extinguish nearly all of them before any serious damage had been done. A new portable fire unit of a larger and heavier design was developed for fire fighting work and sent to Banff. The engine, which is mounted on a three-quarter-ton Reo chassis, is capable of delivering 130 gallons per minute at 120-pounds pressure and it is believed it will prove of very great assistance in the work of fighting forest fires which occur within reach of the various motor roads.

The application of the Dominion Parks Game Regulations to Yoho and Glacier parks following the terms of the agreement recently entered into with the province of British Columbia, has had a very beneficial effect upon wild life. The superintendent reports there is already a noticeable increase in game of all kinds, not only due to the prohibition of shooting but apparently because the wild life appears to have discovered for itself that within these areas it is free from molestation and so is coming into the parks from the surrounding districts. A satisfactory, steady increase is also reported from the other parks where sanctuary conditions have been in force for some years.

Good progress has been made with the work of the preservation of the historic sites of national importance. In view of the large field to be covered and the great number of places of historic interest throughout Canada, it was recognized that before undertaking any extensive preservation or marking, a Dominion-wide historical survey was necessary to collect information with regard to all existing sites and to decide which of these were of national importance. This survey has been carried on during the year by the members of the Historic Sites and Monuments Board, each of whom is a specialist in his own division of Canadian history. The co-operation of thirty-four historical societies and associations interested in the preservation of Dominion landmarks has also been secured. To date 547 sites have received the attention of the board and 46 have been selected to receive attention.

It is very gratifying to note that the enforcement of the Migratory Birds Convention Act has already resulted in a marked increase in many valuable forms of bird life. This has been especially noticeable among the waterfowl, which have shown a notable increase in numbers throughout all Canada. In portions of British Columbia

during the past fall the shooting was better than at any time for years past; the number of breeding birds on the western prairies, where so many of the waterfowl of the continent are raised, has shown definite increase; and in the Maritime Provinces this spring there was a notable increase in the numbers of ducks and geese going north on migration. Several important amendments were made to the regulations during the year, notably the provision with regard to bag limits and equipment which may be used in taking migratory birds. The organization for the enforcement of the Act was also further developed and a very large amount of educational work was done. In June, 1920, seven bird sanctuaries in Alberta were created by Order in Council and regulations established for their control. The final completion of the Saskatchewan sanctuaries is pending and a survey to locate suitable sanctuary areas will be undertaken in Manitoba during the coming summer.

Under the Northwest Game Act, which is administered by the Dominion Parks Branch, approximately 300 licenses for hunting, trading and trafficking were issued from which a revenue of \$3,176 was obtained. Furs taken under these licenses were valued at \$661,446. In view of the anticipated rush to the Mackenzie river oil fields special protective measures have been taken to protect the game resources of this region and to ensure the enforcement of the law.

The reindeer herd at Old Fort, Quebec, the only domesticated herd in the Dominion, which was formerly under the control of the Department of Indian Affairs, was transferred to the Department of the Interior and placed under the administration of the Parks Branch. It is expected that the experience gained in administering the reindeer in the Canadian Labrador will be of great benefit in connection with the larger question of the domestication of caribou and the development of the reindeer industry in the far north of Canada, a question which is now receiving the consideration of the Government.

FORESTRY

The fiscal year 1920-21 was a period of readjustment following the war and post-war periods, and the process of this readjustment was reflected in the conditions prevailing in connection with the administration of forest reserves and forest resources. The prices of farm products declined, while labour remained scarce and wages high. This affected the forest reserves administration directly, since it reduced the amount of building on farms and, consequently, lessened the demand for building timber. On the other hand, owing to the disposition of many settlers to get out their own fuel in the form of wood, the demand for fuel-wood increased considerably over the preceding year. Mine timber was also in increased demand. The number of stock grazed on forest reserves decreased slightly, owing to pasturage and market conditions, but the number of farmers and stock-raisers pasturing herds on the reserves increased, showing that the benefits of the system are steadily becoming more widely distributed. The number of stock associations, which work in co-operation with the Forestry Branch, has also increased, and these associations, in addition to assisting in range management, are also raising the standard of the stock pastured on the reserves. The demand for seedling trees to plant shelter-belts on prairie farms was, in spite of labour shortage, about the same as in the preceding year, and there are indications that with the return to more normal conditions there will be a great expansion in tree planting. Notwithstanding the unsettled agricultural and industrial conditions prevailing during the year, the revenue of the Forestry Branch increased to \$143,812, which was an increase of nearly \$16,000 over the preceding year.

From the standpoint of the prevention and suppression of forest fires the year was much nearer a normal one than its predecessor. There was ample precipitation in early spring to keep down fires, and, while the fire-hazard became high in late mid-summer, especially in Manitoba and British Columbia, the damage was much less than in the previous year; more fires started, but the percentage of these that got

SESSIONAL PAPER, No. 25

beyond the incipient stages and became large was much smaller. Airplanes were used for the first time in forest protective work in Western Canada and, though the period of testing was short, the results indicated that the airplane will prove an effective aid in forestry work.

A total of about twenty acres on various forest reserves was planted with Scotch pine, jack pine, and white spruce seedlings, and approximately twenty-five acres were sown with tree seed; the species being white spruce and jack pine in about equal proportions. This experimental planting and seeding not only restores or increases the supply of desirable species on forest reserves but also gives valuable data as to rate of growth, and as to the best methods of doing the work.

The work of the forest experimental station at Petawawa, Ont., was continued and extended. This station, situated in the heart of the old pine area of Ontario and Quebec, is engaged in investigating the best methods of securing reproduction of desirable species of timber on non-agricultural lands that have been cut over and burned over since the Ottawa valley was opened. Experimental plots enclosing trees of the various species, both in pure stands and in mixture, have been marked out and the rate of growth under different conditions of thinning, trimming, drainage, etc., is being watched and recorded. The work has already yielded a large amount of valuable information, which will be greatly increased in the next few years.

The Forest Products Laboratories of Canada continued the study of the mechanical and physical properties of all Canadian timbers. The results of this investigation as it proceeds enable manufacturers and builders to put each wood studied to its best use; and it also shows profitable new uses for woods hitherto deemed to have but a small range of utility. Special investigations were conducted in regard to paper, pulp, pulpwood, mine timbers, factory timbers, railway ties, etc., and many questions submitted by manufacturers of forest products answered.

The increased interest which the statesmen of the British Empire are taking in forestry was shown in many ways during the year. There was the holding in London, in July, 1920, of the Empire Timber Exhibition and the Empire Forestry Conference, at each of which Canada was well represented. Both of these promise important developments looking towards Canada. The British Forestry Commission continues to draw large quantities of tree seed from Canada for reforestation purposes, which seed is collected and shipped by the Forestry Branch.

WATER-POWER

The general survey of the water-power situation throughout the Dominion carried on by the Dominion Water Power Branch indicates that there is now a total installation of 2,470,000 horse-power in Canada and that during the fiscal year just ended there has been not only a substantial increase in the power available, but remarkable progress in hydro-electric development operations which will largely increase the power output in the immediate future. Much of this increase is due to extensions to existing plants.

The tendency throughout the Dominion has been towards consolidation where feasible of systems serving the same market. Quite recently the British Columbia Electric Railway Company absorbed the power developments of the Western Power Company of Canada on the Stave river, the merger of the developments serving central western Ontario has practically been consummated, while the various developments serving the Montreal market are now largely consolidated.

Several new developments initiated during the previous year have made distinct and satisfactory progress. Especially is this so in the provinces of Nova Scotia and New Brunswick, where Provincial Government power commissions have undertaken important developments to meet provincial needs. A remarkable and in many ways

12 GEORGE V, A. 1922

unique power scheme, the Queenston-Chippawa project of the Ontario Hydro-Electric Power Commission at Niagara Falls, is rapidly reaching the operating stage. Here individual units of 55,000 horse-power capacity, the largest hitherto attempted, are now being installed; these represent the very latest progress in both hydraulic and electric engineering science.

During the year most satisfactory and substantial progress was made towards completing the Water Resources Index-Inventory of the branch. By means of this inventory Government officials, Dominion or provincial, and the members of the general public concerned in any way with power development, can be placed in immediate touch with any data regarding water-power development and water resources generally anywhere in the Dominion.

The Hydrometric Survey of Canada was instituted by Order in Council of July 19, 1920. As a result there has now been established practically from the Atlantic to the Pacific a uniform scheme of basic water resources investigatory effort, which has been worked out through the constructive collaboration of the various Dominion and provincial organizations concerned with power and cognate questions.

So far as the Prairie Provinces are concerned, certain specific matters of importance have been concluded. The question of the regulation and control of the upper waters of the Winnipeg river is about to be definitely settled by agreement between the three Governments concerned—the Dominion and the provinces of Ontario and Manitoba. By the purchase of certain lands dominating power sites on the Winnipeg river, the department now has practically complete control over a water-power situation which is probably unique on the continent, namely, that of the Winnipeg river, where there is over 500,000 dependable twenty-four-hour horse-power within seventy-five miles of the city of Winnipeg.

Regulations covering the conjoint development of two of the most important resources in the Prairie Provinces—water-power and pulp timber—have been completed and promulgated. It is fully expected that under these regulations there will shortly be commenced a pulp and paper project which will meet the growing needs for newsprint for the Prairie Provinces.

In general, the year has been one of distinct progress. While no new development has actually commenced within the administrative jurisdiction of the department, this has been fortunate in that it has afforded us ample opportunity to gather much essential basic water resource and allied data necessary to prove the economic feasibility or otherwise of many projects which have been vigorously presented for definite action. There has also been opportunity for substantial and unhurried progress in the drafting of new water-power regulations; these are now practically complete.

Modern civilization cannot exist without motive power. Coal placed civilization where it is and there is every indication that coal can, for the present, carry it no further. Even now, when there is a general and pronounced industrial depression, there is a fuel emergency; whether this will prevent an industrial revival or bring about a crisis when the industrial revival becomes well started, only the future can reveal.

It has been stated that the biggest question in the world today is the combined one of fuel and power, and water-power is universally acknowledged as the only possible solution; it alone can relieve the fuel situation and bear the burden of increased industrial effort until the fuel problem is solved and the fuel industry rehabilitated. France, Spain, Italy, Norway, Sweden, Germany, Japan, the United States, are all bending their efforts to investigate and utilize their resources. England, whose water-power resources are small in relation to her requirements, is tending towards the development of tidal power. If the development of water-power is as vital to progress as authorities state it to be, Canada can claim to be amply prepared to take her place in the van.

SESSIONAL PAPER No. 25

DOMINION OBSERVATORY, OTTAWA

Work with the meridian circle was prosecuted on the same programme as in recent years; observations were obtained on 137 nights, a somewhat greater number than the average; the computations are making satisfactory headway, though still in arrears. The division errors of the single degree marks of the two graduated circles have been measured, a proceeding which is necessary before the final computations can be made; this involved about 21,000 microscope pointings, which alone, apart from the computations involved, entailed about 400 hours of observing time. Special investigation of certain of the intermediate divisions remain to be made during the coming summer.

Field observations for latitude and longitude were carried out at five stations in British Columbia, at the request of the Provincial Government. The longitudes were determined directly from Ottawa by electric telegraph; the latitudes in the usual way by Talcott's method. A revision is now being made, and is nearly completed, of all such field observations which have been carried out by the observatory; this will be published in the near future.

The time service has been maintained as in previous years, and has been extended to the Hunter building. Some assistance has been given in the installation of clocks in the new Parliament buildings; pending the final completion of the installation this system is still in the contractor's hands. Ten secondary master-clocks are synchronized continuously from the observatory; these in turn control about 400 clocks and dials of various kinds, including the tower-clocks at the observatory and the city post office. Relays beating seconds are maintained in three offices in the city, one clock is synchronized every hour, time signals are sent out by telegraph and telephone, and the time is recorded on the various seismographs at the observatory.

A comparison is made daily with Washington time by means of the wireless time signals sent out by Annapolis or Arlington; comparisons have also occasionally been made with other American and European stations. Some of these signals have been recorded on the chronograph for a portion of the year, and considerable experimental work has been carried on with reference to the possibility of systematic errors in chronographic registration of such signals.

The large equatorial telescope was utilized as heretofore for obtaining radial velocities of stars, a total of 505 spectrograms having been taken with an average exposure of one hour each. Also 148 direct photographs with an average exposure of three hours each have been taken with the wide angle camera, which was mounted on the telescope. Class B stars have been studied as well as stars of classes F, G and K. δ Scorpii, δ Eridani and β Cephei have been studied in detail and have proved to be most interesting systems. Nova Cygni No. 3 was investigated both spectroscopically and by photographic photometry. A paper entitled "A Spectrographic Study of Early Class B Stars, First Paper," has been published as one of the Dominion Observatory Publications. A second paper on the subject is in press.

Several articles on the stationary calcium lines, the interstellar clouds of metallic gases and Nova Cygni No. 3 have been published in the *Journal of the Royal Astronomical Society of Canada*.

The equatorial was available to the public on Saturday nights, 1,124 persons having registered, to which must be added many who failed to register.

With the coelostat and solar spectrograph 270 plates comprising 1,300 observations recording over 12,500 strips of solar, iodine and electric arc spectra, were secured. In addition some 20 test spectra and attempts to photograph the spectrum of Venus on a large scale were made. The Venus spectra were not found sufficiently strong for measurement. Also, 109 photographs of the sun were taken with the coelostat and equatorial solar cameras to record sun-spots. Measurements of rotation, wave-lengths, and convection and pressure in sun-spots were carried on. Eight

papers were presented to the American Astronomical Society, the results of one of which may be specially mentioned, namely, the determination of the sun's distance from the pulse of its wave-lengths due to the elliptic motion of the earth (a method proposed here) resulting in a preliminary value two parts in a thousand in excess of the accepted value, and promising much for future measures.

With the photographic equatorial telescope the use of extra-focal method has been continued owing to unavoidable delay in constructing the thermopile equipment. One hundred and twelve plates with over two hundred exposures have been taken. These include the Harvard Polar Sequenee field, the variable RT Aurigae and Reid's Comet. The Polar Sequenee plates have been reduced and are being prepared for publication along with measures of other standard fields.

The operations of the magnetic survey during the past season were carried along lines followed during previous years. The field work was confined for the most part to observing the three elements, declination, dip and horizontal intensity, at "repeat" stations. In addition to the series of stations occupied along the north shore of the St. Lawrence river between Quebec and Blanc Sablon and a few in Nova Scotia and New Brunswick, a number in the southeastern part of Ontario were occupied.

There will issue shortly the reduction of 500 magnetic stations in Canada, extending from Blanc Sablon to Prince Rupert, all reduced to a uniform epoch 1921, giving tabular values for the three magnetic elements declination, inclination and intensity, as well as four sheets of maps covering the whole of Canada, showing the declination graphically at each of the 500 magnetic stations.

The seismological instruments of the observatory registered 115 earthquakes as compared with 96 during the last fiscal year. The seismographs at Halifax and Saskatoon and the undagraph at Chebucto Head, N.S., being instruments of the observatory, continue to function satisfactorily. Monthly bulletins have been issued regularly and are being sent each month to 118 stations scattered over the earth. The deformation instrument is now recording again after being inactive due to repairs to the vaults. The temperature control of the vertical seismograph has been perfected, resulting in continuous uninterrupted records from that instrument.

DOMINION ASTROPHYSICAL OBSERVATORY, VICTORIA, B.C., J. S. PLASKETT

This is the third annual report upon the work of this observatory in which actual observational work was commenced on May 6, 1918. The details of the work are presented in complete form in the publications of the Dominion Astrophysical Observatory, of which 20 numbers have now been issued and distributed, and it will only be necessary here to present a brief summary of what has been accomplished.

The observing weather during the past year has been much less favourable than in the two previous years, although this perhaps does not appear from the comparative records. The spring and summer months were very good but the fall and winter unusually cloudy and wet and although observations were obtained on a greater number of nights than in 1919-20, the spectra secured were twenty per cent fewer in number. In the year April 1, 1920, to March 31, 1921, 1817 star spectra, between the numbers 4002 and 5828 (the missing 10 being due to error in numbering), were obtained on 215 nights. On 18 additional nights the dome was opened and observation started, but, owing to clouds or other bad conditions, no measurable star spectrum was obtained. On 26 of the 215 nights only one spectrum was secured and on less than 150 nights was the sky continuously clear throughout. Two clear nights, while the mirror was being resilvered, could not be used and another night was lost due to an accident to the dome. Otherwise, however, it may be safely stated that the telescope was engaged in actual observations on every usable night, including Sundays and holidays.

SESSIONAL PAPER No. 25

The principal work of the observatory during the past year has been, as hitherto, the continuation of the main programme of radial velocity measures. This programme contains some 770 stars selected from those north of the equator in Boss's Preliminary General Catalogue which had not been previously observed. The magnitudes of these stars range between about 5.5 and 8.0 and observations have been secured of about 720 of them, the observation of the remaining 50 of about the eighth magnitude or fainter having been postponed for lower dispersion. The observation, measurement and reduction of about six spectra each of these 720 stars is now nearly completed and the results are being prepared for publication. All the spectra have been obtained with one-prism dispersion, the linear scale, since August, 1919, being 29A to the millimetre at H. In order to obtain reliable velocities with this small dispersion the number of spectra proposed to be obtained of each star was placed at six. This ideal has been attained with very few exceptions and in some stars with poor lines has been exceeded. The accuracy of the measures is gratifyingly high as the probable error of a single plate of a star with good lines is about one kilometre per second giving the error of the mean of about four-tenths of a kilometre.

In the investigation of the velocities of these 720 stars about 150 have been found to be spectroscopic binaries, leaving about 570 constant velocity stars. When we compare these numbers with those previously determined at all other observatories which, from the beginning of accurate radial velocity work some twenty-five years ago, comprise less than 2,000 radial velocities and some 600 spectroscopic binaries, it will give some idea of the magnitude of the work in this programme, and of the energy with which it has been attacked.

In addition to this main work to which most of the time of the staff has been devoted, a number of independent investigations have been completed and the results published. Taking first those allied to the radial velocity work above described there is the work begun by the director of obtaining the spectroscopic orbits of eclipsing variables whose photometric orbits have been determined. This has been energetically continued and the orbits of U Coronae, TX Hercules, Y Cygni and Z Vulpeculae have been determined, in addition to the three obtained last year. As in each of the four variables observed the spectrum of each component is measurable, the absolute linear dimensions and the distance apart of the two components with their masses and densities have been obtained. This work is important as it gives the only known means of obtaining the absolute dimensions of the stars, and it is proposed to continue it to all eclipsing variables bright enough to be spectroscopically observed. Previous to the work here, the dimensions of only seven systems were known and to these six have been added by this work. Another line of work closely allied to radial velocities is the determination of the orbits of spectroscopic binary stars to which considerable time has been devoted. Mr. Harper has determined the orbits of the binaries Boss 5026, H.R. 6385, Boss 5900 and Boss 5070, all of which were discovered here. The first three have appeared in the observatory publications while the fourth is in press. Dr. Young has determined the orbits of H.R. 8427, H.R. 6169, H.R. 8800 and α Draconis. The first three binaries were discovered here and have appeared in our publications, while the fourth orbit of a long period binary discovered elsewhere is in press. Professor S. L. Boothroyd, volunteer research assistant at the observatory for the past two summers, has obtained the orbits of two binaries discovered here, Boss 4602 and H.R. 8803. The first has been issued in our publications and the second is in press.

In addition to this direct radial velocity work, Mr. Harper made observations of the Spectrum of Nova VYgni which appeared last summer and these spectra were measured and the results discussed along with further discussion on the Spectrum of Nova Aquilae in Vol. I, No. 24, of the observatory publications which is now in press. Dr. Young has made an extensive investigation and compilation of the behaviour of the H and K lines of Calcium in early type stars, which has appeared

as Vol. I, No. 17, of the observatory publications. As a result of this investigation certain fundamental facts concerning this interesting problem have been brought out and some general considerations looking towards the explanation of the observed facts adduced.

The time of Mr. H. H. Plaskett, outside of his share of the general radial velocity programme, has been devoted entirely to purely astrophysical problems principally connected with the radiation from the stars and the energy distribution in their spectra. A new method developed by Merton and Nicholson of determining relative intensities in terrestrial spectra has been improved and adapted after considerable experimental difficulty to celestial spectra and promises to give results of the highest interest and value. A preliminary paper on the intensity of the emission lines and continuous spectrum of γ Cassiopeiae was read before the Royal Astronomical Society, London, and this work has been extended to the determination of the energy distribution in typical stellar spectra. Observations are practically completed and the paper which will appear as No. 26 of Vol. I is in preparation.

The remaining two prisms of the spectrograph, whose completion was delayed on account of the impossibility of obtaining material during the war, were finished by the Jno. A. Breashear Co. and delivered last summer. Their performance was carefully tested and they were found to give excellent definition. Owing to the urgency to complete the main programme, in which one-prism dispersion only is used, they have not yet been used in any investigation, but it is proposed shortly to use the spectrograph with two and three prisms in certain special problems. Another addition to the instrumental equipment has been the receipt of the Callendar Recorders for recording and controlling the temperature of the spectrograph and for recording continuously the temperatures of the dome and mirror. These recorders were ordered in 1916, but their construction has been long postponed by war delays and post-war problems so that they were only received last January. They were promptly permanently installed in a very satisfactory manner by Mr. T. T. Hutchison, who assists in the night observing, and have proved to be of great value in maintaining the spectrograph at constant temperature and also in giving a record of the changes of temperature around the mirror in comparison with changes in the dome temperature. Considerable time has been spent by the director in testing the prisms and in experimenting to determine the best position and arrangement of the resistance thermometers of the recorders. The resistance thermometer used in the spectrograph is divided into five equal sections distributed as uniformly and symmetrically as possible over the interior of the spectrograph, thus ensuring much more uniform and homogeneous temperatures than would be otherwise possible.

The performance of the telescope has remained perfectly satisfactory and has, I am convinced, never been equalled for accuracy, convenience, and rapidity of operation. The time required to make the change from star to star, from the end of the exposure on one plate to the beginning of that on the next, is on the average two minutes, which is only exceeded when in passing from a north to a south star or vice versa the dome has to be revolved through about 180 degrees. The driving is practically perfect, and even with the long focal length of 108 feet the star image remains on the slit for several minutes at a time.

The privilege extended to the public of viewing celestial objects through the telescope every Saturday evening between eight and ten o'clock has apparently been much appreciated and is fully taken advantage of with an average attendance of about 200 during the summer months, reduced during the winter to about 50. Numerous applications for the extension of this privilege to other evenings have been received, but this has not been allowed owing to the loss of observing time entailed. The observatory is in addition open to visitors every week day during regular office hours, and visitors are registered here from all over the world. The local authorities have a great pride in the institution and every visitor or party of note coming to Victoria is taken

SESSIONAL PAPER No. 25

to the observatory, thus making the enterprise of the Government in establishing the institution of world-wide knowledge.

The scientific staff of the observatory remains the same as at the last report, and although there is ample work to fully occupy the time of two or three more officers, the present office quarters cannot accommodate them. It is very essential for the progress and efficiency of the work to have the building equipment of the observatory completed. The use of the temporary office quarters on the ground floor of the observatory building is especially undesirable on account of interference with observing conditions, and, moreover, the accommodation is inadequate, poorly heated and ventilated and bad for the health and contentment of the staff. The completion of a moderate-sized office building and of the necessary residences for those having night observing at this relatively inaccessible place is a matter of urgent necessity for the progress of the observatory's work and it is hoped will not be longer delayed.

There have been read at scientific meetings during the year and published in various scientific papers the results of investigations carried on by the staff of the observatory. These investigations have in most cases been issued as Publications of the Dominion Astrophysical Observatory, of which the following numbers have appeared during the year:—

- Vol. I, No. 9—The Orbits of the Spectroscopic Components of Boss 5026, by W. E. Harper.
No. 10—One Hundred Spectroscopic Binaries, by J. S. Plaskett, W. E. Harper, R. K. Young, H. H. Plaskett.
No. 11—The Spectroscopic Orbit of U Coronæ, by J. S. Plaskett.
No. 12—Orbit of the Spectroscopic Binary H.R. 8427, by R. K. Young.
No. 13—The Orbit of the Spectroscopic Binary H.R. 6385, by W. E. Harper.
No. 14—The Orbit of the Spectroscopic Binary Boss 5900, by W. E. Harper.
No. 15—The Spectroscopic Orbit of TX Herculis, by J. S. Plaskett.
No. 16—The Spectroscopic Orbit of Y Cygni, by J. S. Plaskett.
No. 17—The Calcium Lines H and K in Early Type Stars, by R. K. Young.
No. 18—Orbit of the Spectroscopic Binary H.R. 6169, by R. K. Young.
No. 19—Orbit of the Spectroscopic Binary H.R. 8800, by R. K. Young.
No. 20—The Orbits of the Spectroscopic Components of Boss 4602, by S. L. Boothroyd.

PART I

DOMINION LANDS

REPORT OF THE COMMISSIONER J. W. GREENWAY

<i>Applications for Patent—</i>	1919-20	1920-21
Number examined	56,951	77,313
New applications	23,377	16,041
Applications accepted and notifications issued . . .	11,359	13,080
Certificates of recommendation sent out . . .	6,883	5,221

REPORT OF THE CHIEF INSPECTOR OF DOMINION LAND AGENCIES, H. G. CUTTLE

The general condition of all offices is good and a satisfactory service is being given the public. Full details of the work done in the land agencies, sub-agencies, and by the homestead appraisers, will be furnished in the reports of Mr. O. Neff, Inspector of Agencies for Manitoba and Saskatchewan, and Mr. J. W. Martin, Inspector for Alberta and British Columbia.

During the past year the following sub-agencies have been closed:—

Alberta.—Hanna, Wainwright, Mosside, Frog Lake, Whitford, Pine Creek, and St. Paul de Metis.

British Columbia.—Golden.

Saskatchewan.—Kindersley, Ponteix, Weyburn, Alsask, Yorkton, and Shaunavon.

The seed gain collections for the year amounted to approximately \$650,000, of which over \$70,000 was paid directly through my office. Included in the collections are a great number of very old liens; in fact some dating back as far as 1879. Although the collections have not been so great as last year, owing to the low prices which were received for all grain, I consider that they have been very satisfactory.

The seed grain distribution for 1921 is very much smaller than last year; although the crop was not heavy last year, most of the settlers were able to save enough grain to do their seeding this year, they having been advised to do so by the collectors last fall. As there was a very good crop of hay, the feed situation was good, and I feel confident that if we are fortunate enough to have an average crop this season, there should be no need for the department to make further advances. In comparison with last year it will be interesting to note that for the same period last year there were 2,003 more applications than this year, and 135,012 bushels of wheat, 157,049 bushels of oats, and 4,758 bushels of barley less being granted. I expect, however, to have a considerable number of applications during the month of April.

12 GEORGE V, A. 1922

REPORT OF THE INSPECTOR OF DOMINION LANDS AGENCIES,
O. NEFF, MOOSOMIN, SASK.

REPORT OF MR. N. O. CÔTÉ, CONTROLLER OF THE LAND PATENTS

BRANCH AND REGISTRAR OF DOMINION LANDS PATENTS

For the fiscal year ended March 31, 1921, with statements in relation thereto, marked A to K, inclusive.

LETTERS PATENT

The number of letters patent issued during the period mentioned was 17,947, covering an area of 2,753,494 acres, which may be classified as follows:—

Province	Patents	Acres
Manitoba	2,601	397,426
Saskatchewan	8,550	1,338,332
Alberta	6,370	979,662
British Columbia	376	37,902
Yukon Territory	40	70
Northwest Territories	10	102
	<u>17,947</u>	<u>2,753,494</u>

SESSIONAL PAPER No. 25

These grants are given in detail in the statements marked A to G, inclusive, and may be summarized as follows:—

Grants	Patents	Acres
Homesteads..	12,329	1,934,922
Sales..	1,324	169,026
Pre-emptions..	3,350	531,045
Purchased homesteads..	406	62,369
Railways..	190	10,744
Special or free grants..	282	37,166
Northwest half-breeds..	3	283
Licenses of occupation..	12	26
Soldier grants..	49	7,805
Hudson's Bay Company..	2	108
	17,947	2,753,494

There was an increase of 215 letters patent and a decrease in the area patented of 35,403 acres, as compared with the previous year.

There are recorded in the Land Patents Branch 433,215 letters patent, aggregating 97,583,419 acres, which have been issued since May, 1873, to March 31, 1921.

LANDS DISPOSED OF

Five thousand three hundred and eighty-nine homestead entries were granted during the year, aggregating an approximate area of 862,240 acres, made up by provinces as follows:—

Province	Homestead entries	Acres
Manitoba..	725	
Saskatchewan..	1,670	
Alberta..	2,874	
British Columbia..	120	
	5,389	862,240

There was a decrease of 1,343 in the number of homestead entries granted, as compared with the previous year.

By land agencies the 5,389 homestead entries are made up as follows:—

	Entries
Manitoba—	
Dauphin..	358
Winnipeg..	367
	725
Saskatchewan—	
Battleford..	367
Moosejaw..	240
Prince Albert..	674
Saskatoon..	163
Swift Current..	226
	1,670
Alberta—	
Calgary..	280
Edmonton..	1,297
Grande Prairie..	548
Lethbridge..	78
Peace River..	671
	2,874
British Columbia—	
Kamloops..	71
New Westminster..	44
Revelstoke..	5
	120

12 GEORGE V, A. 1921

The 5,389 entrants for homesteads represented 11,256 persons, as compiled from information obtained from each entrant. Of these entries 1,605 were made by residents of the several provinces of the Dominion; three by Canadians who had returned from the United States, and 871 by persons who had previously obtained homestead entries, but which entries had been cancelled by default or at the request of the entrants in order, in most cases, to enter for other lands; 1,177 were made by persons from the British Isles; 1,072 by Americans; 170 by naturalized Austro-Hungarians; 99 by Russians and Finns; 84 by Norwegians; 71 by Swedes; 22 by naturalized Germans; 32 by Frenchmen; 36 by Belgians, and the remaining 147 were made by citizens of various other countries.

There were 2,892 soldier grant entries made during the year, aggregating approximately 462,720 acres, made up by provinces as follows:—

	No. of entries	Acres
Manitoba..	475	76,000
Saskatchewan..	1,188	190,080
Alberta..	1,171	187,360
British Columbia..	58	9,280
	2,892	462,720
By land agencies as follows:—		
Manitoba—		
Dauphin..	185	
Winnipeg..	290	
		475
Saskatchewan—		
Battleford..	218	
Moosejaw..	153	
Prince Albert..	467	
Saskatoon..	166	
Swift Current..	184	
		1,188
Alberta—		
Calgary..	212	
Edmonton..	489	
Grande Prairie..	209	
Lethbridge..	73	
Peace River..	188	
		1,171
British Columbia—		
Kamloops..	38	
New Westminster..	12	
Revelstoke..	8	
		58
		2,892

CANCELLED ENTRIES

There were cancelled during the same period 8,185 entries, made up as follows:—

	Manitoba	Saskatche- wan	Alberta	British Columbia
Homesteads..	1,403	2,360	3,365	208
Pre-emptions..	1	557	232	
Purchased homesteads..		24	16	
Sales..	1	9	8	1
Total..	1,405	2,950	3,621	209

SALES

Three hundred and seventy-three sales were made during the fiscal year for 15,239.42 acres of land, with an average for each sale of about 40½ acres.

SESSIONAL PAPER No. 25

ACCOUNTS AND REVENUE

There are at present kept in this branch about 21,000 individual accounts in connection with purchased homesteads, pre-emptions and ordinary sales.

During the fiscal year \$1,704,412.27, including \$319,491.25 interest on deferred payments, was received on account of purchased homesteads, pre-emptions and ordinary sales, being a decrease of \$1,014,651.45 as compared with the payments received during the previous year.

One hundred and twenty-one thousand, eight hundred and twenty-nine dollars and eighty-nine cents has also been received for entry fees, improvements and sundries, making a total revenue for the fiscal year of \$1,826,242.16.

REFUNDS

There were 1,668 refunds made, amounting to \$76,324.02, as follows:—

859 refunds—Value of improvements collected on cancelled homesteads.. . . .	\$60,083 12
809 refunds—Overpayments on sales; and of moneys paid on account of purchased homesteads and pre-emption sales, entries for which have been cancelled.. . . .	16,240 90
	\$76,324 02

NEWLY SURVEYED LANDS THROWN OPEN TO HOMESTEAD ENTRY

During the past fiscal year newly surveyed lands comprised in one hundred and thirty-two townships were made available for homestead entry in the following land agencies:—

Dauphin, Man.. . . .	in 12 townships
Winnipeg, Man.. . . .	" 17 "
Battleford, Sask.. . . .	" 2 "

SCHOOL LANDS DIVISION—W. T. ROLLINS

ANNUAL REPORT of School Lands Branch, Department of the Interior, for the Fiscal Year, ending March 31, 1921.

School lands were disposed of by sale in the provinces of Manitoba, Saskatchewan and Alberta as follows:—

MANITOBA			
How Disposed of	Area Acres	Value	Average Per acre
Soldier Settlement Board.. . . .	10,424.01	\$130,487 97	\$12 52
Railway companies.. . . .	25.54	357 45	14 00
School sites.. . . .	13.	130 00	10 00
Total.. . . .	10,462.55	\$130,975 42	\$12 51

SASKATCHEWAN			
How Disposed of	Area Acres	Value	Average Per acre
Soldier Settlement Board.. . . .	84,163.22	\$1,229,162 31	\$14 60
Special to lessees of mining rights..	166.92	3,813 00	22 85
Railway companies.. . . .	43.38	754 68	17 40
School sites.. . . .	31.25	327 70	10 48
Total.. . . .	84,404.77	\$1,234,057 69	\$14 62

ALBERTA			
How Disposed of	Area Acres	Value	Average Per acre
Public auction.. . . .	115,768.55	\$2,063,021 27	\$17 82
Soldier Settlement Board.. . . .	6,695.70	102,018 00	15 24
Railway companies.. . . .	39.19	462 78	11 81
Total.. . . .	122,536.44	\$2,165,850 05	\$17 67

The approximate net area disposed of to March 31, 1921, after making deductions for cancelled sales, etc., was as follows:—

Province	Area Acres	Value	Average Per acre
Manitoba.. . . .	668,025.35	\$ 6,441,699 30	\$ 9 64
Saskatchewan.. . . .	1,508,539.96	27,135,966 34	17 99
Alberta.. . . .	973,131.59	13,461,461 41	13 83

The value of town lots disposed of to March 31, 1921, was as follows:—

Manitoba.. . . .	\$ 4,808 49
Saskatchewan.. . . .	12,659 00
Alberta.. . . .	41,436 00

The number of permits and leases issued, the number of leases in good standing and the combined revenue derived therefrom for the three provinces to March 31, 1921, was as follows:—

	Permits issued	Leases issued	Leases in good standing	Revenue derived
Grazing.. . . .	5,648			\$181,877 12
Coal.. . . .		7	82	39,375 35
Petroleum and gas.. . . .		10	313	33,442 53
Hay.. . . .	5,288	6	25	9,307 81
Cultivation.. . . .	44			2,025 15
Timber.. . . .	224			9,361 77
Special.. . . .		6	17	1,179 41

Registration Fees.—The revenue derived for the registration of 581 assignments for the three provinces amounted to \$1,175.75.

SESSIONAL PAPER No. 25

The total net revenue collected for the fiscal year was as follows:—

Manitoba.. . . .	\$ 408,349 99
Saskatchewan.. . . .	2,830,172 05
Alberta.. . . .	1,204,723 23
Total.. . . .	<u>\$4,443,245 27</u>

The revenue collected for the fiscal year, less principal moneys and less expenditure, was paid over to the Governments of the provinces of Manitoba, Saskatchewan and Alberta, as follows:—

Manitoba—	
Revenue other than principal moneys.. . . .	\$92,585 77
Less expenditure.. . . .	15,874 61
Amount paid to province.. . . .	<u>\$76,711 36</u>
Saskatchewan—	
Revenue other than principal moneys.. . . .	\$675,599 39
Less expenditure.. . . .	47,967 94
Amount paid to province.. . . .	<u>\$627,631 45</u>
Alberta—	
Revenue other than principal moneys.. . . .	\$376,766 39
Less expenditure.. . . .	38,504 76
Amount paid to province.. . . .	<u>\$338,261 63</u>

The balance standing to the credit of the School Lands Fund for each province as on March 31, 1921, was as follows:—

Manitoba—	
Total amount at credit of fund.. . . .	\$5,497,538 31
Amount invested in debenture stock.. . . .	5,497,000 00
Balance at credit of fund.. . . .	<u>\$538 31</u>
Saskatchewan—	
Total amount at credit of fund.. . . .	\$10,985,410 99
Amount invested in debenture stock.. . . .	10,984,000 00
Balance at credit of fund.. . . .	<u>\$1,410 99</u>
Alberta—	
Total amount at credit of fund.. . . .	\$6,159,146 38
Amount invested in debenture stock.. . . .	6,159,000 00
Balance at credit of fund.. . . .	<u>\$146 38</u>

Statements herewith lettered "A," "B" and "C," respectively, show the revenue collected from each of the provinces of Manitoba, Saskatchewan and Alberta duly classified.

Statements herewith lettered "D," "E" and "F," respectively, show the balance standing to the credit of the School Lands Fund for each province as on March 31, 1921, after deducting amounts invested in Dominion of Canada debenture stock as provided for by Order in Council dated December 1, 1919.

NOTE.—Balance at credit of Alberta School Lands Fund on March 31, 1921, was \$6,159,146.38, of which \$6,159,000 is invested in 5 p.c. Dominion of Canada debenture stock, maturing October 1, 1922, as per Order in Council of December 1, 1919. Interest paid on investments for fiscal year 1920–21 totalled \$275,950.

REPORT OF THE MINING LANDS AND YUKON BRANCH FOR THE YEAR WHICH ENDED MARCH 31, 1921—II. H. ROWATT

The total revenue of this branch derived from all sources during the fiscal year amounts to \$1,215,156.11, being an increase of \$336,408.88 over the previous year. The increase in revenue is principally due to the number of petroleum and natural gas leases issued at higher rental.

Statements lettered “A” and “B,” showing in different forms how the revenue is made up, will be found at the end of this report. The statement lettered “A” shows the total revenue, and the statement lettered “B” shows the revenue collected at each agency, including the Yukon Territory.

The revenue from the Yukon Territory for the year amounts to \$91,036.13.

The reports and statements for the fiscal year from the Gold Commissioner and the Crown Timber and Land Agent at Dawson, in the Yukon Territory, also the report of the Inspecting Engineer of Mines, are herewith submitted.

PETROLEUM AND NATURAL GAS

There are now in force under the regulations, 6,033 petroleum and natural gas leases, embracing a total area of 2,207,065.24 acres, distributed as follows: In Manitoba, 306 leases, comprising 54,760.90 acres; in Saskatchewan, 221 leases, comprising 128,841.90 acres; in Alberta, 4,196 leases, comprising 1,675,693.43 acres; in British Columbia, 1,134 leases, comprising 207,765.03 acres; and in the Northwest Territories, 176 leases, comprising 140,003.98 acres. The total revenue derived from petroleum lands during the year amounts to \$622,146.07.

SESSIONAL PAPER No. 25

Natural gas has been discovered and is now being utilized for commercial and domestic purposes in different parts of the province of Alberta. Oil has been discovered in large quantities in the Northwest Territories, and in smaller quantities in different parts of Alberta. Boring operations are being carried on throughout Alberta and in Saskatchewan, Manitoba and the Northwest Territories.

At a point about forty miles north of Fort Norman, in the Provisional District of Mackenzie, oil in quantity is reported to have been discovered in August, 1920, at a depth of 783 feet in the first well drilled in the Northwest Territories. As the formation in which the oil is reported to have been discovered underlies a very considerable portion of the Mackenzie Basin it is anticipated that the development of an oil-field of considerable extent will result from this discovery.

As the presence of oil in commercial quantity in the Northwest Territories appeared to have been established through this discovery it was considered advisable to rescind the petroleum and natural gas regulations in force, in so far as the said territories are concerned, and to introduce new regulations for the disposal of such rights more directly applicable to a proven field.

The staff of technical officers, with headquarters at Calgary, has been furnished with all appliances necessary to close wells which have gotten beyond the control of the operator, and reference is made to the work of this staff in the report of the inspecting engineer.

COAL MINING LANDS

The regulations authorizing the sale of coal mining lands have been rescinded and all sales made previous to the withdrawal of the regulations have been completed. The total amount of revenue received on this account was \$2,108,665.79.

COAL LEASES

The total number of coal mining leases in force at the close of the fiscal year was 682, including a total of 316,355.49 acres, distributed as follows: In Alberta, 590 leases, comprising 298,661.02 acres; in Saskatchewan, 89 leases, comprising 15,414.47 acres; in British Columbia, two leases, comprising 2,240 acres; and in the Yukon Territory, one lease, comprising 40 acres.

The total number of leases of coal mining rights issued during the year was 156, comprising 60,263.91 acres. The total revenue received during the year for rental of coal-mining rights was \$256,420.07.

12 GEORGE V, A. 1921

ROYALTY ON COAL

Under the regulations governing the issue of leases to mine coal, the royalty is fixed at five cents per ton of 2,000 pounds on the merchantable output of the mine.

The following is a statement showing the amount collected on account of royalty on coal mined from lands in the western provinces, the Northwest Territories and the Yukon Territory, respectively, during each year since the regulations came into effect:—

Year	Alberta	Saskatchewan	British Columbia	Yukon	Northwest Territories
	\$ cts.	\$ cts.	\$ cts.	\$ cts.	\$ cts.
1903-04.....	56 90	Nil.	Nil.	22 40	Nil.
1904-05.....	2,822 00	110 70	"	47 00	"
1905-06.....	2,379 75	47 10	"	569 33	"
1906-07.....	3,865 26	74 20	"	517 34	"
1907-08.....	7,621 67	4 30	"	1,543 38	"
1908-09.....	5,322 39	358 11	"	371 73	"
1909-10.....	153,559 98	1,672 50	3 00	136 38	"
1910-11.....	218,932 88	2,184 74	3 50	125 00	"
1911-12.....	104,894 55	2,034 74	2 78	390 00	"
1912-13.....	142,997 79	3,145 72	6 95	1,069 11	"
1913-14.....	147,198 75	2,123 43	19 35	Nil.	"
1914-15.....	104,489 77	1,880 06	4 90	"	"
1915-16.....	67,190 17	2,601 52	3 50	"	5 10
1916-17.....	149,447 82	2,228 08	8 92	"	Nil.
1917-18.....	144,634 75	4,046 55	Nil.	"	6 00
1918-19.....	175,687 66	3,193 05	"	"	Nil.
1919-20.....	181,641 80	2,573 32	"	"	"
1920-21.....	190,545 80	2,703 41	"	"	"

By an Order in Council dated March 16, 1918, provision was made that, owing to the scarcity of fuel in the Yukon Territory, no royalty shall be levied or collected on coal mined in that territory for a period of five years; that is, up to April 7, 1923.

The total amount derived from coal mining lands on account of purchase price, rental, royalty and application fees, during the fiscal year, amounted to \$456,888.09.

QUARTZ AND PLACER MINING LANDS

During the fiscal year 1,365 entries for quartz mining claims were granted by the mining recorders in Manitoba, Saskatchewan and Alberta, and by the mining recorder for unorganized districts. The total revenue from rentals of quartz mining leases and fees in connection with mineral claims was \$30,110.80.

According to the returns from the Yukon Territory during the fiscal year, 30 entries for placer mining claims, 666 entries for quartz mining claims, and 2,973 renewals and relocations were recorded. The revenue collected from these sources and from fees for registering documents in connection with mining properties was \$37,185.28.

QUARRYING

The number of leases now in force, issued under the provisions of the regulations, is 248, distributed as follows: In Manitoba, 91 leases, comprising 2,785.77 acres; in Saskatchewan, 28 leases, comprising 845.77 acres; in Alberta, 92 leases, comprising 4,163.01 acres; and in British Columbia, 37 leases, comprising 937.34 acres. There are four clay leases in Alberta, comprising 101.26 acres, and five in Saskatchewan, comprising 131.65 acres.

The total revenue collected during the fiscal year on account of quarrying and clay leases, including the application fees, amounts to \$10,330.63.

SESSIONAL PAPER No. 25

ROYALTY AND GOLD MINED IN THE YUKON TERRITORY

The total amount collected up to March 31, 1921, for royalty on gold, the output of placer mining claims in the Yukon Territory, after deducting the exemption at one time allowed under the regulations, was \$4,786,072.59, of which amount \$31,273.76 was collected during the last fiscal year. For the purpose of estimating this royalty, the gold is valued at \$15 an ounce, which is much below its real value.

The actual value of gold produced from placer mining operations in the Yukon Territory, up to March 31 last, might be safely placed at \$158,565,000.

DREDGING

Twelve leases to dredge for minerals in the beds of rivers in the Yukon Territory are now in force, covering a total frontage of 53 miles. The total revenue derived from this source up to March 31, 1921, amounts to \$201,218.82, of which amount \$394.55 was collected during the fiscal year just closed.

These dredging leases are confined to the Yukon, Fortymile and Klondike rivers.

There are in operation in the Yukon Territory six dredges. These dredges are working on the Klondike river and tributaries, also on tributaries of the Indian river, and are operated by hydro-electric motive power. Two of the largest gold-saving dredges in the world are being operated most successfully on the Klondike river-flat.

Thirty-two leases to dredge for minerals in the submerged beds of rivers in the provinces of Alberta, Saskatchewan and Manitoba are now in force, covering a total frontage of 37 miles. Of these leases, five are in Alberta and include 25 miles, one is in Saskatchewan and includes seven miles, and one is in Manitoba and includes five miles. The total revenue derived from this source up to March 31, 1921, amounts to \$48,695.47, of which amount \$968.34 was collected during the past fiscal year.

HYDRAULIC MINING

The Hydraulic Mining Regulations relating to the Yukon Territory were rescinded by an Order in Council dated February 2, 1904, but leases already granted were not affected by such withdrawal.

There are still in force in the Yukon Territory six hydraulic mining leases, covering an area of 17.96 square miles. Since the Hydraulic Mining Regulations were first established in December, 1898, 47 hydraulic mining leases have been issued, all of which have now been cancelled, with the exception of the above number. During the year eleven mines were operated by the hydraulic mining process, from which 1,702,264 cubic yards of material were removed.

TIMBER IN THE YUKON TERRITORY

The total amount of dues collected on account of timber in the Yukon during the fiscal year was \$9,288.47. During the year 118 permits were issued, under the authority of which 13,152 cords of wood were cut. The dues collected on permits issued amounted to \$7,267.75.

There are in existence 76 timber berths, held under license to cut timber within the territory, covering an area of 164.75 square miles, which licenses were granted prior to May 10, 1906, on which date the regulations governing the granting of licenses to cut such timber in the territory were rescinded, and regulations for the issue of permits to cut timber substituted therefor.

According to returns received in the department, the number of lineal feet of lumber manufactured under license during the year and sold was 16,361, and the number of cords of wood cut was 2,750½. Seizure dues, amounting to \$157.75, were collected on 197 cords of wood cut in trespass. This does not include the very large amount of timber and cordwood cut free of dues for mining purposes.

WATER RIGHTS

There are now in force in the Yukon Territory 488 grants to divert water for mining purposes, aggregating a total of 120,445 miner's inches. During the last fiscal year six water rights were issued, comprising 700 miner's inches. Four grants were issued under regulations established by Order in Council authorizing the diversion of water in the Yukon Territory for power purposes. Up to date 13 grants have been issued, authorizing the diversion of 131,200 miner's inches of water. Four of these grants have been permitted to lapse, but the remaining nine, authorizing the diversion of 66,200 miner's inches of water, are in good standing. Two power plants have been installed, one of which is situated on the north fork of the Klondike river, and it appears that this plant is kept in operation during the winter, the power generated being used for heating and lighting purposes in the city of Dawson. These rights are now administered under the Dominion Water Powers Act.

HOMESTEADS IN THE YUKON TERRITORY

One hundred and four homestead entries have been granted in the Yukon Territory, of which sixty-three are now in force, comprising a total area of 9,610.56 acres. Patents have been issued for thirteen homesteads.

REVENUE OF DOMINION LANDS, INCLUDING THE YUKON TERRITORY

A.—STATEMENT of receipts on account of coal and minerals in the province and territories, also timber, hay, coal, hydraulic mining, dredging, royalty on gold, mining fees, rental of agricultural lands, water power and water fronts and sale of Dominion lands in the Yukon Territory, for the fiscal year which ended March 31, 1921:—

12 GEORGE V, A. 1922

REPORT OF THE GOLD COMMISSIONER, DAWSON

The revenue of the office for the year was \$38,723.08, exclusive of rentals paid direct to the department at Ottawa. This is an increase of \$560.12 over last year. The statement lettered "A" shows how this amount was made up and the statement lettered "B" is a comparative statement of the receipts for the years ending March 31, 1920 and 1921, respectively.

PLACER GOLD MINING

Export tax was paid on 83,003,396 ounces of gold, which was practically the amount mined during the year. Owing to the fact that supplies must be imported during one open season sufficient to last until the following July, the merchants were obliged to buy their present stocks at the peak of the market so that while other parts of Canada are getting in some measure the advantage of reduced prices, food and supplies of all kinds are higher at the present time in Dawson than ever before in the history of the territory. This condition should improve during the coming summer, but until it does improve, a revival of gold mining cannot be expected, as under existing conditions only very rich gravels can be profitably worked.

YUKON GOLD COMPANY

This company's operations were on much the same scale as last year. Two dredges were operated during a dredging season of 128 days from May 26 to October 2. One of these dredges operated on claims Nos. 59 to 63, Below Discovery, Hunker Creek, and the other on claims Nos. 23 to 26-A, Gold Run creek. A total of 1,226,578 cubic yards of material was dredged.

This company had eleven hydraulic mines in operation at various times during the summer at the following points: Bunker Hill, Cheechaco Hill, Adams Hill, Americal Gulch, Oro Fino Hill, Fox Gulch, Monto Cristo, Trail Gulch, Lovett Horsford, Jackson Gulch, Gold Hill.

A total of 1,702,264 cubic yards was removed.

The company's hydro-electric power plant on the Twelvemile river furnishes the necessary power to carry on their various mining operations. As one unit of the plant referred to is now sufficient to furnish all the power needed, the remaining two units were dismantled during the past winter and hauled to the banks of the Yukon presumably for shipment to some other field.

The daily average of men employed was as follows:—

Hydraulic mines (April to October)	71
Dredges and thawing (April to October)	74
Ditch	23
Otherwise employed	56
Total	<u>224</u>

CANADIAN KLONDYKE MINING COMPANY, LIMITED

This company operated two of their mammoth dredges in the Klondyke valley on Hydraulic Lease No. 18 and Dredging Lease No. 24. Dredge *Canadian No. 2* operated from May 18 to December 31, a period of 227 days, and 1,290,581 cubic yards of material was dredged. Dredge *Canadian No. 4* operated from May 14 to November 3, a period of 174 days, and 1,497,375 cubic yards of material was dredged.

The pumping plant situated near the mouth of Hunker creek pumps Klondyke river water to the hills and benches of lower Hunker and Last Chance creek and was in operation from May 20 until October 2. An average of 500 miner's inches of water was furnished.

SESSIONAL PAPER No. 25

The power for these various mining operations was furnished by the Canadian Klondyke Power Company's, Limited, hydro-electric plant, situated at the north fork of the Klondyke river.

An average of 70 men were employed by this company.

NORTH WEST CORPORATION, LIMITED

This company, which is under the same management as the Canadian Klondyke Mining Company, Limited, continued prospecting and work preparatory to dredging on their extensive holdings, which consists of 1,020 claims, 300,000 cubic yards of mud overlying the pay gravels was removed by water under pressure on Lower Dominion creek and similar operations on a smaller scale were carried on on Quartz creek.

Dredge *Canadian No. 1*, now known as *North West Dredge No. 1*, referred to in last year's report as being dismantled on Upper Hunker creek, was reassembled on No. 17 Below Lower Discovery on Dominion creek, and was operated from August 24 to November 8. 179,574 cubic yards of material was dredged.

A second dredge of 7½ cubic feet bucket capacity was purchased from the Yukon Gold Company and during the past winter hauled from Hunker creek to Lower Dominion, where it will be reassembled and operated this summer.

An average of 76 men were employed by this company in their various operations.

TITUS DREDGING COMPANY

A dredge of 7 cubic feet bucket capacity owned and operated by the Titus Dredging Company was installed on No. 66 Highet creek, in the Upper Stewart district. Owing to delay in securing some necessary parts, occasioned chiefly by lack of telegraphic communication, the dredge was not ready to commence operations until September 1, and was operated until October 10. This is the first dredge installed in that district.

OTHER PLACER OPERATIONS

Other than the large scale placer operations referred to, considerable mining by individuals and small companies was carried on as in former years.

LODE MINING

In last year's report reference was made to a discovery of silver-lead ore on Keno Hill, near the head of Crystal and Lightning creeks in the Upper Stewart district. This discovery is undoubtedly the most important made in the territory since the gold discovery in 1896. Over 800 claims have been located and a very considerable amount of development work done. It has been demonstrated that the mineralized area is extensive and the ore of high value, but on only one property has sufficient work been done to speak with any assurance of the quantity of the ore.

Reference was made last year to the Yukon Gold Company having secured options on Discovery claim and adjoining properties on Keno Hill. These options have been taken up and a new company known as the Keno Hill, Limited, organized to develop them.

During the past summer this company had an examination made of the whole field by a very well-known geologist, and the engineers in charge are men of wide and successful experience.

The development last summer justified the company in making arrangements to mine and haul to Mayo, a distance of 40 miles, during the winter 3,000 tons of high-grade ore for shipment to the smelter on the opening of navigation. Owing to

12 GEORGE V, A. 1922

an accident to the power plant and other unavoidable delays, perhaps not more than 2,500 tons of ore will be landed at Mayo before the winter trail breaks, and unfortunately as yet there is no summer road upon which ore can be hauled. The company will, however, continue their development work during the summer.

A 75 k.w. generator was installed near Discovery on Duncan creek and the necessary power lines to Keno Hill, about four miles distant, installed. This plant commenced operations about the first of the year and furnishes light for the camp and mine and power to operate the company's hoists, drills, compressors, etc.

The men employed during the winter was as follows:—

Actual mining operations on Keno Hill.. . . .	35
Power plant.. . . .	4
Furnishing wood to power plant.. . . .	8
Ore transportation.. . . .	25
Total.. . . .	72

At least three other mining companies of world note have taken options on property in this district and will have their own engineers make examinations during the coming summer.

The most pressing needs of this promising district are roads and telegraphic communication.

The silver-lead properties on Spotted Fawn creek, a tributary of Twelvemile, is again receiving attention. A company known as the Spotted Fawn Company has been organized in New York and all arrangements perfected to commence operations on quite an extensive scale during the coming summer.

YUKON COUNCIL

The Yukon Council was in session from April 7 to 28 and legislation of considerable importance was enacted.

The existing Game Law was repealed and a new ordinance enacted.

An ordinance was also passed prohibiting the sale of intoxicating liquor for beverage purposes.

HOSPITALS AND PUBLIC HEALTH

St. Mary's hospital at Dawson and the General hospital at Whitehorse rendered their usual adequate services in their respective fields.

A modern X-ray machine was installed by the Government in St. Mary's hospital, the hospital having built a suitable addition for X-ray room.

EDUCATION

The public and high schools at Dawson and Whitehorse have been kept at their usual high state of efficiency. The number of pupils enrolled was slightly in excess of last year.

An assisted school was maintained at Mayo.

LAW AND ORDER

No serious crime was committed in the territory during the year. The Royal Canadian Mounted Police performed their usual efficient services. Frequent patrols were made to outlying districts.

SESSIONAL PAPER No. 25

REPORT OF THE CROWN TIMBER AND LAND AGENT, DAWSON

The revenue of the office for the year was \$13,144.65. Statement lettered "A" shows revenue collected in the Timber Branch from royalty on wood cut on timber berths. Dues paid in connection with timber and wood permits, seizure dues on wood cut in trespass, and dues in connection with hay permits. Statement lettered "B" shows revenue collected in the Lands Branch in connection with land rentals, land sales, office fees, rental of coal lands and homestead entries.

These statements show a total increase in revenue compared with last year of \$2,365.20, the increase in the Lands Branch being \$165.10, and in the Timber Branch, \$2,200.10.

Ninety-one permits to cut wood and timber were issued during the year. The number of feet b.m. cut under permits during the year on which dues were paid was 115,363 feet. Number of cords cut under authority of permits during the year 8,478. Other timber cut under permit, 1,000 fence poles. Number of feet b.m. cut and sold under license during the year, 16,361. Number of cords cut under license and sold, 2,750½.

COAL

The Five Fingers Coal Company operated their mine at Tantalus, but the supply of coal furnished the Dawson market was inadequate owing to the fact that barges could not be secured to transport the coal from the mine.

AGRICULTURE

The farmers have had a successful year. On account of the dry summer the potato crop although not up to the average in quantity was of good quality and brought high prices. The yield of other vegetables was satisfactory.

Great difficulty has always been experienced by the farmers in securing their seed grain, the oats sown being generally the ordinary feed oats, which necessarily does not give the best results. The territorial Government, realizing this fact and in an endeavour to assist the farmers, authorized the purchase of grain and fertilizer to be sold to the farmers at cost. One car of seed and one car of fertilizer was consequently imported last fall and has been distributed for use this spring. If this experiment works out satisfactorily, it will probably be continued on a larger scale another year.

REPORT OF INSPECTING ENGINEER OF MINES, O. S. FINNIE

During the year 1920, the production of coal in Alberta exceeded that in any previous year. In the province of Saskatchewan the production was somewhat less than the previous year owing to the fact that more Alberta coal found its way to the Saskatchewan and Manitoba market.

For the purpose of comparison, the schedule below indicates the output from these provinces for the two years, 1919 and 1920. It is divided into three classes, viz., coal subject to royalty on Dominion Lands, coal subject to royalty on School Lands, and coal not subject to royalty:—

Province	Calendar Year	Output subject to Royalty		Output not subject to Royalty	Total Output
		Dominion Lands	School Lands		
Alberta.....	1919	2,601,807	271,091	2,131,370	5,004,268
Saskatchewan.....	1919	43,037	22,062	319,018	384,117
Alberta.....	1920	3,631,672	523,318	2,752,773	6,904,935
Saskatchewan.....	1920	41,798	45,952	217,372	346,328

It will be observed that only a little more than half the total production is subject to royalty. This is accounted for by the fact that royalty is not levied on unmerchantable slack or on coal consumed under boilers at mines or coal taken from road allowances. Neither is it exacted on mines located on Hudson's Bay lands or lands given as subsidies to railways or lands disposed of prior to the introduction of royalty.

The following schedule indicates the total number of coal mines operated during 1919 and 1920, also those subject to royalty and those not subject to royalty:—

Province	Calendar Year	No. of Operating Coal Mines		Not subject to Royalty	Total
		Subject to Royalty			
		On Dominion Lands	On School Lands		
Alberta.....	1919	176	10	69	255
Saskatchewan.....	1919	55	6	3	64
Alberta.....	1920	177	16	76	269
Saskatchewan.....	1920	58	10	4	72

During the year all mines in the producing fields of Saskatchewan were inspected and surveyed. Estevan, the largest centre, has been very active and with the completion of the Government briquetting plant, the activity should materially increase.

The mines of southern Alberta, including Crowsnest Pass, in addition to those in the foothills south and west of Calgary, were inspected during the year. On the south branch of Sheep creek, in the Kootenay Coal Measures, considerable development work was done and it is altogether probable that sometime in the future a new field will be opened which will be one of the largest in the province.

The Drumheller field has also had an active season, having taken out more coal than during any other year. The Canadian Pacific Railway branch line from Acme to Drumheller is opening a new coal area along Kneehill creek, known as the "Carbon Field." At the present time development on a large scale is taking place and no doubt several new mines will be in operation during the coming year.

Thee Brazeau territory, west of Rocky Mountain House, is another field in which extensive development work was done. A considerable number of claims were staked

SESSIONAL PAPER No. 25

in the vicinity of Saunders creek and a number of new mines opened. The boundaries of many of these claims overlapped, but during the year practically all the location posts were tied to the various section corners. In this way accurate descriptions by section and legal subdivision were possible. The description appearing in the leases by metes and bounds were substituted for the more accurate description.

The Yellowhead field, west of Edmonton, also developed a number of new mines, some of which are operated by steam shovel, and the output from this field also exceeded that of any previous year.

Two mining inspectors are located permanently in the west, their offices being in the Lancaster building, Calgary, where they make their headquarters.

In the Petroleum Engineer's Department a number of special and detailed investigations were undertaken in addition to the routine inspections and reports. Operations with the department's mudding and cementing equipment at the "wild" gas well of the Canada Cement Company at Medicine Hat were successfully completed. Many requests for advice and assistance from operators were complied with as far as it was within the power of the petroleum engineer and his assistant to do so.

Office records were enlarged and systematized. The careful classification and tabulating of well records is a very important part of the petroleum engineer's duty. Efficient supervision of boring operations cannot be carried on unless detailed information of the condition of the boreholes is intelligently compiled. At the present time we are endeavouring, with some success, to obtain data on boreholes drilled in former years. Before the office was established very little effort had been made to preserve this valuable information.

In September, 1920, Mr. C. W. Dingman was appointed temporarily to the position of petroleum and natural gas inspector.

Towards the end of the year the petroleum engineer was called to Ottawa to assist in the revision of the Petroleum and Natural Gas Regulations for the Northwest Territories.

A summary of the boring operations in Western Canada is herewith submitted.

GENERAL

Boring operations for oil and gas were commenced on fifteen new locations in the period April, 1920-March, 1921, as follows:—

In Manitoba.. . . .	1
In Saskatchewan.. . . .	3
In Alberta.. . . .	9
In British Columbia.. . . .	2

One well was officially reported abandoned during the year. Three wells reported a flow of gas and one well brought in a production of oil.

Boring operations were conducted more or less actively on twenty-eight different locations.

NORTHERN ALBERTA

Peace River Field.—The controlling of heavy flows of water at the base of the cretaceous still remains a problem with the operators. Seven or eight wells have been temporarily abandoned because of water trouble. Until the flow of water is successfully controlled, no idea of the productivity of this field can be formed.

Arrangements have been made to place the department's mudding and cementing equipment in the Peace River field during the 1921 season for the purpose of sealing off the water sands in the wells already drilled, and to develop a method of boring through the sand to test deeper horizons for oil.

Natural gas is being wasted in considerable volume from the wells which are temporarily abandoned.

CENTRAL ALBERTA

Birch Lake Field.—A borehole has been “spudded in” on the S.W. shore of Birch lake in section 14, township 50, range 12, west of the 4th meridian.

Viking Gas Field.—In townships 48 and 49, ranges 12 and 13, west of the 4th meridian.

No boring operations were conducted in the Viking gas field during the year. Nine (9) wells were drilled in and capped. All these wells produce gas with an open flow capacity ranging from 2,000,000 cubic feet to 8,000,000 cubic feet per twenty-four hours. The depth of the gas horizon is from 2,150 feet to 2,220 feet. A water horizon was penetrated below the gas, but has been effectively sealed off in all the wells. The total open flow capacity of the proven field is 40,000,000 cubic feet per twenty-four hours, indicating a working production of about 16,000,000 cubic feet per twenty-four hours. All these wells are maintained in excellent condition. No gas has been produced, but the field was drilled for the purpose of supplying Edmonton with gas by the Northern Alberta Natural Gas Development Company.

Czar Field.—A well is being drilled on crumpled beds in Legal subdivision 10, section 17, township 39, range 7, west of the 4th meridian, by the Northwest Company, Limited. Three water horizons were penetrated at 224 feet, 440 feet and 600 feet respectively, and have been effectively closed off.

Monitor Field.—Three drilling outfits, one of these being a rotary drill, are operating south of Monitor, Alberta. When inspected in November, 1920, none of these had drilled over 100 feet.

FOOTHILLS SOUTH OF CALGARY

The Turner Valley Field.—An unfortunate occurrence during the year was the destruction of the gasoline absorption plant, operated by the Calgary Petroleum Products Co., Limited. Before the fire the plant produced from 500 to 700 gallons of gasoline per day from 2,000,000 cubic feet of gas produced from the company's two wells.

The Southern Alberta Oil Company, the Alberta Southern Oil Company, the Alberta Petroleum Consolidated Oil Company, the Illinois-Alberta Oil Company, and the Calgary Petroleum Products Company all produced oil during the year. Figures indicating the production from the field are not available.

Active boring operations were carried on at two locations in this field during the year.

Willow Creek Field.—Boring operations are being conducted on the S.E. $\frac{1}{4}$ of section 29, township 14, range 2, west of the 5th meridian.

The Alberta Associated well in Legal subdivision 5, section 7, township 16, range 2, west of the 5th, which had been closed down for a number of years, was cleaned out and the borehole is now being deepened from 2,700 feet. Some “shows” of oil are being obtained.

Pincher Creek Field.—Two boreholes are being sunk south of the town of Pincher on the N.E. $\frac{1}{4}$ of section 14, township 4, range 30, west of the 4th meridian, and on Legal subdivision 1 of section 20, township 3, range 29, west of the 4th meridian. At the latter location gas flows have been encountered. In the Waterton Lake district of the Pincher Creek field the attempts which have been made to clean out the old Lineham well (a producer in the early days) have been abandoned. An exploratory diamond drill hole is now being bored close by.

SESSIONAL PAPER No. 25

SOUTHERN ALBERTA PRAIRIE

Bow Island Gas Field.—A detailed investigation of the Bow Island field was carried out and a report submitted. The investigation brought out the following facts regarding the field:—

- (1) The gas "pool" is practically exhausted.
- (2) The field produced about 28,756,000,000 cubic feet of gas up to 1919.
- (3) The amount of gas remaining in the field is about one-quarter of the volume removed, but only a fraction of the remaining volume will be recoverable.
- (4) The original gauge pressure of the field registered 750 pounds, and in 1919, the pressure was 250 pounds.
- (5) "Edge" water is gradually encroaching on the gas field and the marginal wells are being "drowned out."

The company operating in this field employ very efficient methods and all the wells are maintained in as good a condition as is possible. The flooding of the sand with water is the result of natural conditions, and is not caused by improper drilling methods.

Medicine Hat—Redcliffe Field.—One borehole has been "spudded" in lately at Redcliffe, but no other boring operations were commenced. Medicine Hat city is carrying on commendable work in repairing old wells having defective casing which allowed an appreciable leakage of gas into the formations. The Medicine Hat field is showing a decided decline. Recent pressure tests indicate a drop of 50 pounds in the gauge pressure during the year.

SOUTHERN SASKATCHEWAN FIELD

Drilling has been in progress on Legal subdivision 4, section 9, township 1, range 27, west of the 3rd, near the Manitoba boundary. There has been some structural disturbance here in the upper Belly river beds, and a well has been located on this folding.

A borehole is being drilled on the bank of the South Saskatchewan river in Legal subdivision 2, section 30, township 19, range 11, west of the 3rd meridian, in search of gas to supply Moosejaw and Regina. The boring here has been beset with many difficulties caused by running sands, and the first attempt to sink a well had to be abandoned.

CENTRAL SASKATCHEWAN

A well is being drilled on section 7, township 39, range 22, west of the 3rd meridian, near the town of Unity, Saskatchewan. These drilling operations have not been inspected.

BRITISH COLUMBIA

The boring operations which are being conducted near Vancouver were not inspected during the year.

NORTHWEST TERRITORIES

The report of the flow of oil in the Northwest Company's well near Fort Norman, on the Mackenzie river, was received too late for an inspection to be made during 1920. It has been arranged to inspect the drilling operations in the Mackenzie district during the coming season.

The following information regarding the strike has been supplied by the company:—

The well is located on E. Proctor's claim, Lease No. 11491, on the north bank of the Mackenzie river, about forty miles down stream from Fort Norman. The rocks

12 GEORGE V, A. 1922

penetrated are limestone and shales of Middle Devonian age. Almost every porous bed from a depth of 180 feet yielded oil at the rate of one to two barrels per day, and gas in increasing volume. At 783 feet a crumpled and faulted shale horizon was penetrated and yielded oil in large quantities. The oil flowed from the well by "heads," but it was immediately capped, and no attempt made to measure the capacity of the well. An analysis of the oil is submitted:—

Distillation:

70° — 150°	— 23.8%	gasoline
150° — 300°	— 38.2%	illuminating oil
300° — 350°	— 33.7%	light lubricating oil
350° — 375°	— 4.0%	medium lubricating oil
Loss	— 0.3%	

OPERATIONS WITH THE MUDDING AND CEMENTING EQUIPMENT

There are defective wells in Western Canada, which have defied all the efforts of the operators to repair. Among these are "wild" gas wells which waste large volumes of gas, and also wells that have encountered heavy flows of salt water, which, when not sealed off, threaten to ruin adjacent oil and gas sands.

In view of these conditions the department acquired a complete mudding and cementing equipment, to be under the charge of the petroleum engineer's staff. Upon application by an operator who is having difficulties in controlling his well, the use of the equipment may be obtained.

The success of the first operation undertaken fully justified the expenditure incurred in obtaining the equipment. The Canada Cement Company's well No. 5, at Medicine Hat, had been wasting gas at the rate of 2,000,000 feet daily for five years, and during that time various engineers and drillers had been attempting, unsuccessfully, to close the well. Four months after the department's staff began operations the gas flow was effectively sealed off.

Arrangements are now being made to move the equipment to Peace River, where several wells have been turned over to the petroleum engineer for cementing off water sands and controlling gas flows.

SESSIONAL PAPER No. 25

REPORT OF THE CONTROLLER, TIMBER AND GRAZING LANDS BRANCH, B. L. YORK

The total revenue derived from timber, grazing and hay lands during the fiscal year amounted to \$807,119.23. This is an increase of \$119,717.40 over the revenue for the past year.

TIMBER

Statements "A," "B," and "C," showing the total revenue, the revenue from the timber by agencies, and other sources of revenue by agencies, also statements from the Crown Timber Agents at Calgary, Edmonton, Prince Albert, Winnipeg, Kamloops, New Westminster and Revelstoke, showing the revenue collected within their respective agencies and other information, are appended hereto.

The report of the Superintendent of Dominion Timber Agencies, and the reports of the Inspectors of Ranches located at Calgary, Moosejaw and Prince Albert are also attached.

The revenue from timber, grazing and hay lands received at the Crown Timber Agencies, also the number of mills operated under license, and the number of mills operated under permit are as follows:—

Agency	Total Revenue	No. of Mills operating under license	No. of Mills operating under permit
	\$ cts.		
Calgary.....	55,024 88	11	13
Edmonton.....	156,020 51	30	89
Prince Albert.....	83,650 78	29	43
Winnipeg.....	116,621 24	29	51
Kamloops.....	54,817 98	8	—
New Westminster.....	141,356 45	30	—
Revelstoke.....	33,593 11	13	—

12 GEORGE V, A. 1922

The return of operations received from the timber agencies show the quantity of timber and also other material manufactured and sold under license, to be as follows:—

	Manufactured	Sold
Sawn lumber, feet B.M.....	266,990,738	227,111,196
Railway ties.....	728,819	880,369
Laths.....	25,546,350	18,395,600
Shingles.....		31,000
Mine props.....	564,207	513,857
Mine ties.....	4,029	4,029
Cordwood.....	1,593	1,593
Piling.....	253,704	283,440
Telephone poles.....	32,865	
Shingle bolts (cords).....	28,437	
Fence posts.....	124,089	
Round timber.....	2,394,642	
Logging cords.....	113	113

The total quantity of timber and other material manufactured and sold under permit and portable sawmill herths is as follows:—

	Manufactured	Sold
Sawn lumber, feet B.M.....	54,975,092	51,596,362
Railway ties.....	268,363	
Shingles.....	437,000	529,000
Laths.....	5,343,680	5,343,680
Fence posts.....	533,970	
Fence rails.....	14,591	13,565
Cordwood.....	9,572	8,702
Telephone poles.....	2,176	431
Mining timber, lineal feet.....	3,076,572	2,718,735
Mine ties.....	8,978	8,306

The quantity of lumber manufactured and sold within each agency will be found in the agent's report appended hereto.

SESSIONAL PAPER No. 25

The area of timber lands held under license and permit in the provinces of Manitoba, Saskatchewan, Alberta and British Columbia is as follows:—

	Under License Square miles	Under Permit Square miles
Manitoba.....	1,028.69	392.97
Saskatchewan.....	1,528.74	144.78
Alberta.....	1,899.85	137.70
British Columbia.....	1,726.59	8.83
	6,183.87	684.28

During the year there were 171 berths granted, of which there were three license berths, 26 permit berths, 67 portable saw-mill berths and 75 cordwood berths. This is an increase of 42 berths granted during the previous year.

GRAZING

On March 31, 1920, there were in force 6,201 grazing leases, covering an area of 6,487,634 acres as follows:—

	Acres
Manitoba.....	140,629
Saskatchewan.....	3,021,556
Alberta.....	2,908,215
British Columbia.....	417,234
	6,487,634

During the year 640 new leases were issued.

The falling-off in hay revenue is due to the abundant hay crop throughout the west in the year 1920, which enabled many to meet their needs from their own lands.

REPORT OF THE FINANCIAL CONTROLLER, G. D. POPE

STATEMENT of Revenue Collected from Various Sources during the Fiscal Year ended March 31, 1921, as follows

A. Dominion Lands, including Yukon.. . . .	\$ 4,086,076 49
B. School Lands.. . . .	4,480,270 67
C. Ordnance Lands.. . . .	8,887 88
D. Registration fees, Yukon.. . . .	448 31
E. Fines and forfeitures.. . . .	1,139 75
F. Casual revenue.. . . .	811,970 45
G. Seed grain and relief repayments.. . . .	773,200 67
H. Sales of railway lands, special account.. . . .	27,602 30
	<u>\$10,189,596 52</u>

A statement of revenue on account of Dominion Lands marked "I", shows the receipts classified under sub-heads.

Statement marked "J" shows a comparison between the revenue of the present fiscal year and that of the previous twelve months.

12 GEORGE V, A. 1922

REPORT OF THE ORDNANCE AND ADMIRALTY LANDS BRANCH, FOR
THE FISCAL YEAR ENDED MARCH 31, 1921
JOS. P. DUNNE, SUPERINTENDENT

Within the period covered by this report one sale of land by public auction was held in the city of Sorel, concerning which a detailed account is given under that locality.

With respect to those properties previously sold or occupied under leases granted under the provisions of the Ordnance and Admiralty Lands Act, or originally issued by the Imperial authorities with the privilege of converting those leasehold properties into freehold on payment of the purchase price in full, five whole lots or parcels and three part lots situated in the respective localities hereunder mentioned have been paid for in full and letters patent issued therefor.

KINGSTON

One lot forming part of "Artillery Park" and which was sold and paid for in full some years ago, letters patent being withheld, however, pending the filing of a suitable plan and description. Satisfactory arrangements having been made with the present owner, letters patent were issued for the lot in question.

MONTREAL

When the property known as the "Logan Farm" was subdivided and sold certain streets and lanes were laid down on the plan, which streets and lanes became vested in the corporation, so long as the same continued to be used for the purposes for which they were set apart. The adjoining land was acquired by the Notre Dame Hospital and as the corporation of the city of Montreal conveyed to the hospital authorities the interest held in the lanes in question, the Crown confirmed the transfer by relinquishing its claim and granted letters patent in the form of a Quit Claim deed.

NEPEAN

The lots referred to under this heading form part of the subdivision of township lots 39 and 40, first concession, Ottawa Front, now within the limits of the city of Ottawa. During the past fiscal year two whole lots and one part lot were redeemed and letters patent issued.

The sum for which these lots were sold is \$644.58, of which \$410.24 was received within the fiscal year.

OTTAWA

Certain lots in this locality are occupied by tenants under leases granted by the Imperial authorities and amongst other things provided these tenants may obtain title in fee simple for the land occupied on payment of the purchase price in full. During the fiscal year one whole lot and two part lots were redeemed and letters patent issued therefor. The total amount of consideration money received was \$474.25.

SOREL

Twenty lots or parcels of land, forming part of the reserve lying south of Victoria street, in the city, were offered for sale at public competition and sold to the corporation of the city of Sorel. The amount realized on the sale was \$16,801.64, of which \$4,819.35 was paid in cash.

The following statements are hereto annexed, namely, "A," "B," "C," and "D," which are self-explanatory.

SESSIONAL PAPER No. 25

"A"

STATEMENT giving the number of lots and part lots sold or redeemed, the amounts for which such lots were originally disposed of and the sum received as instalment or balance of purchase money during the fiscal year ended March 31, 1921.

PART II

DOMINION PARKS

REPORT OF THE COMMISSIONER, J. B. HARKIN

In reviewing the work carried on in connection with the Dominion Parks during the past fiscal year it is gratifying to note that in spite of unfavourable economic conditions, which necessitated expenditure on development and publicity being reduced to the lowest possible amounts, the national parks have had one of the most successful years in their history. The steady increase in travel, not only to such famous resorts as Banff, Lake Louise and Glacier, but to the smaller and less widely known parks as well, is an indication that the parks are fulfilling the purpose for which they were created and that they are rendering a service to the Canadian people truly national in scope. Waterton Lakes park, in southern Alberta, though small in area compared with some of the other parks, had nearly 14,000 visitors, an increase of several thousand over any previous year. This park can be reached only by motor. An analysis of the registrations shows that while the bulk of its traffic was drawn from Alberta a large number of visitors came from the other provinces and from the United States and other foreign countries as well. A similar increase was shown at the Wainwright and Elk Island buffalo parks and also at Yoho and Glacier and Point Pelee, while the parks among the Thousand Islands were crowded with visitors, picnickers and campers practically every day during the season.

The largest percentage of foreign travel went, as usual, to the great resorts in the Rockies. At these places the volume of travel was so great that it was difficult at times to supply adequate accommodation and during the height of the season the facilities of both railways and hotels were severely taxed. Plans were made some time ago for increased hotel accommodation at several of these points but owing to the unsettled labour conditions they are being held in abeyance. The following statement based upon hotel registrations and a careful estimate made by the officers in charge of the parks shows the volume of travel during the past year:—

Rocky Mountains park..	78,882
Yoho park..	2,500
Glacier park..	3,779
Mount Revelstoke park (estimated)..	4,000
Waterton Lakes park..	13,750
Jasper park..	10,000
Buffalo park..	7,500
Elk Island park..	4,300
Point Pelee park (estimated)..	6,000
St. Lawrence Islands (estimated)..	20,000
	150,711

An analysis of this traffic reveals that from 50 to 60 per cent of the travel to the resorts of the Rockies is from foreign countries. In the smaller and less widely known parks the patronage is more largely local. The total number of foreign visitors to the parks in the Rockies last year was approximately 50,000. Allowing an average expenditure of \$300 for each foreign visitor, this travel represents an indirect revenue

12 GEORGE V, A. 1921

to the country of \$15,000,000. Capitalized on a basis of a five per cent dividend it means that the mountain parks alone are worth \$300,000,000 to the people of Canada. This does not take into account the money the parks keep at home by providing Canadians with unequalled recreation and pleasure grounds or the direct revenue derived from park licenses, sale of privileges, timber, etc., which last year amounted to over \$81,000. The total appropriations for all the parks last year were approximately \$720,000; that is, the cost of maintenance and development for all the parks was less than one-quarter of one per cent of the capitalized value of the foreign tourist traffic mentioned above. It must be remembered, too, that a considerable part of this appropriation was spent on new road construction forming an investment on capital account which will bring in its own revenue in the near future. The total expenditures for national parks since 1896 have been a little over \$5,000,000; that is, the whole cost of maintenance and development of the national parks during the past 25 years has been a little more than one-third of the foreign revenue which the mountain parks brought into the country last year.

TOURIST TRAVEL IN CANADA

A noticeable feature with regard to tourist traffic generally has been the tide of travel turning toward Canada in the past two years. This is probably the result of the greater advertising being done by Canadians and partly the result of conditions arising out of the war. Whatever the cause, it is evident that Canada is being discovered as a playground. Practically every province reported the heaviest travel in its history last year. British Columbia, according to figures compiled by Reginald Davidson, Publicity Commissioner for Vancouver, derived a revenue of \$20,000,000 from this source, one-third of which came to Vancouver. Tourist travel to Montreal in 1919 was estimated at \$4,000,000, and last year's business, as about one-third greater. The St. Lawrence resorts and the Muskoka and Georgian Bay districts and the Maritime Provinces all had a record year. The value of motor travel alone from other countries into Canada was probably \$20,000,000. According to figures furnished by the Department of Customs over 93,300 cars entered Canada during the calendar year 1920. Of these 1,800 registered for more than one month and 91,500 for a shorter period. Allowing an average expenditure of \$15 per day, including gasoline and garage charges, for the first class of car and an average length of stay of thirty days, this traffic amounted to \$810,000 while the second class of car, on a basis of an estimated expenditure of \$25 per day for seven days, was worth \$16,000,000, or \$16,810,000 in all. That is, the motor highways of Canada brought in last year a foreign revenue equal to the above sum. Estimated on the basis of a five per cent dividend, Canadian roads were, therefore, worth \$340,000,000 to the country without taking into account the service they rendered Canadians themselves. While no definite figures have been compiled I believe that the total value of tourist traffic into Canada last year would be not less than \$75,000,000.

And Canada's resources in this respect have only begun to be developed. In her climate, her virgin forests, her big game and fishing, her picturesque Indian and French Canadian traditions, her great hinterland of wilderness, she possesses a wealth of natural attractions capable of practically unlimited development. But it must be remembered that tourist traffic is largely a matter of stimulus and at the present time Canada is competing with many other countries which are putting forth highly organized efforts to attract and take care of this traffic. The European nations are making strenuous efforts to regain their pre-war revenues. The French Bureau of Touring is carrying on a very active propaganda. Switzerland and Italy are making special efforts to re-attract their former patronage. Belgium since the war has spent 16,000,000 francs in rebuilding her roads so as to fit them for motor travel. The Automobile Association of Great Britain is making arrangements for the reception

SESSIONAL PAPER No. 25

of foreign motorists on an organized scale as yet unknown in this country. In the United States the "See America First" and the National Parks movements, backed by the almost universal support of the press and practically every public spirited organization in the country, have been engaging in an active propaganda encouraging Americans to keep their travel money at home. The value of their national parks as a means of attracting tourist traffic is widely recognized. The Director of the United States National Parks Service say in his last report:—

"Beyond the Mississippi the fact that the parks are the great lodestones of the West has been fully acknowledged. They attract visitors as do nothing else. People of all classes and means arrive. Every visitor is a potential settler, a possible investor. Were each visitor to spend an average of \$100 on his tour, and this figure I feel confident is considerably below the average, it means \$100,000,000 left on these park trips alone—not within the parks solely but along the whole route of travel, left in this country for the development of our industries and resources rather than to accrue to the benefit of foreign countries."

Travel to the United States parks has increased from 356,097 in 1916 to 1,058,455 in 1920. On the same basis of value as given by the Director of the National Parks Service above, this means that travel to the United States parks was worth \$65,000,000 more in 1920 than in 1916; that is, the parks have increased their national value to the country to that extent. This is largely due to the widespread support of the parks movement in the United States. It constitutes the best argument that can be made in favour of an active policy of publicity and development in connection with the Canadian national parks and scenic resources generally. It shows not only what could be accomplished in Canada, but the competition Canada must meet, if she is to develop her own industry to achieve similar satisfactory results.

MOTOR TRAVEL

An analysis of the travel to the United States parks indicates that tourists coming by private automobile represent 65 per cent of the park visitors. This is largely due to the fact that the principal parks are all accessible by good motor roads and the majority linked up by their magnificent park-to-park system. As soon as the Canadian Transmontane highway is completed I look forward to the same increase of travel to the Canadian parks. Everything seems to point to the motor as the great factor in transportation for the next twenty years. A comparison of railroad mileage with highway mileage in the United States shows that the latter is ten times greater than the former. There are at the present time 2,478,552 miles of highways and 253,626 miles of railways in the United States. Registrations in January, 1920, showed that there were over 6,000,000 cars in the country or approximately one to every seventeen of the population. It is to the motor that we must look for the greatest development in so far as tourist travel is concerned and this consideration has a definite bearing on the development of park policy. It means that the construction of good roads within and linking up with the parks and the great highways of the country becomes of paramount importance and it also means the provision of campsites and other conveniences suited to this form of travel.

MOTOR HIGHWAYS

With this in view construction work in the Canadian parks for several years past has been centred on the development of our road system, the most important feature of which at the present time is the construction of the road from the Vermilion summit to the Columbia valley. As has been pointed out before this road is the last

12 GEORGE V, A. 1921

link necessary to open up the Rockies to through travel from both east and west. It will link up the Canadian parks with the United States park-to-park highway system and allow the motorist to go from Banff to California by a direct route via the most remarkable scenery on the continent. Work on parts of this section is very heavy owing to the extensive rock cutting involved. Much of it is solid rock excavation with cuts ranging from 20 to 60 feet. The long distance from a base of supplies also adds to the difficulties of the work and these have been increased by the labour stringency, but, considering the difficulties, good progress has been made. Contract for three miles of road on the western end through the narrow Sinclair valley, which had been constructed by the British Columbia Government some years ago but which had been washed out, was let in August, 1919, and the work concluded in 1920, including four truss bridges. The completion of this section opens up $8\frac{1}{2}$ miles of splendid scenery and makes the summit of Sinclair pass accessible to motor traffic. The scenic beauties of this district will make this one of the most attractive sections of the route. Among the interesting features are the wonderful upper Sinclair canyon, lake Olive and what is known as Red Bluff. One mile west of Sinclair summit there is also a viewpoint from which a magnificent panorama of the Kootenay valley can be obtained.

On the west end of the road grading work was also carried on by day labour from the end of the above section under contract to mile 13 from the Columbia valley road. During the winter months, clearing the right of way was undertaken at the west end of the road, and by March 31, 12 miles of the Kootenay section had been cleared. At the east end of the Banff-Windermere road, on what is known as the Vermilion section, 5 miles of new road were opened up during the summer months. The grading work at this end was very heavy and, owing to a lack of labour, progress was retarded. Clearing work was also undertaken on the Vermilion section during the winter months and on March 31 some nine miles had been completed.

Two truss bridges were constructed on this section during the winter, the larger over the Kootenay river at Kootenay crossing consisting of a 70-foot round timber truss. A 40-foot round timber truss was also constructed at Hawk creek and a good start made on a 140-foot bridge over the Vermilion river.

CASTLE-LAGGAN ROAD

The final $10\frac{1}{2}$ miles of this important highway were completed at the close of the season and the road will be thrown open for traffic during the early part of the 1921 season. The completion of this highway has been anxiously awaited by eastern motorists. It opens up the beautiful Lake Louise and Moraine lake districts and gives access to Paradise and Consolation valleys, two of the loveliest valleys in the mountains, the latter of which affords good fishing in its lakes. The distance from Calgary to Lake Louise is about 110 miles and the trip can be easily made in seven hours. This makes it a week-end possibility from Calgary and other points in Alberta and a very heavy travel may, therefore, be looked for over this road in the near future.

MOUNT REVELSTOKE MOTOR ROAD

In Mount Revelstoke National park the construction of the Mount Revelstoke motor road was continued under contract under the supervision of the parks highway engineering division. Owing to a very late season and to a wet fall in this locality, less than two months of favourable weather was experienced and the work called for by the contract was not completed. It is expected that the remaining $1\frac{1}{2}$ miles of work embraced by the contract will be completed in the season of 1921. The objective of the road is the summit of Mount Revelstoke where there are many hundred acres of open park-like country. The total length will be in the neighbourhood of 18 miles, of which $12\frac{1}{2}$ miles have already been constructed.

SESSIONAL PAPER No. 25

BRIDGE CONSTRUCTION

Two large and important bridges were constructed under the supervision of the parks highway engineering division during the past year. One of these was a 290-foot wooden truss bridge over the Kickinghorse river at Field, Yoho park, to replace the old wooden bridge which had become dangerous to traffic. This bridge consisted of three spans and was constructed with a curved upper chord which adds much to its appearance. The total cost was \$13,500.

In Jasper park a new steel bridge of 150-foot span was erected over the Athabaska river at a total cost of approximately \$21,000. The concrete piers and the approach work were completed by day labour while the steel work was let out by contract. This bridge is to replace the old bridge over the Athabaska river on the road to Maligne canyon, which was in a very bad condition.

In addition to the above contract work several miscellaneous surveys were carried out by the engineering division, the most important of these being the reconnaissance survey of a motor road between Field and Golden. Some six miles of the road west of Field are already constructed and the reconnaissance made covered particularly that section between Leanehoil and Golden. This portion of the road follows through the famous Kickinghorse canyon and will necessarily be very high in cost. If constructed, however, it would be one of the most spectacular roads from a scenic standpoint in the Canadian West.

PROTECTION OF ANIMAL LIFE IN THE PARKS

It may be of interest to note that the extension of our roads and trails system has an important bearing upon the question of game protection. According to reports received from the warden staff as soon as a road or trail is constructed into a new district the wild animals make use of it to come into the parks. Following the construction of the Transmontane highway over the Vermilion summit numbers of sheep and goat have been observed entering Rocky Mountains park via this roadway and it is noticed that all game in that part of the park has noticeably increased.

Yoho Park made Sanctuary.—The results of absolute protection have again been demonstrated in Yoho park where, owing to the agreement completed with the province of British Columbia, the parks' game regulations have been in force since January, 1920. Reports from the officers in charge of this park state that almost immediately an increase in many forms of wild life was noticeable. Bear, moose and deer roam the park at will and seem to know that no harm will befall them, while goat, grouse, ptarmigan and beaver are rapidly becoming more numerous.

Increase in Other Parks.—A similar steady increase is reported from the other parks. Sheep are to be seen almost constantly on Sofa mountain near the townsite of Waterton Park and beaver are becoming very numerous. In Jasper park, in addition to the continued increase in big game, the superintendent reports that valuable fur bearing animals such as beaver, fisher, marten and mink are evidently greatly on the increase.

Elk.—The elk, or wapiti, procured from the Yellowstone National park, Wyoming, and liberated in Rocky Mountains and Jasper parks have done well. The chief game warden of the former park reports that all the animals seen are in fine condition and that there is a large percentage of young in the herd. The chief game warden of Jasper park reports a similar increase and states that no dead have been found since June 1, 1920, indicating that, except for the few which were injured in shipment, the herd has adapted itself to its new environment and is now in a

thriving condition. There is, therefore, good reason to believe that the areas within the parks suited to elk will again soon become stocked with these magnificent members of the deer family.

Antelope.—The antelope herd in the fenced enclosure at Nemiskam, Alta., continues to thrive, and the caretaker reports that a number of fawns were noticed among the herd this spring. Only one dead was found during the year. This was a young buck, thought to have been killed while fighting. While it has been impossible to secure an accurate count of the number, it is believed that there are upwards of 100 now in reserve, an increase of over 60 since the herd was enclosed.

So far as is known this is the most successful experiment yet made in breeding antelope in captivity, and the satisfactory results attained lead to the consideration whether the policy should not be further extended. According to reliable reports there are no antelope left in Manitoba today. In Saskatchewan they are fast disappearing. One of the last large herds in Canada, and in fact on the continent, is to be found in Alberta, in the "bad lands," within a radius of about 30 miles from the town of Brooks. Recent reports indicate that there are probably 300 antelope scattered among the sand hills in this locality. The land is said to be absolutely worthless for agricultural purposes and cannot be irrigated. It consists of a succession of sand hills running back into deep coulees, which afford the antelope good shelter in storms. The creation of another reserve in this section would not be a difficult matter and it is, I believe, the only means of saving this last herd from extinction. Judging from the rapid disappearance of the antelope in Western Canada during the past fifteen years, there will not be a single wild antelope left in Canada in a very few years. If this interesting native animal is to be preserved for posterity, action will need to be taken at once.

Buffalo.—At the close of the fiscal year the Government buffalo herds number 5,152 in Buffalo park, Wainwright, Alta., and 230 in the Elk Island park, Lamont, Alta., with 11 in the Buffalo exhibition herd at Banff, or a total of 5,393 in all. The proportion between the sexes is now about even, which means that there are about 1,000 more males in the herd than are required to maintain it in its best condition. The question of the best disposal of the surplus animals has been under the consideration of the department, and it has been decided during the coming winter to slaughter about 1,000 males and to dispose of the meat, heads, and hides. Buffalo meat is as tender and palatable as the best beef and a market should be readily found for it. A very considerable revenue should also be secured from the sale of the heads and hides. During the past season the question of corrals, sorting pens, and receiving pastures necessary in connection with the scheme has been carefully gone into and provision has been made in the estimates for the work being undertaken during the coming year, including the construction of a building for storing and handling the meat during the winter months.

If the herd continues to thrive as it has done in the past, it is believed that the department will have 1,000 surplus buffalo to dispose of every two or three years and I think we may confidently look forward to securing a revenue which will in a few years have paid for the total expenditure on the buffalo, including purchase, fencing of park and maintenance, while still maintaining the herd at about 6,000 head. The future revenue from these, deducting the cost of maintenance, will then be clear gain.

PARK FARMS

The policy of the growing of feed within the parks for park animals continues to justify itself and is the means of a considerable annual saving to the department. Farms are now maintained in Elk Island, Rocky Mountains, Waterton Lakes and Buffalo parks. The season's operations in the first three consisted of the following:—

SESSIONAL PAPER No. 25

PARK FARMS—*Continued*

Green Feed—

Hay—		
Headquarters.....	65	tons.
District No. 1.....	9.63	tons.
	74.63	tons

Green Feed—

Headquarters..	39	loads	7,800	sheaves.
District No. 5..	8	loads	1,600	sheaves.
	47	loads	9,400	sheaves.
Elk Island Park.....	350	tons hay		
Rocky Mountains park.....	102	tons of hay cut on shares system.		

The most extensive farming operations are carried on at Buffalo park, where there is a farm of about 600 acres. This park has about 100 horses, and in good seasons the crop is sufficient not only to supply all the requirements of the park but also to allow shipments of hay and oats to other Dominion parks. During the past season about 400 acres were put to oats and 200 summer-fallowed. The crop, which was almost double that of the preceding year, totalled 12,450 bushels of oats, 250 tons of straw and 900 tons of hay. The problem of conserving the fertility of the soil at Buffalo park has been the subject of a good deal of consideration. As the needs of the parks' service only call for oats, the usual practice of rotating crops is not practicable. By summer-fallowing 200 acres each year and putting the remaining 400 to crop, up to the present good results have been obtained. But if an enriching crop such as clover or rape could be got to grow in conjunction with the oats no doubt the yield would be increased. Unfortunately the true clover, which does so much for the fertility of farms in the East, will not thrive in the Buffalo park district. During the past two years experiments have been made in growing rape with the oats. These have not been very successful, but it is hoped with deeper ploughing and a favourable season better results will be obtained this year. An experimental plot of 5 acres is also being seeded with sweet clover to see if this species can be made to grow in the district.

GRAZING

The dry summer of 1919 proved so destructive to the natural browse in Waterton Lakes park that in order to protect the wild life it was decided to considerably restrict the number of grazing leases. Leases covering the grazing of about 1,900 head were granted during the year, as compared with 2,900 the previous year. This allowed the vegetation to recover itself and an amply supply of food was available for the wild life during the winter season.

Grazing permits in the national parks are limited to cattle and horses. The question of permitting sheep to graze in the parks did not arise until 1918, when applications were received from sheep owners in the neighbourhood of Waterton Lakes park. After carefully considering the question, the department was convinced that the presence of sheep threatened the purpose for which parks are fundamentally established, namely, the preservation of certain areas in an absolutely natural condition, including the native fauna and flora, and for this reason it was decided to ban sheep definitely from park areas. As is well known, sheep by reason of their close-cropping habits are excessively destructive to shrubs and plant life which form the browse of cattle and wild animals such as deer and elk. The unhappy results pointed out by Prof. Henry Fairfield Osborn, President of the American Museum of Natural History, New York, following sheep grazing in the country lying between Arabia and Mesopotamia, confirm the fears with regard to the dangers of grazing sheep on semi-arid lands. "I am convinced," he says, "that this country, formerly densely populated, full of beautiful cities, and heavily wooded, has been transformed less by the

12 GEORGE V, A. 1921

action of political causes than by the unrestricted browsing of sheep and goats. This browsing destroyed first the undergrowth, then the forests, the natural reservoirs of the country, then the grasses which held together the soil, and finally resulted in the removal, by erosion, of the soil itself."

During the past year the question has been brought up in a new form by the receipt of applications from stockmen to drive sheep across Waterton Lakes park to grazing lands in British Columbia. After carefully considering the matter, the department decided that such permission would be a serious detriment to park interests unless the applicants agreed to fence the route on both sides through the park. Up to the present no applications for the necessary permission have been received.

FISH AND FISHING

The fishing in the parks on the east slope of the Rockies constitutes an important attraction and the good results obtained from the restocking of the lakes and streams are now widely evident. During the month of July about 1,000 pounds of trout and Rocky Mountain whitefish were taken in Rocky Mountains park, in addition to 800 pounds of Great Lake trout from lake Minnewanka, and 6,300 pounds in all in the month of August. In Waterton Lakes park the fishing is always exceptionally good. Last season a record catch of a 51-pound trout was made by a lady visitor who succeeded in gaffing and landing the fish by her own unaided efforts. The question of amendments to the fishing regulations so as to further protect this valuable resource is now receiving consideration.

FOREST PROTECTION

The season of 1920 was a very dry one in the parks and constant vigilance with regard to forest fires was necessary. While a number of fires were started, in the great majority of cases, owing to the prompt action of the warden service and the improved equipment with which all the parks are now provided, damage was restricted to a few acres. The following is a statement of the number and causes of fires and estimated damage:—

SESSIONAL PAPER No. 25

Name of Park	Campers or Smokers	Railway	Unknown	Lightning	Other causes	Total	Areas burnt over (acres)			Cost of extinguishing			Fires Grand total

12 GEORGE V, A. 1921

The great success which has attended the use of the portable fire units developed by the Parks Branch a few years ago suggested the development of a larger engine for use in connection with fires along our motor roads and, in September, a three-quarter ton Reo chassis, with hose body and pressure pump, capable of delivering 130 gallons per minute at 120 pounds pressure, and equipped with 2,000 feet of 2½-inch hose and two play pipes, was sent to Rocky Mountains park for fire fighting purposes. The trial tests of this engine showed that it surpassed even our expectations and I believe it will prove of very great assistance in forest protection work. The fact that a large proportion of park fires are caused by engines and that the motor road parallels the railroad for a great part of the way through the park will make it possible to utilize this engine in connection with a large percentage of the fires that break out.

New construction in connection with the forest protective system during the year was as follows:—

Name of Park	Tele- phone Mileage	Cabins	Trail Mile- age	Stables or Barns	Speeder Houses	Shelter	Well for Fire Units Supply	Equip- ment Store- house	Fire Unit Garage
Rocky Mountains.....	39½	2	49	2	1			1	1

Buffalo.....		1							
Pt. Pelee.....						1	1		
Elk Island.....									
Totals.....	88½	13	78	15	2	1	1	1	1

An additional assignment of 10,000 pipe protectors, which very effectively prevent sparks from pipes setting fires in dry places, was purchased in June, 1920, for distribution among visitors to the various parks.

PARKS PUBLICITY

For the first time since 1914 a small appropriation was available for publicity purposes and it was possible to undertake the re-publication of some of our parks pamphlets as well as the issue of some new ones. These were urgently required as owing to the steady demand for information practically all our editions were on the verge of exhaustion. A new edition of "Glaciers of the Rockies and Selkirks," an attractive monograph on glacial formations by Prof. A. P. Coleman, of Toronto University, which has proved very popular, was put in hand as well as a new and revised edition of "Guide to Fish and their Habitat in Rocky Mountains Park." Considerable new data has been added to the latter and it is being enlarged so as to cover the fishing waters of the three parks on the eastern slope of the Rockies all of which contain the same species of game fish. Material for a new descriptive booklet on the parks through the central Rockies and Selkirks along the main line of the Canadian Pacific Railway was also prepared and is now in the hands of the printer. A small folder "Where to go and what to see at Banff," another on Golf at Banff and a folder to be distributed in connection with some coming European exhibitions are now in course of preparation.

A unique souvenir which has attracted considerable attention was issued in connection with the forest protection educational campaign. This was a small

SESSIONAL PAPER No. 25

aluminum luck charm called "Buffalo Medicine," enclosed in an attractive paper facsimile of an Indian pouch. An enclosed leaflet related the Indian legend connected with the charm and made the forest protection appeal in an unusual way. Ten thousand of these souvenirs were distributed but the demand for them has been so great that a new edition will probably be issued in the near future.

Another attractive device in connection with the same campaign was the issue of automobile stickers designed to be attached to the windshields of cars entering the parks where they will serve as a constant reminder with regard to fire. The design chosen for Rocky Mountains park was the head of a Bighorn, for Waterton Lakes park, a Dolly Varden trout.

Splendid publicity was given the Canadian parks at the International Alpine Congress held at Monaco in May. Mrs. Julia Henshaw, author of "Wildflowers of the Canadian Rockies," and Mr. Byron Harmon, the well-known mountain photographer, were the Canadian representatives and they took with them a number of very fine park films loaned by the Exhibits and Publicity Branch of the Department of Trade and Commerce as well as a collection of about fifty sepia enlargements of striking park pictures. The Canadian programme proved of such interest that it was twice repeated, once at the special request of the Prince of Monaco himself. At the close of the congress the President, Baron F. Gabet, addressed a letter to the Canadian officials thanking them for their participation and stating that Canada's share in the congress had been "the most brilliant and the most important whether from the point of communications presented or of exhibition." As the congress embraced representatives from all the Alpine organizations of the world, the attractions of the Canadian Rockies as a new field for alpine work were brought to the attention of thousands of climbers and I have no doubt that Canada will benefit largely from this publicity. At the conclusion of the proceedings permission was granted to present the exhibit of enlarged photographs to the Club Alpin Francais where they will serve as a valuable and permanent advertisement of the Canadian mountains.

The demand for the loan of motion picture films, lantern slides and half-tones of park scenes is increasing from year to year. The Exhibits and Publicity Branch of the Department of Trade and Commerce have now seventeen films on their list depicting national parks subjects. These films are in almost constant circulation and form one of our best mediums of publicity. The Parks Branch also has about 500 coloured slides of birds, animals, flowers and scenery which are in almost constant circulation. During the year slides and lecture notes were furnished to several well-known speakers who were giving a course of lectures in Great Britain and Europe and wished to include a lecture on the Canadian National parks. While the Parks Branch has at the present time no official lecturer, a considerable number of addresses were given voluntarily by members of the branch.

A greater demand from Canadian magazines and newspapers for articles, photographs and material with regard to the national parks was evidenced than ever before, indicating that the Canadian public is beginning to take a more active interest in these great national possessions. A number of well known magazine writers were furnished with the necessary data and illustrations for articles on various phases of the parks and their work. These articles appeared in some of the prominent English and American periodicals.

A delegation of the Imperial Press Association comprising nearly 200 journalists from all parts of the Empire, with their wives and daughters, toured Canada during the summer and visited a number of the national parks. Although their stay in each was necessarily short the extent and beauty of these great reservations made a deep impression on the members of the party and after their return many articles appeared in their respective journals in praise of the attractions of the Canadian parks and appreciation of the ideals behind them.

WALKING TOUR CAMP

A new way of seeing the Rockies was made possible last summer by the inauguration of the so-called "Walking Tours." These were organized by Mr. A. O. Wheeler, the energetic director of the Alpine Club of Canada, and were intended not only to stimulate the healthful art of pedestrianism but also to make it possible for people of limited means to enjoy a holiday among the mountains at moderate expense. As is well known, some of the finest and most spectacular scenery in the parks lies out along the trails, remote from railways, and hitherto it has been open only to those wealthy enough to afford the expense of a pack train. The objective selected by Mr. Wheeler was mount Assiniboine, the highest and perhaps the most beautiful peak in Rocky Mountains park, which lies about 20 miles south of Banff in a direct line or about twice as far by trail. The surrounding district is a very fine one and the route to the peak lies through alpine scenery of great beauty. A headquarters camp equipped with large dining and living tents and small tents for sleeping and in charge of a competent staff, was established on lake Magog directly below the magnificent massif of Assiniboine and parties under the protection of experienced guides left Banff each day for the camp during the camp season. The trip was timed to cover from two to three days and ponies were available for those who found the walk too fatiguing. Two in-between camps were also established at the end of each day's march—Sunshine Camp, 12 miles from Mount Edith landing, and Golden Valley Camp. These were also fully equipped so that touring or fishing parties could remain as long as they desired. About 275 visitors travelled over the route during the weeks the camp was in operation. Among these were several publicity men including the official photographer of the Canadian Pacific Railway, a representative of the Chester Production Company, and Mr. Brauson de Cou, the well-known lecturer of New York, all of whom secured some excellent pictures. It is expected that the camp will be continued during the coming season and if the scheme proves a success the intention is to extend the policy to other parts of the park.

AIRSHIPS AT BANFF

An application was received during the year from the Rocky Mountains Aviation Transport Company, Limited, for a lease of land at lake Minnewanka and at the second Vermilion lake for a sea-plane harbour. The company plans to operate a sight-seeing aeroplane system to enable visitors to view the Rockies from the air. Passengers will be taken up to a height of 2,000 or 3,000 feet which will afford a wonderful panorama of the ranges but no attempt will be made to cross the high peaks. In view of the attraction of such a service to summer visitors the application was favourably considered and a suitable area will be selected on each of these lakes for a landing and taking-off place and marked off with buoys and signs so that boating parties will be protected. The intention is to use the second Vermilion lake during the first part of the season but if its waters become too shallow during the height of the summer to utilize the landing place at lake Minnewanka. Plans for the construction of a hangar at the latter lake are also being considered.

WATERTON LAKES PARK

The rapid development in the service which this park is furnishing to the public is a matter for much satisfaction. During the past three years the number of visitors has more than doubled, largely as a result of the improved condition of the roads to and within the park. The demand for lots for permanent summer homes has also been heavy. All indications point to this becoming one of the most popular of the Dominion parks in the near future. The fishing is unexcelled, the scenery as beautiful as any to be found in the Rockies with a character distinctly its own. Towards the close of

SESSIONAL PAPER No. 25

the fiscal year Mr. W. Thomson, golf professional at Banff, was sent to Waterton Lakes park to lay out the course for a new nine-hole links. Mr. Thomson selected an area about a mile and a quarter from the townsite of Waterton Park on a high bench overlooking the Waterton lakes. He reports the site admirably adapted for the purpose, with fine sporting hazards, a good natural turf and wonderful scenery. Work on the course will be carried on immediately and it is hoped to have it ready for play before the close of the season.

JASPER TOWN PLAN

A preliminary plan of the proposed development of Jasper townsite was furnished early in the summer by Mr. Thos. Adams, Town Planning Adviser to the Commission of Conservation. Mr. Adams visited Jasper in May, accompanied by Mr. A. G. Dalzell, Engineering Assistant, and investigated the question of water supply and drainage in a preliminary way and also drew up a sketch of the proposed plan of extension of the street system and made recommendations with regard to a suitable hotel site. Such a plan will be of great value in the future development of the town and Jasper is fortunate in having practically no existing construction which will interfere with the carrying out of such a scheme from the beginning. Before it is finally adopted, however, some additional survey work will be necessary to secure complete data with regard to levels, drainage, etc., a work which it is hoped the Surveyor General's Branch will be able to undertake early during the coming year.

ARTISTS' AND AUTHORS' COLONY

Miss Agnes Laut, the well-known Canadian author, has selected an area in Jasper park on the shores of lake Edith, on which she proposes to form a colony of authors, artists and professors, a number of whom will come from New York to spend their summer amid the inspiring scenery of the park. Plans for several of the proposed bungalows have been approved by the department and three of these are now under construction.

AIR-FLIGHT STATION IN JASPER

Jasper park was one of the landing stages in the transcontinental air-flight from New York to Alaska successfully carried out last August under the command of Capt. Street. The site selected was near old Henry House, about 10 miles from Jasper townsite, and according to reports published by the air men it proved one of the best landing places encountered in the trip. Its one drawback owing to its distance from Jasper is the difficulty of forwarding supplies and it has therefore been decided to make provision for a permanent landing place within the town itself. A suitable area has been selected and will be included in the proposed Jasper town plan.

WAR TROPHIES

Through the courtesy of the War Trophies Commission a number of captured guns were allotted to the Parks Branch and have been placed in Dominion parks in different parts of the country. It is felt that the parks are a very appropriate place for these trophies in view of the large number of people from all parts of Canada as well as other countries who visit them each year. One German 77 M. gun was placed at Jasper, one gun and two machine-guns at Banff, one gun and two machine-guns at Fort Anne and one gun at Fort Chambly.

IRRIGATION PROJECT

A scheme which would have had a serious bearing on the future of Waterton Lakes park came up for discussion during the year. This was a proposal submitted by the Superintendent of Irrigation for the utilization of the waters of Upper Waterton

12 GEORGE V, A. 1921

lake for irrigation purposes in southern Alberta. The scheme involved the building of a 40-foot dam at what is known as "The Narrows" and the creation of a storage reservoir of over 100,000 acre feet. The resulting elevation of the water level would have caused serious damage to the park, including the flooding of the townsite of Waterton Park, the park's headquarters. After going more fully into the matter, however, the Irrigation Branch decided that the plan would involve a very heavy expenditure and that its undertaking was not feasible at the present time. The matter is therefore being held in abeyance.

Applications for private interests for water-power rights in other parks have also come before the department during the past few years. The stand taken by the Parks Branch with regard to such applications is that the parks are the property of all the people of Canada and that consequently they should not be developed for the benefit of any one section of the country or of private interests; second, that such development constitutes an invasion of the fundamental principles upon which parks have been established, namely, the conservation of certain areas of primitive landscape with all their original conditions of plant and animal life and other natural features intact. National parks are in reality natural museums of undisturbed nature. As time goes on they will probably be the only places which will present a perfect picture of natural conditions such as existed when the white man first came to this continent. The national parks from this aspect are valuable now but they will be many times more so 100 years hence when probably every part of the country will have been settled. Moreover the national parks contain only a small proportion of the water resources of the country and, so long as other sources can be developed, to injure or destroy the recreational values of the parks might be an economic policy of the poorest kind. The Director of the United States Parks estimates that the value of the travel which annually goes to Niagara to view the great spectacle of the falls is worth from \$30,000,000 to \$40,000,000, while, he says, it has been estimated that Niagara developed as electrical horsepower, at the rates charged at present in a wholesale way, could at the most produce less than \$15,000,000 a year.

In previous reports I have shown that the foreign tourist traffic to our oldest national park—Rocky Mountains—has been estimated to be worth not less than \$15,000,000. This is a revenue which is increasing annually. I look forward to its becoming in time \$30,000,000 a year. Unless power development could be carried on without damaging the scenic values of the park it would, I think, be poor policy to endanger such a potential revenue. The following extract from a letter from Albert B. Fall, Secretary of the Interior, Washington, to Hon. Chas. L. McNary, Chairman of the Committee on Irrigation and Reclamation, United States Senate, with regard to the proposed Walsh Bill for power development in Yellowstone park, gives the statement of his policy with regard to the United States National Parks, a policy which I think might well be adopted in this country:—

"I cannot favour the enactment of the measure. I do not believe it would be advisable for Congress to permit private interests to develop irrigation or power sites within the limits of existing national parks. These parks were created by Congress for the preservation of the scenery, forests, and other objects of beauty and interest in their natural conditions, and they are created and maintained for general and national purposes as contradistinguished from local development.

If cases be found where it is necessary and advisable in the public interest to develop power and irrigation possibilities in national parks, and it can be done without interference with the purposes of their creation, I am of the opinion that it should only be permitted to be done, whether through the use of private or public funds, on specific authorization by Congress, the works to be constructed and controlled by the Federal Government."

SESSIONAL PAPER No. 25

EXTENSION OF PARKS POLICY

The growing appreciation of the value of national parks and their increasing use by the people serve to emphasize not only the need for preserving the parks we already possess but for an extension of the policy to meet the needs of the whole country. The parks as they are today will unfortunately for geographical reasons always be beyond the reach of many thousands of Canadians. Yet the things the parks have to offer are needed by all sections of the people, and nowhere more so than near our large centres of population. The increasing strain and complexity of city life make the necessity for recreation, change, escape into a simpler environment, greater each year. The mile-a-minute existence of the modern city forces us too often to run 20-horsepower human engines at a 40-horsepower speed. The result is an increasing number of nervous and mental breakdowns. The figures for insanity and organic diseases, due to deficient vitality, have been steadily rising during the last quarter of a century largely owing, it is said, to overstrain and monotonous conditions of labour. Recent experiments show that fatigue, even fatigue from purely manual labour, is more a matter of the brain and spinal cord than of the muscles, that capacity for work depends on nervous energy and that that capacity is increased by rest and recreation. Tests worked out by Dr. Stanley Kent, in connection with his studies on munition workers in England, showed that capacity for work or what is called "reaction power," that is the ability of the nerves to respond, the quality of "snap" or the capacity to think quickly, to make prompt decisions, was highest on Monday after the week-end holiday and lowest after overtime work, while on Saturday which was a half-day with the prospect of the holiday ahead, the men finished with the same capacity for work as when they began. These experiments, carefully carried out as they were, go to show that unless provision is made for adequate rest and recreation there must be a gradual lowering of the nervous system and consequently of the capacity for work, resulting finally in a weakening of the general vitality. After the enormous sacrifices that have been made for the safety of the country the conservation of the vitality of the race is surely a question of first importance and no means of preserving or increasing that vitality should be neglected. It is in this connection that national parks become valuable. The city worker, in addition to his long hours of monotonous labour, has too little sunlight, air and freedom. Life in the crowded anthills of our great cities exhausts nervous energy. Contact with nature, escape into the freedom, solitude and the ample spaces of the country is often a positive need. And it must be nature in her wildness rather than the cultivated nature of the city park.

Leon Rosenthal in his recently published *Villes et Villages Français après la Guerre*, writing of the increased need of parks for the workers, says: "The simple aspect of the country is not enough for him. He craves a suggestion of the wildness of mountain scenery, the calm of the lake, the turbulence of cascades," and Mr. Rosenthal is asking the French landscape architect to create these artificially to meet what is apparently an instinct on the part of the worker. Fortunately on this continent there is no need to resort to artificiality. There are areas still within easy reach of all our large cities which could be procured and set aside as national parks where nature is practically undisturbed. The benefits which would result would be incalculable. Indeed I am convinced that the expense involved would be paid for by our unused gaols, asylums and hospitals within a comparatively few years and we should at the same time be building up a healthier, happier and better citizenship by bringing the life of nature back into the life of the masses. It has been said that Great Britain's notable series of contributions to civilization are "bounded on the east by the Magna Charta and on the west by the week-end". The statement was no doubt made humorously but it is scientifically true that the habit of recreation and change which has been adopted by the British people as a whole has done much

12 GEORGE V, A. 1921

to add to the general well-being and happiness as well as the capacity for labour. The creation of national parks within easy access of our great cities where thousands of workers could spend the week-end camping and fishing would result in human dividends worth many times the capital invested.

HISTORIC AND PRE-HISTORIC SITES

Good progress has been made with the work of the preservation of historic sites of national importance during the year. The Historic Sites and Monuments Board, which acts in an advisory capacity to the Government in connection with this work, has held to date two general and five local meetings. In view of the large field to be covered and of the great number of places of historic interest throughout Canada, it was recognized that before undertaking any extensive preservation or marking, a Dominion-wide historical survey was necessary to collect information with regard to all existing sites and to decide which of these were of national importance. This survey has been carried on during the year by the members of the board, each of whom is a specialist in his own division of Canadian history. The co-operation of thirty-four historical societies and associations interested in the preservation of Dominion landmarks has also been secured. To date 547 sites have received the attention of the board and 46 have been selected to receive attention. Action with regard to a number of these has been taken as follows:—

MARITIME PROVINCES

Louisbourg, N.S.—Ruins of old French fort, built in 1720-40, once the stronghold of France at threshold of continent, played an important part in the events which led to withdrawal of French rule from Canada. This was one of the first sites to receive the attention of the board. An official of the Parks Branch was detailed to make an investigation and report and steps were taken to secure title to lands on which the ruins of the old fort stand.

Fort Edward, Windsor, N.S.—Formerly old French fort Piziquid, which came into possession of the British soon after the establishment of British power at Halifax, 1749, and was used for many years for defensive purposes against the Indians and Acadians. The barracks and original blockhouse intact. Controlled by Militia and Defence Department. Previously under lease to town of Windsor. Protective clauses concerning the historic buildings have been inserted in the new form of lease, to be signed.

Fort Moncton, about one and a half miles from Fort Elgin, N.B.—Formerly old French Fort Gaspereaux. Erected by the French about 1750 at Bay Verte, to command defence of the Isthmus of Chignecto against the British. Captured in 1755 by the British. All that remains is the square of trenches. There are old grave stones, and the ancient turnpike and causeway across a tract of marsh as well as the contour of the walls can be ascertained without difficulty. It is proposed to erect a cairn and tablet. The site is privately owned and the consent of owner to sell has not yet been obtained.

Fort Cumberland, about four miles from Amherst, N.S.—Formerly old French Fort Beausejour, erected about the middle of the seventeenth century for protection against the English in the vicinity of Beaubassin, one of the most important French Acadian settlements, near the site of the flourishing town of Amherst. Captured in 1755 by British forces and village destroyed. Named Fort Cumberland in honour of Duke of Cumberland, son of George III. The ruins are still

SESSIONAL PAPER No. 25

visible in the shape of a pentagon or fort of five bastions, which once mounted thirty or forty guns of large calibre, also ruins of the old barracks. The casemates were very recently in a fair state of preservation having been built of solid brickwork. Action has been taken to have the ruins fenced and preserved from further deterioration.

QUEBEC

Hochelaga, Montreal, P.Q.—Site of the Indian town of Hochelaga on present grounds of McGill University. The University authorities have consented to allow the placing of a monument and tablet of suitable design.

Fort Crevier, St. François du Lac, P.Q.—Built in 1687-1714, as a protection against Indian attacks. A tablet and cairn have been recommended as soon as the necessary land can be secured.

Battle of Repentigny, P.Q.—To commemorate battle against Iroquois, June 7, 1691, in which a number of Canadians, including Lemoine de Bienville, were killed. A cairn and tablet are recommended and steps are being taken to acquire site.

Second battle of Laprairie, near Laprairie, P.Q.—To commemorate military operations which took place on same day as the first battle of Laprairie, between the French militia and the New England States militia. A cairn and tablet have been recommended.

St. Maurice Forges, near Three Rivers, P.Q.—The Forges were established in 1730 and operated until 1880, under both English and French regimes. There are only ruins left, which will not permit the placing of a tablet thereon. Permission has been granted by the Bishop of Three Rivers to place a tablet on the church, which is on the Forges site.

de la Verendrie, Three Rivers, P.Q.—To commemorate the birthplace of Sieur de la Verandrie, discoverer of the Northwest Territories. The site on which the house was situated, which is in a beautiful park, has been given by the city of Three Rivers. A cairn and tablet are to be placed there.

Battle of Three Rivers, P.Q.—To commemorate military operations in 1776 against the Americans. Cairn and tablet recommended. Owner of land has consented to donate the site.

Chateauguay, Allan's Corners, P.Q.—Area, .25 acres. A monument was erected on this site in 1895 by the Dominion Government to commemorate the battle of the 26th of October, 1813, between the Americans and British. The site which is fenced and in a good state of repair has been transferred by the Militia Department to the Parks Branch for historic memorial purposes.

Fort Lennox, Isle aux Noix, P.Q.—One of the forts which formed the line of defence in the Richelieu valley. Remains consist of earthworks and a number of well preserved buildings. The Department of Militia and Defence has agreed to the transfer of the whole island with five other small islands, covering in all 250 acres, for historic memorial purposes.

Fort Chambly, Chambly, P.Q.—The fort was built of palisades in 1665; burnt by Iroquois in 1702. Rebuilt of stone 1709-1711. Taken by the Americans in 1775, and interior buildings burnt in 1776. Restored in 1777; abandoned definitely in 1850. The present ruins consist of three well preserved outside walls and the old cemetery, containing 2.16 acres. This site was handed over recently by the Militia and Defence Department to this department.

EASTERN ONTARIO

Old Simcoe Building, Kingston, Ont.—Where Lord Simcoe held his first Executive Council in 1792. It is reported that the house has been removed from its original site. Matter being further considered.

Glengarry House, near Cornwall, Ont.—Site of the residence of Lieut.-Col. John McDonnell, a noted pioneer in the settlement of the province. First speaker of the Legislative Assembly of Upper Canada. Ruins of residence left. Cairn and tablet recommended when site is secured.

Windmill Point, Prescott, Ont.—To commemorate the victory over invading force of Filibusters, November 11-13, 1838. The windmill is now being used as a lighthouse by the Marine and Fisheries Department and the placing of a tablet has been allowed by that department.

Chrysler's Farm, Dundas County, Ont.—Area, .23 acres. A monument was erected here by the Dominion Government in 1895, to commemorate the victory over Americans at the battle of Chrysler's Farm, November 11, 1813. This site has been recently transferred from the Militia and Defence Department to this department.

WESTERN ONTARIO

Southwold Earthworks, near St. Thomas, Ont.—This site containing the Southwold Earthworks is the best example of aboriginal earthwork in Ontario, if not in Canada. It is identified at the Neutral Indian village called St. Alexis, probably built before 1650. It is recommended that 25 acres be purchased surrounding the earthworks for preservation and park purposes, although the site of the works only actually covers 2½ acres. The site is privately owned.

Port Dover, Ont.—(Site of the Cross) "*Cliff Site.*" The site is situated on a cliff, near the mouth of the river Lynn, overlooking lake Erie. The Sulpician Fathers Dollier and Galinée, near here, on March 23, 1670, erected a cross, with the Arms of France, etc., and claimed sovereignty in the name of King Louis XIV over the lake Erie region. It is proposed to erect a cross in cement, to place at the base thereof a tablet with a suitable inscription, and on either sides of the base to attach plates reproducing the original proces-verbal in French and in English, with the arms of France over these. "*Wintering site.*"—This site is about three-quarters of a mile from the mouth of the river Lynn. Here in 1669-1670, the above Sulpicians and seven other Frenchmen, the first Europeans known to have ascended the Great Lakes to Sault Ste Marie, wintered. Earthen mounds are the only remains of their hut, which served for residence, chapel and fort. A cairn with a tablet and fence is proposed.

Sault Ste. Marie, Ont.—Site of the old lock at Sault Ste. Marie constructed by the Northwest Fur Company in 1797. Part of the old lock has been restored. The erection of a monument with a tablet is recommended. The owners of the site will allow the placing of a monument.

Mission of Ste. Marie I, on the Wye, near Midland, Ont.—This site, a fortified mission built by the Jesuits in 1639 and occupied for ten years, consists of a stone fort and other works. The missionaries were forced to burn and abandon the mission on account of the Iroquois persecution. The owner of the site wrote to the effect that he did not wish to dispose of the property at present but would allow the department to carry on restoration work. The erection of a monument with tablet and restoration work is proposed.

SESSIONAL PAPER No. 25

Mission of Ste. Marie II, on Christian Islands, near Penétanguishene, Ont.—This is the second fortified mission built by the Jesuits in 1649 after the burning of Ste. Marie I, on the Wye, above referred to and occupied from 1649 to 1650. It is situated on Christian island, which is an Ojibway Indian Reserve. The Indians by a resolution have allowed this department to fence the site, erect a monument with tablet thereon and carry on certain restoration work, as recommended in a report made by an officer of the department who visited the site.

Mission of St. Ignace, Township of Tay, Simcoe County, Ont.—This is the probable site where the Jesuit missionaries Breboëuf and Lalement were tortured and put to death by the Iroquois in 1649. The owner of the land has consented to transfer the site with a right of way thereto gratuitously to the department. The erection of a monument with a tablet and the construction of a fence is recommended by an officer of the department who visited the site.

Niagara Front, Ont.

The historic places on the Niagara front, extending from lake Ontario to lake Erie, have already been fairly well marked, with the exception of a few sites. In order to complete the marking of this front, it was recommended that the following sites were of national importance and should be dealt with.

Chippewa.—Site located in an open field on south side of river, in front of Laura Seoord's cottage. Battle July 5, 1814, between United States and Canada. More British soldiers were killed at Chippewa than in any other engagement in the war. It is proposed to place a tablet on a monument constructed by the Niagara Falls Park Commission.

Frenchman's Creek.—Landing place of Fenian Raiders, May 31, 1866. On this site was fought the action of Frenchman's Creek, November 27, 1812, between the United States and Canada. Several non-commissioned officers and men of the Royal Artillery, 49th Regiment, and Norfolk Militia were killed in this action.

Vrooman's Battery.—This site is situated on private property, below Queenston on the left bank of the river, near the house formerly owned by Solomon Vrooman. The battery was employed in the Battle of Queenston Heights, October 13, 1812. The gun mounted here fired 112 rounds on that day.

The Niagara Falls Park Commission has consented to erect the monuments on these three sites, provided the department supplies the tablets, an offer which it is proposed to accept. The monuments will be prominently placed.

Battle of Cook's Mills.—This site is situated on Lyon's Creek road near the town hall of the township of Crowland, about three miles east of the city of Welland. Here was fought the Battle of Cook's Mills on October 19, 1814. Several non-commissioned officers and men of the 82nd, 100th, and 104th Regiments and Glen-garry Light Infantry were killed in this action.

Battlefield of Fort George.—This site is situated on the Lake Shore road, near Two Mile creek, some distance outside the limits of the town of Niagara. An action was fought here on May 27, 1813, which resulted in the capture of Fort George by the Americans.

Battlefield of Beechwoods or Beaver Dams.—Site located on the Mountain road, in the township of Stamford, near the town line between Thorold and Stamford. A battle took place here on June 24, 1813.

12 GEORGE V, A. 1921

Battlefield of Ridgeway.—Site located at the junction of the Garrison and Ridge roads, near Niagara. Here was fought the action on June 2, 1866, between a force of Canadian Militia composed of the Queen's Own Rifles, 13th Regiment, York and Caledonia Rifles, and a body of Fenians.

It is proposed to erect monuments with tablets on the four above-mentioned sites, when the necessary areas have been secured.

Site of Tête du Pont Battery.—This site is located on the little island (Hog island) at the mouth of Chippewa river. The battery was utilized for defence of the line of Chippewa creek, during September and October, 1814.

Weishuhn's Redoubt.—This site is located on private property on the point at and between the confluence of Lyon's creek and Chippewa river, and was utilized for the defence of the line of Chippewa creek during September and October, 1814. Stone markers with inscriptions are to be placed on these two sites.

Port Arthur, Ont.—It has been decided to erect a cairn and monument in Gore park, Port Arthur, to commemorate the landing of the first military expedition to the Northwest Territories under Col. (Field-Marshal) Wolseley, in 1870, the construction of the Red River road to Fort Garry and other early events associated with its history. The city has dedicated a site for this purpose.

WESTERN CANADA

Northwest Rebellion.—The board recommended that the sites connected with the Northwest Rebellion of 1882, namely, Batoche, Duck Lake, Fish Creek, Clark's Crossing, Cut Knife Hill and Frog Lake, should be considered as a whole. Steps are being taken to ascertain facts to be submitted for recommendation.

Fort Prince of Wales, Churchill, Man.—This fort was built by the Hudson's Bay Company, from 1733 to 1747. It was subsequently destroyed by the French in 1782. The site covers five acres situated at the mouth of the Churchill river. It is Dominion lands and a temporary reservation has been made. There are 38 old guns within the ruined walls, as well as the ruins of the factor's residence. The R.C.M.P. have consented to look after the site.

Battle of Seven Oaks, Winnipeg, Man.—The Lord Selkirk Association of Rupert's Land offered to transfer this site, containing approximately one-half acre, on which a monument has been erected to commemorate the above battle, which took place in 1816, between the Fur Trading Companies, where some settlers were killed, provided a monument was erected to the satisfaction of a committee of their members to commemorate the memory of Lord Selkirk and his people.

Fort Pelly, Sask.—This is one of the early Hudson's Bay Company's posts, and is situated in township 32, range 32, west P.M. It was thought desirable to restore, preserve, and maintain the buildings on this site, as a typical Hudson's Bay Company's post, on account of the association of these institutions with the early history of Canada. The company offered to sell the site to the department for historical purposes. The department has completed a survey covering an area of 5 acres surrounding the buildings.

A design for an artistic tablet to be used in connection with these sites has been furnished by the well-known Canadian artist, Major Lionel Fosberry, R.C.A., and the tablets are now being cast in bronze. An attractive design for a cairn has also been made by the engineers of the Dominion Parks Branch, and it is hoped, during the coming summer, that several of the above sites will be marked as suggested.

SESSIONAL PAPER No. 25

PROTECTION OF MIGRATORY BIRDS

The enforcement of the Migratory Birds Convention Act in Canada and the United States has already resulted in a marked increase in many valuable forms of bird life. This has been especially noticeable among the waterfowl, and reports received show that a notable increase in numbers has occurred in all parts of Canada. In portions of British Columbia during the past fall the shooting was better than at any time for years past; the number of breeding birds on the western prairies, where so many of the waterfowl of the continent are raised, has shown definite increase; and in the Maritime Provinces this spring there was a notable increase in the numbers of ducks and geese going north on migration. This widespread increase is attributed to two of the main features of the treaty, namely, the abolition of spring shooting and the general stopping of the sale of these birds for food purposes.

In June, 1920, an important amendment to the regulations under the Migratory Birds Convention Act was passed. The new features in this amendment were the provision of bag limits upon migratory birds throughout Canada which put into force a recent amendment to the Migratory Birds Convention Act; the provision of shooting restrictions which regulate the manner in which migratory game birds may be legally taken and the equipment that may be used for this purpose; the provision of more complete rules covering persons who wish to capture and keep protected birds for propagating purposes; and the provision requiring all taxidermists preparing protected birds for exhibition purposes to have a Federal license.

The organization for the enforcement of the Migratory Birds Convention Act throughout Canada and for increasing the spread of knowledge concerning this work has been improved by the addition of two chief officers, one for Ontario and Quebec, and one for the western provinces, whose duties will be to co-ordinate all efforts being made in these areas toward the protection of migratory birds. These two officers assumed their new duties late in 1920, and already important results have been obtained through their efforts.

The appointment of some seventy-seven honorary officers throughout Canada has been completed, and about fifty-eight more applications have been received and the appointments are under way. In addition, all fishery officers and overseers in Quebec and the Maritime Provinces have been appointed officers under the Migratory Birds Convention Act, and all officers of the Royal Canadian Mounted Police are game officers under this Act. Persons who are interested in furthering the work of protecting Canadian birds can find a valuable field for their endeavours by undertaking the duties of honorary game officers under the Migratory Birds Convention Act, as it is felt that there is still a large field in which these officers can be of value, and in which they can serve as centres for the dissemination of knowledge concerning bird protection matters and sources of information by which the efforts of this branch may be guided.

EDUCATIONAL WORK

Due consideration has been given the necessity for acquainting the public of Canada concerning the value of the three great groups of birds which are protected by the treaty. The migratory game birds are protected because they serve as an important food item and because they provide a means of recreation; the non-game birds are protected because of their beauty and aesthetic value; and the insectivorous birds because they serve as one of the most important natural agencies in the control of injurious insect pests. The losses to agricultural and other interests in Canada from insect pests amounted to many millions of dollars last year, and although the work of the birds in controlling these pests was obvious at only a few points, they

12 GEORGE V, A. 1921

were carrying on this work nevertheless, and must have succeeded in controlling many incipient outbreaks before these assumed epidemic proportions. During the grasshopper outbreak on the prairies many forms of birds were found to be depending upon the grasshoppers for food, and fortunate indeed was the community which possessed a suitable slough in which the Franklin's Gulls could nest, for that community was protected from the grasshopper outbreak by the vigilance of the birds.

Many pamphlets previously issued in the interest of bird protection have been re-printed because the demand for them continued long after the supply had been exhausted. New pamphlets were issued during the year as follows:—

Birds a National Asset (First edition published under title: Ministers of Agriculture Give Views on Bird Protection.)

Bird Houses and their Occupants, by P. A. Taverner.

Les Ministres de l'Agriculture donnent des idées sur la protection des oiseaux.

Maisons d'oiseaux et leurs occupants, par P. A. Taverner.

The posters used to acquaint the public with a summary of the Migratory Birds Convention Act were printed on cardboard for outside use, and through the co-operation of the Post Office Department copies printed on paper were distributed to each of the post offices in Canada.

The permission of each provincial Minister of Education has been obtained allowing the use of three lessons on bird protection in all of the schools of Canada and the material for these lessons has been prepared and they will be printed and distributed shortly.

Members of the staff have given about twenty-five lectures on bird protection subjects during the year. Mr. H. K. Job, Naturalist, of the National Association of Audubon Societies, was brought to Ottawa to speak, the lecture being given under the auspices of the Dominion Parks Branch and of the Canadian Field-Naturalists' Club. While Mr. Job was in Canada on this trip he gave about seven lectures to bird societies and others on bird protection matters, and the favour granted by the Audubon Society, which assisted in the arrangement of this trip, is much appreciated.

A motion picture showing nineteen Trumpeter swans on their wintering ground in British Columbia was taken in the winter of 1919-20, and, as these birds have long been considered on the verge of extinction, this picture has created great interest wherever it has been shown. A copy of it was presented to the National Museum of the United States in October, 1920, and was shown there in Washington, for the first time, at the annual meeting of the American Ornithologists' Union. It was shown as well at a meeting of the American Game Protective Association in New York, and has formed the basis of many talks on bird protection given by our officers at various places in Canada.

The collection of lantern slides in the branch has been increased as rapidly as funds would allow. These have been used by officers of the branch and by outsiders and in addition the latter have occasionally been supplied with the subject matter for bird lectures.

Newspaper articles have been distributed to the press wherever it was desired to give information concerning bird protection matters which were mostly local in character, and the press has co-operated in no small way in spreading valuable information concerning bird protection matters throughout the Dominion.

BIRD SANCTUARIES

In June, 1920, seven bird sanctuaries in the province of Alberta were finally established by Order in Council and regulations were drawn up for their control. The final completion of the Saskatchewan sanctuaries is pending and a survey is to be made to locate suitable areas for bird sanctuary purposes in the province of Manitoba during

SESSIONAL PAPER No. 25

the summer of 1921. Advances have been made in providing protection for birds by bird sanctuaries in the province of British Columbia and in that province the land owners in some important areas have almost unaimously signed petitions asking for the ereation of bird sanctuaries which cover in part their privately-owned property.

Assistance was given to the Queen Victoria Niagara Falls Park Commissioners of Niagara Falls, Ont., in devising plans for making this attractive beauty spot a bird sanctuary. The efforts of the branch have also resulted in the purchase of an island in lake George by the town of Yarmouth, N.S., for the purpose of ereating the island a bird sanctuary and thus proteeting a colony of gulls which nest there.

PUBLIC SHOOTING GROUNDS

In addition to the bird sanetuary areas which are being set aside, it is considered desirable to reserve suitable areas in all available localities so that the public may have reasonable access to the game at all times. This may not be an important question in thinly settled portions at present, but the time may not be far distant when it will be exceedingly difficult for the shooter who is not a member of a game club to obtain any of the migratory game birds or other game birds which are the common property of the people of Canada. Consequently, in co-operation with the Provincial Governments, consideration is being given to the matter of locating and setting aside suitable areas as public shooting grounds.

PROSECUTIONS

It was necessary for the officers of the branch to take court action in 55 cases. Convictions were registered in 46 cases, in 4 of which the sentence was suspended, and in 9 instances the cases were dismissed. The total fines imposed amounted to \$648 while 7 guns, 1 boat, 36 mounted bird specimens, 2 sleds and 56 pieces of miscellaneous equipment were seized. Of this material 4 guns, 1 boat and 6 mounted specimens were returned to the defendants by the court.

A convietion was registered in the ease of *The King vs. Russell C. Clark* by the Supreme Court of Prince Edward Island, thus reversing the decision of the trial magistrate who had dismissed the case in the first instance. The decision of the court has been widely quoted as it shows the views of the courts on some important phases of bird protection.

INVESTIGATIONS

During the summer of 1920 further investigations were made with respect to the proposed bird sanctuaries in Alberta and Saskatchewan, and in February, 1921, some important work was done in connection with the large flock of Canada geese, which winters in the province of Nova Scotia.

Ninety-seven permits were issued allowing the holders to take birds for scientific purposes; five permits were issued allowing the eapture of protected birds for banding purposes, and 116 permits allowing the eapture and possession of birds for propagating purposes were issued. As it was found by competent fishery officers that certain birds were causing damage to fish hateheries in the province of British Columbia, permission was granted allowing the destruction of these birds while actually causing damage to the fish hatcheries.

WOOD BUFFALO PATROL

The wood buffalo patrol to protect the wild herd of these mammals which ranges in Northern Alberta and the adjoining Northwest Territories has been maintained throughout the year on the usual lines. Mr. F. H. Kitto, of the Natural Resources Intelligence Branch, Department of the Interior, traversed a portion of the wood buffalo area during the summer of 1920, and reported upon the condition of the herd.

12 GEORGE V, A. 1921

NORTHWEST GAME ACT

Licenses, under the Northwest Game Act which has been enforced throughout the year by the Royal Canadian Mounted Police, have been issued as follows:—

Licenses Issued

Hunting and Trapping.—Residents, 103; non-resident British, 21; non-resident non-British, 14.

Trading and Trafficking.—Residents, 159; non-resident British, 3; non-resident non-British, 8.

The revenue received from these licenses amounted to \$3,176.

The furs taken under license as given in returns received here during the year 1920-21 are as follows:—

Moose..	19
Caribou..	99
Mountain sheep..	1
Mountain goat..	1
Otter..	6
Beaver..	339
Martin..	897
Fisher..	14
Mink..	298
Muskrat..	7,834
Wolf..	10
Wolverine..	40
Coyote..	1
Lynx..	26
Skunk..	47
Ermine..	1,089
Bear..	24
Fox..	56
Fox, white..	344

The furs reported as traded, as taken from license returns received here during 1920-21, are itemized below and an approximate market value is placed upon the catch:—

	Number	Spring 1921 Average Market Price.	Approximate Market Value.
Otter..	62	\$ 24 25	\$ 1,503 50
Beaver..	1,589	15 00	23,835 00
Martin..	4,419	37 50	165,712 00
Fisher..	27	48 75	1,316 25
Mink..	3,236	12 00	38,832 00
Muskrat..	74,403	1 60	199,044 80
Wolf..	249	7 50	1,867 50
Wolverine..	303	6 00	1,818 00
Coyote..	3	7 00	21 00
Lynx..	113	18 00	2,034 00
Skunk..	100	3 60	360 00
Ermine..	5,877	0 85	4,995 45
Bear..	395	12 00	4,740 00
Fox..	494	15 50	7,657 00
Fox, white..	7,648	37 50	286,800 00
Fox, silver..	2	195 00	390 00
Fox, cross..	7	35 75	250 25
Fox, blue..	3	90 00	270 00
			\$661,446 75

The discovery of oil in the vicinity of Fort Norman, Northwest Territories, may lead to a further drain upon the game resources of the territories and special protective measures have been taken to insure respect for the law.

SESSIONAL PAPER No. 25

The wolf bounty paid during the year amounted to \$3,940, representing \$20 each for 197 wolves.

There have been three convictions for violation of this Act during the year. A fine of \$5 was imposed in one instance and three seizures have been made under the Act. In one instance two musk-ox skins found in the possession of a trader were seized and ordered returned to the Coronation Gulf Eskimos who had taken them.

MUSK-OX AND REINDEER

The report of the Royal Commission appointed to consider the advisability and feasibility of developing reindeer herds in Northern Canada and the domestication of the musk-ox has been placed before the Government and contains very valuable information on this question which will be of great service in the event of action being taken.

The only herd of domesticated reindeer in the Dominion, which had been under the control of the Department of Indian Affairs, was taken over by the Department of the Interior and the administration given to this branch during the summer of 1920. This herd, which is located at Old Fort, Quebec, numbering 142, was placed in charge of a competent officer and according to the latest report has increased to about 180.

The experience which is being gained in the handling of this herd should prove of great assistance in deciding upon a future policy with respect to the development of reindeer in Northern Canada as a source of increased food supply both for the natives and for Canada generally.

APPENDIX No. 1

REPORT OF THE SUPERINTENDENT OF ROCKY MOUNTAINS PARK,
R. S. STRONACH, BANFF, ALBERTA

The past fiscal year has been one of the most successful since the creation of this park. All records have been broken for number of bathers at the Government bath-houses, number of tourists visiting the park, motor traffic and revenue. A new record for the number of persons registered at the various hotels in Banff has been made and the public camping grounds were also well patronized, approximately 900 persons camping on these grounds during the season. The revenue for the past fiscal year collected by this office amounted to \$58,314.34, which is an increase of \$11,358.65 over the year 1919-20 which previously held the record for revenue taken in by this office. Although the number of building permits issued was not so large as for the year 1919-20, they called for construction to the estimated value of \$66,883, which is \$34,633 greater than for 1919-20.

ROADS

During the past year special attention was paid to the improvement and maintenance of roads, this work being necessary owing to the large increase in motor traffic. Although this is already large, when the highway from Banff to Windermere is completed, it will no doubt be much increased.

Very little rain fell during the past summer, consequently the surface of the roads dried out and maintenance charges were proportionately increased not only through lack of moisture, but owing to the fact that a very heavy motor traffic passed over all our roads.

12 GEORGE V, A. 1921

Approximately 5½ miles of road were coated with asphaltic oil, 18,488 gallons being used for this purpose. Seven miles of streets in Banff were also oiled. Most satisfactory results were obtained from this treatment of the road surfaces, and it is hoped that the mileage oiled will be greatly increased during the present year.

During the year the Alberta Provincial Government did a considerable amount of work on the road between Calgary and the eastern boundary of the park. This work, in conjunction with the work done in the park by the Parks Branch, now gives a first-class highway between Calgary and Banff.

Great difficulty was experienced during July, August and part of September, in securing sufficient labour to carry on the various works authorized due to the scarcity of labour through the demand for harvesters at that season, but fortunately we had a late and open fall which allowed us to catch up with the work.

ANIMAL ENCLOSURES

The exhibit of buffalo, which is always a great attraction to the many visitors to the animal enclosures, has been increased by the addition of five buffalo cows from the large herds at Wainwright. A young buffalo bull was also received from Wainwright during the year. Six Rocky Mountain goats captured during the early fall have been placed in the enclosures.

The following is a list of the animals now in the enclosures: 12 Angora goats, 6 buffalo bulls, 5 buffalo cows, 1 buffalo calf (male), 34 elk, 62 four-horned sheep, 1 moose (female) balance having been released during the fall, 1 Persian sheep (female), 5 Rocky Mountain goats, 17 Rocky Mountain sheep, 1 Siberian pony, 21 yak.

During the past year animals were shipped to the following points:—

Zoological Gardens, Washington, D.C.—2 Rocky Mountain sheep, 5 Rocky Mountain goats.

Zoological Gardens, New York.—4 Rocky Mountain sheep, 2 Rocky Mountain goats.

Stanley Park, Vancouver, B.C.—2 Rocky Mountain sheep, 2 Rocky Mountain goats, 2 Angora goats.

United States Government, Sitka, Alaska.—2 yak.

GOVERNMENT ZOO

Considerable maintenance work was done in connection with the fences, buildings and concrete floors of the animal cages in the Zoo. A heating plant was installed in the bird houses. By this means the pens in which the various specimens of birds are housed during the winter months are kept at an even temperature, a factor which helps greatly in keeping the birds in a healthy condition.

The following is the list of animals at present in the Zoo:—2 badgers, 2 bald eagles, 3 black bears, 2 bobcats, 4 Canada geese, 1 cinnamon bear, 2 cougars, 2 coyotes, 1 golden eagle, 3 gophers, 2 grizzly bears, 2 ground owls, 3 horned owls, 3 Lady Amherst pheasants, 1 mink, 1 Mongolian pheasant, 2 pea fowl, 4 pine martens, 1 Polar bear, 2 porcupines, 4 red foxes, 1 red tailed hawk, 8 Rhesus monkeys, 3 ring-necked pheasants, 2 silver pheasants, 1 timber wolf, 1 white ground hog, 2 wolverines.

GOVERNMENT BATHS

It is very gratifying to note that the two government bathing establishments again proved their popularity, new records in the number of bathers both at the Upper Hot springs and at the Cave and Basin being established. During the months of July and August accommodation at the Cave and Basin was taxed to the limit.

SESSIONAL PAPER No. 25

All the rooms in the new portion of the building were constantly occupied and the dressing rooms around the old disused pool were repaired and utilized to great advantage during rush periods. By this arrangement the congestion was somewhat relieved. The bathhouse at the Upper Hot springs also had a very successful season.

The numbers of bathers at the two bathhouses were as follows:—

	CAVE AND BASIN.			
			Receipts.	
	1920-21	1919-20	1920-21	1919-20
Number of bathers.. . . .	44,691	38,917	10,578 20	9,037 75

	UPPER HOT SPRINGS.			
			Receipts.	
	1920-21	1919-20	1920-21	1919-20
Number of bathers.. . . .	27,866	24,221	6,886 35	5,854 85

This shows an increase of 9,419 bathers over the record which was established during the previous year.

The cave at the Cave and Basin was also well patronized, the number of visitors registering being 23,425.

CAMPING GROUNDS

The public camping ground near the Spray river was extremely popular during the season. Two hundred camping permits were issued, an increase of 123 over the previous year. The increasing popularity of the campsite is shown by the number of permits issued during the four years it has been in operation:—

1917-18.. . . .	73
1918-19.. . . .	57
1919-20.. . . .	77
1920-21.. . . .	233

FISHING

Fishing in all the waters of the park during the past season was exceptionally good. During the first part of July the rivers were still muddy from spring freshets, which interfered with the fishing, but the Kananaskis, Twin, Consolation and Harrison lakes all afforded good sport. Some good catches of Lake Minnewanka trout running to 16 pounds were made. During August fishing was reported excellent in all park waters. About 6,000 pounds were taken in this month, including 300 pounds from lake Minnewanka.

The Dominion Fish Hatchery in Banff continued work throughout the year with excellent results. The following game fish were liberated in the waters of Rocky Mountains park:—

Salmon trout.. . . .	150,000
Rainbow trout.. . . .	22,660
Cutthroat trout (in Spray lakes).. . . .	153,992
Cutthroat trout (other park waters).. . . .	278,760
Total.. . . .	605,412

A shipment of salmon trout was also made to Jasper park and 24,312 fry were liberated.

FIRE BRIGADE

During the year twenty-six fire alarms were received by the fire brigade, the majority being for chimney fires. Two cubicles have been constructed in the fire hall, thus providing sleeping quarters for two additional firemen. This brings the number of members of the fire brigade sleeping at the fire hall to five.

During the year a Gamewell fire-alarm system was installed in Banff, and fire-alarm boxes were placed in the outlying portions of the town. This system, which is tested every week, will undoubtedly be of great value when sending in fire calls.

12 GEORGE V, A. 1921

FOREST FIRES

Owing to the extreme dryness of the weather during the summer and the frequent high winds considerable anxiety was felt with regard to forest fires. Thanks to the vigilance of the warden staff and the improved equipment with which we are now furnished we were able to extinguish every outbreak of fire without much difficulty. Two fires, however, entered the park from the British Columbia side of the divide, one at the head of Bryant creek, and the other at the head of Douglas creek. Another fire occurred at the Kananaskis lakes, the latter burning over about 2,000 acres of mixed growth. The Royal Canadian Mounted Police gave valuable assistance in fighting these more serious fires. The total expenditure for fire fighting for the year was \$4,578.82.

A Government aviation station was established during the year on the eastern boundary of the park, and although the aerial patrol work was confined for the most part to the forest reserves in the foothills, some patrols were made in the vicinity of Banff during which excellent photographs of the Bow valley were taken.

FIRE-FIGHTING EQUIPMENT

In addition to the five gasoline fire-fighting units and the Ford truck already in use, a Reo fire-fighting truck complete with pump and 3,000 feet of 2½-inch hose has been added. This new equipment is likely to prove a very valuable addition in fighting fires which may occur in the vicinity of our highways.

GAME PROTECTION

It is gratifying to note that the game regulations are being generally observed. During the year there was only one violation of the regulations, and in this case a conviction was secured and a heavy fine imposed.

During the month of July a large number of moose were seen in the Spray lakes district, these animals apparently having come into the park from British Columbia.

The herd of elk brought in from the Yellowstone National park in 1918 has done exceedingly well, and is increasing in numbers. It is estimated that the number of elk now ranging in this park is 325 head.

GOVERNMENT BUILDINGS

A new steam-heated garage for Government cars was completed during the early summer and has proved very satisfactory. The old official residence for the park superintendent at Banff was demolished, and a new residence, largely constructed from material used in the former, was built on the old site.

GOLF LINKS

Work on the new Banff golf links has been carried on throughout the year. Courses 3, 4, 5, 6, 7, 8, 9, 11, 12, 13, 14 and 15 have all been completed as far as clearing, grubbing, and bunkers are concerned. Satisfactory progress was made in the spreading of soil on these courses and it is expected that the seeding of the new portion of the links will be completed this spring, also that some of the holes seeded last year will be available for play. The revenue derived last year was \$3,643, which is \$702 more than the previous best.

SESSIONAL PAPER No. 25

HEALTH

Health conditions as usual in the park during the past year have been exceptionally good. There were no epidemics and very few cases of infectious or contagious diseases.

During the latter part of the fiscal year a tubercular test of all dairy cows in the park was undertaken by an officer of the Department of Agriculture, assisted by our inspector. At its completion the veterinary surgeon stated that the cattle in Rocky Mountains park were the healthiest he had ever tested.

LICENSES

The following licenses were issued during the fiscal year 1920-21: 18 auto transfer licenses, 133 auto livery licenses, 227 private auto licenses, 2,746 transient licenses, 125 park season licenses, 175 chauffeur's licenses, 7 motor cycle licenses, 3 motor launch licenses, 26 horse livery licenses, 5 boatman's licenses, 109 dog licenses, 10 driver's licenses, 27 guide's licenses, 3 gum machine licenses, 2 moving picture operator's licenses, 70 peddler's licenses, 5 poolroom licenses, 58 rowboat licenses, 1 steamboat license, 30 tearoom licenses, 1 tent circus license, 1 bowling alley license, 9 butcher's licenses, 2 moving picture theatre licenses.

In practically every case the number of licenses taken out last year shows an increase over those taken out in previous years.

MOTOR TRAFFIC

Motor traffic in this park showed a large increase. The total number of automobiles passing through the entrance gate at the eastern boundary of the park during the year was 2,774, an increase of 796 over the previous year.

MOSQUITO MENACE

During the past spring and early summer all Western Canada suffered from an unprecedented number of mosquitoes. In order to prevent the breeding of these pests a large quantity of oil was spread on the swamps and other breeding places, also a considerable amount of brushing and drainage was done, a work which greatly reduced the number of eggs hatched out in those places. It is intended to renew these efforts during the coming season and to extend the oiling and other work done last year.

MUSEUM

The following specimens have been added to the museum during the year:—

Birds.—American golden eye duck, sharp shinned hawk, belted kingfisher, Louisiana tanager (brilliantly plumaged male), Bohemian waxwing (male), Western pine grosbeak (brilliantly coloured male).

The following skin study specimens were received: American golden eye duck, sharp shinned hawk, junco.

All these birds were killed within the park by flying against windows or telephone wires.

MAMMALS

Rocky Mountain sheep (ram), Rocky Mountain sheep (ram), timber wolf (full size), mink (mounted), 3 young mule deer (preserved in formalin).

12 GEORGE V, A. 1921

BIRDS

In October seventeen Trumpeter swans landed on the third Vermilion lake, and remained there for several days. This is the first recorded appearance of these birds in the vicinity of Banff. Several Wavey geese accompanied these swans. Hungarian partridge were seen during the fall near Johnston canyon. This is their first appearance in the vicinity of Banff.

BUILDING PERMITS

During the year fifty-four building permits were issued. The estimated cost of the work covered amounted to \$66,883.

GRAZING PERMITS

The number of grazing permits issued during the year was eighty-seven, an increase of six over the previous year. The above permits covered the grazing of 315 horses and 206 cows.

TIMBER PERMITS

Ninety-four permits were issued to residents for the cutting of dry wood in the vicinity of Banff, covering approximately 314 cords of firewood. Thirty-three permits for quarter-sections were also issued, and 2,630 cords of timber cut on the areas covered.

Logging operations were continued by the Eau Claire and Bow River Lumber Company on their limits in the Spray valley, and 4,500,000 feet of timber cut during the year.

POLICE

The Royal Canadian Mounted Police were in charge of the enforcement of law and order throughout the park. Conditions in this respect have been very good. In spite of the large floating population, while there were a number of minor offenses, there were few crimes and none of a serious character.

ROADS AND BRIDGES

The improvement and maintenance of all roads within the park was a matter of special attention during the year. Large gangs of men were employed on the Banff-Kananaskis and on the Banff-Castle roads. Portions of these roads, over which there is considerable motor traffic, were treated with a coat of asphaltic oil from which very satisfactory results have been obtained. A diversion of the Loop drive around the golf links necessitated by the construction of the new course was commenced during the year and is now practically completed. Construction on the Castle-Lake Louise road is almost completed, only the surfacing remains to be done. It is expected that this road will be opened for motor traffic during the coming summer. It will undoubtedly become one of the most popular roads in the park.

Good progress has been made with the new bridge over the Bow river, the construction of which was begun last September by the Department of Public Works, and which has been carried on throughout the winter. Work was also commenced during the latter part of the winter on a new two-span 200 foot wooden truss bridge over the Cascade river near Anthracite. This bridge is being erected to replace the bridge which was moved in 1916 to replace a span washed out from the bridge situated on the Banff-Calgary motor road $3\frac{1}{2}$ miles east of Banff.

SESSIONAL PAPER No. 25

TELEPHONES

During the past season the Banff telephone system has been completely remodelled along the lines that have been under consideration for a number of years. The system is now thoroughly up to date in every respect. A cable system along the lanes has replaced the open wire system along the streets and follows a well defined plan that will allow for unlimited development. It is intended in the near future to remove all poles and wires from Banff avenue which will add greatly to its appearance.

GOVERNMENT TOWNSITES

Banff.—General maintenance work on the streets of Banff was carried on during the past season. All the town streets as well as Banff avenue, Cave and Basin road, Spray avenue and Golf Links road, were treated with a coat of asphaltic oil.

The demand for building lots in the residential districts of Banff has been very heavy during the year. It is hoped that the St. Julien subdivision will be thrown open to the general public during the coming year. Several applications have already been received for lots in this district.

Canmore.—In January last the public school was burned to the ground and the school trustees have applied for a new site for the purpose of erecting a new school. The estimated cost of this structure will be in the neighbourhood of \$35,000. It is a matter for great thankfulness that, although the school was in session at the time the fire occurred, no lives were lost.

Lake Louise.—In anticipation of the opening of the Banff-Lake Louise road to motor traffic, several applications have been received at this office for building sites at Lake Louise.

Lake Minnewanka.—Owing to the close proximity of the lake to Banff no great demand has yet been made for building lots but it is expected that with the increase in motor traffic this townsite will develop in the near future.

TRAILS

The following new trails were constructed during the past year:—Trail from Fortymile creek to Mystic lakes, distance 3 miles; trail from the mouth of Molar creek, in Pipestone valley, over the summit of Molar pass to Mosquito creek, length 12 miles. Both the above trails pass through beautiful alpine country.

The trail from the Gap to Boundary cabin in the lower Kananaskis valley which had previously been constructed for only a portion of the distance was finished, length completed, 12 miles.

VISITORS

In August last the members of the Imperial Press Delegation visited Banff. Included in this party were well known journalists from England, Scotland, Wales, Ireland, Australia, India, South Africa, Natal, Egypt, New Zealand, Ceylon, Singapore, Jamaica, Malta, Newfoundland and Canada.

APPENDIX No. 1c

THE ALPINE CLUB OF CANADA

(Report prepared by the Secretary)

The Alpine Club House was open to members and their friends during the entire season. The attendance was the largest yet recorded and, as will be seen, was drawn from an unusually wide area. The tourist industry of this continent does not appreciate how large is the public which would travel if accommodation simpler than that of the huge and expensive railway caravansaries was provided. The prosperity of the enormous tourist business of Switzerland is founded on the appeal to the many, not to the comparatively few rich people. That nation has proved the possibility of hotels, simple in accommodation, reasonable in price, and of the utmost comfort.

The face of Cascade, the traverse of Mount Norquay, several ascents of Mount Edith were made during the season and the other excursions of the beautiful Banff region were enjoyed.

Owing to the abnormally late opening of the season and the heavy forest fires less original climbing than usual was done. Mr. A. L. Mumm from England and Mr. V.

A. Fynn climbed mount Freshfield. Dr. Hickson of Montreal made mount Forbes, a most interesting climb. Sir Donald was climbed by Mr. Osler of the English Alpine Club and the chief mountains in the Lake Louise region were climbed by members. The activities in the neighbourhood of mount Assiniboine are described in the camp section.

As usual many strangers made inquiries concerning mountain matters and the opening of a well informed and appreciative bureau of mountain information becomes more and more imperative.

Visitors to the club house were drawn from the following:—British Columbia, Alberta, Saskatchewan, Manitoba, Ontario, Quebec, London, California, District of Columbia, Illinois, Indiana, Iowa, Massachusetts, Maryland, Michigan, Minnesota, New Jersey, New York, North Dakota, Oregon, Pennsylvania, Wisconsin, India and Switzerland.

APPENDIX No. 2

REPORT OF THE SUPERINTENDENT OF YOHO AND GLACIER PARKS, E. N. RUSSELL, FIELD, B.C.

At the beginning of the year I was relieved by the department of the supervision of Mount Revelstoke park, Mr. F. E. Maunder, who had returned from overseas, again taking over his duties as superintendent. In severing my connection with this park I can only express my appreciation and thanks to the citizens of Revelstoke for the courtesy, assistance and co-operation which at all times was so freely given during the four years the park was under my charge, and which helped to make every duty a pleasure.

One of the most important steps in the history of the Dominion parks in the province of British Columbia was brought about as a result of the agreement concluded during the previous year between the Federal Government and the province of British Columbia. Under the terms of this agreement the control of all game and the collection of licenses within Dominion parks, which had hitherto been in the hands of the province, were transferred to the Dominion. It was also arranged that the Royal Canadian Mounted Police should take over the enforcement of law and order within the parks, including the laws for which the province is usually responsible. The result of this agreement has been to create the parks in British Columbia inviolate wild life sanctuaries similar to those in Alberta, the Dominion parks regulations with regard to game automatically coming into effect.

The enforcement of the parks regulations was rigidly carried out by the warden staff during the year. Two cases of confiscation for carrying unsealed firearms occurred and in one case a fine was inflicted but I am pleased to say that on the whole the public showed every disposition to assist us and very little trouble was experienced.

The results of the increased protection became apparent almost immediately, particularly with respect to bear, moose and deer. These animals roamed the park at will and seemed to know that no harm would befall them. They were frequently seen on the main roads of the park and even came into the town of Field. A colony of beavers was found working on the Kickinghorse flats at Ottertail and another in the Ice River valley, while goat, grouse and ptarmigan were also quite numerous.

RE-ADJUSTMENT OF BOUNDARIES

Another step of importance to wild life protection was the adjustment of the boundaries of Yoho park. During the year an arrangement was made by which the branch relinquished all that portion of the park lying to the west of the Beaverfoot

SESSIONAL PAPER No. 25

river and south of the north boundary of township 25, range 19, west of the 5th meridian in exchange for a new area on its northern boundary.

ROADS AND TRAILS

The first work of the year was the customary clean-up around the townsite of Field, which was commenced in April as soon as conditions would allow. Mount Stephen avenue, which was opened up last fall, was completed by being surfaced with gravel hauled from the bed of the Kickinghorse river. All streets were cleaned up and repaired as usual and the sidewalks put into good condition.

In May the Yoho, Emerald Lake and Ottertail roads were gone over and the necessary repairs undertaken. On the Yoho road an unusually heavy snowslide had done considerable damage, completely covering the road for an average depth of twelve feet for a distance of over half a mile and carrying away two bridges in its course down the valley. As soon as the general road repairs were completed, sectionmen were placed on the Yoho and Emerald Lake roads for maintenance purposes with the usual good results.

Minor repairs were made during the spring to the bridge over the Kickinghorse river at Field and in the autumn the construction of a new bridge was begun. At date of writing the new bridge is almost complete. It is a good improvement over the old structure which was built some twenty years ago, and which was inadequate for the present traffic. The new structure consists of three spans 100 feet long, each span supported on two centre piers. The width between wheel guards is 17 feet 9 inches, and the load capacity of the bridge 18 tons.

FOREST PROTECTION

An addition was made to our telephone system by the stringing of a line from Field to the Chalet cabin, on the Emerald Lake road, a distance of 6 miles. Telephones were installed in the Snowpeak and Chalet cabins, which during the fire season are usually occupied by sectionmen. This and the other lines were connected up with the chief warden's cabin, thus placing the chief warden in direct communication with his warden staff and also with outlying portions of the park. The total telephone mileage in the park is now 24 miles.

Although the season was very dry I am pleased to say that owing to the vigilance of the wardens only one forest fire occurred which assumed serious proportions. This occurred on the Ottertail trail near Frenchman's creek where the timber and undergrowth are very dense. About 500 acres were burned over.

Now that the branch has taken over full control of game in the park, the wardens' positions have been made permanent instead of seasonal as heretofore. This adds greatly to the efficiency of the staff as it is possible to secure a better class of applicant and also to build up an experienced staff. The four wardens in Yoho park working under the supervising warden during the past two years have accomplished a very large amount of work. In addition to the regular patrol of our 158 miles of trails they have handled all minor repairs to trails and telephone lines and have constructed three new cabins, one of which is a five-roomed house, and two stables. At the time of writing another log stable and barn capable of accommodating twelve horses and with suitable harness, feed and storage rooms is almost completed. These buildings are well constructed of peeled logs and present a very pleasing appearance.

TOURIST TRAVEL

Tourist travel was fairly large again this year and would have been larger had the facilities of the park been able to accommodate more people. The Emerald Lake Chalet and the Yoho Camp were both filled to overflowing, while all other accommo-

12 GEORGE V, A. 1921

dation available in the town was in constant demand. The Canadian Pacific Railway Chalet at Emerald lake added considerably to its capacity by the erection of a number of tents dotted around in close proximity to the Chalet which for the first time ran a motor bus between the hotel and the station to meet all trains.

Motors were allowed this year for the first time on the Yoho road, the last of our roads to be thrown open to this class of traffic. Many of the residents availed themselves of this privilege and brought in cars which mixed freely with the horse traffic, and I am pleased to say that not a single case of accident of any kind was reported. This can be attributed to the care exercised by the drivers and to a rigid enforcement of the speed and other motor regulations.

GLACIER PARK

The first work undertaken in Glacier park was the widening and surfacing of the road between Glacier station and the hotel. About $1\frac{1}{2}$ miles of this road were too narrow to permit of two teams passing; this portion was therefore re-graded, and then ballasted with ballast taken from a portion of the old abandoned railroad grade. This road has to carry a heavy traffic during the summer months, all of it on narrow-tired rigs, but for a dirt road it has stood the test as well as could be expected. The road to the Nakimu caves and the completed portion of the Rogers Pass road were then gone over and it was intended to complete the road between Glacier and Rogers Pass but owing to the extreme scarcity of labour this work had to be postponed.

TRAILS

As soon as the snow was sufficiently melted a trail gang began the construction of a new trail up Grizzly creek, commencing at the intersection of Grizzly creek with the Beaver Valley trail and running to the headwaters of the Spillimacheen river, a distance of 8 miles. A good trail already exists running down the North fork of this river to the Columbia valley, so that it is now possible to go by trail from Glacier to Banff, which before the construction of this trail was not feasible.

The other trails in the park were cleared out and bridges repaired or replaced as required.

TELEPHONES

A new line was constructed between Bear Creek cabin and Stoney Creek station, a distance of about $1\frac{1}{2}$ miles. This line connects the warden stationed at Bear Creek with the Canadian Pacific Railway telegraph station and hence with the superintendent's office at Field and other points and will be a great help in facilitating the speedy sending of assistance in cases where help is required to fight fires.

GAME

In this park as in Yoho park, the game is now under the jurisdiction of the Dominion Parks Branch, and protection is rigidly enforced through the warden staff. All rifles and guns within the park have been sealed, and wild life is protected in every way possible. The results of this protection even for so short a time are easily seen and game of all kinds is becoming more plentiful.

FOREST PROTECTION

Three forest fires occurred in the park which caused some anxiety, all of them caused by electrical storms. Two of these started in the Beaver valley and one near Flat creek. On account of the scarcity of men I was forced to use our road and trail gangs to assist the wardens in fighting them which delayed some of our other work.

SESSIONAL PAPER No. 25

Generally speaking the year just passed has been one of progress for both the Yoho and Glacier parks. Most of the work contemplated has been carried out and the revenues in both parks show an increase of almost double that collected in any previous year.

APPENDIX No. 2a

REPORT OF THE FIFTEENTH ANNUAL CAMP OF THE ALPINE CLUB
OF CANADA AT MOUNT ASSINIBOINE

The Fifteenth Annual Camp of the Alpine Club of Canada was held at the foot of mount Assiniboine from July 27 to August 8. The original plan had been to hold it a week earlier, but the unprecedented late lying of the snows rendered it impossible. When finally summer did start the weather was perfect, but the end of the camp was troubled by the smoke of forest fires which later developed to serious proportions.

The holding of the camp was made possible by the institution of the Walking Tour scheme, the members making use of the comfortable camps on their way to and from Banff. From Golden Valley Camp the first ascent of a neighbouring mountain was made by a number of members from Edmonton. They hoped it might be called mount Edmonton but the Geographic Board disallowed the name though none other was suggested and the mountain remains nameless.

The camp was specially designed to give an official welcome home from the Great War to all members who were on military service overseas, and was held in their honour. There was also present a party from the Alpine Club (England) with which the Canadian Club is now affiliated. Camp was pitched in a sheltered position near the creek. It was singularly warm at night, the cold air sinking to the trough of lake Magog.

The keynote of the climbing was, naturally, mount Assiniboine; not a difficult mountain for an experienced climber but not to be attacked by the novice. It was climbed during camp by 35 members who found it of great interest. The graduating climb was mount Magog, which gave good experience to the beginner. Forty members graduated to active membership. Other peaks ascended were: mount Sturdee, the first ascent; mounts Marshall, Wedgwood, Naiset peak, Wonder peak, mount Towers and the traverse of mounts Magog and Terrapin. An attempt was made on mount Eon but the route chosen was impracticable and the summit was not reached.

12 GEORGE V, A. 1921

Mount Assiniboine is the centre of a magnificent country affording opportunities for excursions of surpassing interest. Perhaps the most striking was Marvel valley with its chain of lakes and the superb background of mounts Assiniboine, Eon and Ayc.

There were present members of the English, Swiss and American Alpine Clubs, the British Columbia Mountaineering Club, the Appalachian Mountain Club, the Mazamas, the Sierra Club, the Royal Geographical Society and the Royal Society.

APPENDIX No. 3

REPORT OF THE SUPERINTENDENT OF MOUNT REVELSTOKE PARK, F. E. MAUNDER, REVELSTOKE, B.C.

The spring of 1920 was cold and backward in this district and consequently the snow was slow in melting, thereby delaying the opening of our work until the 1st of May. At this date the work of clearing ditches and culverts to handle the surface water was commenced and the repair work to the roads continued throughout the season until stopped by snow in the fall.

Repairs on the motor road were very heavy owing to the great volume of water which choked up the culverts and overflowed on to the road, washing out the surfacing. Wherever possible, good side ditches were put in during the season by the sectionmen on the respective sections and the material so removed used on the roadbed. This work practically consumed all the appropriation for repair work but the road was left in good condition for traffic.

During the season permission was granted for the erection of two small cabins for the accommodation of the sectionmen while working on road repair work. Two cabins were erected, one about mileage 4 and the other near mileage 6. These will save the expense of furnishing tents for the sectionmen and also the trouble of moving the same at different times during the season's work. Authority is being asked to have three more of these cabins erected during the coming season.

NEW ROAD WORK

Work on the construction of new road from Station 635 onward could not be started until after the middle of July, owing to the snow still lying on the ground. About this time the contractors moved up their outfits and commenced road building operations. Approximately one mile of new road was opened up during the season.

FIRE AND GAME PROTECTION

Although the summer was hot and dry, and many forest fires were raging practically all around, we were very fortunate in not having any outbreaks within the park. Nearly every one of these fires started from lightning and it is a miracle that Mount Revelstoke park escaped. Provision having been made in the appropriation for a new trail commencing at a point 12 miles north of Revelstoke, on the Big Bend Government road, to extend along the northern boundary of the park to the head of Silver creek, several days were spent exploring the country in order to locate the most feasible route. About six miles of line were blazed out and then construction was commenced on the building of the trail. Approximately three and one-half miles were completed and then seeing we were getting above the cedar line we decided to erect the warden's cabin. This cabin will in the near future be the headquarters from

SESSIONAL PAPER No 25

which the patrol of our north boundary will be carried out. There is urgent need of this fire trail being continued right across the north boundary as there is a tract of fine timber along a great part of the route and the trail will be of great service in getting in means to combat fires should they occur.

Along the eastern boundary a fire trail is also necessary and an amount is being asked for in 1921-22 appropriation to provide for the commencement of a trail to Silver creek.

With regard to game protection, as we had no trouble with poachers, we believe that practically all the hunters have acquainted themselves with the new boundaries as established and therefore refrained from encroaching on the park. The new southern boundary, as defined by Order in Council, May 5, was first located by the warden and myself, and later was well brushed out, making it clear. Further, we placed boundary notices and also metal fire notices at all trail crossings, and at frequent intervals along all of this boundary line.

Blue grouse and partridge appear to be multiplying judging from the increased numbers to be seen along the road and trails, and black and brown bear are frequently met. An occasional deer has been seen during the summer, while at the northern end will be found quite a number of caribou.

We were supplied with a portable pumping unit, hose, etc., which will be very valuable in combating forest fires should we be unfortunate enough to have any. The unit was given a test to be in readiness for any emergency, and the warden shown how to run it in case of necessity.

In the late fall a small amount was expended on making some improvements to the ski hill, which is now inside the park boundaries. Considerable grading was done both at the bottom of the run, and above the take-off. A new trestle was erected at the top in order to attain greater speed before taking the jump. These improvements were greatly appreciated by the Ski Club, as well as by the contestants who took part in the competitions. Many of the best ski-jumpers on the continent participated in the sports and several world's records were broken on this hill during the meet. A circuit has been formed comprised of Calgary, Banff and Revelstoke to promote this winter sport, and it is intended to include other towns and cities in this circuit.

SKI TOURNAMENT

At the Ski Tournament held in Mount Revelstoke park, February 8-9, a number of world's records were broken. Among these was the world's professional long standing jump of 214 feet, made by Anders Haugen at Steamboat Springs, Colorado, broken by Henry Hall, of Detroit, on the Revelstoke hill, who jumped 229 feet. On the same date, February 9, Hans Hansen, of Revelstoke, jumped 221 feet, and in trying to surpass Hall's jump cleared 235 feet, but did not remain standing.

The world's amateur record jump of 185 feet, held by Nels Nelson, of Revelstoke, was broken and the new record of 201 feet established by himself. This jump of 201 feet also establishes a new Canadian amateur record.

The world's record jump for boys under seventeen years stood at 116 feet previous to this meet, but on February 8, Ivend Nelson, of Revelstoke, surpassed his previous year's record by jumping 120 feet. Next day, under better conditions, he established a new record by clearing 133 feet 6 inches, which is the present record for boys under seventeen years of age.

A cash prize of \$500 has been posted for the ski-jumper who is able to break the professional record as it now stands if made on Revelstoke hill.

The contestants included:—

Professional.—Lars Haugen, of Colorado; Carl Hall, of Detroit, Michigan; Henry Hall, Detroit, Michigan, present world's champion; Hans Hansen, Revelstoke, B.C.; Barney Riley.

12 GEORGE V, A. 1921

Amateur.—Nels Nelson, Revelstoke, world's champion and Canadian champion; Oliver Kaldahl, Chicago, former boys' world champion; Sigfried Steinwall, champion of Sweden; J. Digerose, of Calgary; I. Nelson, world's champion in boys' class 17 years and under.

APPENDIX No. 4

REPORT OF THE SUPERINTENDENT OF JASPER PARK, COL. S. M. ROGERS, JASPER, ALTA.

GAME RESOURCES

The game resources of Jasper park are steadily increasing.

Elk.—The 85 wapiti received from Yellowstone National park have thriven well and taken very kindly to their new surroundings. With the exception of a few bad spells of northeast blizzards with heavy snow and extreme cold, the winter conditions permitted these animals to range on the south hillsides, there keeping in the best possible condition. During the prevalence of the severe stormy spells we fed the wapiti with hay at Cottonwood slough, using a few tons of wild hay. This had the result of making these animals quite tame and an interesting number of photographs were taken at close quarters, copies of which were sent to head office.

Sheep and Goats.—In the vicinity of Jasper, Brulé and Pocatontas, large herds of mountain sheep and goats are seen almost every day.

Bear.—Bear, particularly black and cinnamon, are increasing very rapidly and are becoming tame and bold. This necessitated last year the destruction of some animals which had become a nuisance.

Moosc.—Moose are moving in the sheltered valleys west to the Divide and the outlook is very promising for the increase of these magnificent animals.

Deer.—The different species of deer are thriving and increasing rapidly and last winter, owing to the less heavy snowfall in the valley of the Athabaska, we had a very small percentage of loss from predatory animals. In the neighbourhood of Jasper the mule deer are becoming very tame and are frequently seen in the town-site. On a recent visit to the Maligne range the chief warden observed over 100 deer and 25 sheep. This is the first time sheep have been seen in this locality.

Caribou.—One of the wardens who visited the Whirlpool area in March saw 13 of the large Douglas or Mountain caribou on the mountain side near where the tie cutting work is being carried on. These results of sanctuary protection are very encouraging.

Fur-bearing animals.—Beaver, marten, fisher, mink, etc., are increasing rapidly. Marten and fisher in particular are growing so numerous that the question of disposing of some of them is being considered.

Bird life.—There is not much apparent increase or change in the description of birds making their habitat in Jasper park, though it is pleasing to note the increasing number of water-fowl permanently settled in the park during the breeding season, particularly the different types of geese and duck.

Fish.—The past season was the best yet experienced as regards fishing in the park.

SESSIONAL PAPER No. 25

The following fry were placed in park waters: 10,000 Rainbow trout in Patricia lake, 5,000 in Hibernia lake, 5,000 in Marjorie lake and 24,500 Salmon trout in Pyramid lake.

The rough trail, which is now partly constructed and will be finished the coming season to Dorothy lakes, will open up what has always been considered one of the best chains of lakes in the park.

The continued restocking of lakes in the vicinity of Jasper this year made it possible to open up other new lakes for legitimate fishing and it is hoped that the policy of restocking will be carried out during the coming season so as to popularize this pleasing and healthful pastime among visitors to the park.

Predatory animals.—The wardens have been indefatigable in their efforts for the destruction of predatory animals with a very large measure of success. In addition to the usual destruction of coyotes and lynx, two black timber wolves (one extremely large) and two wolverines, were killed during the past winter. In the early part of the winter of 1920 it was feared we would have a serious invasion of timber wolves from the north country, owing to the decimation of game and other animals on which they live, and the wardens were brought in from outlying districts where the snow was too deep to permit of game animals wintering. These wardens covered very successfully the low valleys of the Athabaska and its affluents where the game animals usually range during the deep snow of winter.

The following predatory animals were destroyed: timber wolves, 2; coyotes, 32; wolverines, 2; weasels, 24. In addition numerous crows, hawks and pack-rats were killed.

VISITORS

Jasper park during the past season was again honoured by a visit from the Vice Regal party, who spent two weeks within the park and visited Maligne lake, Athabaska falls and the Tonquin valley, and in spite of unpleasant weather during a portion of their trip graciously expressed their great pleasure in the visit. The Imperial Press party spent a day here under ideal weather conditions and apparently enjoyed their short experience of motor rides and drives to lac Beauvert (where a barbecue luncheon including buffalo meat was served) and then on to Maligne canyon, the wonders of which drew forth many expressions of praise and interest. Members of the Prairie Club of Chicago also spent a week here and were much interested in what they were able to see in so short a time. Mr. Howard Palmer, F.R.G.S., and Allan Carpe again spent a few weeks exploring the southwest portion of the park and secured a number of interesting photographs of the region of Fortress lake and mount Athabaska.

The Jasper Park Camp at lac Beauvert was at all times crowded to capacity. Unfortunately the lack of accommodation still proves to be a serious drawback to the travelling public who would otherwise come here in large numbers and help this park to fulfil its proper destiny.

FIRES

Fires originating from the railway line, 39 in number, occurred during the past year with a cost charged in connection therewith of \$445.72. The heaviest item of loss was due to a fire which originated along the railway in British Columbia and which was carried by a strong wind into the park. This was a serious fire and we were fortunate in being able to check it with no great loss. The general fires were largely caused by the carelessness of campers and fishermen. A fire at Brulé which might have been serious originated through the neglect of a smudge fire.

12 GEORGE V, A. 1921

TRAILS

Twenty-six miles of trails were added during the year, although the difficulty of procuring and maintaining labour prevented our accomplishing as much as we had planned. All trails in constant use were cleared out several times during the season and outlying trails made passable. As every wind storm causes trouble trails have to be cleared on every trip made by the wardens. The following are the new trails: Athabaska falls to Whirlpool river and Otter creek, six miles; Cavell bridge cut-off to avoid steep grade and rock, shortening trail one-half mile, one mile; Dorothy lake from Caledonia lake, not quite completed, four miles; new trail up Snake Indian river, diversion from old trail to avoid muskeg and grades, fifteen miles.

CABINS

Six new cabins and three stables were constructed by the wardens and all of the existing cabins repaired. A non-standard cabin has been erected at Rocky river, area number 7, and it is hoped also to build a suitable stable. This area is almost impossible of access and the local wardens were forced to use whip-sawed lumber as ordinary lumber could not be carried in.

TELEPHONE LINES

The maintenance of our system of telephone lines involves enormous difficulties owing to the large amount of dead timber in the valleys and the heavy wind storms which so often arise in this mountain region. It is hoped that in the near future a system of wireless telephony may be installed which will obviate the interruptions at present unavoidable with the existing system. Trouble was caused to the Jasper-Canyon trunk line several times during the season through pack-rats eating the insulation off the wire in the Canyon shelter. This line was gone over several times during the season. The Jack lake and Maligne lake lines will always be difficult to maintain on account of the heavy snowfalls and high winds in those districts and last year both required heavy repairs. The Jasper-Bedson line has been stretched by falling trees and is so thin that it will soon have to be replaced.

PERMANENT STEEL BRIDGE OVER ATHABASKA RIVER

The steel bridge at Jasper over the Athabaska river was completed before the winter of 1920 set in, except the concrete flooring and painting. This work will be finished during the early months of the coming season and will render access to the south and east from Jasper safe and passable at all times.

APPENDIX No. 5

REPORT OF THE SUPERINTENDENT OF WATERTON LAKES PARK,
G. E. BEVAN, WATERTON PARK, ALTA.

The past year has been one of the most successful in the history of Waterton Lakes park. It is estimated that nearly 14,000 people visited the park, an increase of 40 per cent over the preceding year and a large advance over any previous record. These were drawn not only from the adjacent towns but from every part of Canada and many foreign countries as well showing that the beauties of this unique park are becoming very widely known. The number of visitors from the United States, the

SESSIONAL PAPER No. 25

majority of whom came on from the United States Glacier National park, is an indication of the probable future interchange of traffic between these two parks when the projected motor roads are completed.

WATERTON TOWNSITE

Many inquiries were made at the Administration office for building lots this year and much disappointment was expressed upon finding that the lots surveyed and plotted last year were not open for application. It is apparent that as soon as these are open a large number will be applied for and buildings erected thereon.

OFFICIAL BUILDINGS

Headquarters.—In addition to the small house and office erected in 1919, a commodious bunkhouse and dining room for the workmen and a very suitable garage and repair shop for the proper care of cars used in the parks service were built during the year.

Warden's Stations.—The stations at Castle river, (District No. 5) and Mill creek (District No. 4) were each equipped with a log cabin and a combined stable and hay barn, while at Yarrow creek a suitable hay barn was also erected adjacent to the present log stable.

A large and well equipped stable to hold at least twelve horses is urgently needed at Headquarters and this will be asked for in next year's estimates. A building suitable for an implement shed and general storeroom is also required. At Belly river a cabin and combined stable and hay barn is badly needed and I would strongly recommend a stable and haybarn at Pass creek.

ROADS

The constant repair work which is being done on our roads is bringing them each year into better condition. Section men are maintained during the season going over all roads, raking the rocks, filling ruts, widening narrow places and straightening curves. By this constant supervision we are able to keep them in excellent condition and they drew forth many expressions of appreciation from our motor visitors last year. The Pincher creek addition, commenced in 1919, was completed early in the season in time to be utilized by the tourists. The Cardston extension, from Waterton bridge to the east boundary of the park, was not completed until late in the fall. It is, however, a standard road and while only of earth construction will be much appreciated the coming season.

A road from Waterton bridge almost due east to connect with our warden's station on Belly river is urgently required so that the affairs of the park in this area may be satisfactorily and economically conducted, the more so as this road will one day become a main highway connecting this park with Glacier park in Montana via the valley of the Belly river. The projected road from Waterton townsite via Cameron creek to Akamina pass at the Interprovincial boundary is also much desired. This will be the branch's contribution (14 miles) towards a road which, by co-operation with the British Columbia authorities and the United States Glacier park administration, will give access to the park roads in Glacier park via the Kishenena pass and the Flathead river and will eventually connect us with their park-to-park highway system, besides which it will encourage motor traffic into Waterton Lakes park. Both the above projects when completed will be the initial roads towards a project which embraces a circular motoring route covering approximately 250 to 300 miles as follows: From Waterton lakes westward via Cameron falls, Oil City and Cameron lake

12 GEORGE V, A. 1921

over the continental divide into British Columbia: via Wall lake, Akamina and Kishenena passes across the International boundary to the Flathead river, passing by the Kintla lakes and Agassiz glaciers; thence following down this river to Belton, Montana and lake McDonald, then across the southern portion of the Glacier National park to Glacier hotel at the eastern park entrance. From this point the international highway is followed north to the Many Glaciers hotel on lake McDermott, via Two Medicine, Sun Camp and St. Mary's chalets. From Many Glaciers down the Swift Current pass, Kennedy creek, lakes Glenn and Crossley, down Belly river across the International boundary to Waterton lakes, via the Crooked creek basin, Stoney creek divide and Blakiston brook.

Needless to say the scenic features of this projected route are most alluring while at the same time Waterton Lakes park will be placed upon the park-to-park highway project of the United States system and, later, way will be found, probably via Flathead river, to Michel, British Columbia, or a shorter pass may be located to connect with Elko, which would then connect us with the Banff-Windermere highway.

TRAILS

No new trail work could be undertaken during the past summer owing to the difficult labour situation. The existing trails, however, were all gone over and put into good condition by the wardens.

TELEPHONE LINES

The park now has in operation approximately 50 miles of single wire grounded telephone lines, mostly suspended upon poles. Such of our lines as are attached to trees are very unsatisfactory owing to the swaying of the trees weakening and breaking the wires. For this reason some of the old lines will shortly have to be rebuilt. Approximately 8 miles of construction were undertaken during the past year and the Pass creek telephone line was extended to the Forks cabin. For fire protection and general efficiency our single wire grounded telephone line is without a doubt very serviceable. During this season the Alberta Government built a telephone circuit from Pincher creek to Cardston and connection was given this park, thus establishing for the first time in its history direct connection with outside points. This will add much to the general efficiency of our administration.

TRANSPORTATION

The department during the year issued to the park a Reo speed wagon. This is a splendid type of transportation truck for this park, our sources of all supply being 40 miles distant. Provincial roads both north to Pincher creek and east to Cardston, while leaving something to be desired in way of grading, are otherwise excellent and our transportation difficulties, always a serious item, are now largely met.

GRAZING

Following the dry season of 1919 and the consequent close grazing of the park, it was considered advisable to reduce the number of permits this season so that the natural browse and forage should have an opportunity of recovering. For this reason only 1,912 head of stock were permitted as against 2,916 during the previous season. The result was very noticeable and recovery showed all over our grazing areas. Strict watch was maintained and trespassers impounded.

SESSIONAL PAPER No. 25

FIRE AND GAME PROTECTION

As compared with the previous year our fire season was not so exacting. Although the summer was very dry and fires broke out in the park neighbourhood, we escaped with only one fire. Prompt action from headquarters controlled this at Black Tail point and it was extinguished without trouble or incident. Our small portable fire engine here alone demonstrated its value.

Notwithstanding an exceedingly dry summer, which destroyed the natural browse of our wild life, and an exceptionally early, protracted and late winter in 1919-20, the losses of big game were surprisingly small. The greatest loss was noticed in early lambs and fawns, which died largely as a result of the many severe snowstorms. Consequently few young can be seen with their dams. The present season has been surprisingly open and free from snow. Hence this season we expect better results.

The usual herd of Rocky Mountain sheep have again made the west slopes of Sofa or Sheep mountain their winter range and large numbers have daily been observed. A quantity of rock salt placed on the point at the Narrows has attracted them to the immediate neighbourhood of the town. The herd of elk ranging in the north end of the park near Castle river appears to be increasing. Beavers are very numerous in the park and workings are extensively observed in the shape of dams, houses, etc. Branches of trees cut for food are evident everywhere and the various colonies excite considerable interest amongst the tourists, who are never tired of watching these busy little animals. Bears also are becoming numerous but they very seldom commit any depredations.

In the latter part of the year two bands of wolves settled in the park coming in presumably from either British Columbia or United States. The services of Mr. Henry Riviere, provincial game warden, were secured and a war of extermination commenced. To date one male wolf has been shot by him and as no further reports are forthcoming it would appear he has driven the others out.

In addition a mountain lion also made its appearance on the eastern slope and commenced depredations in the north end of the park.

The services of an expert hunter, J. Morden, to supplement the wardens' efforts were also secured in this case with the result that on March 29 a lion measuring 7 feet 11 inches from tip to tip was shot.

FISHING

This most popular sport has been excellent in the lakes this year, many enthusiastic anglers having secured their daily limit upon several occasions. Considerable excitement was occasioned amongst the visitors on July 8 when a Lethbridge lady, Mrs. C. Hunter, brought to shore a lake trout weighing 51 pounds which she caught, played, gaffed and landed in her boat without any assistance. Although many efforts were made to beat this record catch, needless to say, it still stands. These old fellows are unusually cute and seldom take the hook.

During July, the co-operation of this administration was sought by the United States Glacier Park authorities in providing transportation for a shipment of Cutthroat trout fry for disposal in the headwaters of Waterton and Belly rivers respectively. This was gladly accorded and the deposit made. During the long road trip great care had to be taken of these delicate little fellows but the project was fairly successful. In this connection I would recommend that an effort should be made to secure for this park stocks of fish from the hatchery at Banff. Bertha lake and Cameron lake, ideally situated as they are, have not a fish in them. These should receive first attention and application will be made in due season for shipments to stock these two waters. There is no sport in our national parks which appeals to visitors more than good fishing. A permanent fish hatchery would be a great acquisition.

12 GEORGE V, A. 1921

VISITORS

The attractions of this park as a holiday resort are abundantly evidenced by the very gratifying increase in the number of visitors from year to year. This increase is largely made up of newcomers visiting us through the advice of their friends. No advertising has been done except that of satisfied visitors. Moving pictures, showing the various holiday recreations indulged in during the summer, would be a very effective means of bringing this park more prominently before the public. In these days of the motor car, the early transportation difficulties are forgotten and travel to and from the park becomes a delightful part of the holiday.

RECREATIONS

Boating and fishing are the chief sources of recreation but saddle-horse trips, mountaineering, valley hikes, must not be overlooked as means of enjoyment. Every evening of the season dances are held at the local pavilion and as a means of bringing a somewhat full day to an end, this provides a very enjoyable climax.

In the spring of this season a special appropriation was made for the purchase of children's playground equipment. This was very popular and highly appreciated, not only by the little ones but also by their mothers. The fathers also were interested to the extent that inquiries were made at our office for addresses of firms supplying such equipment and the matter brought to the attention of local school boards.

LAW AND ORDER

The responsibility of maintaining law and order again fell upon the detachment of the Royal Canadian Mounted Police sent here for that purpose by the officer commanding the Macleod division. A corporal and one caretaker were in charge of the park and their mere presence was sufficient to prevent any petty larcenies or disorderly conduct. The fact that we are so near the International boundary and that the opening up of a roadway via British Columbia to connect with the United States Glacier National park is now being projected would seem to warrant the establishment of a permanent post here. Customs duties and international travel could then be controlled.

FARMING OPERATIONS

An area of approximately 200 acres was enclosed with new wire fence during the season of 1920 and about 20 acres were newly broken and seeded to oats. Our success in growing our own forage for our horses fully warrants any reasonable expenditure along these lines. The wardens at each end of the park were also similarly provided with small farming areas. Owing to the lateness of the season and to the fact that the headquarters farm was first attended to, these areas were not quite the success we had anticipated, nevertheless, such results as were attained go to show that these establishments can with perseverance be made self-sustaining for horse forage and the large expense involved in the purchase and transportation of feed, owing to their isolation, can be eliminated.

APPENDIX No. 6

REPORT OF THE SUPERINTENDENT OF BUFFALO PARK, A. G. SMITH,
WAINWRIGHT, ALBERTA

FARMING OPERATIONS

Approximately 440 acres were seeded to oats and rape again this year, of which 200 acres were summer-fallowed. The rape did not grow quite so well as it did the previous year but the oat crop was much better. About 75 acres were cut for green-feed and from the balance a sufficient quantity of oats was harvested to supply not only the requirements of this park, including seed for the coming year, but also Jasper park and Elk Island park until next year's crop is available. Two thousand bushels were also sent to Rocky Mountains park. The good crop gave us considerable more straw and this, mixed with rape leaves, made excellent feed for the buffalo.

For further experimental purposes it was decided to try white clover and about the end of June a 5-acre plot was seeded and a fair catch obtained.

About 200 acres were summer-fallowed again this year and left in splendid shape for seeding in the spring.

Haying.—This has been the most successful year we have had in putting up hay. In all about 900 tons were cut and stacked, 800 tons on the Ribstone meadow, the balance upland hay cut in the cattalo enclosure. The hay cut on the Ribstone meadow was all this year's growth. It contained no old bottom and was well saved.

In addition to the hay cut for ourselves, permits covering about 100 tons, issued for small lots, were granted to farmers living in the vicinity of the park.

GRAZING LEASES

As in former years those sections of the reserve outside the fence on the east and west sides of the park were leased for grazing purposes, which was not only a convenience to the cattle owners in the vicinity but also served to bring in considerable revenue.

FIRE-GUARDING

The fire-guards on the south and east boundaries of the park, also those around winter quarters and the home paddock were ploughed by our own teams. No fires occurred in the park during the year.

FENCING

Between 50 and 60 miles of fence on the west, north and east sides were gone over and repaired. As this fence was in bad shape it took a great many new posts to put it in a safe condition. Fences surrounding the home paddock and farm were also gone over and repaired.

TIMBER PERMITS

Each year a larger number of farmers are securing permits for obtaining dry wood in Buffalo park. This year 46 permits were issued and as each permit covers 25 cords it will be seen that this privilege is a great benefit to the settlers. Permits were also granted to farmers covering 10,500 willow fence pickets, and this is also a very great help to settlers living in the vicinity of the park who have no fence pickets on their own farms.

12 GEORGE V, A. 1921

NEW BUILDINGS AND IMPROVEMENTS

Several new buildings were erected this year. A storeroom and garage at the superintendent's quarters, an oil house at the farm, a cook camp at the Rihstone meadow, a machinery shed in the home paddock, a cottage and barn at the Rocky ford and a cottage and barn in the cattalo enclosure, the latter being erected for the Department of Agriculture.

The superintendent's residence and office were veneered with brick during the year. This was a decided improvement and one which is much appreciated.

HORSES

During the year other Dominion parks were supplied with 37 horses from this park, and we have on hand at present, including colts, 69 head. There was an increase of five colts.

WILD ANIMALS

The feed this year throughout the park was much better for the animals while on the summer range and they have come through the winter in good shape. The natural increase in buffalo for the year has been 543, and the herd now numbers 5,152. It will be of interest to note that the total increase in buffalo for the last four years has been 2,898, which is 500 more than double what the herd numbered four years ago. The elk and deer are also increasing rapidly.

The decrease in buffalo for the year was 59, of this number 21 were slaughtered and 7 sent to Banff.

Our records show the number of wild animals now in the park to be as follows: buffalo, 5,152; elk, 155; mule deer (estimated), 419; moose, 23; antelope, 4; cattalo, 15; yak, 5; domestic cattle, 16. Total, 5,789.

The cattalo experiment being carried on in this park by the Department of Agriculture is very interesting. The practice of raising buffalo calves on domestic cows and allowing them to grow up together with domestic and yak calves promises to be the surest and quickest way of arriving at the results desired.

WILD BIRDS

Every year larger flocks of wild fowl are to be seen within the park. Many of these return to their breeding and feeding place each year, while many others seem to realize the protection afforded them when migrating and are to be seen at that time on and around the small lakes in the park. A great many different species of bird life are to be found.

COYOTES

The hunting of coyotes with dogs has been kept up again during the winter, and, including a few shot by the wardens, 59 of these animals were destroyed.

VISITORS

A visitors' register is now kept at the entrance gates and the records show that more people are visiting the park each year. This year four special excursion trains, including the Imperial Press Association, came to Wainwright for the purpose of seeing the world's famous buffalo herd, and on the pages of our visitors' register can be found the names of people from every part of Canada, from twenty-three different states of the American Union, and from England, Scotland, Ireland, the Channel Island of Jersey, Sweden, Holland, South Africa, South America and Barbados island.

SESSIONAL PAPER No. 25

APPENDIX No. 7

REPORT OF THE SUPERINTENDENT OF ELK ISLAND PARK,
ARCHIBALD COXFORD, LAMONT, ALTA.

As the spring of 1920 was very late, we were compelled to feed the animals up to the last week in April.

The first spring work was as usual the burning of long grass in the sloughs around the park fence which was likely to prove a firetrap; the grounds were then cleaned up and the brush cut between the fence and the road on the north side of the park, to better protect the fence from fire. We then went over all the fences and made the necessary repairs. This is work where I find the great advantage of having a rider. It is very important that the fences be kept in first-class shape and they require almost constant watching, particularly now that the park is becoming so crowded with animals.

I considered it advisable to widen the fireguard on the south of the park for about $2\frac{1}{2}$ miles so had the brush cut 16 feet in width. In June and July, I had the whole fireguard ploughed and the new piece broken out. In October, I had it all disked and the roots grubbed out of the new piece. This work was very thoroughly done.

The usual repairs were made to the roads such as grading up some of the low places, putting in culverts and dragging the main entrance road with a split-log drag.

The interior of the superintendent's house was altered so that an office might be provided. I find this a great improvement. A garage was also built for the Reo truck that was shipped from Banff.

Haying operations commenced the last of July. About 350 tons of good hay were stacked for winter feeding. Advantage was taken of a very open fall to start the cleaning up of a piece of ground for sports. This work is not completed.

The animals came through the winter in good shape. The number in the park on March 31 was: buffalo, 230; moose, 67; elk, 174; mule deer (estimated), 150. With the animals increasing every year we are crowded for room. I would advise extending the park south for at least five miles as the range is crowded and if we have another hard winter the animals ranging out all the time will suffer.

APPENDIX No. 8

REPORT OF THE SUPERINTENDENT OF POINT PELEE PARK,
F. H. CONOVER, LEAMINGTON, ONT.

The past year has been a very successful one at Point Pelee park both as regards the growing number of visitors and noticeable increase of bird life. The improved appearance of the park, its general cleanliness and order, as well as the good condition of the roads have been the subject of many commendations.

In the month of April a rustic arch, bearing the name "Point Pelee Park" was erected at the park entrance. The arch is artistically designed and well constructed and makes a very attractive addition. The cleaning up of debris and underbrush was also steadily carried on, thus materially lessening the fire danger as well as improving the appearance of the park. The roads were put into good condition, ruts filled in, waysides mowed, stumps and roots along the roadsides removed and gravel and sand applied where necessary. During the first part of the season the main roadway in the park was scraped and lightly graded. Clay was then hauled from the Point to give a good bond to the road and a top dressing of gravel from the beach spread

over this by hand. This made an excellent road and in spite of the heavy travel of the summer it stood up well.

A frame engine and tool house with concrete foundation and floor was completed and the building given two coats of olive green paint.

During the year the Cottontail rabbits in the park increased in such numbers as to become troublesome to the settlers living on the Point. During the winter they destroyed a number of fruit trees by girding the bark, as well as many native shrubs, and in the early summer did considerable damage to garden plants. As a result permission was granted to settlers to shoot rabbits on their own property. As is well known, however, once rabbits have become numerous there is no satisfactory method of getting rid of them except by a general drive, and during the winter, as the depredations continued, it was decided to adopt this form of attack. The neighbouring sportsmen were invited to participate, and on the 14th of January sixteen shooters assembled and under the direction and leadership of the superintendent and warden formed a long line across the park reaching from the edge of the marsh to the lake. When the word was given they advanced south in a crescent-shaped line, driving the rabbits before them. The drive lasted about five hours, and at its close the count showed that 122 rabbits had been destroyed. As it was believed that a number had escaped on account of the thickness of cover, a second drive was inaugurated a little later, but only a few rabbits were secured, showing that they had been practically cleaned up in the first drive.

Considerable attention was also given to the question of the elimination of carp and dogfish from the Pelee marshes. These predatory fish infest the park waters and have become so numerous that they are practically eliminating all game fish. In addition, they eat and destroy the marsh vegetation, particularly the wild rice on which ducks and other water-fowl feed. As carp do not respond to hook and line, the only practical method of capture is by netting, and during the spring the department took up the question with the provincial authorities and it was decided to allow permits for seine fishing for carp in the Pelee waters. It is too soon at the time of writing to tell what the results will be, but it is hoped that the numbers of these noxious fish will be materially lessened by these means.

With a view to improving the supply of plant foods for wild bird life, a quantity of wild celery and rice seed was planted in the waters of the larger ponds and lakes. The local sportsmen subscribed about \$100 to this fund, the rest of the amount required being provided by the department.

In view of the large area of the park and the presence and formation of the marsh, I would point out that there is urgent need for more patrol assistance to prevent violations of the park regulations.

APPENDIX No. 9

REPORT OF THE ST. LAWRENCE ISLAND PARKS

The St. Lawrence Island parks, which comprise thirteen islands and one mainland reservation among the Thousand Islands of the St. Lawrence river between Morrisburg and Gananoque, continue to justify their existence more and more from year to year. They are now practically the only places on the Canadian side where campers and picnickers are free to go, and the increasing use which is annually made of them indicates what a valuable service they render the general public. By obtaining a permit from the local caretaker campers may secure a camp site with the use of a stove and other conveniences free of charge, and last year large numbers of people availed themselves of the opportunity to enjoy an inexpensive and healthful holiday

SESSIONAL PAPER No. 25

in this way. Organizations such as the Boy Scouts and Girl Guides also held camps on the islands and many Sunday schools and churches in the neighbouring towns and cities made use of them for their annual outing. So many applications were received for the latter on some of the islands that it was necessary to arrange dates in advance.

The island parks are inspected twice a year by an official from head office, who sees that the wharves, paths, buildings and other conveniences are kept in good repair. Local caretakers are in charge and maintain general cleanliness and order. Last year a number of large signs giving the name of each park were erected so as to be easily legible from the river. This was a great improvement on the old signs, "Dominion Lands, No. —," which were the cause of considerable confusion. Minor repairs were undertaken where necessary.

The new Border Island park opposite the town of Morrisburg was largely patronized throughout the summer, and promises to become one of the most popular of the island resorts. A large pavilion is needed for this park to serve as a shelter in the event of storms, but our appropriations last year would not permit of its erection. A large military tent, however, was erected, which answered the purpose temporarily very well.

APPENDIX No. 10

REPORT OF THE HONORARY SUPERINTENDENT OF FORT ANNE
PARK, L. M. FORTIER, ANNAPOLIS ROYAL, N.S.

During the past fiscal year we have made an addition of a considerable number of interesting articles to the Fort Anne park museum and library, the most interesting being the Savary bookcase completely filled with books bearing on the history of Port Royal and Annapolis.

This bookcase has on its front a brass tablet bearing the following inscription: "From the Library of Alfred William Savary, M.A., K.C., D.C.L., Judge of the County Court, Member of the Nova Scotia Historical Society, First Hon. President of the Historical Association of Annapolis Royal. Presented to the Commission in charge of Fort Anne by his sons, as a Memorial of him, and in commemoration of his constant interest in all matters pertaining to the Fort and the History of his native Province. A.D. 1920."

The formal "unveiling" and dedication of this interesting memorial took place on August 30, 1920, in the presence of the mayor and councillors of Annapolis Royal and some visiting strangers, among the latter the Rev. G. Whitfield Brooker, of Freeport, Nova Scotia, who delivered a particularly striking address.

We have been successful in procuring copies of several rare and interesting books outside of the Savary collection, and it seems probable that at no distant date the library of Fort Anne will contain practically every book, and a copy of every map or plan, on the past history of this place.

A number of interesting trophies of the recent great European war are now displayed in our visitors' room, and more are coming.

On December 17, 1920, Fort Anne was honoured with a visit from His Excellency the Governor General, the Duke of Devonshire, who spent a little time here and gave an address from the doorstep of the Administration building.

The tourist season this year has been particularly heavy, and Fort Anne has attracted a remarkable degree of attention. We had during the season something over 6,000 visitors to the Fort, 3,800 of whom wrote their names in the visitors' book and received personal attention, all, I think, going away well pleased with what they saw here and the attention paid to them, and determined in a great many cases to come back and bring or send their friends.

PART III

FORESTRY

REPORT OF THE DIRECTOR OF FORESTRY, R. H. CAMPBELL

This report covers the work of the Forestry Branch for the fiscal year 1920-21, ended March 31, 1921.

The process of readjustment in all lines of life following the war and post-war periods was reflected in the conditions prevailing in the western provinces in connection with the administration of forest reserves and forestry generally. During the year the price of farm products declined, while at the same time efficient labour continued scarce. The result was that there was a slackening in some lines of activity on the part of settlers and not the increase in other lines that there would have been under more normal conditions. The number of individual permits issued to settlers to secure timber of various kinds on forest reserves increased by slightly over 200, whereas there was a decline in the quantity of saw-timber and building logs taken out. On the other hand, the quantity of fuel cut increased by about ten thousand cords, and the quantity of mine timber cut was more than double that of the previous year. There was a slight decrease in the number of stock grazed and in the quantity of hay cut, while the demand for tree seedlings for planting shelter-belts on farms was about the same as the preceding year. In spite of these mixed conditions, the total revenue increased from \$127,975 to \$143,812.

Weather conditions were better for forest protection because of increased moisture in early spring, and losses from fires were reduced as compared with the preceding year. The year witnessed the first use of airplanes in forest protection in Western Canada.

FIRE PREVENTION AND SUPPRESSION

In the western provinces there was considerable variation in the fire-hazard as between different districts. In Saskatchewan and Alberta the fire season was almost normal; in Manitoba the conditions were hazardous, though losses were small; and in British Columbia the emergency season was one of the most difficult with which the Forestry Branch has had to deal, although damage was confined to the district east of the Cascade range. In the latter district numerous violent electrical storms occurred which caused a large number of lightning fires; in fact, fires from this source attained the unprecedented figure of 40 per cent. Fairly well throughout the West, the snow remained late in the spring, so that the danger usually experienced at this time did not develop. During the summer and early autumn, however, there occurred a period of hot, dry weather, during which a number of fires started. As compared with the preceding season, the total number of fires occurring throughout the four western provinces increased by 219, but the area burned over and the amount of timber damaged or destroyed were very much smaller.

It is always of considerable value to know how fires originate, as such a study makes possible the application of preventive measures. For a considerable number of years past it has been necessary to designate the cause of a large percentage of fires as "unknown." The percentage of unknown fires for last season, however, shows

12 GEORGE V, A. 1922

a considerable reduction, which may be taken as an indication of material improvement in the attention given to study of the fires. Fires caused by railways reached the total of 45 per cent, which is an increase over previous years, and was probably caused by heavy traffic during the danger period and the use of inferior grades of coal. Lightning fires increased to 10 per cent, which is about twice the normal. In other respects the statistics show that the relative percentage of fires attributable to the various human agencies other than those mentioned above remained approximately stationary. Right-of-way conditions along railways were somewhat improved, but still further action is necessary, especially upon the newer and smaller branch lines.

The total number of fires for the season was 1,532 as compared with 1,313 for the preceding season. There was, however, a reduction in the proportion of large fires (that is, fires burning an area of ten acres or more), 27 per cent falling into this class, while in 1919 the number of large fires was 40 per cent of the total. The total area burned over was 485,500 acres, of which approximately 110,000 acres was commercial timber, 152,600 acres young growth, the remainder being open or grass lands. As a result of uncharted fires in the more inaccessible regions of northern Manitoba, a considerable area, the figures for which cannot be included with the above, was burned over.

IMPROVEMENTS

A fundamental requirement for forest administration and fire protection lies in the provision of communication facilities in the forest. Rapid communication from point to point is necessary for the adequate control of fires, and also is a great aid to ordinary administration; to secure these ends specially constructed telephone lines are used. Roads and trails are necessary for the movement of men and supplies for both protective and administrative work. Buildings for the accommodation of forest officers and storage of equipment, and lookout towers for fire detection, are also essential improvements. Each year, therefore, all the funds which can reasonably be devoted to such construction work are used in providing telephone lines, roads, trails, lookouts, and other improvements of this nature.

Very material progress was made in the improvement plans of each district during the year, the sum of \$72,790 having been expended on this work; this expenditure was, however, supplemented to a considerable extent by the use of ranger labour. When not otherwise engaged in fire protection and administrative work the entire staff, permanent and temporary, is used for construction work, thus increasing the amount of work which would otherwise be possible. The following table indicates the amount of improvement work which was brought to a state of completion:—

	Number		Miles
Cabins (Class C).....	5	Telephone lines.....	95
Ranger station houses.....	2	Roads.....	52
Stables and barns.....	6	Trails.....	47
Other buildings.....	11	Fireguards (ploughed).....	13
Lookout towers.....	5		

In addition to the foregoing, however, numerous improvements, previously reported, were repaired and maintained; also, a considerable number of new projects were started which for various reasons could not be completed within the year. By consistent work of this kind, from year to year, the reserves should within a reasonable time be fairly well provided with the facilities required.

AIRPLANES IN FOREST PROTECTION

During the season of 1920 the Air Board of Canada inaugurated an airplane patrol over certain of the forest areas in charge of the Forestry Branch. Two patrols were established, one in the Alberta inspectorate and the other in the British Columbia inspectorate. In both cases, however, it was not possible to begin the patrols until the fire-hazard season was virtually over. The Alberta station was at Morley and from there the machines made their first flights in September, while the first flights

12 GEORGE V, A. 1922

from Kamloops and Sicamous, the British Columbia bases, were not made till early November. In spite of this a number of trips were made and the result was to convince forest officers that the airplane will be of great utility in forest work, such as exploration, mapping, fire patrol, inspecting insect infestation, etc.

GRAZING

On the non-agricultural lands set aside as forest reserves there are considerable areas, which have been denuded of timber but which with protection will, in time, bear another crop. In the meantime, that the crops of native grasses which they bear may be made as useful as possible to the surrounding settlements, the grazing of cattle, horses, and sheep is permitted under proper regulations. There are also other areas in the midst of forest reserves, especially in the Rocky mountains, which while unsuited either for agriculture or for tree growth, are composed of fair pasture land. To these also stock is admitted. The settlers in the West have readily availed themselves of these privileges and the number of stock grazed increased steadily until the season of 1920, when there was a slight falling off in numbers. This is accounted for wholly by pasturing and market conditions. The season of 1919 was exceedingly dry with a shortage of feed, followed by a winter of heavy snowfall, which caused many stockmen to reduce their herds. In the spring of 1920 the farmers felt that they could not purchase stock to fill up their herds at prevailing prices, and many, who had grazed their cattle on forest reserves in the past few years, found their own lands sufficient to carry their stock. The total number of stock grazed in the summer of 1920 was 90,724, a decrease of about 8½ per cent from the preceding year, but that this was not caused by lack of interest on the part of farmers and ranchers is shown by the fact that the number of permits issued to individual stock-owners was 1,757 an increase of 104 over 1919, or of about 6 per cent; thus more settlers are taking advantage of grazing privileges even though the average number of stock each owner pastures is temporarily lessened. In all the provinces the number of stock associations has increased which is indicative of the growing favour with which stock-owners view the co-operative use of forest range. These associations, in addition to aiding in the management of the herds, are also gradually eliminating scrub stock, with the result that the quality of the stock now grazing on forest reserves is much higher than formerly.

During the summer the policy of carrying out grazing surveys was continued, and additional detailed grazing type maps were compiled and other information obtained, by means of which the number of stock which can be carried in the various grazing districts can be more accurately determined. Another improvement in grazing conditions is the extension of the plan of grazing in summer only on the reserves. Under this plan the stock are fed hay and other stored feed on the owner's farm during the winter and early spring, and this saves the range from the damage often resulting from the running of stock at those seasons. An incidental advantage of this plan is the opportunity it gives for eliminating all stray and unauthorized stock from the ranges.

SILVICULTURE

Under this heading are grouped all the operations connected with the handling of timber on the reserves, looking to the development of the same as a growing crop and to its ultimate harvest. The object is not only to provide the surrounding communities with all the fuel and timber possible for the next few years but also to get the forest into the highest state of production, so that the largest possible supply of good timber may be available from each of these forests in perpetuity. To this end efforts are directed toward the cutting of mature and overmature timber, and especially to the removing of all dead and diseased trees, that a new crop may spring up

SESSIONAL PAPER No. 25

and grow as speedily as possible. The cutting is closely supervised to prevent waste in high stumps and large tops left in the woods, and to see that all the slash from the cutting operations is piled and burned, so as to remove this form of fire-hazard. One feature of silvicultural work in the past year was the campaign to combat and wipe out a dangerous infestation of western yellow pine by bark beetles. By this action this outbreak has been greatly lessened, if not entirely removed. In regard to the permits issued to settlers to cut timber for their own use for fuel and building, these show an increase of about 200, indicating that increasing numbers are taking advantage of this privilege. The quantities of saw-timber, mine timber, building logs, fuel, etc., taken out on the various reserves differed considerably according to the markets and the conditions of the roads, but on the whole were slightly less than in the preceding year. This was caused partly by the falling off in building operations and partly by the exceedingly deep snow in some localities in the winter of 1919-20. An interesting development was the number of inquiries received as to the possibility of obtaining pulpwood on the reserves, which may indicate a possible method of utilizing some classes of timber at present of low commercial value.

PLANTING ON FOREST RESERVES

Planting trees and sowing tree seed on forest reserves is done for two purposes: first, to restock the area with some desirable species, which has become extinct or nearly extinct through repeated fires in years gone by, and second, to furnish data as to the best methods of planting and seeding, the rate of growth, etc. These experimental plantings were greatly increased during the year. Approximately 58,000 Scotch pine, jack pine, and white spruce seedlings and transplants were set out in twenty-seven plots aggregating about twenty acres. A large part of the planting stock was furnished from the Forest Nursery Station at Indian Head, Saskatchewan, and the remainder came from small nurseries established on various reserves. In addition to the above, nineteen experimental plots covering approximately twenty-five acres were sown with seventy pounds of tree seed, about evenly divided between white spruce and jack pine.

RECREATIONAL USES OF FOREST RESERVES

It is natural that people should desire to make use of the forest reserves for recreational purposes, and, under proper supervision and regulation, this is desirable from the forest administrator's standpoint. People who spend their holidays in the woods, whether simply in camping or in hunting and fishing, get a good idea of the value of forest resources and thus become active agents for forest protection. In desirable locations along the shores of lakes in different forest reserves plots are leased to citizens on condition that they erect suitable houses and keep their surroundings in good order. The number of these cottages is steadily increasing, although progress in this respect has not been so rapid in the past year, owing to the business depression. Fishing is one of the great attractions for tourists and cottagers, and the policy of the Forestry Branch is to maintain good fishing, by stocking the lakes with fish fry, when necessary, and by restricting the method of taking fish to angling. The efforts in this direction are meeting with success; and in the matter of fish and game protection the Forestry Branch acts in co-operation with the Dominion fishery authorities, on the one hand, and the various provincial game wardens on the other.

TREE PLANTING ON PRAIRIE FARMS

The officers in charge of the tree-planting work report increased interest in this subject in all parts of the Prairie Provinces. The experiences of the past few years have impressed on prairie farmers the great benefits of having belts of trees across

12 GEORGE V, A. 1922

their farms and about their farm buildings. The injury that has been done to many farms by soil-drifting has led to the discussion of tree planting as a remedy at farmers' meetings and in the press. The planting inspectors note that the ground is being better prepared to receive plantations, and that the plantations are being better cared for than in the past. The year 1920 was a satisfactory one for plantations, except those in certain districts, where precipitation was very light. No general injury was reported during the year from insects or winter-killing. The growth of broad-leaved stock on the Nursery Stations was, on the whole, favourable. The coniferous species, however, suffered severely in the transplant plots and seed-beds, owing to hot, dry weather, with high winds at planting time and for a few weeks following. The number of applicants for stock to plant in the spring of 1921 was about the same as for 1920, namely approximately 8,000. Conditions in agricultural districts are unsettled. Labour is still scarce, wages high, and the price of produce has fallen greatly; consequently many farmers, who are anxious to plant, are unable to do so, because of lack of help or funds. As soon as more normal and settled conditions return there is every indication of increased activity in tree planting on the prairies.

FOREST PRODUCTS LABORATORIES

The work of the Forest Products Laboratories of Canada, which had been seriously interfered with by the drain of trained men during the war and the period of activity immediately following, was swung back toward normal, and by the end of the fiscal year had re-attained a satisfactory state of efficiency. In addition to carrying on the work of testing all Canadian woods to determine their mechanical and physical properties (one of the main lines of activity of the Laboratories) investigations were pressed forward in regard to methods of utilizing decayed aspen, the decay of pulpwood, decay of timber in buildings, Nova Scotia mine timbers, railway cross-ties, paving blocks, etc. The cross-tie investigation involved, in addition to laboratory tests, the placing of a number of treated and untreated ties in railway lines having heavy traffic, the recording of results in these special cases, and co-operation with railway officials to obtain data as to the "life" of ties under actual conditions. The preparation of specimens of different kinds for exhibition, in order that both technical experts and the general public may see the results of these investigations, is an important feature of the work, as well as the answering of inquiries which Canadian business men and manufacturers are making with increasing frequency. The exhibit of Canadian woods made at the Empire Timber Exhibition in London in the summer of 1920 was prepared at the Laboratories, and placed in position by one of its officers, who also wrote the report on the Exhibition which has been published as Circular No. 12 of the Forestry Branch. The need of the more economical utilization of forest products has led in the last few years to the establishment of forest products laboratories in three different countries of the Empire and similar institutions are in process of establishment in four more parts of the British Commonwealth. There is need, therefore, that Canada, the greatest forest country in the Empire, should make her Laboratories as complete and efficient as possible.

PETAWAWA FOREST EXPERIMENT STATION

The investigative work inaugurated on the military reservation at Petawawa, Ontario, in 1918 and 1919, was continued and extended during the season of 1920. Additional permanent sample plots were established with the object of studying yield of merchantable species, the effect of thinnings to improve and increase the final yield, the best means of securing natural reproduction, and the release of conifers from the domination of less valuable species. A considerable amount of work has been done on the study of European mensuration methods, their adaptation to scientific work in this country and their practical use at the present time. It has been possible already to secure valuable results in this line of work.

SESSIONAL PAPER No. 25

In the course of an experiment, established with a view to assisting coniferous growth by the removal of other species, it was found possible to dispose of the material cut. Authority was obtained from the Department of Militia and Defence to sell the cut on a small area. This material was sold to local residents on the stump, under suitable brush disposal and other regulations, which were carried out satisfactorily, and the sale, while very small, illustrated the practicability of carrying out silvicultural experiments on a commercial basis. Experiments of this nature are to be extended and authority has been secured to cut two hundred acres. It is expected that the condition of the forest will be very much improved, by increased growth of the small conifers left, and that the sale will yield a satisfactory monetary return.

In addition to the above, a start has been made in the study of the reproduction that follows logging on pine lands. Permanent sample plots have been established on a logging operation in northern Ontario, and these plots will be examined periodically. Important results have already been obtained from these investigations and data thus secured will be of increasing value to forest engineers and lumbermen as the experiments continue.

THE EMPIRE AND FORESTRY

The interest which the leaders of public thought in the United Kingdom are taking in the question of forest conservation has been made clear in the past year. One of the chief evidences was the holding of the Empire Forestry Conference in London in the summer of 1920. This was attended by representatives from all the Dominions and Colonies, Canada being fully represented. The conference stressed the need of having a stock-taking of all the forest resources of the Empire carried out as soon as possible, and of immediately putting into execution plans for the protection of these forests from fire, insects, and wasteful exploitation methods. It was shown that the Empire possesses woods of all kinds but that the chief source of supply within the Empire for coniferous structural timbers is, and always must be, Canada. The important place as regards timber supply, assigned to Canada by statesmen of the Empire at this conference, was further evidenced by the passage of a resolution suggesting to the conference executive the desirability of holding the next meeting in Canada, in 1923, if arrangements to that end could be made. Throughout the conference the point was repeatedly emphasized that Canada should take prompt and vigorous measures for the conservation of forest resources both for her own sake and to meet the needs of the Empire.

The conference was held at the same time as the Empire Timber Exhibition, at which Canada was represented by a display of woods and forest products prepared by the Forest Products Laboratories of this branch. This has been fully described in Forestry Branch Circular No. 12, "The Empire Timber Exhibition," which has been widely distributed and of which copies may still be had upon application.

Another evidence of the interest in forestry in Great Britain and the looking to Canada for co-operation in this matter has been the request of the British Forestry Commission to this branch for tree seed for reforesting denuded timber lands in the United Kingdom, the Forestry Commission bearing the cost of the work. The Forestry Branch has made an energetic and sympathetic response to this request, but the year 1920 was a bad year for tree seed all over Western Canada, and especially on the Pacific coast, and the result was that but little seed could be obtained. It is hoped that conditions will permit of a heavy shipment of seed in the coming year.

STAFF AND APPROPRIATION

The strength of the inside and outside permanent staff remained practically the same as in the previous fiscal year, namely 253, and the appropriation for carrying on the work was \$862,000 as against \$850,000 in 1919-20. The details of the above will be found at the end of this part of the report.

12 GEORGE V, A. 1922

PUBLICATIONS AND PUBLICITY

The past year was a busy one in regard to publications and publicity. The most important document issued was the manual "Methods of Communication Adapted to Forest Protection" which deals with the construction and use of telephones, semaphores, heliographs, etc., in the forest. Bulletin No. 1, "Tree-Planting on the Prairies," was printed for the eighth time. The total number issued has now reached 60,000. The demand for information about tree planting necessitated a new and enlarged edition of Bulletin No. 69, "Care of the Woodlot." Bulletin No. 70, "Forest Fires in Canada, 1918," deals with the greatest menace to the forest. Several documents were printed for the Empire Forestry Convention in London in July, 1920, the one available for distribution in Canada being Circular No. 12, "The Empire Timber Exhibition." Fire prevention notices, one of the most effective means of keeping down fires in the forests, are now standardized as to size and material, but the mottoes, messages, and warnings are completely changed each year and made as striking as possible. The use of automobiles by those going into the reserves, and of airplanes to protect the forests, necessitated the designing of "stickers" to be attached to the wind-shields of the former and of slips to be dropped upon camps by the flying men. Another method of publicity adopted in the past year, by arrangement with the Post Office Department, was the placing of the words "Help Prevent Forest Fires" on the cancelling stamps of several western post offices. An important feature of the work has been the supplying of information to the newspapers of Canada, which, more than ever before, have in the past year impressed upon their readers the importance of forests to Canada and urged all to assist in preventing their destruction by fire.

LIBRARY

During the year, the library has had the opportunity of extending its usefulness to quite a degree through co-operation in the research work done by a party of the branch, from which many calls were received. The party in the field as it progressed in its investigations was kept in touch with the latest results obtained in similar work in other countries. Special mention might be made of the usefulness of certain Swedish literature in this connection. A special study of tables of volume, growth, and yield was made from which lists are being prepared and sent out, from time to time, to field officers and others interested.

In January the library was moved to more suitable and somewhat larger quarters. During the year 528 books and pamphlets have been added to the library. A total of 111 periodicals has been regularly received, 52 by subscription, and 59 by exchange or other arrangements. About six hundred photographic negatives have been added to the collection. The total number of pictures is now about 12,300.

STATISTICS

A report on the extent, character, ownership, management, products, and probable future of the forests of Canada was prepared for presentation to the delegates at the British Empire Forestry Conference in London in July, 1920. The co-operative arrangement between this Branch and the Dominion Bureau of Statistics for the publication of forest products statistics was continued. Bulletins were issued for distribution covering the annual production of lumber, lath, shingles, pulpwood, pulp, and paper under this arrangement. Studies of the wood-using industries of Canada, similar to those undertaken from 1911 to 1916, were resumed in co-operation with the Bureau of Statistics. The industries in Ontario were circularized, and the information so obtained, supplemented by that secured by personal visits to characteristic establishments, will be issued in bulletin form. The other provinces will be taken up in turn, so that each province or group of provinces will be re-visited about once every five years.

SESSIONAL PAPER No. 25

STAFF

The total permanent staff of the Forestry Branch for the last year was as follows:—

Head office.. . . .	39
District inspectors.. . . .	5
Assistant district inspectors.. . . .	2
Forest supervisors.. . . .	17
Foresters and forestry assistants.. . . .	13
Forest rangers.. . . .	100
Chief fire rangers.. . . .	8
Promoters of tree planting.. . . .	8
Forest Products Laboratories, technical staff.. . . .	19
Outside clerical staff.. . . .	42
	253

APPROPRIATIONS

The appropriation for the fiscal year was \$862,000, plus refunds from fire guarding and vote covering payments of back salary under classification, \$83,214.08; total available for expenditure \$945,214.08. The expenditure was divided as follows:—

Salaries at head office.. . . .	\$ 24,462 59
Travelling expenses.. . . .	2,518 55
Printing and stationery.. . . .	2,746 09
Miscellaneous expenses.. . . .	5,069 36
Statistics.. . . .	4,105 00
Fire-ranging.. . . .	281,896 53
Forest reserves.. . . .	467,406 64
Surveys.. . . .	8,912 93
Tree planting.. . . .	71,544 81
Forest Products Laboratories.. . . .	70,974 84
	\$939,637 34

The field expenditure, exclusive of tree planting on prairie farms, is divided as follows among the provinces:—

Manitoba.. . . .	\$129,508 26
Saskatchewan.. . . .	204,883 49
Alberta.. . . .	226,459 35
British Columbia (Railway Belt).. . . .	197,365 00
	\$758,216 10

* The figures in this column indicate the number of units on which the dues were calculated. They include 1,003,755 fence-posts, 6,239 cords of wood, 2,324,053 railway cross-ties, 7,410 logs, 38,365 lineal feet of piling, and 2,306 rails.

APPENDIX No. 1

REPORT OF THE CHIEF OF THE TREE-PLANTING DIVISION

NORMAN M. ROSS

The season of 1920 was on the whole very much more favourable than that of 1919. Generally speaking, all plantations set out this year have done as well as in any previous season, with the exception of those in certain localized districts where precipitation was very light. The inspectors generally report the 1920 plantations as very good, those set out in 1919 as poor, on account of the exceptionally unfavourable conditions prevailing during that season; and that plantings of 1918 and those established previous to that date showed a better growth than for the past three years.

An increased interest in tree planting is reported by all inspectors. On the whole, applicants are preparing their ground better and those who already have planted trees are generally giving them better care and attention than in the past. There is a more general tendency to improve the home surroundings by seeding down lawns, planting shrubs and flowers, and cultivating fruits.

The increasing injury caused by soil-drifting in many districts has led to much discussion in the press, at farmers' meetings, and in private conversation as to the possibility of lessening the enormous damage by some systematic scheme of tree planting on a large scale. Many individual farmers are considering a system of wind-breaks to protect their grain fields and a few at least are definitely planning such planting for this spring.

In the south central portion of Saskatchewan the Russian thistle has spread to an alarming extent, and from the nature of the plant is a very great hindrance to the tree planter. When matured, this weed is about three feet in diameter. It breaks off at the ground and is then blown about over the prairie till stopped by some obstruction such as a fence or shelter-belt. In the badly infested districts these weeds blow into and pile up in the tree-belts as high as the tops of the trees, and in many cases make it practically impossible to cultivate or do anything with the belts at all.

No general injury has been reported during the past season from insect attacks or winter-killing. Scotch pine and some other evergreens for some unaccountable reason were badly "burned" and in some cases killed outright, due to the very severe winter conditions. It seems difficult to understand just what combination of conditions caused this injury, as in the same localities fruits and other half-hardy plants came through without injury. The trouble was apparent only with the evergreens (conifers) and was general over the whole of the Prairie Provinces, the Northwestern States and well into Pennsylvania. I am glad to report, however, that only a very small percentage of the pines were actually killed, and quite probably similar conditions may not appear again. Planters who have had more than thirty years' experience in growing Scotch pine have never before seen a similar occurrence.

NURSERY WORK

At Indian Head the season on the whole was fairly favourable for the growing of broad-leaved stock and the stands and growths of maple, ash, and caragana seedlings were quite good. The coniferous species, however, suffered severely in the newly set out transplant plots and in the seed-beds. Dry, hot weather and high winds at planting time and for the next few weeks played havoc with the young transplants and in the seed-beds the plants came up well but were literally burned up by the hot

SESSIONAL PAPER No. 25

sun and dry weather in June. Unfortunately the water supply was extremely short and it was not possible to save the beds by artificial watering. I estimate that probably 40 per cent of the seedlings were lost in this way.

Distribution.—Shipping of broad-leaved stock commenced March 8 and was completed May 18. Evergreens were shipped out May 21 and shipping completed May 29.

DISTRIBUTION OF BROAD-LEAVED STOCK IN 1920

Number of applicants receiving trees.. . . .	4,201
Seedlings and cuttings distributed.. . . .	3,250,000
Average number per applicant.. . . .	773
Number of applicants on inspection list, 1920.. . . .	7,816
Number of new applications for 1921 inspection list, approximately..	1,800

The following broad-leaved material is available for distribution this spring (1921) from the Indian Head and Saskatoon Nursery Stations: Manitoba maple, 2,446,000; green ash, 669,500; Russian poplar, 1,404,500; red willow, 1,166,000; acute leaf willow, 285,000; laurel willow, 155,500; caragana, 337,500; total, 6,464,000.

Although weather conditions in the Saskatoon district were more unfavourable from an agricultural standpoint than the average for the province I am glad to say that a considerably better growth of stocks was obtained on the Saskatoon Nursery Station, very largely due to the increased shelter afforded by the greater development of the hedges and shelter-belts.

The number of applicants on our inspection list for 1921 will be just about the same as for last season, namely approximately 8,000. It is not possible to complete these lists at this early date. There is generally much more interest being shown at the present time than in former years in the matter of tree planting, as indicated by correspondence and also by the frequency with which this question is being discussed in the western press.

Conditions in the agricultural districts still continue to be very uncertain, labour is scarce, wages high and prices for farm produce have taken an enormous drop in recent months. Consequently very large numbers of farmers who are anxious to plant are at present unable to do so on account of lack of help or shortage of funds. As soon as more normal and settled conditions again arrive, every indication points to an increased demand for tree-planting material, especially in Saskatchewan and Alberta.

Conifers.—Applicants numbering 641 were supplied with coniferous transplants at the nominal rate charged per 100, as follows: White spruce, 79,700; jack pine, 16,750; Scotch pine, 64,150; a total of 160,600. For planting on the forest reserves we also shipped 77,400 seedlings and transplants, making a total of 238,000 shipped out.

Collection of seed.—Some difficulty was experienced in securing seed this year. The season was not, apparently, a good one for maturing seed. Ash seed was not available anywhere. We were able to secure only 1,420 pounds of maple seed, partly collected in the Qu'Appelle valley, north of Indian Head, and partly in the Treherne district in Manitoba. Cones of spruce and pine were collected in small quantities on the northern reserves in Saskatchewan and Manitoba and shipped here for extraction. One hundred and twenty-eight bushels of white spruce cones yielded 109½ pounds of seed; 105 bushels of jack pine cones yielded 41½ pounds, and 41½ bushels of lodgepole pine cones yielded 15½ pounds of clean seed.

We were also able to secure through the Forestry Commission, Scotland, ten pounds of Scotch pine seed collected in Invernesshire, Scotland. This is supposed to be one of the hardiest strains of this species. Most of the Scotch pine at present cultivated in this country originated from seed collected in central Europe. It was particularly trees of this central European strain that suffered during the past winter.

12 GEORGE V, A. 1922

Distribution of Seed.—About fifty pounds each of maple, ash, and earagana seed were sent out in small lots in March, 1921, to 106 applicants. Seventy-seven pounds of spruce and jack pine seed were supplied to the various reserves for starting seed-beds and for experimental sowings.

Permanent Plantations.—No new planting on the Nursery was undertaken during the past season, but some pruning of dead branches in the older coniferous plantations was done, not with the idea of improving the stand, but to make it easier to get among the trees when securing the annual growth measurements. As an indication of the growth under prairie conditions where trees are spaced approximately 4 by 4 feet the following measurements secured last season are very interesting:—

Plot No. 1.—Native tamarack planted in 1904; present average height, 24½ ft.; maximum height, 29 ft. 9 in.; average diameter, 3½ in.; maximum diameter 4½ in.

Plot No. 5.—Scotch pine planted in 1906; present average height, 19 ft. 9 in.; maximum height, 22 ft. 10 in.; average diameter, 3¼ in.; maximum diameter, 5 in.

Plot No. 7.—Cottonwood and maple in alternate rows, planted in 1906. Average height, cottonwood, 30 ft. 9 in.; maple, 20 ft. 2 in. Maximum height, cottonwood, 36 ft. 6 in.; maple, 28 ft. Average diameter, cottonwood, 4½ in.; maple, 2¾ in. Maximum diameter, cottonwood, 6¼ in.; maple, 4½ in.

Plot No. 8.—White birch and maple in alternate rows, planted in 1906; birch, average height, 23 ft. 2 in.; maximum height, 29 ft. 6 in.; average diameter, 3¼ in.; maximum diameter, 4½ in.

In view of the prevailing idea that conifers (evergreens) are so much slower growing than the broad-leaved kinds, it is interesting to notice that the maples in Plot 7 on the average show only about 5 in. more height-growth than the Scotch pine in Plot No. 5 and average three-quarters of an inch less in diameter. It is safe to say that the pines in Plot 5 would yield at the present time considerably more wood material than the maples in Plot 7, planted at the same time and under exactly the same conditions of soil and spacing. No thinning has yet been done in these plantations. The Scotch pines planted in Plot 10 in a heavy sod of rye grass in the spring of 1919 have come along splendidly and show an excellent growth under conditions that would have choked out any of the broad-leaved seedlings.

PLANTING IN RESERVES

In *Spruce Woods* reserve ten acres were planted with 30,000 two-year-old and three-year-old Scotch pine seedlings. Another small plot was set out with 525 white spruce transplants, as an experiment under a twenty-year stand of scrub poplar. Over 480 of these were living on September 30. The broadcast-seeding experiments were continued. An additional block of twenty acres was burned off and disked up, and sown on May 28 with a mixture of 21 pounds of jack pine seed and 34 pounds of white spruce seed. When examined on September 30 a large number of jack pine seedlings were found, and the stand estimated at about 2,000 per acre. No spruce seedlings were observed, but it would be almost impossible to find these as they would be practically indistinguishable at that age from the grass around them. Towards the end of June two pounds of spruce seed were sown in a blow-hole, where ground cedar had become established. No seedlings were found here in the fall. On November 18 two pounds of spruce seed were sown among scrub poplar and willow, the surface growth of grass being first burned off.

SESSIONAL PAPER No. 25

- In *Cooking Lake* reserve 675 white spruce and 675 Scotch pine transplants were set out, adding to the planting of last season.
- In *Cypress Hills* reserve 2,025 white spruce and 2,025 Scotch pine seedlings were planted in the neighbourhood of the ranger station.
- In *Duck Mountain* reserve, 2,225 white spruce transplants, 2,225 jack pine transplants, 750 white spruce seedlings, and 750 jack pine seedlings were set out in several small plots for experimental purposes. Adjoining the Grand View ranger station, seven plots ($\frac{1}{4}$ acre and $\frac{1}{2}$ acre area) were seeded with jack pine and white spruce, under various conditions of ground cover and preparation of seed-bed.
- In *Dundurn* reserve, 9,000 spruce and 4,000 jack pine seedlings were used, principally in filling blanks in previous plantings.
- In *Elbow* reserve 15,000 seedlings each of spruce, Scotch pine, and jack pine were used for filling blanks.
- In *Nisbet* reserve 5,400 Scotch pine transplants and 2,700 jack pine transplants were planted, principally for experimental purposes.
- In *Riding Mountain* reserve 3,000 spruce, 750 Scotch pine, and 3,700 jack pine transplants were set out in several different small plots, some under poplar stands, some on open prairie. Different methods of planting and preparing the ground were employed, the purpose of these plots being purely experimental. Experiments were also started with direct seeding in spots and furrows and also broadcast. In the fall several more sample plots were broadcasted after burning off the ground cover.
- In *Turtle Mountain* reserve 3,000 white spruce transplants were planted in four $\frac{1}{4}$ -acre plots close to what is known as the Boissevain trail. Some were set in furrows and others directly in the sod. In November, 1920, one $\frac{1}{4}$ -acre plot on a heavily burned area was sown with white spruce broadcasted.

VIDAL'S POINT

Forty-three permits, as compared with thirty-four in 1919, were issued for camping on the Government property known as Vidal's point, which is situated on the Qu'Appelle lakes. The public generally also made very considerable use of the portion reserved for general recreation, bathing and picnics.

APPENDIX No. 2

REPORT OF THE DISTRICT FOREST INSPECTOR FOR MANITOBA

F. K. HERCHMER

I am pleased to report that the people of Manitoba are evidencing an active interest in the forest resources of the province, and that we are yearly meeting with more hearty co-operation. The public realize more keenly than ever the immense importance that forests play in our economic and national life. It is no longer necessary to point out to them the necessity of using non-agricultural land for the production of timber, and the high prices of lumber and newsprint paper, added to the increased cost of transportation, have brought home to them the advantage of an ample local supply.

12 GEORGE V, A. 1922

IMPROVEMENTS

Owing to the high cost of labour and other conditions during the summer of 1920, only necessary repair work, such as could be done by our own rangers, was undertaken. About three miles of new telephone line were completed in the Turtle Mountain forest reserve. Roads were repaired in all reserves and fireguards reploughed in the Spruce Woods and Turtle Mountain forest reserves.

SILVICULTURE

Owing to the sudden heavy drop in the price of grain and the resultant financial stringency, the settlers in the vicinity of forest reserves did very little building on their farms, the result being a distinct falling off in the number of permits issued on forest reserves. This lessening of the amount cut, however, permitted the more careful regulation of the cutting and brush-burning operations, and it was very gratifying to see that the operators themselves realized the advantage of brush disposal and cheerfully carried out the regulations in this respect. The cost of brush disposal, under the method of burning employed in this district, is less than one dollar per thousand feet board measure, and this burning not only reduces the insect and fire-hazard, but also leaves the forest floor in good condition for natural regeneration.

Several sample plots for the study of growth, etc., were laid out, marked, and recorded in the Riding Mountain forest reserve, and annual measurements will be taken.

REFORESTATION, PLANTING AND SEEDING

During the spring of 1920, in addition to carrying out the regular planting programme on the Spruce Woods forest reserve, some forty experimental plots were either sown or planted on the different reserves. The object of this experimental planting is to determine the relative advantages of planting or sowing different species under varying conditions of soil, forest cover, and in different seasons of the year, that the best and most economical methods of artificial reforestation in places where natural regeneration has failed may be ascertained. Careful records are being taken, and the different plots closely watched. In addition to the valuable information collected in this way for future use, the forest rangers are being educated in this important part of their work, so that when the time comes for extensive reforestation by planting and seeding there will be a well trained staff to carry on the work.

GRAZING

The use of the forest reserves for grazing is increasing in popularity with the settlers. Numbers of applications for the formation of stock associations under the forest reserves regulations are being received, particularly in those districts where other stock associations have been operating for a few years, proving that these associations are satisfactory to the settlers as well as to the forest officers. Owing to the decline in the price of cattle it is probable that there will be some reduction in the number of cattle grazed during the coming summer.

RECREATIONAL USES

Summer resorts in forest reserves continue to increase in popularity. Applications for building sites are coming in, which will necessitate the surveying of additions to the present sites in the near future. Applications have also been received for the laying out of new summer resorts in other parts of the reserves. As the roads are improved both without and within the forest reserves, this use of the reserves will increase very rapidly.

SESSIONAL PAPER No. 25

GAME AND FISH

Owing to the accessibility of the reserves in this inspectorate and to the fact that they are entirely surrounded by settlement, game animals are being rapidly killed off and fur-bearing animals have almost disappeared. This matter has been drawn to the attention of the provincial game department, and I understand steps are being taken to afford greater protection to animals within the reserves.

Large numbers of pickerel fry from the Dominion fish hatcheries at Selkirk, Manitoba, were placed in some of the larger lakes in the Duck Mountain and Riding Mountain reserves, and it is hoped to continue this until the lakes are well stocked with these fish. At present very little fishing is being done within the reserves.

FIRES

Climatic conditions during the summer of 1920 created the greatest continued hazard in the experience of this inspectorate. The season was a very unusual one for this province. Usually our greatest danger period is in the early spring, during the months of April, May, and June. In 1920, however, these three months were passed in safety. This is accounted for by the extremely heavy snowfall of the previous winter, very early spring rains, and the fact that grass and undergrowth became green before the ground had thoroughly dried out. From the end of June until the second week of September there was practically no rainfall, and everything became very dry, particularly in the northern part of the province. Muskegs dried up and lakes and rivers reached an extremely low level. Fires were bad over the whole province in August. Many settlers in the Lake Winnipeg and Lake Manitoba districts had buildings destroyed. Considering the long dangerous period, the loss in commercial timber was small, as, with great effort, fires were confined to, and held in the muskegs.

APPENDIX No. 3

REPORT OF THE DISTRICT FOREST INSPECTOR FOR SASKATCHEWAN

C. MACFAYDEN

The work of the Forestry Branch in Saskatchewan, consists in the administration of the Dominion forest reserves within the provincial boundaries, and that portion of the Porcupine forest reserve lying in Manitoba, together with the maintenance of a fire-protection staff on those lands not yet included in any reserve but on which there is now merchantable timber or valuable young growth. The Branch is thus concerned with all lands that are likely to be maintained permanently under forest cover, whether they are now actually established as reserves or not. To the foregoing work, should also be added that arising from the enforcement of the fire-prevention requirements, laid down by the Board of Railway Commissioners of Canada for railways under the jurisdiction of that body.

The forest reserves now actually established, number fifteen, with an aggregate area of approximately 6,500,000 acres, exclusive of the proposed Big Stick forest reserve, north of Maple Creek, containing approximately 400,000 acres, which while not as yet established by Act of Parliament, is, in part, administered by the Forestry Branch. These figures are as they were a year ago, no new reserves having been established during the year, and the area of lands withdrawn from existing reserves being so small as to be negligible. Since the early part of the year applications to have lands withdrawn for agricultural purposes have grown less and less, indicating that lands suitable for this purpose within the reserves, are growing correspondingly

12 GEORGE V, A. 1922

scarce. In dealing with these applications, the attitude was taken that ultimately all lands should be put to their highest economic use, and there was accordingly no hesitation in recommending for withdrawal lands that were upon examination, thought to be suitable for the growing of cereal crops. As stated in my last report, withdrawal was not recommended when the lands applied for were found to be suitable only for grazing purposes. In the case of these it was believed that the Forest Reserves Regulations provided for their fullest use, and their retention, if for no other reason, was by this justified. That such action will meet with public approval, is indicated in the resolutions passed at several meetings called to discuss the problems of the so-called "dry belt" of the province. In these resolutions it was urged that all lands not suitable for cultivation be retained as "community range," on which the stock of the district would be grazed on a co-operative basis.

FIRE PROTECTION

Unlike the preceding season that under review was, from a fire-protection standpoint, a normal one over the greater part of the district. Owing to an extremely long winter, the interval between the time when the snow disappeared and the time when the vegetation had advanced sufficiently to check fires that may have started was very much shortened, with an accompanying reduction in the fires that are usually looked for in the latter part of April and in the month of May. The advantage thus gained was, however, offset to some extent by a period of drought during parts of July and August, a period during which we are usually comparatively free from fire. The fires occurring at this time were the most serious of those during the season, and the situation was for a short time most critical, particularly in the Battleford fire-ranging district and the neighbouring reserves and districts of the Prince Albert fire-ranging district and the northeastern part of the province. The southern and central northern reserves and fire-ranging districts escaped and experienced a very favourable season on the whole. The peak of the fire-hazard, coming as it did at an unexpected time and during the harvest season, found this office handicapped for labour, although with few exceptions the situation was satisfactorily handled. The damage and fire-fighting costs were kept down, the expenditures on this account being less than one-third those of the preceding year, and the damage infinitely smaller. In order that the flow of labour from the wooded districts to the harvest fields will not again deplete the supply, it is hoped that in future improvement and fire-fighting work can be so correlated that the former will maintain such a supply of labour during the fire season that at least the nucleus of a fire-fighting crew will be available for the latter at any time. Following the dangerous period in July and August, there was sufficient rainfall to minimize the danger of fire until the first frosts and long, cool nights again came around. These, as usual, effectively checked any fires that started.

Fires set out for land-clearing purposes continue to be one of the greatest sources of forest fires, and with the increasing rural population in and adjacent to the wooded districts, this hazard is one that will no doubt continue for some years to come.

Another growing source of fires, lies in the increasing interest in prospecting for mineral, gas, and oil in the northern and northeastern parts of the province. This particularly affects the Pasquia and Porcupine reserves, and the fire-ranging districts immediately north of them. One or two fires were undoubtedly started by prospectors this season, and while it is a difficult cause to deal with, since those engaged in this work are very apt to find their way into any part of a very large territory, plans are being laid to keep as close surveillance of these as possible.

IMPROVEMENTS

The year saw considerable progress made in the improvement programme for the district. In any system of forest management removed from mere exploitation, it is necessary that a large capital investment be made to provide the necessary accommoda-

SESSIONAL PAPER No. 25

tion for the staff, that every part be made accessible by wagon road or pack-trail, and a communication system established, rendering possible the rapid communication of messages arising out of administration and fire-protection matters. There is a tremendous amount of such work necessary to bring heretofore undeveloped reserves into such shape as to allow of the administration aimed at.

The planned telephone system on a number of the reserves, especially the larger ones in the north, was pushed forward during the year. On the Sturgeon forest reserve, twenty-five miles of line construction this year completed the primary system, and there is now a line around three sides of the reserve, placing the officer in charge in direct touch with each forest ranger under his supervision. The line previously constructed on the Big River forest reserve, and running from the town of Big River to the Otter Creek ranger station eight miles north, was extended westward as part of the primary system crossing the reserve from east to west and connecting the Gutches and Birch ranger stations with the reserve headquarters. This line is not yet completed, but that portion now built is of standard pole construction and one of the best in the district. When completed, it will fulfil a long-felt want in a country far removed from all commercial or rural lines, and with only an infrequent mail service. The same line was, under an agreement with the Canadian National Railways, extended south from Big River, on the railway telegraph poles, a distance of four and a half miles to the Bodmin lookout tower, from which point an observer overlooks the greater part of the Big River forest reserve and a portion of the Sturgeon reserve with the country intervening. The headquarters of the Porcupine reserve are situated near Usherville at a distance of thirty miles from the nearest railway point, and the lack of telephone communication with our officers there has been a serious drawback to the proper administration of the reserve. In order to overcome this and also to provide connections with intermediate points on the reserve a line was built to Hudson Bay Junction on the Canadian National railway. A line constructed on poplar poles some years ago, on the Beaver Hills reserve, was this year placed on cedar poles. At the same time there were built six miles of standard metallic line on cedar poles, giving connection with the rural line south of the reserve, so that the system on this reserve is now complete, and gives communication with the whole of the surrounding settlement. The headquarters of the Manito forest reserve, situated eight miles west of Yonker, were connected with the latter point by metallic line on cedar poles, and now have connection with the rural lines north and east of the reserve.

In addition to the foregoing new construction, the required maintenance work was carried out on existing lines, and several short connections built to lookout towers. While even our primary system is yet incomplete, we are rapidly reaching the stage where all of our headquarters and most of our important ranger stations are provided with telephone facilities.

Three houses were built during the year, two at Big River, providing accommodation for the senior forest ranger and clerk, and one at Fort a la Corne for the senior forest ranger at that point. A new barn was erected at headquarters of the Nisbet reserve to replace the old one destroyed by fire during the year. In addition to the foregoing, several log-cabin patrol stations were completed, and the necessary maintenance work carried on on all the older buildings.

Expenditure on new roads was limited to those following the telephone lines built on the Big River, Sturgeon, and Porcupine forest reserves, these two facilities being closely related, and the work of construction usually going hand in hand. Except in the case of that on the Big River forest reserve, it was not attempted to complete the road in all detail, but rather, after properly locating the route, to merely make it passable, leaving the remainder of the work to be carried out by the reserve staff as opportunity offered.

12 GEORGE V, A. 1922

No steel lookout towers were erected during the year, but several wooden towers of different designs were put up by the rangers on the better lookout points. We have been fortunate so far in placing our steel towers on what proved to be good lookout points, but the practice of first placing inexpensive wooden towers on points about which there is any doubt, before erecting a steel structure, is to be commended.

Little outlay was made on account of improvements within the fire-ranging districts, the work here being confined to that which could be accomplished by the rangers themselves. In the more northern districts, this consisted of the marking and clearing of portages and the erection of towers at frequent intervals along the waterways patrolled. Farther south, where horses are the means of transportation, old trails were opened up, and when necessary, streams and soft places bridged or corduroyed.

GRAZING

In spite of the unsatisfactory condition existing in the stock industry, there was, as predicted in my last report, an increase in the use of the reserves for grazing. The increase was not equal to that made in the preceding year, but yet very satisfactory in the light of the experience passed through by the stockmen the winter before, and the condition of the beef and mutton market for the greater part of the year under review. There were altogether 839 permits issued, representing in the aggregate, about 38,500 head of stock. Not more than 10 or 12 per cent of the above stock was carried on the northern reserves. In other words, about 90 per cent of the grazing is done on about 10 per cent of the total area of the reserves. It is doubtless true that a large percentage of the land of the northern reserves is unfitted for grazing, but there are sufficient grazing lands of a quality equal to the southern reserves to maintain three to five times the number of stock we now have under permit. Certain adjustments in grazing methods in these northern reserves have been made, and it is safe to assume that the utilization of the forage crops of these lands will now steadily increase.

The use of the various ranges on a co-operative basis continues to grow in favour, and where there were twenty-four stock associations last year, there are now thirty-five. With few exceptions, these are active, thriving bodies, with a tendency to enlarge on the original object of their formation. It is particularly gratifying to see the increasing interest taken in securing better breeding stock. Thus eventually, the stock in the district from which the associations membership is drawn, will be of a high quality, and limited to a single breed. This would seem to be the line along which the associations growth should be encouraged, and the propaganda now being carried on by the different provincial and federal departments, and the universities, for the eradication of scrub breeding stock is having that tendency.

Throughout the reserves, there are areas producing annually a quantity of wild hay. The Forest Reserves Regulations make provision for the issuance of permits authorizing the cutting of this, either for a settler's own stock, or for sale, although permits for the latter use are issued at a higher rate of dues, and only after the needs of those requiring it for their own stock have been satisfied. At best it is an uncertain crop, and periodically there occur years when the crop is negligible, with the result that those depending on it find themselves short of winter feed at a time when this condition is hard to rectify. During the best of years it is a precarious source of winter feed and, everything considered, it is not deemed advisable to encourage this use of the reserves, except in particularly favourable locations. With the increasing frequency with which most of such lands are being grazed, the permits to cut hay will probably gradually disappear. The year under review was, unlike the preceding year, one of an abundant hay crop in most parts, and 651 permits for this use were granted, totalling 15,300 tons. Generally, the demand, though equal to the supply, was only

SESSIONAL PAPER No. 25

a fraction of what it was a year ago, except in the case of the Nisbet Forest Reserve, where, owing to the number of applicants, the privilege to cut each meadow was put up to tender.

USE OF RESERVES FOR RECREATION PURPOSES

There was not the increase in the use of the different reserves as recreation grounds which had been looked for. The recreational facilities of the reserve were not taken advantage of except the regularly established resorts of the Moose Mountain reserve, and the parts of the Manito reserve designated as picnic grounds. It is possible that the general business depression and uncertainty existing throughout the year prevented people from holidaying as they would otherwise have done, but there are indications that with the return of normal conditions, the different reserves are going to be frequented by pleasure seekers much more than in the past.

The Fish Lakes resort, in the Moose Mountain reserve, continues to lead in the number of people visiting it. The ranger in charge states that at a conservative estimate, between ten and twelve thousand people visited this place during the holiday season, a very large percentage of them coming in from North Dakota and Montana, to spend the week-ends. The fishing regulations require non-residents only to take out permits, and from these visitors over \$1,000 was collected in this way, at this point alone. When there is added to this the money spent in other ways, and the publicity given, this use of the reserves appears to be one that should be encouraged, so long as it does not interfere with the objects for which the reserves were set aside. During the year, co-operation with the provincial department charged with the administration of the game laws was very much increased by that department vesting a number of Forestry Branch officers with the powers of game guardians.

TIMBER SALES AND PERMITS

During the year's cutting season, there were sixteen timber sales in good standing. Four of these were made during the year. Only nine of those that were in good standing, were operated, although these show a cut approximating that of last year, namely, 3,500,000 feet board measure. The timber sale business has for some years past been virtually confined to the Pasquia and Poreupine reserves, the only others in which operations were carried on, the Nisbet and the Fort à la Corne, producing only a small quantity. The price received for the material sold, was on the average considerably higher than in former years.

Where any competition was expected, the sales were made by public auction instead of by tender as in the past. Except where the amount is small, and only the applicant interested, sale by auction was found to be much more satisfactory from the standpoint both of the department and of the persons contemplating purchase.

During the year the policy of last year, of endeavouring to limit, as far as possible sales to fire-killed material was continued. Sales made on the Nisbet and Fort à la Corne reserves were entirely of this class, and on the Porcupine a considerable percentage was fire-killed, although enough green material was sold to encourage the removal of the dry. Green material was also sold in every instance where it lay in comparatively small blocks adjoining lumbering operations, as if not cut with these it would probably remain until overmature, or become decayed and wind-thrown, since these blocks did not in themselves constitute a lumbering unit that would justify a separate operation. It is believed that of the fire-killed timber that we can hope to salvage, sufficient has been cut to leave only what can be taken care of by the normal demand.

During the latter part of the winter, several inquiries were received in connection with available pulpwood, and there is some indication that some of the mills are turning their eyes to northern Saskatchewan in search of this product. The export of

12 GEORGE V, A. 1922

this class of material in an unmanufactured state is prohibited, so that the demand at present is limited to one or two Canadian mills, but if these can utilize the black spruce so common on some of our northern reserves, it will help very much in the utilization of this material.

Timber permits issued free to homesteaders, for material for their own use, and permits for material at the prescribed rate of dues, were both in excess of those of last year. The number of permits issued was 805 free and 992 paid, a total of 1,797. A greater number would no doubt have been issued except that during the early part of the winter, there was hardly sufficient snow to permit hauling, and during the latter part it was so deep as to make hauling difficult. The very mild winter also had a tendency to disrupt the fuel-wood market, with the result that permits for this class of material were not in the same demand as was anticipated from the state of the labour market. In Prince Albert there existed a demand for railway ties, which afforded an opportunity to sell a very considerable quantity of fire-killed jack pine on the Pines, Nisbet, and Sturgeon forest reserves. In order to secure as close utilization as possible, the conditions attached to these permits stipulated that all tops must be made into cordwood, where this was practicable and the market could be found.

APPENDIX No. 4

REPORT OF THE DISTRICT FOREST INSPECTOR FOR ALBERTA

C. H. MORSE

The work of the Forestry Branch in the province of Alberta falls into two main divisions: the protection and administration of the forest reserves, and the protection of timber lands not included therein. This latter work includes a special organization co-operating with the Board of Railway Commissioners of Canada for fire protection along railway lines.

FIRE PREVENTION AND SUPPRESSION

Fires within Forest Reserves.—The winter of 1919-20 was an unusually severe one with a very heavy snowfall, and as a result the spring was very backward. Except in certain especially dangerous localities, as for instance, along the Coalspur-Lovett line on the Brazeau forest, we entirely escaped the usual spring fire-hazard. Throughout the early summer showers were frequent and the growth of grass, so long delayed, became very rank. After the middle of July the rains ceased almost entirely and the weather turned very hot. By the end of July we had to face a very dangerous fire situation, for the heavy growth of grass soon dried and became very inflammable. The weather continued exceedingly dry up to October 11, when a heavy, general snowstorm occurred. A few fires were reported after that date but they were small, burning in moss, and not particularly dangerous.

A total of 106 fires was handled by the forest reserves organization during the season, of which two occurred outside the reserves. Of these, 84 were caused by railways, 8 by campers, 5 by smokers, 4 by lightning, 1 by a stationary engine, and 4 by unknown causes. On the forest reserves 12,000 acres were burned over, but fortunately the fires were kept away very well from areas bearing merchantable timber. The total quantity of timber killed and damaged was approximately ten million feet of saw-timber and twenty-two thousand cords of fuel-wood.

Fires Outside Forest Reserves.—Fire protection on Dominion lands outside the forest reserves is carried on in three large divisions, the Edmonton, McMurray-Slave, and Mackenzie River fire-ranging districts. The latter two districts include

SESSIONAL PAPER No. 25

all the great river routes in northern Alberta and the region to the north of it, from Grand Rapids on the Athabaska river and Vermilion Falls on the Peace river. The timbered land south of these points not included in the forest reserves forms the Edmonton district. This latter district is under the supervision of a chief ranger who, with four sub-chiefs, directs the work of thirty-eight rangers.

Ten large fires and 228 small ones occurred in the Edmonton district, burning an area of approximately five thousand acres. Fires occurred in all months from April to December, but October was the most dangerous. Railways contributed 58 fires; campers, 57; settlers, 58; sawmills, 3. The causes of 50 of the fires could not be determined. Two convictions were secured against lumber companies for allowing fire to spread from their mills. A settler was fined for burning brush without proper precautions, and two men were fined for refusing to fight fire.

In the McMurray-Slave district twelve rangers and four assistants are employed, working under the supervision of a chief ranger whose office is at Fort McMurray. Six large fires and 22 small ones were reported in this district, burning an area of 6,000 acres. They occurred at various times from April to September, and with the exception of seven were caused by campers and travellers. No fires were reported from the Mackenzie district.

Railway Fire-ranging.—Supervision of the railway fire patrols was carried on as in previous years in co-operation with the Board of Railway Commissioners. This work covered the Canadian National, the Grand Trunk Pacific, the Canadian Pacific, and the Edmonton, Dunvegan, and British Columbia railways. There were 355 railway fires reported, practically all of which are believed to have been started by locomotives. This large increase over the number of railway fires of last year is attributed to the greatly increased traffic and the use of inferior coals. Of the 355 fires 260 were extinguished almost as soon as started and burned only a few square yards. The damage done by these was, of course, negligible. Of the remaining 95 fires only five spread over an area greater than fifty acres or did any serious damage. The total area burned was approximately 3,000 acres, of which less than one-third carried merchantable timber, the remainder being young growth and old brule. The merchantable timber destroyed, it is estimated, amounted to 180,000 feet board measure of saw-timber and 9,000 cords of fuel-wood. It is interesting to note that one single fire is responsible for 80 per cent of this damage.

AIRPLANE PATROL

The summer of 1920 witnessed the first use of airplanes in forest protection work in this district. Through the co-operation of the Air Board an air station was established at Morley to carry out flights over portions of the Rocky Mountains forest reserve for the detection of fires. It was decided that the southern part of the Rocky Mountains reserve including the Crowsnest, Bow River, and part of the Clearwater forest would be the most satisfactory region to test an airplane patrol. The reason for this is that on the reserves named above there are better communication facilities than elsewhere and the best possible use of airplane reports can be made. On the Bow River and Crowsnest forests all important ranger stations are linked up with the supervisor's office by telephone and the stations are accessible by motor-car.

The location of the air station was decided upon on June 11 and the hangars were shipped immediately. Unfortunately, however, airplanes could not be provided for some time and it was not until September 7 that the first patrol was made. After this date no fires occurred on the areas patrolled, consequently I am not in a position to demonstrate the usefulness of the patrol for detecting fires. I am quite convinced, however, that airplane patrol will be a great success for this purpose during the coming summer. On the Bow River forest, on the upper Red Deer river, one fairly large fire was burning at the time the air patrols were inaugurated and the

12 GEORGE V, A. 1922

supervisor used the machines to make daily reconnaissances of the fire. By so doing he kept fully in touch with the operations and on his return to his office he could telephone his instructions to the ranger. By use of airplanes the reconnaissance of the fire was made in half a day. Without them it would have taken a week's trip with saddle and pack-horses. Airplanes were also used for a small amount of photographic mapping on the Bow River forest. It was found, however, that this work was left until too late in the season and that long shadows were cast by the trees, due to the low altitude of the sun, thus making confusing parallel lines on the photograph. This effect was heightened by the presence of snow on the ground.

IMPROVEMENTS

A combination of circumstances prevented the carrying out of our improvement plan in its entirety. In the first place the spring was very late and it was well on in June before improvement crews could work to advantage. When weather conditions became suitable the rate of wages rose so high that it was decided to reduce our improvement programme as much as possible.

A large amount of trail maintenance was found to be necessary on all reserves but very few new construction trail projects were undertaken. On the Crowsnest forest the Beaver Mines road was reconstructed in co-operation with the McLaren Lumber Company. On the Bow River forest further work was found to be necessary on the Red Deer road to make the ranger station accessible by motor-car. The Elbow bridge, which was badly damaged by a flood in 1919, was repaired and put in condition for traffic again. On the Lesser Slave reserve work was continued on the construction of a great mileage of secondary trails, in order to open up large districts of the reserve which are even yet rather inaccessible.

Two ranger houses were constructed on the Crowsnest forest. On the Clearwater one ranger house was built and materials were purchased for another. It has been decided to move the headquarters of the Brazeau forest to Coalspur. This necessitates the building of houses for the supervisor and the assistant, and also an office building. On the Athabaska forest, building construction was limited to a speeder house and one cabin, and on the Lesser Slave reserve, three small log cabins were built.

Only two telephone lines were constructed during the year, the longest being from Red Deer ranger station to the Parks ranger station at the Brewster ranch, a distance of approximately twenty-two miles. On the Cypress Hills reserve there were constructed ten miles of a line which will ultimately link up the reserve headquarters with the Birch Creek ranger station.

TIMBER SALES AND SILVICULTURE

During the year thirteen timber sales were in operation in the district. Nine of these sales had been running previously and one has been in operation since 1913. Four new sales were awarded during the year, three of them being for dry props for mining companies in the Clearwater and Brazeau forests and one for green timber on the Lesser Slave reserve. As in previous years the Bow River forest disposed of timber by permit only, but an application for a timber sale has now been received. The bulk of the timber permit business is confined to the Cypress Hills reserve and the Crowsnest and Bow River forests, the last named showing a remarkable increase during the year.

Considerable work was done during the summer in examining and reporting on areas of mature timber, where timber sales are proposed; for which work a party of three students was employed. One area was examined on the Bow River forest and two on the Lesser Slave reserve. A party of two students spent a short period in the Porcupine Hills district gathering data for volume tables for Douglas fir, Engel-

SESSIONAL PAPER No. 25

mann spruce, and lodgepole pine; and, while carrying out a grazing survey, another party of student assistants completed a timber reconnaissance of two and a half townships of the Crowsnest and one and a half townships of the Bow River forest. Accurate timber type maps were submitted for these areas.

Some planting was done during the year on the Cypress Hills and Cooking Lake forest reserves with transplants supplied by the Indian Head Nursery Station. On the Cypress Hills, approximately two thousand white spruce and two thousand Scotch pine were set out but were more or less of a failure, possibly owing to the fact that the plants were too far advanced in their spring growth to adjust themselves to the much higher altitude of the Cypress Hills. Somewhat better success was experienced on the Cooking Lake reserve where 1,350 transplants were set out. It has been decided that planting material should be grown in the reserve in which it is to be set out. With this in view nursery work has been continued in these two reserves. In the Cooking Lake reserves six new seed-beds were prepared and eight in the Cypress Hills. The Cypress Hills also contributed twenty bags of lodgepole pine cones for the Indian Head Nursery Station.

GRAZING

On account of the abnormal conditions prevailing in the cattle industry there was not the usual increase in the number of stock grazing in the forest reserves of this district. The summer of 1919 was a particularly dry one and few ranchers raised sufficient feed for their stock. To make matters worse the winter was very cold and snow was deep. As a result the stockmen sold as many cattle as they could, even at a sacrifice, and there were further reductions to herds by losses on the range. In the spring many ranchers could not afford to restock at the high prices then prevailing and many who had grazed on the forest reserve for years found their own lands sufficient to pasture all their stock. This was particularly the case on the Crowsnest forest. In spite of these unfavourable circumstances there were grazed on the forest reserves 28,141 cattle, 9,225 horses, and 2,855 sheep. The Clearwater, Brazeau, and Athabaska forests, and Lesser Slave reserve are practically unutilized for grazing at present, as there are still considerable areas of open range between the settlements and the forest reserves. Even in the southern reserves there is mountain range available for large herds of sheep which goes unutilized each year. Last summer only three permits for sheep were issued. The reason for this seems to be that stockmen have not yet learned that mountain range is very desirable for sheep. Added to this is the fact that it is difficult to secure herders who have had experience in caring for sheep under such conditions.

The season of 1920 was a very favourable one for grazing. Although the spring was very late and the range was not ready for grazing as early as usual, there was an abundance of rain in the early summer, which produced a luxuriant growth of grass. The late summer was very dry and the grass cured well, thus providing for a certain amount of old feed to supplement the young growth in the spring.

The growth of stock associations, formed for the purpose of co-operating with the Forestry Branch, is indicative of the interest which stockmen take in the use of the forest range. There are now fourteen stock associations recognized by the Forestry Branch. Of these three are in the Bow River forest, three on the Crowsnest, seven on the Cypress Hills, and one on the Cooking Lake. The members of an association graze stock on the reserve as a community and pay such costs as herding, salting, and fencing by a pro rata assessment.

During the summer the policy of extending the grazing survey was continued, and the west Poreupine Hills section of the Crowsnest forest was completed. This was accomplished by a party of five forestry students working under the direction of the grazing inspector. A detailed grazing type map was compiled and data gathered by means of which can be determined the number of stock which can be allotted to the various grazing districts. A comprehensive collection of forage plants was

made at the same time. After completing the work in the Porcupine Hills district the party moved to the North Sheep district and covered one and a half townships in a similar grazing survey.

A very satisfactory condition of grazing management exists on all ranges where our summer grazing policy has been definitely established. Stockmen generally are beginning to realize the necessity of holding over some old forage for use during the critical spring months and not allowing it to be eaten off bare in places, as is the condition where winter grazing is practised. On ranges used in the summer only, 100 per cent more stock can be pastured than where year-long grazing is carried on. This allows for a wider distribution of grazing privileges without the necessity of reducing the permits of the larger owners. Ranges so handled are not only improving but are producing better beef. This improvement is due to the better care and feeding of stock during the winter. Stockmen using the forest range are realizing the importance of improving the grade of stock, having found that it is more profitable to raise fewer animals of better quality than to run large numbers of scrub stock. One great advantage of limiting grazing to the summer period has been that the forest range can be freed of stray and unpermitted stock. A large number of grazing divisions were satisfactorily cleared of all stock at the close of the past summer season and this includes hundreds of stray and unpermitted stock, the owners of which were required to pay trespass dues. Forest Officers are unanimous in stating that the difficulties of handling a grazing administration are greatly reduced on divisions where winter grazing is prohibited, and stockmen are beginning to realize that it is in their interests as well. Many of them who never before cultivated land or provided their stock with winter feed are now growing crops to ensure safe wintering for their herds.

APPENDIX No. 5

REPORT OF THE DISTRICT FOREST INSPECTOR FOR BRITISH COLUMBIA

D. ROY CAMERON

The British Columbia inspection district embraces the Dominion forest reserves in British Columbia and the Coast, Salmon Arm, and Revelstoke fire-ranging districts, all situated within the Railway Belt of British Columbia.

FIRE PREVENTION AND SUPPRESSION

The fire season of 1920 surpassed in hazard, intensity, and expenditure the season of 1919, which in turn was more difficult to handle than any other season encountered until that time. The season of 1920 differed from the season of 1919 by reason of the fact that the trouble was restricted to the country lying east of the Cascade range. The dangerous season in the Coast district was very short, owing to abnormal precipitation and high water during the early part of the season, and to the fact that the fall rains began early in August. Also, September, normally a bad month in the Coast district, developed, in 1920, heavy and continuous precipitation.

In the interior the fire season started propitiously, due to the slow, backward spring and normal precipitation. With the advent of July, however, conditions rapidly changed for the worse. Dry, hot weather set in, accompanied by unusually prevalent winds and a series of electrical storms devoid of precipitation. These storms occurred on July 19, July 29, and August 10. Fires started by lightning developed throughout the entire region from the vicinity of Lytton to the Alberta

SESSIONAL PAPER No. 25

boundary. They were worst, however, in the region of the Shuswap lake and in the Eagle pass. Of all fires occurring during the season, 39.1 per cent were caused by lightning, this being by far the highest percentage attributed to this cause since the inauguration of forest administration in this district.

The total number of fires reported from all sources as occurring in the Railway Belt was 422, as compared to 408 in 1919 and 285 in 1918, which later was in many respects a normal year. The proportion of large fires—that is, fires burning over ten acres—was again abnormal, amounting to 50.7 per cent of the total, as against 52.9 per cent in 1919. On the other hand, increased efficiency of the control organizations was seen in the fact that the number of fires caused by human agency decreased from 370 in 1919 to 267 in 1920.

Of the causes of fires reported during 1920, lightning assumed first place, as mentioned above. Railway fires again were in the second place with a percentage of 14.6, as against 19.3 in 1919. For the first time yet reported, fires of unknown origin dropped to third place with a percentage of 13.9, as against 19.6 in 1919. Fires started by settlers clearing land showed the biggest reduction, dropping from 13.4 per cent in 1919 to 8 per cent in 1920. This fact, together with the correlated reduction in fires attributed to campers, which dropped from 15.7 per cent in 1919 to 5.6 per cent in 1920, indicates a very considerable tightening up in the control organization. Indeed, apart from the unfortunate occurrence of fires beyond human control, the results of the season were very satisfactory, notwithstanding a fire-hazard unparalleled in the history of forest protection in this district.

The 422 fires burned over 64,336 acres, destroyed or damaged approximately 148,000,000 feet of timber and over 18,500 acres of young growth.

Fires within Forest Reserves.—Thirty-one fires were reported within forest reserves during the season of 1920, twenty large and eleven small. The leading causes of these in percentages of the whole were as follows: lightning, 58 per cent; travellers, 20 per cent; hunters and campers, 7 per cent. The percentage of fires of unknown origin dropped to 3.5 per cent, a very satisfactory record. These figures show that human carelessness is still a serious factor. No fires were reported as having been deliberately set, an unusual experience when compared with the record of previous years.

The lookout stations again demonstrated their worth and the establishment of an additional lookout station at Tuktakamin mountain greatly increased detection efficiency. These lookout stations, more than any other feature of the protection organization, assist in safeguarding the forest resources of the Dominion forest reserves. It is considered that the present area under forest reserves can be completely served, as far as the detection of fires is concerned, by the establishment of three additional lookout stations, on Poreupine ridge, Cornwall hills, and Promontary mountain respectively. As in 1919, the great bulk of the work in fire control devolved on the forest reserves staff, owing to the difficulty of securing efficient labour.

Fires Outside Forest Reserves.—The experiences of 1914 and 1919, both seasons of abnormally high fire-hazard, were duplicated during 1920. That is to say the situation got out of control in the region of the Shuswap lakes, within the boundaries of the Salmon Arm fire-ranging district. The cause was the same, namely, a higher percentage of settlement adjacent to and within the confines of the timber areas, with attendant increased fire-hazard from settlers' fires, and the liability of certain areas to fires started by lightning. In addition to these factors the fire-danger is comparatively high in this region, due to higher daily temperature during hot weather periods, to lower relative humidity, and to greater frequency and higher average velocity of wind. Comparing the seasons of 1919 and 1920, as far as the Shuswap lake and adjacent territory is concerned, the outstanding difference lies in the higher percentage of fires caused by lightning. In 1919, the percentage of fires caused by lightning was 15.5, while in 1920 the percentage rose to 45.6. On the other hand,

12 GEORGE V, A. 1922

fires from causes under human control decreased to a very important extent and occasioned no great damage. Had it not been for the combination of severe electrical storms, causing fire in inaccessible locations, and coincident high winds, the situation would have been met very satisfactorily.

The record of the control organization in this district was improved very markedly over that of 1919, as the result of reorganization put into effect during 1920. The experience gained as the result of the last two bad seasons has demonstrated clearly that the fire-ranging organization as at present established cannot meet the emergency of a bad fire season; consequently a fundamental reorganization is planned, which will be put into effect partly during 1921.

As indicated earlier in this report, the fire-ranging organizations in the coast and Revelstoke districts were sufficient to cope with the situations arising therein.

Railway Fire-ranging.—From the standpoint of railway fire protection the situation in 1920 showed a distinct improvement as compared with 1919. Ninety fires were reported as occurring along railways; of these 50 were extinguished before they had attained a size of one-quarter of an acre. Of the remainder, practically all were brought under control before any considerable damage was done. Right-of-way conditions still leave room for improvement, particularly on the Kettle Valley railway between Hope and Coquahalla pass. The patrols established in accordance with the provisions of General Order No. 107, Board of Railway Commissioners, functioned perfectly during the year. In addition, close and satisfactory co-operation was received from the railways concerned, particularly the Canadian Pacific railway. Of all railway fires 54.4 per cent were attributed to sparks from coal-burning locomotives; consequently the announcement of the Canadian Pacific railway of increased use of coal instead of oil in the mountain section is a matter of great concern to this Service and will necessitate greater effort in preventing and suppressing fires from this cause than was the case when oil was used exclusively.

FOREST RESERVES ADMINISTRATION

The appointment of a forest superintendent to take direct charge of the forest reserves administration and the detail of a competent forest ranger to the superintendent's office as forest assistant went a long way toward bringing staff conditions back to normal. Further technical assistance is, however, necessary in order that the necessary detail studies of growth conditions of the timber species occurring in the Railway Belt may be inaugurated.

IMPROVEMENTS

Despite the bad fire season a fair amount of improvement work was undertaken and completed during the year. The most important projects were the construction of the ranger's headquarters, including a house, barn, flume, fencing, etc., at Seottie creek, on the Arrowstone reserve. In connection with these headquarters there were also constructed one and a half miles of wagon road and five and a half miles of telephone line. These projects completed the long delayed establishment of the permanent administrative headquarters on this reserve. As indicated above, a lookout station was constructed on Tuktakamin mountain in the Monte Hills forest reserve. This project involved the construction of six miles of trail and five and a half miles of telephone line.

In addition to the above new projects a good deal of work was done on maintenance of existing plant, including repairs to buildings, trails, telephones and fences. The administrative and protection requirements of the reserves require considerable additional work in the line of improvements, especially the lookout stations mentioned above and the establishment of telephone communication with reserve headquarters on the Tranquille, Arrowstone, Monte Hills and Hat Creek districts.

SESSIONAL PAPER No. 25

SURVEYS

During the summer, reconnaissance surveys were completed of the Martin Mountain and Mount Ida forests, and of a portion of the Hat Creek forest reserve. The survey work was handled by students taking the forestry course in the University of Toronto, with very satisfactory results. The assignment of students to work in inspection districts in which they are likely to receive appointment as forest officers, on graduation, is very desirable practice. In this way the men concerned are enabled to get knowledge and experience of the district in which their work is to lie.

EXPERIMENTAL SEAPLANE OPERATIONS

By an arrangement entered into with the Canada Air Board, an HS2L seaplane was shipped from the seaplane station at Jericho Beach, Vancouver, to Sicamous for the purpose of making experimental flights in co-operation with this Service, with a view to finding out; first, the possibility of operating this class of equipment in the interior sections of the Railway Belt and, second, to study its utility in forest protection and forest administration. Unfortunately, owing to a combination of causes, it was not possible to get the machine to Sicamous until the early part of November, by which time the fire season had terminated, and no data on the use of aircraft in fire work could therefore be obtained.

Assembly of the machine on the beach at Mara lake was completed on November 4 and the first flight from that point to Chase was made on that date, the plane being piloted by Major C. McLaurin, Air Station Superintendent at Vancouver. The next morning the plane flew to Kamloops, from which point trips were made over surrounding country for six days. During the stay at Kamloops the Right Hon. Arthur Meighen, Prime Minister of Canada, made a flight in this machine. On November 12 the plane returned to Sicamous, which was used as a base for flights made during the next three days. Operations terminated on the 15th, with the advent of winter storms. The total distance flown during these operations was 1,729 miles, representing a flying time of 22 hours and 45 minutes.

As a result of these operations, a great deal of useful information was obtained going to show the high utility of seaplanes for forest work in the interior part of the Railway Belt of British Columbia. The machine functioned perfectly and no difficulty was experienced in keeping within range of suitable landing places at any stage of the operations, due to the occurrence of numerous small lakes throughout the country. Contrary to expectations no difficulty was experienced in taking-off from bodies of water situated at comparatively high elevations, and the conclusion came to by the Air Board officer in charge was that the country is ideally situated for the use of hydro-aircraft. From the standpoint of the forester it was proved that aircraft will be a most valuable adjunct to forest administration. The uses to which this equipment may be put may be summarized as follows: Exploration and sketch-mapping of timber areas in inaccessible locations, aerial photographic reconnaissance, investigation and exploration of insect infestations, grazing reconnaissance and patrols, fire patrols supplementary to the lookout system, initial and progress reports on fires, especially lightning fires occurring in high, inaccessible places, emergency transportation of supervising officers, check-mapping of burned areas in inaccessible locations, restocking lakes by the transportation of fish eggs or small fry.

PUBLICITY

Owing to continued inadequacy of staff to handle the routine administrative work it was again impossible to pay proper attention to the very important question of placing before the public an adequate conception of the policy and operations

12 GEORGE V, A. 1922

of this Service. The experience of other countries goes to show that education by adequate and continuous publicity is one of the most important duties of an efficient forest service.

SILVICULTURE

The outstanding feature of operations in the line of silviculture was the inauguration of measures to control the infestation of western yellow pine (*Pinus ponderosa*) by the western yellow pine bark beetles, (*Dendroctonus monticolae* and *Dendroctonus brevicomis*) which had become epidemic in Prospect valley situated in township 12, ranges 23 and 24, west of the 6th meridian. Of a total stand of 200,000,000 feet board measure of timber of this species occurring in this locality, it has been estimated that 20,000,000 feet board measure have been destroyed to date by the depredations of these insects.

Control operations comprise felling freshly infested trees, barking them, piling the brush along the prostrate trunk, and burning the whole. These operations must be conducted in the spring of the year, before the beetles emerge from the trees to attack others. This emergence takes place early in June but operations are necessarily closed down somewhat earlier, owing to the impossibility of controlling fire after the warm weather sets in. During 1920, operations lasted from early in April until the 22nd of May. During this time over 3,000 trees, scaling approximately 1,000,000 feet board measure, were felled and burned. Investigations made during the spring of 1921 showed that the infestation had been reduced between 80 and 90 per cent. This is considered an unusually satisfactory record. Examinations made by officers of the Entomological Branch of the Dominion Department of Agriculture, acting in co-operation with this Service, went to prove that had operations not been started during 1920, the entire stand would inevitably have been destroyed. As an instance of the truth of this assertion it may be noted that two small patches of infested trees were left uncut at the expiration of the 1920 operations, owing to the high fire-hazards. An examination in the spring of 1921 showed that the number of trees affected in one patch increased from six to sixty-four, and in the other from six to sixty trees. This goes to show that the epidemic was at its height when control measures were instituted, and that these measures were undertaken just in the nick of time.

Requests were received from the British Government for the collection of a large quantity of seed of Sitka spruce and coast-type Douglas fir to be used in reforestation work in the British Isles. Investigations made by officers of this Service showed, unfortunately, a complete crop failure of both species in the Queen Charlotte islands, Vancouver island, and the lower mainland of British Columbia. It was, therefore, impossible this year to meet the requirements of the British Authorities. Small quantities of seed of inland species were, however, collected for the forestry Department of the Government of New Zealand.

Considerable activity developed in the market for railway ties as a result of the construction of the Kamloops-Vernon branch of the Canadian National Railways through territory immediately adjacent to forest reserves. Four tie sales were awarded during the year to meet this demand, all on the Martin Mountain forest reserve, and they are proceeding satisfactorily.

The strong market for cedar poles resulted in the awarding of a timber sale for that class of material on the Larch Hills forest reserve, and also the resumption of operations on Timber Sale No. 65. A small tie sale was also awarded on the Hat Creek forest reserve.

The timber permit business remained stationary because most homesteaders still have considerable timber on their own lands.

SESSIONAL PAPER No. 25

SUMMER RESORTS

During the war period the attendance at the summer resorts in the reserves of this district naturally fell off. With the return to normal conditions it is expected that there will be a steady increase in the use of these facilities. Trout Lake summer resort, the longest established, retains its popularity and promises to attract an increased number of summer visitors and cottage residents. The popularity of Paul lake for summer resort purposes is rapidly increasing and local sentiment is demanding very strongly the establishment of a summer resort in that locality.

Except during the earlier part of the season fishing was only fair in both Trout and Paul lakes. This was due in part to the excessively hot, dry season and, in the case of Trout lake, to the fact that the natural increase of the trout has been almost, if not entirely, eliminated by reason of the fact that the flow of Meadow creek, owing to light snowfall, was practically nil and the trout were unable to reach the spawning grounds. If the fishing in this lake is to be conserved steps will have to be taken by this Service to improve spawning conditions and probably to restock artificially to a much greater extent than has been done in the past.

EQUIPMENT

The purchase of a motor truck saved a great deal of money in connection with the construction of improvements and particularly in fire-fighting work, where the original cost was saved several times over. Portable gasoline fire-pumps were also used to good advantage in fire-fighting work and burning slash.

APPENDIX No. 6

REPORT OF THE SUPERINTENDENT OF THE FOREST PRODUCTS
LABORATORIES OF CANADA

W. KYNOC

In the report on the Forest Products Laboratories of Canada for the fiscal year 1919-20, reference was made to the serious interruption of the work caused by the large number of resignations from the staff during the war and immediately afterward. This period ended with the filling of the vacant post of superintendent, toward the beginning of the fiscal year, and since that time the staff has been rapidly recruited. In all some twelve technical and non-technical officers have been added to the staff and the different divisions are now operating efficiently.

A review of the activities of the various divisions is given below.

DIVISION OF PULP AND PAPER

The two major investigations carried on during the year by this division were *Utilization of Decayed Aspen* and *Chemistry of Wood*. The object of the first-named investigation is to devise some profitable method of utilizing this waste material of which immense quantities exist in various parts of Canada. The development of such a method would also make it possible to remove the aspen, an inferior wood, from certain areas and to provide for the establishment thereon of more valuable species. The first section of this project, which dealt with the possibility of profitable utilization of the diseased timber by means of wood distillation, was completed, the results indicating that profitable use by this means was not feasible.

12 GEORGE V, A. 1922

The object of the *Chemistry of Wood* investigation is to establish standard methods for the chemical analysis of pulpwood and pulp, and to carry out a complete study of the chemical character of Canadian pulpwoods. A great deal of work was done on the project and it will be continued in the coming year.

Several minor experimental investigations were carried out, including a series of tests of a wall-board of entirely new composition. Miscellaneous investigations unrelated to pulp and paper but necessitated by demands made upon the laboratories were also carried out by the chemists of the division. These included determination of the free acid content of several woods in connection with use for separators for storage batteries, and a study of methods of protecting wooden tanks used in desilvering mirrors from the action of the acid liquor used in the process.

DIVISION OF TIMBER PHYSICS

The major projects handled by this division were: *Wood Sections, Decay in Pulpwood and Deterioration of Pulp*, and *Decay of Timber in Buildings*. The *Wood Sections* project provides for the preparation of a complete reference collection of microscopic slides of Canadian timbers and of important foreign commercial timbers. The collection is urgently needed in wood identification and for research purposes.

The investigation into the *Decay of Pulpwood and Deterioration of Pulp* was undertaken at the request of various commercial concerns with the object of working out methods of storing pulpwood and pulp which would eliminate or minimize the decay and deterioration, which at present involve considerable monetary loss. Study of storage conditions of pulpwood and pulp at commercial plants was continued, and at the laboratories an investigation was begun on the effect of storing ground-wood pulp in water, both running water and water renewed at certain intervals. These tests will be continued for a year, at the end of which time the pulp thus stored will be made into paper and subjected to various tests.

The object of the investigation into the *Decay of Timber in Buildings* is to secure exact and detailed information as to the conditions which facilitate the action of various wood-destroying fungi on woods used for interior construction in mills and factories, and to work out procedure and methods by means of which the decay can be prevented. The economic importance of this work is not generally realized. Such decay is the cause of the loss of many thousands of dollars each year in Canada alone. Expert technical advice, made use of at the right time, enables it to be entirely avoided. Detailed studies of decay in mill, factory, and other buildings, supplemented by laboratory determinations, were continued and much of the information secured was published. Some 250 careful studies of decay in large buildings have been made by the pathologist since this work was begun.

A large amount of miscellaneous work was carried out by the division, chiefly at the request of individuals and commercial companies. These items included wood identification, tests of suitability of different woods for special purposes, study of dry-rot fungus in wood and study of moulds and fungi in pulps.

DIVISION OF TIMBER TESTS

There were two major and a number of minor projects under way in this division. The major projects were *Testing Clear Specimens* and *Nova Scotia Mine Timbers*. The purpose of the first named investigation is to provide authoritative and complete data regarding the mechanical and physical properties of all Canadian woods of present and possible commercial importance. Since the inception of the work over 17,000 separate determinations have been made, covering sixteen species. Tests were made on five species during the year.

SESSIONAL PAPER No. 25

The object of the investigation of *Nova Scotia Mine Timbers* is the determination of the relative strengths of the several species now used, or of possible use, in the coal mines of the province for props and booms. The actual tests have been completed and the work of preparing results for publication is now in progress.

Miscellaneous work during the year included that on the development of a method and equipment for testing the strength of counter-board used in footwear, strength tests on portions of airplane parts submitted by the Air Board, tests on wall-board and special demonstration tests on the strength of box-car door-posts of red oak and Douglas fir.

DIVISION OF WOOD PRESERVATION

Major projects in progress in this division were: *Railway Ties*, *Red Pine Paving Blocks*, and *Field Survey of Railway Cross-ties*. The object of the *Railway Ties* investigation is to work out the most suitable methods of dealing with ties at every stage from the woods to the track, the final aim being to lengthen the service life of ties in the track as much as possible. Jack pine and hemlock ties to the number of 160, creosoted according to methods worked out at the laboratories, were installed in the main line track of the Canadian Pacific railway for test under actual heavy service conditions. A seasoning study of 100 hard maple ties was begun. The *Field Survey of Railway Ties* is supplementary to the next preceding investigation. It was undertaken for the purpose of obtaining first-hand information on track conditions and present tie practice on the various Canadian railways and of establishing closer relations with railway officials; with a view to enlisting more active co-operation in our tie investigations. Prominent railway officials in both Eastern and Western Canada have been interested in this work and a large amount of valuable information secured and recorded.

In the *Red Pine Paving Blocks* investigation the aim is to work out a satisfactory method of creosoting this wood for paving blocks. The work, which was in progress for two years, was completed and the preparation of a report for publication is under way.

A considerable amount of miscellaneous work was carried out by the division during the year, including analyses of a number of proprietary wood preservatives, field study to determine the percentage of sapwood in jack pine ties, and work on the creosote treatment of telephone poles, carried out on the Cypress Hills forest reserve.

LIBRARY

A library of references on the technology of forest products, the manufactures therefrom, and related matters, which cannot be equalled anywhere else in Canada, has been built up at the laboratories during the past seven years and literature bearing on every phase of these subjects has been collected. By a revision of the filing and indexing system all the information contained in the library is now instantly available for the use of the staff in working out the problems presented to them.

EXHIBITS

There is a continuous and increasing demand from government departments, railway companies, educational institutions, and others for assistance in preparing displays of Canadian forest products and manufactures therefrom. The most notable exhibit work of the year was for the Empire Timber Exhibition held in London in July under the auspices of the British Department of Overseas Trade. The laboratories were made responsible for the Canadian section of this exhibition and the work of collecting, preparing, shipping, and displaying material and products, was carried out by the forest products exhibit specialist. This officer also prepared the catalogue

12 GEORGE V, A. 1922

covering the Canadian section, attended the exhibition daily to supply technical information concerning Canadian timbers, supervised the disposal of the exhibit to the Imperial Institute, London, after the close of the exhibition, and wrote a report on it, which has been published as Forestry Branch Circular No. 12, "The Empire Timber Exhibition."

Other features of the work in exhibits included the supplying of authentic specimens of Canadian woods to institutions, at home and abroad, requiring them. Seventy sets of typical Canadian woods were applied for and sent to schools throughout Canada, where manual training is taught.

INFORMATION FURNISHED

The furnishing of technical information in response to inquiries relating to timber, forest products, and derived products is an important function of the laboratories. This work involves a careful study of the available data on the subject in question and, in some cases, tests or investigations, the final step being the compilation of a report, which is forwarded to the inquirer. Over two hundred inquiries of this kind received attention during the year. From the character of the requests for technical service constantly being received it is evident that study and research along lines not yet undertaken at the laboratories in a systematic way are necessary in order to cover adequately the whole field of forest products work. Provision should be made for dealing adequately with problems in kiln-drying, wood distillation, derived products, and the utilization of wood wastes.

GENERAL

A number of technical articles were prepared during the year by members of the staff and published in Canadian and other periodicals. Addresses were also delivered before scientific, technical, and other societies.

Some 365 visitors, an appreciably greater number than last year, called at the laboratories during the year to secure specific or general information or to inspect the equipment and facilities. There is in fact a continually increasing demand for the services of the laboratories.

That the economic possibilities of research and technical service in connection with forest products are very great has been conclusively demonstrated by the valuable results obtained in this field in other countries. Within the past few years laboratories devoted to this work have been established in three countries of the Empire, while in four others similar institutions are now in the preliminary stages of organization.

In Canada, easily the leading timber-producing country of the Empire, and one in which the industries dependent upon timber are, in the aggregate, second in economic importance only to the agricultural industries, the development and maintenance of first-class forest products laboratories is a necessity, if Canadian wood-using industries are to compete successfully with those of other countries.

PART IV

RECLAMATION

REPORT OF THE DIRECTOR OF THE RECLAMATION SERVICE, E. F. DRAKE

CLIMATIC AND CROP CONDITIONS FOR 1920

In the semi-arid belt of Alberta and Saskatchewan another dry year has been experienced, making the fourth in succession; 1917 and 1918 were dry years, 1919 was even drier and owing to the decreasing stores of moisture in the ground, crops were practically a complete failure except where irrigation was practised. The year 1920 has been but little better than the preceding years.

The winter of 1919-20 was mild, with the exception of a cold snap in the beginning of December and another near the end of January; there was fairly heavy snowfall but Chinook winds melted the snow quickly. The weather was thus ideal for wintering stock but, unfortunately, owing to the drought in 1919, there was an acute shortage of feed, and cattle losses were heavy. Spring ploughing was delayed by a heavy snowstorm on March 30 and in April there was exceptionally heavy rainfall, amounting in all to 4.37 inches. At the beginning of May the ground was so wet that it was impossible to engage in farm operations and much of the seeding was not completed until the end of the month. The following months were warm and very dry. In June there were strong winds and considerable soil drifting in certain areas with a consequent loss of about seventy-five per cent of the crop. Up to the middle of August grains and roots generally gave promise of a fair crop, but they could not stand the continued drought and gradually burned up. Another poor crop was the result. The rainfall from June to December was much below normal and the soil was so dry that fall ploughing and work on the land became almost impossible. It was another very disappointing year to the farmer and when winter commenced there was no accumulation of moisture in the soil.

In the two tables which follow, it has been the endeavour to show the relationship between rainfall and yields of certain field crops in Alberta and Saskatchewan. The value of these tables is only comparative, for the crop yields shown cover the entire province without regard to the boundaries of the semi-arid area, while the rainfall records are those recorded at two points only; also no account has been taken of rust, hail, insect pests or other conditions which affect crops in localized areas. Nevertheless, it is clearly shown that there is direct connection between precipitation and yield and that crop yield fluctuates in much the same ratio as rainfall. The results shown in these tables, while true of the province as a whole, do not fairly represent conditions in the semi-arid area where, as already stated, crop results for the most part were very disappointing. It is a fact, however, that in the semi-arid tract, since 1915—a year of unusual rainfall and abundant crops—the precipitation and crop yield have both been considerably below normal because as the stored moisture in the soil decreased as a result of the succession of dry years, the fertility of the land was proportionately reduced.

SESSIONAL PAPER No. 25

IRRIGATION

The year 1920 has been the fourth dry year in succession in the semi-arid area of southern Alberta and southwestern Saskatchewan. As a result the settlers are becoming insistent in their demands for irrigation as the only remedy for the insufficient rainfall and blowing away of the light top soil by the frequent heavy winds.

The Dominion Government, which administers the surface water supply in the Prairie Provinces, knowing that the available supply is not nearly sufficient to serve all the lands which need irrigation, has always endeavoured to see that appropriated water was put to beneficial use and not wasted. As one dry year followed another and the necessity and value of water for irrigation purposes became more and more apparent, this policy led to the making of extensive surveys to determine the lands best suited for irrigation and to discover the best method of serving them. This, in turn, made necessary the investigation and study of stream flow and storage possibilities. Then in order to make it possible for the farmers living in irrigable areas to co-operate and organize into irrigation districts, the Government, through its Reclamation Service, went further and made complete surveys of a number of tracts, designed the canal systems to serve them, and prepared preliminary plans and estimates of the cost of the required works. All this information was turned over to the people in the districts as soon as they were organized sufficiently to use it. To insure the allotment of water to lands where it would do most good and to protect the extensive surveys completed and under way, an Order in Council was passed on September 6, 1919, reserving the unappropriated waters of certain rivers and streams in southern Alberta until investigations could be completed over the whole area tributary to them to determine where and how these waters could best be applied to beneficial use.

In 1919 negotiations took place between the Minister of the Interior and the Government of the province of Alberta in order that a definite understanding might be arrived at as to the responsibility of each for the survey and further development of irrigation projects within the province. As a result it was decided that the Federal Government would continue to make surveys and exercise supervision as heretofore, but would not assume any responsibility for actual irrigation development beyond this. The Provincial Government, having this assurance from the Dominion, has interested itself in development beyond this point and by passing a new Irrigation Districts Act in 1920 (amended at the session of 1921) and by appointing an irrigation council to supervise and assist in the development of districts, has made it easy for settlers in any area, after they have been assured of the willingness of the Dominion Government to grant a water right, to organize and proceed with the necessary development. Under the provisions of the Act above referred to, several districts were erected in 1920 but a difficulty occurred when one of these, the first to complete preparations and endeavour to raise money for its further development, found that, in spite of the favourable reports of Government and consulting engineers who had investigated the project, it was not possible to sell their irrigation debentures although the lands in the districts were fully pledged as security. The Provincial Government has since made arrangements to guarantee the bonds of this district and of others which may be favourably reported upon by their consulting engineers. This removes the last obstacle and now, with the settlers calling ever more loudly for irrigation, with the line of responsibility between the Dominion and Provincial Governments and the people definitely settled, and with the way to safe and sure financing opened up, there should be substantial development of irrigation in southern Alberta.

In 1919, plane-table surveys were made of a number of irrigable tracts which had been previously located, and comprehensive investigations and studies were made to determine the best methods of storing and distributing flood waters to serve these

12 GEORGE V, A. 1922

areas. This work was continued in 1920, when nineteen survey and inspection parties which were sent into the field obtained information that will permit of the working up and designing of several large projects.

The following projects, which have been completed and are in full or partial operation, not only serve as object lessons of the advantages of irrigation, but are producing crops and feed each year which are helping greatly to stabilize conditions throughout the whole of the semi-arid district:—

Canadian Pacific Railway Projects:—

Western Section, irrigable.. . . .	221,000 ac. .
Eastern Section, irrigable.. . . .	400,000 ac.
Lethbridge Section, irrigable.. . . .	130,000 ac.
Canada Land and Irrigation Co., irrigable.. . . .	202,000 ac.
Taber Irrigation District, irrigable.. . . .	17,000 ac.
Private projects (small), irrigable.. . . .	106,000 ac.
Total.. . . .	1,076,000 ac.

Surveys, reports and estimates have been completed by the Reclamation Service in the following districts, the settlers of which hope to be able to commence construction work during 1921:—

*Lethbridge, Northern Irrigation District to irrigate.. . . .	105,000 ac.
United Irrigation District to irrigate.. . . .	23,000 ac.
Medicine Hat, Southern District to irrigate.. . . .	5,400 ac.
Medicine Hat, Eastern District to irrigate.. . . .	5,000 ac.
Macleod District.. . . .	80,000 ac. (estimated).
Total.. . . .	218,400 ac.

Surveys have been made and estimates worked up in the following districts in which active organization is only in its preliminary stages:—

McLew-Lomond, to irrigate approximately.. . . .	100,000 ac.
Lethbridge, Southeastern, to irrigate approximately.. . . .	350,000 ac.
Barons-Carmangay, to irrigate approximately.. . . .	18,000 ac.
Rocky-Coule to irrigate approximately.. . . .	12,000 ac.
Total.. . . .	480,000 ac.

Survey work under way but not completed includes the plane tabling of certain comparatively small areas in the Lethbridge Southeastern project and the final survey of several small projects lying west of the town of Pincher Creek, preliminary surveys of which were made in 1920. Surveys of very large tracts of land lying north of Red Deer river and south and west of the city of Saskatoon, in what is known as the North Saskatchewan project, are also under way. Reconnaissance, location and level parties will do considerable development work in this district during the present field season.

The work done in each district is outlined more fully in the report of the Acting Commissioner of Irrigation, which is submitted herewith.

HYDROMETRIC SURVEYS

Pursuant to the policy of the department to consolidate and co-ordinate the work of its various branches, the work of hydrometric surveys in the provinces of Alberta and Saskatchewan was transferred on July 1, 1920, to the Dominion Water Power Branch, while the Reclamation Service was made responsible for federal interests pertaining to reclamation (both irrigation and drainage) in British Columbia and Manitoba. This rearrangement of responsibility in connection with hydrometric surveys and reclamation work has made possible a higher degree of specialization of work and standardization of methods, with consequent economy and satisfaction to the Government and the public. The transfer of hydrometric survey work to the Dominion Water Power Branch involved the transfer of the hydrometric field and office staff of the Reclamation Service and of practically all of the hydrometric equipment, including the rating station at Calgary. The new arrangement provides for the closest possible co-operation between the Reclamation Service and the Water Power Branch in all matters of common interest.

*Now under construction.

SESSIONAL PAPER No. 25

DRAINAGE

The year 1920-21 was the second season of the operation of the Drainage Division of the Reclamation Service. Although the provisions and the working of the Federal Reclamation Act and Drainage Regulations and the similar Provincial Reclamation Acts are but beginning to be known by the settlers in Alberta and Saskatchewan, where there are extensive areas of lands requiring drainage, increasing interest is being shown in drainage as evidenced by the numerous applications and petitions that are being received from those desiring to reclaim small areas of swamp lands, and from communities suffering from flooded and wet conditions.

These laws are proving to be admirably adapted to encourage the reclamation and highest development of swamp lands in Alberta and Saskatchewan, more especially in the northern parts where drainage is most necessary. Several districts in which our engineers have made investigations contain as high as 50 per cent of land that is practically worthless until efficiently drained. Much good land that is at present inaccessible except in winter, on account of intervening swamps, cannot be made available for settlement until roads are made possible by the drainage of the adjacent lands. One extensive district, in particular, abounds in abandoned homesteads, and on account of the wet conditions patented homesteads have frequently changed hands during the last four years at prices varying from \$2.50 to \$9.50 per acre. The new owners now realize, as did those before them, the futility of attempting to work their farms at a profit on account of the amount of land that is unproductive through wet conditions and timbered swamps.

These northern areas are best adapted to mixed farming, dairying and cattle raising, and for a farmer to exist, let alone make a decent living, more hay is required than can be obtained on his own homestead. Men engaged in the cattle-raising business have found that, while feed is fairly plentiful for their needs in summer, sufficient hay cannot be found locally to ensure the wintering of their stock. Conditions were such, before the approval of the Drainage Regulations, that farm after farm was abandoned and the raising of cattle was fraught with too many risks to encourage further development. This very common and widespread disappointment and despair of settlers in many localities is now undergoing a change and many who were on the point of leaving the country have been encouraged to stay by the possibility being opened to them of purchasing swamp lands from the Government under conditions of drainage and on terms that appear satisfactory.

Active and energetic drainage pioneers are invaluable for the development and progress of this north country, and every encouragement should be given to expedite the work of drainage reclamation; in fact herein lies the only hope of converting vast and practically worthless areas into profitable farming districts. Although precipitation is commonly abundant for the growth of farm crops in the northern parts of the provinces, the rain does not always come when most needed and it is often found that a system of irrigation or spring flooding can be combined with drainage at little additional cost, thus ensuring an ideal condition—drainage and irrigation hand in hand. This combination of advantages is, wherever possible, receiving the attention it deserves.

Every drainage scheme successfully carried out by a legitimate settler, making his living and home in the district, constitutes a new link in the chain of prosperous development of the country, produces additional revenue to the province and to the railways, and assists in opening up further territory for settlement. Drainage here is in its infancy and the methods encouraged and permitted to-day will have a far-reaching effect on the future development and agricultural character and prosperity of the areas included and associated with the various drainage projects. Surveys are made and plans prepared by experienced drainage engineers who permit no slipshod, inefficient methods. Every scheme is studied and planned with a view

12 GEORGE V, A. 1922

to the best and most economical development of the land involved. No partial reclamation for the sake of saving in cost and labour is permitted where a more truly economical result is obtainable by more costly or extensive works, and many applications have not been favourably considered where the land applied for, formed merely a portion of a more comprehensive scheme, too large or too costly to be efficiently carried out by an individual settler. Such a comprehensive scheme, if found feasible and desirable, would be recommended for the consideration of the Provincial or Federal authorities.

The sale price of Crown lands is always likely to be a controversial point between the Government and the prospective purchaser, but valuation by an experienced engineer, taking into consideration all the conditions relating to quality of soil, proximity to town or railroad, climate and the estimated cost of the necessary drainage works, should be sufficient to ensure a fair deal in the interest of the public and in justice to the applicant. At the present time considerable allowance should be made in favour of the applicant, who is in the position of a pioneer, spending possibly the best period of his life in assisting in the opening up of a new country, experimenting on the best treatment of land after drainage, the best crops to grow and methods of tillage, and the results of whose labours will be a guide and help to others. Many of these districts, though reasonably near a railroad, are quite inaccessible by any kind of vehicle until after freeze-up. Living is commonly accompanied by many discomforts and hardships and the conditions are such that it would be almost criminal to attempt to bring up a family amidst such surroundings. These pioneers are not only reclaiming land that they may make a decent living, but are assisting materially in opening up the country for others, making intercommunication possible, winter and summer alike, and giving an added value to lands in which they have no interest. All this should be considered in fixing the sale price of Crown lands.

Besides the large number of small schemes, twenty-nine large drainage schemes were investigated during the season, eight of which, having proved feasible and in the public interest, have been recommended for construction. Two proved feasible but were not recommended for the present on account of their not being as desirable and urgent as many of the others. Eleven were recommended for further and more detailed investigation. Eight proved to be not feasible or desirable.

Of the two recommended for construction in 1919, one, the Waterhen Lakes Drainage project, is now in course of construction.

The schemes recommended for construction would in the aggregate make available 12,000 acres of land that would be at least of equal value to the best lands in the districts in which they are situated, and on account of the large accumulation of plant food that is commonly found in the beds of lakes and swamps, would probably be of more lasting fertility. The margin of profit from the sale of these lands when reclaimed would, it is estimated, not only defray all expenses of engineering and construction but usually be a source of considerable profit, while the indirect advantages of opening up new territory, making the country more habitable, making good roads possible and improving the agricultural condition of the adjacent lands would be of far-reaching and permanent benefit.

There is great need of more reconnaissance work to ascertain the potential agricultural value of the vast areas still unproductive and largely unsettled lying within reasonable distance of railroads. The reclamation and settlement of these areas would undoubtedly contribute much towards placing the railroads on a paying basis, would encourage the influx of a better class of settlers and would put an end to the uneconomical but too prevalent practice of widely scattered settlement beyond reasonable distance from existing railroads and markets.

Although this report is intended to cover the fiscal year ended March 31, it is but fitting that reference should here be made of the death of Mr. Ralph J. Burley, Assistant Director and Chief Engineer of the Drainage Division of the Reclamation Service, which occurred at Cressy, Ontario, on April 14, 1921.

SESSIONAL PAPER No. 25

Mr. Burley entered the service of the department immediately after his graduation in Applied Science from Toronto University in May, 1902. From 1903 to 1916 he was attached to the staff of the Commissioner of Irrigation at Calgary, Alberta, where he acquired a varied and thorough knowledge of all phases of irrigation engineering. In 1916 he was transferred to a wider field of usefulness on the staff of the Superintendent of Irrigation at Ottawa, and in April, 1919, was appointed Assistant Director and Chief Engineer of the then newly organized Drainage Division of the Reclamation Service.

Mr. Burley was a capable engineer of wide experience and sound judgment and his loss to the department and the public service will be seriously felt. His death at the early age of 39 years is deeply regretted.

REPORT ON IRRIGATION SURVEYS AND INSPECTIONS FOR YEAR ENDED MARCH 31, 1921

By V. MEEK

Acting Commissioner of Irrigation and Chief Engineer

Following the precedent established during the last two years, a summary only of the reports of various members of the staff is submitted. The originals are on file in the offices of the Reclamation Service at Calgary and Ottawa for the information of those desiring more detailed information regarding the work.

GENERAL

Although the rainfall was not up to normal in southern Alberta this year, it was fairly well distributed during the growing season, making the conditions much more favourable for crop production than during the previous three years. Notwithstanding this the demand for irrigation, as indicated by the applications received, was nearly as great as during the previous year.

There were 191 new applications received and recorded this year, as against 206 during 1919-20 which was the largest number ever received during one year.

ORGANIZATION

The work of the office has been heavier this year than during any previous year of its existence. Exclusive of the Hydrometric Office, which was transferred to the Water Power Branch of this department on August 1, 1920, the staff during the field season when up to full strength was about 240, but this was reduced to 60 during the winter.

In order to accommodate this staff it was found necessary to secure part of the fourth floor of the Lancaster Building. This space is now occupied by that part of the field force which came in for the winter and the temporary office party connected with the large surveys, about thirty in all.

WATER ADMINISTRATION

Revision of Records.—Owing to the large amount of current work it has been impossible to make as much progress in revising old records as was expected, but the relative priorities have been determined in consultation with the Ottawa office, and in a short time it should be possible to replace the stream folio register and other books by the new water administration records, which will then become the official records of priority.

12 GEORGE V, A. 1922

Water quantities.—In addition to indicating the priority of a scheme the licenses are required to show the quantity of water which may be diverted and also the rates of flow at which diversion may be made at low, high, and flood stages. In order that these figures may correctly represent the value of a license, exhaustive studies are necessary, based on hydrometric and other records. Preliminary steps have been taken with a view to preparing a run-off map of Alberta and Saskatchewan.

Water Administration Maps.—Large scale maps showing the outlines of irrigation and other schemes are now in preparation, and are essential for a proper study of water questions in certain districts. These maps are being traced on sheets corresponding in size to the Sectional Sheets published by the Surveyor General, but are drawn to a scale of one inch to the mile with index maps to a smaller scale. It is intended to revise these maps as may be necessary from time to time, and it is expected that they will be of service to other branches of the department. Blue prints of particular areas can be supplied upon request. Twenty tracings have already been supplied in addition to forty rough drafts in process of compilation.

Hydrometric Survey.—Although the officers and records of the Hydrometric Service are still available for consultation, the recent transfer of this staff to the Water Power Branch will increase the amount of correspondence, especially with regard to gauge height observations and measurements on irrigation ditches. The measurement of ditches will need special attention in the near future, both as a matter of record and for the purpose of field administration.

Diversion Changes.—Owing to physical changes due to various causes it is often necessary to alter the position of the intake of an irrigation scheme or other works constructed under the Irrigation Act.

When these changes are of small extent and will not affect other interests it has been the practice to sanction them without much formality, but in recent years there have been several cases where dams have been washed out and pumping schemes have been installed in lieu at a considerable distance from the original intake.

In order that these schemes may be legally reconstructed, provision has now been made by regulation for applications to be made in a regular form and thoroughly investigated to insure that no other interests may be prejudicially affected. It will then be possible to approve these applications either with the original priority or dating from the subsequent application according to the circumstances of each case.

P.C. 1859.—On the 6th September, 1919, an Order in Council was passed (P.C. 1859), reciting the fact that surveys had demonstrated or indicated the feasibility of utilizing practically all the surface water supply in southern Alberta, not otherwise appropriated, in irrigating large areas of land in that district. In view of the inadequacy of water supply to serve all of the lands that might be benefited, it was considered desirable as a matter of public policy that the available supply should be so allocated as to serve the largest possible area of land to the best advantage and in the most economical manner, having regard to the aridity of the various portions of the district, the cost of delivering water to them, and the carriage losses incidental thereto.

The Order reserves all the unappropriated waters of the Oldman river and the Milk river and their tributaries in the province of Alberta, but does not preclude the granting of rights to divert water directly from such streams for domestic, municipal, or industrial purposes nor for the irrigation of areas not in excess of 640 acres, when the land to be irrigated is not more than one mile from the source of such diversion and where application is made in accordance with the provisions of the Irrigation Act.

SESSIONAL PAPER No. 25

The above Order was subsequently confirmed by an amendment to the Irrigation Act. Its practical effect is to protect small schemes by permitting them to be dealt with immediately, while deferring the granting of priority and allocation of water for the larger schemes until they have been thoroughly investigated.

Duty of Water.—The duty of water, or the amount required to irrigate an acre of land, was originally fixed at one-hundredth of a cubic foot per second throughout the irrigation season. This was equal to a depth of about 3 feet, but the regulations were subsequently amended to provide the equivalent of about 2 feet depth of water.

In February, 1919, the regulations were further changed to provide for a quantity equal to a depth of 18 inches on the land, measured at the farmers' headgates. It is not, however, always possible to obtain this quantity of water without the construction of elaborate works at prohibitive cost and recent practice has been to regard this depth as a limit to the quantity of water which may be granted for irrigation purposes.

It has, however, been understood that no sale of land will be made when the average supply of water is less than the full legal duty on the area required to be irrigated by the regulations for the sale of lands. It has also been required that all large schemes shall provide the full duty of water, but at the present time one or two schemes are under consideration which contemplate a more extensive distribution of the available water. In such cases the licenses and the plans will clearly set forth the limitation in the supply, and storage will be provided so that the supply to the consumers will be suitably distributed throughout the irrigation season, whether for the full duty or a smaller quantity.

Owing to the urgent need for water and the short duration of flow in certain districts grants may now be made on the basis of the quantity which can be diverted through the works as designed and beneficially used during the period of flow available on the stream. Whenever possible dyking is provided and beneficial use can often be made of 12 inches or even 8 inches of water for the irrigation season, in localities where there is a general scarcity of moisture throughout the year.

In issuing a certificate under section 33 of the Act, "Utilization" is defined as the beneficial use of water for the purpose named in the application.

As the demand for water increases it becomes necessary to limit the grants to practical quantities, both for purposes of administration, and in order that the licenses may correctly represent the estimated limit of available supply and the period during which it is generally available. This information is of value to persons who may wish to purchase lands containing licensed irrigation schemes.

Preferred Purposes.—By an amendment to the Irrigation Act (chapter 37, section 4, 4-5, George V) it was provided that, subject to priority, applications should have precedence in the following order, namely:—

1. Domestic purposes.
2. Municipal purposes.
3. Industrial purposes.
4. Irrigation purposes.
5. "Other" purposes.

A further amendment (chapter 55, section 4, 10-11, George V) provides that upon application the minister may cancel an earlier grant in favour of an application for a purpose having precedence in the foregoing order.

The objects of these provisions is to permit a municipality or railway company to acquire a water right by compensating the original appropriator and any other interests which may be affected. Four such applications are now under consideration.

New Applications.—Owing to the exceptionally dry conditions in 1919 there was a very large increase in the number of applications received for purposes covered

12 GEORGE V, A. 1922

by the Irrigation Act. These were more than twice the usual quantity and the large increase has been fully sustained during the year 1920, with no signs of any diminution.

Field-work.—In order to clear up doubtful questions of fact it is necessary to co-operate very closely with the field inspecting engineers, especially during the winter months when questions can be discussed personally. The Water Administration Engineer has, in addition, made four inspection tours during the year.

Future Administration.—The chief object of revising the records and readjusting the existing licenses is to define all water rights as clearly as possible and so reduce the probability of future disputes between water users.

At the present stage of development the demand for water is not sufficient to justify an elaborate field organization of water masters, but the senior inspecting engineer has been appointed a water master under the authority of section 34 of the Irrigation Act. He has been empowered to receive complaints of alleged improper or excessive use of water, and to enquire into the circumstances of all such cases or other cases which may become known to him and to take such action as may be necessary and legal to remedy grievances.

The duties of a water master are in a large measure discretionary and under the present conditions the inspecting engineers are in the best position to explain the requirements of the Irrigation Act and to advise irrigators as to their respective rights and obligations.

The water administration office staff consists of two engineers, one draughtsman and one clerk-stenographer working in co-operation with the field inspection staff and is under the supervision of Mr. J. A. Spreekley, acting as Water Administration Engineer.

INSPECTION WORK

Special Inspections.—Domestic, Municipal, Industrial, and Irrigation. This work was carried out under the immediate supervision of the office engineer, Mr. P. J. Jennings. The office engineer supervises the work of all inspecting engineers and particularly those of the special inspectors for Alberta and Saskatchewan. He sees that for each tour of inspection the inspections are properly grouped as regards economy of time, travel, expense and the urgency of a special report. During the year the office engineer examined and checked one hundred and ninety-six plans of all descriptions, including fifty-two descriptions of right of way. One thousand four hundred and thirty-six letters dealing with engineering subjects were written and four hundred and sixty-three reports were dealt with.

Mr. Jennings's report outlines the work carried out by the six inspecting engineers acting under his supervision and from the figures quoted the following is a summary:—

North and East Cypress Hills District—Mr. M. H. French.	
Inspections.. . . .	127
South and West Cypress Hills District—Mr. C. M. Moore.	
Inspections.. . . .	150
Calgary and Cardston Districts—Mr. R. H. Goodchild.	
Inspections.. . . .	63
Alberta Special Inspections—Mr. F. R. Burfield.	
Inspections.. . . .	94
Saskatchewan Special Inspections—Mr. Angus Smith.	
Inspections.. . . .	73

Owing to the continued large increase in the number of applications received for water for irrigation purposes and the requests for surveys and plans the district

SESSIONAL PAPER No. 25

engineers were not able to inspect old licensed or authorized schemes—unless it so happened that they were in the immediate vicinity and had time to spare. During the past year this increase has been maintained and is now more than 100 per cent over any year prior to 1919. A very busy field season for 1921-22 is therefore anticipated.

It has been found necessary to call upon the district engineers for more detailed information regarding watershed areas, boundaries and physical conditions than has been done heretofore, owing to the critical condition of water supply in many of the drainage basins. This naturally entails spending more time on these inspections, but the information obtained is of inestimable value in determining the amount of the grant to be recommended and will constitute a valuable record in connection with future applications in the vicinity.

During the coming year it is proposed to have district engineers install ditch gauges on many of the schemes diverting from streams where the supply has been apparently fully appropriated. These gauges, if regularly and properly read, will furnish valuable information as to the quantity of water being diverted and act as a check upon the stage of flow during which the diversion occurred. In making a start on this work it is fully realized that many difficulties may have to be solved before satisfactory conditions are attained and reliable information secured. For instance, there is wasted—annually—an enormous quantity of the water which is actually diverted at the headgate. This condition cannot be rectified until the time arrives for carefully administering each drainage basin, which will entail appointments of additional water masters. In some of the drainage basins this time may be said to have arrived, as all available stream flow has been appropriated and many applications remain which cannot, under the existing system of administration, be supplied with even a small quantity of water.

DISTRICT OFFICES

The ever-increasing number of applications for irrigation investigation surveys has brought up the question of furnishing some suitable office accommodation within the districts for our engineers. Arrangements have therefore been made establishing district offices at Medicine Hat and Lethbridge for the use and convenience of district engineers and the public. These offices have been equipped with the necessary office furniture and equipment to enable our engineers to work up their field notes, draft pencil plans and write their reports.

CYPRESS HILLS DISTRICT

Little real progress in irrigation development appears to have been made in the Cypress Hills District during 1920, due no doubt to scarcity of money consequent upon four dry years. Many large schemes already licensed or about to be licensed are not using the water which is being reserved for their use under the provisions of the Act and new settlers with small holdings are in the meantime being deprived of the benefits of this water. Readjustments or cancellations will have to be considered in the near future unless greater interest is shown by the holders of unused, or partially used, water rights.

DOMESTIC WATER SUPPLIES

Scattered throughout the provinces of Alberta and Saskatchewan are a large number of small reservoirs in coulees or on well defined watercourses, built by the farmers or ranchers entirely on their own property and for purely domestic requirements. The object of these reservoirs is to store a small quantity of the early run-off or storm water occasioned from sudden heavy rains. The dams are invariably built on watercourses which have no regular discharge beyond that due to snow or periodical

12 GEORGE V, A. 1922

rain storms and which are dry most of the year. Our inspecting engineers therefore encourage the farmers who have constructed such works to secure water rights under the Irrigation Act. They also explain that while in most cases the existence of the reservoir may not at the moment interfere with other rights, there is always the possibility of newcomers filing applications for diversion and storage above or below them—which might entirely deprive them of the possibilities for future storage and of the legal means of obtaining any. An estimate of the cost of filing memorials and plans is generally given at this time together with an outline of the procedure to be followed. In most cases the total cost does not exceed \$20, i.e., \$10 for the license and \$10 for survey and plans. Advertising is as a general rule waived and the filing of plans can also be waived at the discretion of the minister.

MUNICIPAL WATER CONSUMPTION

Records of the daily water consumption for the principal cities and towns in Alberta and Saskatchewan have been tabulated for each town and the monthly and yearly averages obtained. No returns have been received from the city of Calgary owing to the fact that their system is mostly a gravity one from the Elbow river and no measuring devices have been installed. Returns for the portion of the city served from the Bow river by means of pumping would not be of particular value as the area so served varies according to conditions at the headworks of the gravity system. Only incomplete returns have been received from the town of Kamsack and these were not considered worthy of inclusion in the yearly summaries.

ARTESIAN WELLS

There has been no opportunity during the past year for gaining any additional information regarding artesian wells.

STOCK-WATERING RESERVES

Owing to pressure of other work a comparatively small number of these reserves have been examined during the past season, and in most cases maintenance of the reserve with a view to a better water supply for the settlers in the district or in connection with stock sanctuaries has been recommended.

CANADIAN PACIFIC RAILWAY COMPANY'S IRRIGATION PROJECTS

Western Section.—The Canadian Pacific Railway Company has disposed of nearly all the land in this section and the larger part of the area is under cultivation. Grain and flax were practically the only crops grown this year.

During the early summer there was a good rainfall and crops gave promise of a large yield, but owing to drought later on they produced somewhat less than was estimated. Had they been irrigated during the dry spell they probably would have produced the estimated yield.

Only about four thousand acres were irrigated in this section this season, as compared with 31,908 acres in 1919. The total irrigable acreage is approximately 221,000.

In accordance with the general policy followed by the company for several years, of replacing the original structures with a more permanent type, a number of the larger wooden structures have been rebuilt with concrete.

Eastern Section.—Settlement of this area is proceeding rapidly. No extensions or new construction have taken place this year, but owing to the fact that a large part of the system has been constructed for eight or nine years and colonization held

SESSIONAL PAPER No. 25

up during the war, it has been necessary to do considerable repairing and enlarging of the laterals this year to keep pace with the rapid settlement.

The classification of three large blocks of land in this section has been held up by this office pending further information in regard to soil conditions and drainage.

Two of these blocks, comprising about 36,000 acres of irrigable land, have been released. These are the area northeast of Brooks under the North Bantry canal, and the St. Julien Colony, located south of Tilley.

The third block above mentioned includes all the land served by the Rolling Hills canal. The classification of this area is still being held in abeyance pending a decision of the company in regard to drainage.

During the season of 1920 there were about 60,700 acres irrigated in this section as against 43,400 the year before.

Lethbridge Section.—After eighteen years of successful operation, this continues to be the best argument in the province in favour of irrigation. It is reported that the average value of the crops raised during 1920 on the 80,000 acres under crop included in this scheme was \$49.31 per acre. The amount of land actually irrigated during 1920 fell off about fifteen per cent from last year, water being delivered to 60,000 acres. This was due to the climatic conditions being more favourable for raising dry crops than in the previous three years.

The programme for improvement of this system which the company has carried out during the last two years was continued during this year. The enlargement of Chin Lateral No. 1 was nearly completed and Chin reservoir was filled to capacity last fall through this canal. The old headgates and spillway at the lower end of Nine Mile coulee, by which waste water was discharged into Etzikom coulee, have been abandoned, and the Six Mile coulee spillway constructed to take their place. This wasteway takes off the main canal near Chin headgates and consists of a constructed channel with several drops running to the head of Six Mile coulee. The new concrete dam and headgates at Magrath which replace the old timber structure and which were started in 1919, were completed during this season and are now in operation. A considerable portion of the main canal below Pothole coulee in the vicinity of Magrath was enlarged and the banks on the lower side were strengthened. A number of additional timber checks were built in the natural channels to further control erosion.

This system differs from the eastern and western sections which were constructed later, in that the farmers own the smaller laterals which supply them from the company's main distributaries. They have recently awakened to the fact that in order to operate these successfully they must have an organization, and have formed within the last two years, four water users districts under the Irrigation Districts Act of Alberta.

TABER IRRIGATION DISTRICT

This district was the first to organize under the Irrigation Districts Act of Alberta, having been erected in 1915. After considerable delay they finally entered into a contract with the Canadian Pacific Railway Company in the spring of 1919 to take their bonds and construct the necessary works. The district owns, operates and maintains the system, and the company delivers water to their headgates through the Lethbridge Section canals and the Chin Coulee reservoir.

The construction of the irrigation works for the supply of this district was completed in October, 1920, and water was turned into the system. The ditches were thoroughly primed and about 2,000 acres were fall irrigated.

It was expected that water could be delivered to the district by July 1, but the unusually heavy winds in the spring blew the ditches full of sand and this, together with the difficulty of obtaining sufficient help during the summer, delayed completion until late fall.

12 GEORGE V, A. 1922

The Canadian Pacific Railway Company improved their reservoir facilities in Chin coulee this year by constructing an additional outlet of 48-inch cast-iron pipe at the Strafford reservoir and by raising the dam of the Chin Butte reservoir about seven feet to the full height proposed.

The works have now been officially turned over to the district, and it is expected that a larger part of the 17,000 acres under the system will be irrigated this coming season.

THE SOUTH SASKATCHEWAN DIVERSION PROJECT

A brief history of this project was published in the last annual report.

The Saskatchewan Water Supply Commission, which was appointed by the Provincial Government in 1920, has now published its report from which the following is compiled:—

It is proposed to divert from the South Saskatchewan river by pumping at a point about three miles from Elbow, Saskatchewan, an average of about 12,000,000 Imperial gallons per day with a maximum of 16,000,000 per day during the short time of excessive consumption each year. This is equal to a diversion rate of about twenty-three to thirty cubic feet per second.

They propose to distribute the water through concrete, wood-stave and steel pipe lines for domestic and municipal purposes to a district covering some 1,620 square miles, in which there are resident about 85,200 people. About three-quarters of this population, however, is in the two large cities of Moosejaw and Regina. The balance is distributed among some thirty-four towns and villages and other rural communities within this area. They estimate that the water can be delivered to the consumers at a rate not to exceed one dollar per thousand gallons.

The cost of construction is to be met by sale of debentures secured by the total assessable property within the district.

It is the purpose of the commission to submit the matter to a vote of the district during the coming summer. Mr. A. J. McPherson, of Regina, is the chairman of the commission.

SEVEN PERSONS DRAINAGE BASIN

Investigation.—This work was begun late in the fall of 1919 and has been continued during 1920, with the result that two irrigation districts have been organized in this basin under the Irrigation Districts Act of the province of Alberta, known as the Medicine Hat Southern and Medicine Hat Eastern Districts.

The Southern project extends from the town of Sevenpersons on the Lethbridge-Crownsnest section of the Canadian Pacific railway northeasterly along the line of the railway nearly to the southern limits of the city of Medicine Hat. The Eastern project adjoins the Southern on the north and includes the land between it and the southern limits of the city and extending easterly between the railroad and Ross creek to a point about five miles east of the city. The proximity of this land to the city of Medicine Hat affords a ready market, and the fact that the Canadian Pacific railway traverses the tract for almost its entire length, giving easy access to transportation, makes these projects particularly attractive.

Water Supply.—The water supply for these two projects is taken from two streams, Ross creek and Sevenpersons creek, which rise in the Cypress hills and flow into the South Saskatchewan at the same point within the limits of the city of Medicine Hat. The records of the discharge of these streams extend over a period from 1913 to date, in the case of Sevenpersons creek, and 1911 to date in the case of Ross creek. The observations on Sevenpersons creek have been taken at Medicine Hat; those for Ross creek at Irvine, about eighteen miles east of the city. The duration of flow in both streams is quite similar. The larger part of the run-off comes during March and April. In exceptional years it may begin in February or

SESSIONAL PAPER No. 25

extend into May, but usually it has practically stopped by the first of June. This makes it imperative, in order to irrigate any large areas after the first of May, to have some means of storing the water for use later in the season. Reservoirs have, therefore, been provided for this purpose in connection with both these projects.

A detailed study of the water supply for these two projects shows that if they had been in existence during the period over which records were taken there would have been water sufficient to give the irrigations shown in the following table:—

Medicine Hat Southern District (Sevenpersons Creek)				Medicine Hat Eastern District (Ross Creek)			
Year	Depth Irrig. Inches	Rain- fall Inches	Total Water Rec'd Inches	Year	Depth Irrig. Inches	Rain- fall Inches	Total Water Rec'd Inches
1911.....				1911.....	10	10.0	20.0
1912.....				1912.....	17	6.7	23.7
1913.....	10.0	6.7	16.7	1913.....	12	6.7	18.7
1914.....	3.0	3.5	6.5	1914.....	6	3.5	9.5
1915.....	12.0	11.2	23.2	1915.....	18	11.2	29.2
1916.....	18.0	12.6	30.6	1916.....	18	12.6	30.6
1917.....	18.0	3.3	21.3	1917.....	18	3.3	21.3
1918.....	18.0	5.0	23.0	1918.....	17	5.0	22.0
1919.....	12.0	2.9	14.9	1919.....	4	2.9	6.9
1920.....	13.5	5.0	18.5	1920.....	14	5.0	18.5

The table shown above is based on an irrigation factor of 83 per cent in the case of the Eastern project and 100 per cent in the case of the Southern project.

It should be noted that neither of these projects will be able to get the full duty of water (eighteen inches) every year. While the Government experiments in the duty of water indicate that to produce during the dryer seasons the maximum yield of those crops which require the largest amount of water it is necessary to apply during the season a quantity of water equal to 18 inches in depth over the irrigated area, it does not necessarily follow that the application of a lesser quantity will not produce a profitable crop.

On account of the bulk of the water running into the reservoirs in the early spring it will be possible about the first of May each year to forecast the quantity of water available for irrigation during the season. This makes it possible in years of shortage, like 1914 and 1919, to deliver double the quantity to half the area, thereby ensuring a good crop on half the land instead of practically no crop or a very poor one on the whole area.

THE MEDICINE HAT SOUTHERN DISTRICT

The works as designed comprise a reservoir of 24,506 acre-feet capacity, a diversion dam, headgate and ditches and a small auxiliary reservoir with a capacity of about 900 acre-feet.

There are 134 quarter-sections in the district as organized, or 21,440 acres, but because of scanty water supply the works have been designed with a view to irrigating not in excess of about forty acres on each quarter-section—or 5,300 acres in all. Should it ever become possible in the future to augment the water supply from any other source a considerable additional area can be irrigated merely by constructing additional laterals or distributaries.

On the basis of the prices of labour and materials in December, 1920, the works as designed were estimated to cost \$263,955, which on the basis of 5,300 acres is at the rate of \$49.80 per acre irrigated. On the basis of 1921 prices these works could probably be built for considerably less.

12 GEORGE V, A. 1922

THE MEDICINE HAT EASTERN DISTRICT

The works for this district comprise two reservoirs known as the "Ross Creek" and "Gros Ventre," with capacities of 8,220 acre-feet and 5,967 acre-feet respectively, a wood-stave pipe of 44-inch diameter to carry the water across the valley of Bulls-head creek, and the necessary canals and laterals.

The irrigable area comprises 5,000 acres and the estimated cost of the works, on the basis of prices in December, 1920, was \$306,330, or \$61.27 per irrigable acre. In this case also the works could probably be built for considerably less on the basis of present prices.

Water Supply.—The water supply for both these projects is admittedly less than could be desired, but because of the known aridity of the district which precludes the successful practice of agriculture without irrigation, and the proximity of railways and markets, it is believed that the beneficial results of irrigation in those years in which water is available will amply justify the cost of the required works.

The trustees of both these districts have asked the Provincial Government to authorize the issue of bonds to cover the cost of construction. The provincial authorities have referred both cases to a consulting engineer whose report, while not yet made public, is believed to be unfavourable—chiefly because of uncertain and supposedly inadequate water supply. Under these circumstances it is unlikely that the province will guarantee the bonds of these districts and construction will probably be deferred indefinitely.

CANADA LAND AND IRRIGATION COMPANY

This has been an eventful year for this company. Work was begun on the construction of this system in 1909 and after encountering many difficulties, both financial and constructive, they delivered water to a small acreage for the first time this year (1920).

Water was turned into the canal from Lake McGregor reservoir on April 29, and with the exception of a few days ran continuously throughout the season. Between four and five thousand acres in the Vauxhall district were irrigated, this being all the land which was ready for water this year.

The results from irrigation during 1920 were highly satisfactory on the comparatively small acreage actually watered. A thriving town had sprung up at Vauxhall, several thousand acres of land had been sold and prepared for irrigation in 1921, and the company expects this year to irrigate not less than 10,000 acres in this district. The work of constructing lateral and distributing ditches is proceeding as rapidly as justified by land sale, while at the same time the main canals and other works are being enlarged, strengthened and improved.

During the summer the chief engineer and manager, Mr. D. W. Hays, under whose able management the work has proceeded to date, resigned, and his place has been filled by Mr. F. W. Hanna, formerly of the United States Reclamation Service.

LETHBRIDGE NORTHERN IRRIGATION DISTRICT

Surveys for this project were begun in 1914 and completed in 1916. The annual reports of this branch for 1914, 1915 and 1916 give a detailed account of the work. In 1917 a reservation of water from the Oldman river was made for the benefit of this land.

Application for the formation of this area into an irrigation district under the Irrigation Districts Act of Alberta was made on July 31, 1919, and the order erecting the district was published in the *Alberta Gazette* on October 31, 1919. A corrected notice of erection was published under date of November 29, 1919.

SESSIONAL PAPER No. 25

In November, 1919, the trustees appointed Mr. H. B. Muckleston as their chief engineer. The Alberta Government employed Mr. George G. Anderson, a consulting engineer, who submitted a report on the project on January 17, 1920. This was later published in pamphlet form.

Authorization for the construction of works was issued by the Minister of the Interior on March 9, 1920, with the proviso that before the construction of any part of the works was undertaken, complete plans thereof would be filed and approved as required by sections 15 and 16 of the Irrigation Act. Later the district was enlarged to include the area known as the North Macleod project, and the district surrendered this authorization, and a similar one, dated September 8, 1920, was issued.

During the past summer the interest in irrigation was apparently revived in those areas which were originally included in our surveys for the project but in which at the time of organization the sentiment was against inclusion in the Lethbridge Northern Irrigation District. These areas were the Barons-Carmangay, Rocky Coulee, and North Macleod areas. The revival of interest resulted, however, in only the North Macleod District petitioning to be included. This makes the total irrigable land in the Lethbridge Northern District 104,758 acres. The order for this enlargement was published in the *Alberta Gazette* of August 14, 1920. The Provincial Legislature during the session of 1921 passed an Act guaranteeing in full the principal and interest on the bonds of the district, amounting to \$5,400,000—a sum estimated to be sufficient to cover the entire cost of construction. This Act also provides that the Irrigation Council of the province shall themselves take the necessary steps to let a contract for the construction of the works, and shall exercise general supervision over the trustees in all important matters affecting contracts, construction, etc.

It is understood that the bonds will shortly be offered for sale with this guarantee, which should assure their sale at a good price. It seems quite probable, therefore, that construction on this project will be commenced this summer.*

BARONS-CARMANGAY AND ROCKY COULEE DISTRICTS

During the spring of 1920 the Irrigation Council of Alberta investigated the sentiment in these two districts with regard to inclusion in the Lethbridge Northern Irrigation District. It was found that the residents of the Barons-Carmangay area were three to one in favour of inclusion, but unfortunately about fifty per cent of the land was held by non-residents, only a few of whom replied to the correspondence sent them. The sentiment in the Rocky Coulee District, however, was overwhelmingly in opposition to irrigation. These two projects were therefore not included in the Lethbridge Northern Irrigation District.

SOUTH MACLEOD IRRIGATION PROJECT

In the year 1916, a party in charge of Mr. T. M. Montague located a canal from the Oldman river to command a portion of the area now known as the South Macleod District. It was proposed to use the same intake as the Lethbridge Northern project. The irrigable area was estimated at 9,500 acres in townships 8 and 9, ranges 24, 25 and 26. In 1919 the landowners in townships 6 and 7, ranges 25, 26 and 27, petitioned the Government to include their land, and the necessary surveys were undertaken to determine the feasibility of irrigating this additional area.

Since it was not possible to command the whole of these lands from the Oldman river, other sources of water supply were investigated, such as the possibility of extending the United and Lone Rock system. It was finally decided as the result of a reconnaissance that the most economical development to serve the whole area was to divert water from the Waterton river.

* NOTE.—Bonds to the amount of \$2,400,000 have been sold and contracts have been let for the earth work; further sales of bonds will be made as required.

A standard twelve-man party in charge of Mr. N. M. Sutherland was assigned to this work and surveys were commenced about the first of June, 1920. The main canals and such of the secondaries as were necessary to determine the commande- area were located by the first of August. Mr. Sutherland's party was then reorganized with a view to completing plane-table surveys of the area under the project. On Octo- ber 1, a second plane-table party in charge of Mr. A. B. Cook was transferred to this work and these two parties completed the field surveys on December 7. During the field season the party under Mr. Sutherland completed the following work in 148 working days: 164 miles of traverse with profile and topography; 116 miles of levels; 51,800 acres of plane-table topography.

Mr. Cook's party completed in 57 working days: 122 miles of levels; 40,645 acres of plane-table topography.

Mr. P. A. Fetterly made a general survey of the soil of the project, taking fifty-four groups of samples at carefully chosen average points covering the whole district. These samples were tested for alkali with an electrolytic bridge with the following results:—

36	groups	showed	no	alkali.
9	"	"	moderately	strong alkali from 3 to 5 feet
3	"	"	"	" " " " 1.5 to 5 "
5	"	"	"	" " " " 0.5 to 5 "
1	"		(not	completed).

The land represented by the eight groups of samples showing moderately strong alkali within three feet of the surface was reserved for further investigation during the coming field season. The district as a whole is considered to be comparatively free from alkali.

The land surface in the southern portion of the district is smooth and fairly uniform but has a heavy slope to the north and east. South and east of Macleod the surface is more rolling and there are numerous depressions which have no natural drainage. In classifying this land a sufficient acreage of the low areas was classed as non-irrigable to contain the drainage from the surrounding irrigable lands. The soil varies from clay loam to sandy loam and in the northerly sections has a tendency to drift, owing to the prevalence of high winds. In some places the loosened portion of the top soil has entirely blown away, exposing the trails left by the plough when the land was broken. The practice of irrigation, and especially the growing of alfalfa, would obviate this difficulty by supplying sufficient root fibre to hold the soil in place.

The main and branch canals have been designed for the same maximum require- ment as used on the Lethbridge Northern, i.e., of a sufficient size to irrigate fifty per cent of the total area six inches in depth in a period of fifteen days. Seepage losses were estimated at six second-feet per million square feet of wetted area. The total irrigable area is approximately 61,000 acres, which is subject to a slight revision on a more complete soil investigation. A gross main canal capacity of 633 second-feet is required at the intake.

Assuming an irrigation factor of eighty per cent and an eighteen-inch duty of water, the water requirements are as follows:—

Net water required on 61,000 acres.	73,200 ac.-ft.
Seepage losses at 20 per cent of the water diverted.	18,300 ac.-ft.
Total water required.	91,500 ac.-ft.

SESSIONAL PAPER No. 25

The following is an estimate of the average monthly requirement during the irrigation season:—

May, 12 per cent.	11,000 ac.-ft.
June, 35 per cent.	32,000 ac.-ft.
July, 30 per cent.	27,000 ac.-ft.
August, 15 per cent.	13,700 ac.-ft.
September, 8 per cent.	7,400 ac.-ft.
100 per cent.	91,500 ac.-ft.

There are no prior appropriations of any size on the Waterton River drainage basin, and a study of the hydrometric records since 1908 shows that the above monthly amounts are available from the natural flow of the stream, even in a low-water year.

The site for the diversion weir and intake is located on the Waterton river in the NW. $\frac{1}{4}$ section 18, township 5, range 27. The river at this point flows in a straight, well defined channel close to the left bank, which is twenty-five feet in height. It is proposed to construct a concrete weir 550 feet in length with a maximum height of seventeen feet, which will raise the water-level to the required height to enable the diversion canal to be located on the first bench of the river valley, in a good clay material, well away from any flood action. No attempt was made to ascertain the character of the underlying material, but from surface indications and for estimate purposes it is assumed that the headworks will rest on a pervious foundation. The weir was designed to pass a maximum flood of 20,000 acre-feet.

The estimated cost of construction, based on 1920 prices and a total irrigable area of 61,000 acres, is \$27.72 per acre. Unit prices have fallen considerably since the estimate was made and it is believed that any revision will be in a downward direction. The landowners under the scheme are well organized. A petition for the organization of a district under the Irrigation Districts Act was forwarded to the Minister of Public Works of Alberta early in 1920. Further action was delayed until the field surveys were completed and the feasibility of the project determined.

IRRIGATION DEVELOPMENT ASSOCIATION

This association is still actively engaged in furthering irrigation interests in southern Alberta. A great deal of activity which has been started by this organization has now been transferred to the officers of the various districts which have organized under the Irrigation Districts Act of Alberta.

There are many matters, however, which are common to all districts, and this organization affords a central medium through which they can be handled to better advantage than by the individual effort of each district.

WATER USERS ASSOCIATIONS AND DISTRICTS

The Lethbridge-Coaldale Water Users Association is a voluntary organization which was formed in July, 1918, for the purpose of furthering the interests of the farmers under the Lethbridge section of the Canadian Pacific Railway Company's irrigation system located east of Lethbridge.

The activities of this organization have been to some extent superseded by four Water Users Districts which have been organized more recently and which cover practically the same territory.

The organizations were formed under the Alberta Irrigation Districts Act for the purpose of operating that part of the system under which they were located, and are as follows in order of their location:—

Ready Made Water Users District.

East Lethbridge Water Users District.

Coaldale Water Users District.

Cameron Water Users District.

The first of these districts has been in successful operation ever since its erection in February, 1919. The three remaining were formed in 1920, but as yet have not shown any great activity.

UNITED AND LONE ROCK IRRIGATION DISTRICTS

The field-work was finished and an estimate made of these projects in 1919. The two projects contain about 23,265 acres irrigable and it is estimated that the works can be built for about \$19 per acre.

These two districts are watered from the same system and under date of January 5, 1921, a majority of the owners of land under the Lone Rock District petitioned the Minister of Public Works of Alberta to be included in the United Irrigation District which had already been organized.

The Minister of the Interior gave his consent to this on February 28, 1920, and an order for the dissolution of the Lone Rock Irrigation District was signed by the Provincial Minister of Public Works on March 2, 1921. On the same day he issued an order changing the content of the United Irrigation District to include the former Lone Rock District. The order provided that the enlarged United District should assume the liabilities of the former Lone Rock District. The Provincial Government employed Mr. D. W. Hays to make a report on this project and inform them as to the advisability of their guaranteeing the bonds of this district. The report has not been made public on the date this report is submitted.

THE SOUTHERN IRRIGATION DISTRICT

The order for the erection of this district was published in the *Alberta Gazette* March 31, 1920, where a description of the land included may be found.

The condition of this district is practically the same as set forth in the last annual report. Apparently nothing can be done towards constructing works to serve this land until we have finished the design and estimate for the whole Lethbridge Southeast project, of which this is a part.

As stated in the last report, a portion of the area within this district is at present served by the Lethbridge section of the Canadian Pacific Railway Company's irrigation system. A party has been assigned to determine this year how much of the remaining land in the district is irrigable.

THE PROPOSED NEW DAYTON IRRIGATION DISTRICT

Petitions have been circulated for the formation of this district but the order for erection has not yet been issued. This district adjoins the Southern District on the east. The original intention was to make the line between range 15 and range 16 the eastern boundary. This, however, leaves out considerable land in township 4 and township 5, range 15, which can be served by the same distributary. It is, therefore, desirable that this land be included within the New Dayton District.

THE PROPOSED WARNER-MILK RIVER IRRIGATION DISTRICT

The petitions for the erection of this district have been submitted to the Provincial Government but the order for erection has not yet been issued. The condition of this district is the same as set forth in the last annual report. The project is a part of the Lethbridge Southeast project and any development of this area must be considered in connection with the development of the larger project.

SESSIONAL PAPER No. 25

THE PROPOSED MASINASIN IRRIGATION DISTRICT

This district adjoins the New Dayton Irrigation District on the east and includes the land in the area known as Tract 7-B (see report on Irrigation Surveys, 1918-19) of the Lethbridge Southeast project. Petitions are being circulated for the erection of the district.

LETHBRIDGE SOUTHEAST PROJECT

Plane-table surveys for the development of this project were commenced in 1919, but only a small area was completed in that year. An attempt was made in 1920 to complete these surveys and for this purpose six parties were placed in the field; one location party consisting of twelve men and five plane-table parties of twenty-seven men each.

The character of the work necessitated the employment of a very large number of experienced men and there was great difficulty in finding a sufficient number properly qualified, which materially delayed the work at the beginning of the season. After the parties were organized it was found necessary to devote considerable time to the training of some of the less experienced men, in order to get the parties into efficient working condition. In spite, however, of these difficulties, fairly good progress was made. Work was begun about May 22 and the several parties thereafter took the field as soon as their personnel was complete. The first party was disbanded towards the end of October and it was found necessary to disband another party about the first of November. In both these cases the cause was the impossibility of keeping a sufficient number of properly qualified men. When by reason of loss of men a party fell below efficient working strength, it was disbanded and the remaining personnel was used, as far as possible, to fill vacancies in the other parties.

During the comparatively short field season the five plane-table parties surveyed a total area of 591,973 acres, which area was also tentatively classified in the field. The daily average rate per plane-table day was 252.2 acres, computed on the basis of actual working days.

The method adopted for the work was to have the main canals and principal laterals located in advance of the plane-table parties, so that the area to be covered by the latter would thereby be delineated, thus precluding the possibility of surveying any lands above the canals which would of course be non-irrigable. The work was also planned so that the several plane-table parties would never be widely separated, but always be in touch with one another and with a central camp where the inspector of plane-table work made his headquarters and where there was maintained a portable field garage for the prompt repair of the large number of motor-cars used in connection with this work.

Surveys were commenced in the district north and east of Magrath and south of Raymond and thence carried easterly to Pakowki lake and from that point north and west to Chin coulee and to the boundaries of the Taber Irrigation District.

The location party after completing the survey for the main canals and reservoir sites was moved on 22nd November to Waterton lakes where it was intended to make a complete survey on the ice of the upper lake, with a view to its use as a storage reservoir. The lake, however, did not freeze solidly enough to permit of such a survey and therefore only a small portion of the work was done, consisting chiefly of the survey around the townsite within the Waterton Lake Park. The party was disbanded about the middle of December, 1920.

In addition to the five survey parties previously referred to, a small party equipped with a light rotary rock drill, sunk a number of test holes at the proposed dam site on the St. Mary river at section 9, township 1, range 25, west of the 4th meridian, in order to determine the feasibility of constructing a dam on this site. This party

12 GEORGE V, A. 1922

took the field on February 17, 1920, but owing to severe weather and bad roads, the drill and other equipment which had been freighted from Cardston to the proposed site, a distance of seventeen miles, was not actually put into operation until March 3.

The equipment of the drilling party consisted of a McKernan-Tierney rotary drill, class "Z-1," an 8-horsepower gasoline engine, a centrifugal pump and the necessary equipment and accessories. During the field season ten test holes were sunk to depths varying from thirty-five to ninety feet. An accurate log of each hole and the progress of the work was kept plotted up to date on a map. From a study of the logs of the several test holes and the character of the rock it appears that this foundation is suitable for any type of dam. Comparative estimates must hereafter be made to determine the most suitable type, but the type which has been tentatively designed and seems to be the most economical is a rock-filled dam.

While survey work was in progress a careful examination of the land was undertaken by an additional party. This work was undertaken on the first of September and was continued until November 10, during which period 267 soil groups, which were carefully chosen throughout the tract, were tested with the electrical bridge apparatus in order to determine their alkali content. Five samples, which were assumed to be typical of the general soil conditions within the district, were forwarded to Ottawa for chemical analysis in order to confirm, or otherwise, the results obtained by the electrical bridge tests. The field tests with the electrical bridge showed the following results:—

130 groups showed no alkali.

82 groups showed no alkali at depth of 5 feet.

37 groups showed alkali at depth of 3 to 5 feet.

8 groups showed alkali at depth of 1.5, 3 and 5 feet.

10 groups showed alkali at all depths.

All soils which showed a resistance when tested of less than 190 ohms. were classed as alkaline.

While as a result of this soil examination certain small areas of land have been excluded and a few other small areas have been reserved for further examination, the district as a whole was found to be comparatively free from alkali and the soil is believed to be well adapted to irrigation.

In order that the results of the field-work might be plotted and correlated a small office staff was maintained in Calgary through the season. This staff was somewhat augmented at the close of the field season by the addition of some of the field engineers. Considerable progress has been made in working up the results of the surveys but a very great deal of work yet remains to be done. The small office staff previously referred to will be employed continuously upon this work throughout the summer of 1921, while, at the same time, efforts will be made to complete the field-work.

CROWSNEST PASS IRRIGATION DISTRICT

During the year 1919 when it was realized that there was a probability of the Lethbridge Northern Irrigation project being constructed, taking their water supply from the Oldman river, the occupants of lands higher up on the stream became interested, and a number of resolutions from various local unions of the United Farmers of Alberta and also from the Board of Trade of Pincher Creek were forwarded to this office requesting the Dominion Government to make the necessary surveys to determine the feasibility of irrigating a large area of land tributary to the Oldman, Crownsnest and Castle rivers.

A standard twelve-man party organized in the spring of 1920 under Mr. S. H. Hawkins was accordingly placed in the field to make the necessary surveys and investigations.

SESSIONAL PAPER No. 25

This party was assembled at Cowley, Alberta, on May 29, and field-work was commenced at the "Gap" on the Oldman river section 31, township 10, range 3, west of the 5th meridian on May 3. This work was continued until November 15, when the party had to disband on account of bad weather.

During the season the following work was completed:—

Contour survey of the "Gap" reservoir on the Oldman river, townships 10 and 11, range 3, west of the 5th meridian.

Contour survey of reservoir site on Castle river at Canyon creek, township 6, range 2, west of the 5th meridian.

Contour survey of reservoir site on Gladstone creek, township 5, range 2, west of the 5th meridian.

Contour survey reservoir site on Pincher creek township 6, range 30, west of the 4th meridian, and range 1, west of the 5th meridian.

Contour survey of reservoir site on Five-mile creek, township 9, range 29, west of the 4th meridian.

Contour survey of dam site at Castle River reservoir site, section 30, township 6, range 2, west of the 5th meridian.

Preliminary survey for main canals and lateral system over the Todd creek area, townships 8 and 9, ranges 1 and 2, west of the 5th meridian.

Preliminary survey for main canals and lateral system over the Pincher creek east area township 6, ranges 29 and 30, west of the 4th meridian.

Reconnaissance and section line levels over the Pincher creek north area, townships 6 and 7, ranges 29 and 30, west of the 4th meridian, and range 1, west of the 5th meridian.

Preliminary survey for diversion canal from Gladstone and Mill creeks to the Pincher creek areas.

Reconnaissance of the Beaver creek area, townships 7 and 8, ranges 28 and 29, west of the 4th meridian.

The result of the field-work is summarized in the following tables. The estimates of cost are based upon 1920 prices and are merely approximations, subject to later and more detailed calculations.

SUMMARY OF RESERVOIRS OLDMAN RIVER

	Location	Flooded Area Acres	Capacity Acre-Feet	Total Cost	Cost per Acre-Feet	Remarks
"Cap" Reservoir.....	Tps. 10 and 11, rgs. 3, W. 5th M.	1500	90,000	\$612,232 50	\$6 80	Rock-fill concrete-faced dam.
Castle River Reservoir.....	Tp. 6, rgs. 2 and 3, W. 5th M.	800	30,000	219,299 50	7 30	"
Canyon Creek Reservoir.....	Tp. 6, rgs. 2, W. 5th M.	1000	40,000	292,974 00	7 32	"

*Includes Reservoir—\$120,000.

SESSIONAL PAPER No. 25

Water for the Todd creek area would be taken from the Oldman river at section 10, township 10, range 2, west of the 5th meridian. A main canal ten miles in length is required to reach the irrigable lands. Although the estimated cost is \$49.20 per irrigable acre, which is considerably lower than at first thought possible, four miles of this canal is on side-hill in excess of forty degrees and it is considered that this piece of canal would be very difficult to construct and maintain. Although allowance has been made in the estimate for heavy work here and a number of bench flumes, it is doubtful whether the scheme could be constructed for the figure shown in the table. These four miles of canal make the feasibility of the project very uncertain because it is not possible to determine just what contingencies may arise in construction. This scheme is not considered a feasible one at the present time.

The estimate of cost to irrigate the Pincher creek north area is necessarily very approximate. The irrigable area was determined by running levels over section lines, and although some preliminary line has been run for main canal, it was found that the route was so difficult that the scheme was not considered a feasible one, and therefore was not surveyed in any detail. The estimate of cost has been based partially on actual surveys, but largely upon a reconnaissance. This scheme is not considered feasible at the present time.

More detailed surveys were made of the Pincher creek east area. Except for the storage reservoir required on Pincher creek, this is a very cheap and simple scheme. Water can be carried to the irrigable lands by means of a main canal four miles in length, and even with the comparatively expensive reservoir required on Pincher creek, the estimated cost per acre is less than \$45. The land in this area is comparatively heavy and not so well adapted for irrigation as the Pincher creek north area.

No surveys have yet been made of the Beaver creek area. It is estimated, however, that there are some 9,000 acres which could be irrigated. A study has been made of the water supply of Beaver creek and although the records of stream flow are very incomplete, it was estimated that there is only a sufficient quantity of water, with a storage reservoir on Five-mile creek of 3,500 acre-feet capacity, to irrigate some 2,600 acres. A very approximate estimate of cost to irrigate this area was made and the cost determined at \$55.30 per acre.

A reconnaissance was made of the Cowley area and the estimated cost is based on this reconnaissance. Water could be carried to this area by means of a grade canal twelve miles in length, or by utilizing the water-power available at the falls near Lundbreck and pumping to a point on the side-hill carrying the water to the land by a canal about five miles in length. Either of these schemes would be expensive and the project is not considered feasible at the present time.

There are, no doubt, many other small schemes along the foot-hills which may prove to be feasible, some of which will be investigated during the coming season. It would seem that these areas could be more economically irrigated from the smaller streams than from the rivers.

CYPRESS LAKE RESERVOIR PROJECT

As stated in the last report, a reconnaissance survey was made of the irrigation possibilities in the valleys of Battle creek and Frenchman river and a report was submitted early in 1920.

During the field season of 1920 a further examination was made of the conditions on both streams and it was decided that on account of the many evidences of alkali in the bottom lands of both valleys, and especially those of the Frenchman, it would be better to develop first the large block of land in the vicinity of Consul, Vidora and Robsart. A main canal was located from the Battle creek outlet of Cypress Lake reservoir to the vicinity of Robsart, a total distance of twenty-two and one-half miles. Levels were run over the section lines of the commanded area and a topographic map

12 GEORGE V, A. 1922

prepared. The main laterals required were located in the field and the remainder projected on the topographic plan. The total irrigable area under this canal system was estimated at 11,580 acres. An extension of the McKinnon ditch was also surveyed which would add 425 acres, making a total of 12,005 acres for the scheme.

The water supply is the proposed Cypress Lake reservoir, where a storage capacity of 90,000 acre-feet can be created by the construction of dams at the east and west ends of the lake. The flood waters of Battle and Oxarart creeks would be diverted into this reservoir by a canal with a maximum capacity of 1,885 second-feet. The additional works required are, an outlet through the east dam at the Frenchman river and an outlet through the west dam with a short canal to Battle creek. The estimated cost of this storage is \$6.61 per acre-foot. A study of the run-off records from 1912 to 1920 show that with 90,000 acre-feet storage it is possible to supply, in addition to the present demands, about 10,000 acres with the full duty of eighteen inches, or 12,000 acres with a reduced duty of fifteen inches.

The total cost of the project, based on 1920 prices and 12,000 irrigable acres, is approximately \$60 per irrigable acre. In view of the present reduction in prices, the 1920 unit costs are considered high and it is probable that the scheme could be built for \$50 per irrigable acre.

The examination of the soil of this tract proved that in general the top eighteen inches is practically free from alkali. Below this, however, to a depth of about six feet the soil is rather heavily impregnated. The land can, no doubt, be successfully irrigated if the water table can be kept below eighteen inches from the surface. This depends largely upon the character of the subsoil which will be further investigated during the coming field season.

NORTH SASKATCHEWAN DIVERSION PROJECT

A history and general outline of the scope of this project is contained in the last annual report. No further field-work was undertaken during 1920.

The proposal for this scheme is to divert the North Saskatchewan and Red Deer rivers to provide water for irrigation and domestic use to an immense tract of land extending from the Berry creek district in Alberta to the neighbourhood of Saskatoon in Saskatchewan. The small amount of reconnaissance which has been completed to date has only served to outline in a general way some of the possibilities of this project.

During 1921 preliminary surveys will be made to determine the feasibility or otherwise of diverting water from the above-mentioned rivers into Buffalo lake as a reservoir, and also the feasibility of locating a canal from Buffalo lake to the irrigable areas. In addition it is proposed to run a system of levels over the township lines of the irrigable tract to obtain a general knowledge of its extent and suitability for irrigation.

THE LITTLE BOW IRRIGATION PROJECT

On January 26, 1921, a meeting of the farmers representing owners of land along the Little Bow river bottoms was held in Carmangay, Alberta, for the purpose of organizing an irrigation district. It is proposed to divert water from the Highwood river into the Little Bow river at the town of High River.

In 1919 this branch in co-operation with the Provincial Public Works Department selected a new site for the construction of permanent headworks for the diversion of the 50 cubic feet per second of water which the Provincial Government had been granted to supply the domestic rights on the Little Bow river. This site is located just below the Canadian Pacific Railway bridge at the town of High River.

This proposed district plans to join with the Provincial Government in building these headworks large enough for both diversions. It is proposed that the district

SESSIONAL PAPER No. 25

as a whole shall maintain the headworks and that each farmer shall construct and maintain his own pumping plant for the irrigation of his own land. There are thirty-two separate tracts varying from six acres to two hundred and twenty-five acres in size, all situated less than forty feet above the river. The tracts begin about eighteen miles above Carmangay in section 5, township 15, range 25, west of the 4th meridian, and extend along the Little Bow river to section 3, township 14, range 20, about twenty-six miles below.

The total area is about 2,786 acres.

The landowners have engaged Mr. John Haddon, of Calgary, as their engineer and are making their own surveys.

DUTY OF WATER

Duty of water investigations were carried on at Brooks, Ronalane and Coaldale as in former years under the general supervision of Mr. W. H. Snelson. Mr. E. E. Eisenhauer collected the data at Coaldale and Mr. A. Hildenbrand of the Canada Land and Irrigation Company operated the experimental plots at Ronalane. The results obtained are detailed in the report submitted for separate publication. The conclusions arrived at are discussed briefly in the following summary.

DISCUSSION OF THE SUMMARIZED DATA

The duty of water for any locality will vary from year to year, principally in accordance with the amount and seasonal distribution of the precipitation, and to a lesser extent as influenced by temperature and the conditions of soil and subsoil; therefore, in order that the water requirements of crops may readily be compared, from one year to another, or between different localities, it is best to consider that crops annually receive a certain amount of water—precipitation plus irrigation—and designate this amount as the "Total Depth Received."

The next table is inserted to show the climatic conditions prevailing during the years 1914 to 1920 inclusive at the four stations from which data have been taken in writing the general discussion on Duty of Water which follows.

The second table is inserted for the purpose of comparison and shows the average climatic conditions which prevailed during the seven years as compared with long term averages. In both tables the data cover the period April to September, inclusive.

The small chart indicates the different soil conditions at Strathmore, Ronalane, Coaldale and Brooks.

	PRECIPITATION							TEMPERATURE						
	1914	1915	1916	1917	1918	1919	1920	1914	1915	1916	1917	1918	1919	1920

Second Foot	Sandy Soil		Sandy		Clay Loam		uniform
Third Foot	to depth		Loam		very		Soil Very
Fourth Foot	varying				uniform		fine sand
Fifth Foot	from				has		and silt
Sixth Foot	3 to 7 feet		Sand		no		Light
			and		impervious		gravel at
	Heavy Clay		Gravel.		stratum		12 to 14
	and gumbo						feet
	subsoil very						depth
	impervious						

The following table gives a summary of the data collected from the Coaldale, Ronalane, and Brooks stations during the period 1913 to 1920, inclusive. It is not the intention to set forth these figures as representing the exact depths required for the various crops, but rather as showing the results of our investigations to date. The column headed "Yield" is inserted as a useful index to the crops produced, at these three stations. The column headed "Depth" shows in feet the total depth of water received (irrigation plus precipitation).

The *average depth* shown is the average of the depths at the different stations weighted according to the number of years during which records have been taken at each place. The column marked "Average Depth" shows the average for Coaldale, Ronalane, and Brooks.

The data at Coaldale are based on results gained by average farmers irrigating their own fields and cover a period of eight years: the yields at Coaldale have been omitted because they would not be comparable with the results obtained at the other places.

The results at Ronalane are based on plot work carried on consistently for six years. The results at Brooks are based on accurate and consistent plot work covering a period of three years. For Ronalane and Brooks the figures shown represent the average, at each place, of the total depths of water producing the maximum crop yield in each year. For Coaldale the figures represent the average for ordinary crops in each year.

SESSIONAL PAPER No. 25

Crop	Coaldale		Ronaldane		Brooks		Average
	Yield	Depth	Yield	Depth	Yield	Depth	Depth
Wheat.....		1.53	45.9	1.91	46.5	2.03	1.77
Oats.....		1.58	91.4	2.15	94.4	1.82	1.86
Barley.....		1.61	58.5	1.74	57.3	1.98	1.77
Peas.....			44.0	2.31	52.7	2.29	2.30
Potatoes.....		0.83	371.0	2.03	298.7	1.72	1.79
Flax.....					21.1	1.95	1.95
Alfalfa seed.....					10.7	1.23	1.23
Alfalfa.....	2.18		3.33	2.08	6.48	2.08	2.19
Grasses.....	1.89				1.66	1.66	1.66
Sugar beets.....			1.35	1.66	16.2	1.82	1.82

The average depth noted in the above table indicates quite clearly the total depths required for the crops listed, when grown in that part of Alberta lying south of township 28, and exclusive of that strip of country lying immediately east of the foot-hills.

Assuming, as in previous reports, that eventually all irrigated farms will be seeded down, one-half to alfalfa and one-half to common grains, we have:—

Average depth for wheat, oats and barley.....	1.80 feet.
Average depth for alfalfa.....	2.19 "
Then, total required for entire farm unit.....	2.00 "

With legal duty at 1.50 feet, under this condition we would need to rely on seasonal precipitation to make up the additional 0.50 foot.

The mean summer precipitation at Ronaldane for the past four dry years, 1917 to 1920, inclusive.....	0.47 foot
The mean summer precipitation at Brooks (same period).....	0.50 foot
The mean summer precipitation at Coaldale (same period).....	0.64 foot
Mean of three stations.....	0.54 foot

We find, therefore, that even during the past four dry seasons in southern Alberta, we have had enough precipitation when added to the legal duty of water to meet the above indicated possible duty.

REPORT ON DRAINAGE SURVEYS AND INVESTIGATIONS, 1920

By H. R. Cram, B.Sc., A.M.E.I.C.

Field-survey work was commenced in the provinces of Alberta and Saskatchewan about the middle of May and continued well into September. Conditions during this period were very favourable for drainage surveys, as this year might properly be termed the fourth in succession of dry years, and, as a consequence, marked progress was made in the investigations of the projects which were brought before the Department from time to time by petition, application to purchase, or otherwise. While, however, dry seasons enable the engineer to more expeditiously carry out his surveys, paradoxical as it may seem, normal and flood conditions are in most cases preferable, as, under such conditions, an engineer, in the study of the many problems arising in connection with the reclamation of land by drainage, is in a better position to obtain definite and reliable information of the wet or flooded conditions than in a dry year when he has to depend on information obtained from settlers or from personal studies and observations of the district.

ALBERTA

Sounding Lake, Townships 36 and 37, Ranges 4 and 5, West 4th Meridian

This lake lies at the end of a valley almost surrounded by hills, about 12 miles north of the town of Monitor, Alberta, on the Canadian Pacific railway, and has a superficial area of approximately 9,000 acres. The water is shallow, not exceeding one foot in depth at low stage, is muddy and quite useless for stock-watering purposes except in the early spring. There is no apparent outlet from the lake, although Eyehill creek rises within a few hundred feet of it and flows east and north into lake Manitou in Saskatchewan.

Electrolytic bridge tests and the sparse growth of vegetation on land abutting upon the lake indicate the presence of alkali in considerable quantities.

The cost of reclamation is estimated at \$11.50 per acre. As a drainage project this is not looked on with favour, but there is a possibility that the lake may serve as a reservoir in connection with the proposed North Saskatchewan Irrigation Project, which will be investigated during the present season.

Gough Lake, Townships 35 and 36, Ranges 17 and 18, West of the 4th Meridian

Gough lake is a shallow body of alkaline water not exceeding two feet in depth and about 12,400 acres in extent. The investigation disclosed that the project is not economically feasible inasmuch as it would cost approximately \$20 per acre to reclaim the land underlying and adjoining the lake and this, together with the fact that the soil after reclamation will probably be of a very doubtful value, renders this scheme undesirable at the present time.

Farrell and Dowling Lakes, Townships 33 to 36, Ranges 16 to 18, West 4th Meridian

The area of these lakes, together with some small adjoining and connecting lakes, comprises 14,800 acres. They are situated in a natural depression about 100 to 150 feet below the surrounding hills. The water of Farrell lake and of one of the small lakes is fresh but all the other lakes are quite alkaline. The investigation proved that this is not a feasible or desirable project, but the information furnished indicates that Farrell lake is ideally situated for an irrigation reservoir and that it may be found feasible to irrigate about 15,000 acres of the valley land at reasonable cost.

Sullivan Lake, Townships 34, 35 and 36, Ranges 14 and 15, West 4th Meridian

This lake is situated eight miles south of the town of Castor, Alberta, on the Canadian Pacific railway, and is in area about 41,600 acres, with a tributary drainage area of 410 square miles. The water of the lake and soil samples of the lake bed, tested by means of the electrolytic bridge, show the presence of alkali in excess of two per cent.

Alternative schemes of reclamation covering partial and complete drainage were considered for two outlets and it was found that the estimated cost of drainage by the cheaper scheme would approximate \$10.36 for partial reclamation and \$11.04 per acre for complete drainage, but in view of the very doubtful value of the soil for agricultural purposes, when reclaimed, this scheme cannot be recommended. It is possible, however, that Sullivan lake may be utilized as a reservoir in connection with the North Saskatchewan Irrigation Project, as it is feasible to divert water from Battle river, or Red Deer river, to the lake, which is capable of storing 500,000 acre-feet.

SESSIONAL PAPER No. 25

Lanes Lake, Townships 37 to 39, Ranges 14 and 15, West 4th Meridian

This lake is situated eight miles north of Sullivan lake and three miles west of the town of Castor, Alberta, on the Canadian Pacific railway, and drains south to Sullivan lake. The lake bed is approximately 2,650 acres in extent, of which about 1,430 acres are periodically flooded, or too wet for cultivation, and 1,220 acres are permanently covered by water. The lake is of a permanent character, being fed by springs, and the water is fresh and clear. Vegetation along the shores is exceptionally good and in places extends well into the water; the land above the water yields an abundance of grass which is cut annually.

The lake bed contains excellent soil which on the surface consists of six inches to one foot of black sandy loam with a stratum of sand six inches to twelve inches thick between that and the clay subsoil. No indications of alkali to any extent were noticed or detected by the electrolytic bridge tests.

The total cost of the project is estimated as \$22,300, or an average cost per acre of \$8.40. As all the resident owners of land affected in any manner by the project are in favour of it, it was decided to make complete location surveys of the scheme during the season of 1921.

Cygnets Lake

This lake is situated in township 38, range 28, west of the 4th meridian, and in township 38, range 1, west of the 5th meridian, about six miles due west of the town of Red Deer, Alberta. The level of this lake was lowered some eight or ten feet in 1910 when the Alberta Central Railway Company undertook to construct its grade across the northern extremity of the lake and as a result reduced the superficial area from 4,840 acres to about 1,500 acres.

Complete investigations and surveys of this project were made during the season and it was found that the land underlying and adjoining the lake could be permanently reclaimed at a cost of approximately \$8 per acre. The settlers affected in any manner by the proposed scheme are favourable to drainage and, as the soil of the lake bed is of excellent character, this is a scheme which is now in readiness for construction by the Federal Government, if it should be decided to proceed with it.

*Lac-la-Nonne, Township 57, Range 2 and 3, West 5th Meridian**Lake Majeau, Township 57, Ranges 3 and 4, West 5th Meridian*

Lac-la-Nonne was found upon investigation to comprise about 3,000 acres completely contained within high and steep shores, and soundings taken showed a depth of thirty feet of water without reaching the deepest portion of the lake, so it was not considered further as a reclamation project.

Majeau lake is situated about twenty-five miles west of Busby station on the Edmonton, Dunvegan and British Columbia railway, and fifteen miles north of Gunn station on the Canadian National railway. Its natural drainage is into Lac-la-Nonne by a creek flowing generally through a deep ravine, especially in the lower part of its course.

Partial drainage of the lake by lowering its level two feet would provide sufficient fall for the reclamation of about 220 acres of wet land along the inflowing creeks and would prevent the overflow of some of the meadows which are now periodically submerged. This could be carried out at a cost of about 85 cents per acre benefited, but as the land affected is almost completely alienated from the Crown, the initiative should be taken by the settlers affected.

To completely drain the lake will cost approximately \$31,200, or about \$7.30 per acre. Drainage is therefore economically feasible, but in view of the opposition of

12 GEORGE V, A. 1922

some of the interested settlers to complete reclamation, and the general indifference of the majority of the others affected, no action will be taken by the department at present.

Chip Lake, Townships 53 and 54, Ranges 9, 10 and 11, West of the 5th Meridian

This lake is situated on the main line of the Canadian National railway about eighty miles west of Edmonton and has a superficial area of approximately 18,500 acres. After the freeze-up in December, 1920, soundings of the lake bed were taken from the ice which furnish sufficient information to provide the data for a fairly accurate and detailed working map showing one-foot contours on which a projection of the drainage ditches can be made.

As a result of the limited investigation and details collected, it is estimated that 20,000 acres of land are reclaimable by lowering the level of the lake approximately six feet at a cost of about \$9 per acre. In view of the promising nature of the scheme, it was decided to have a location party thoroughly investigate the project during the season of 1921.

Magloire Lake

This scheme is a development of an application received from a private individual to drain. Because of its size and probable cost it was considered too large for private enterprise and it was therefore decided to investigate the possibility of reclaiming the land adjoining and underlying the lake in accordance with the provisions of Part IV of the Drainage Regulations. The lake is situated in township 79, range 21, west of the 5th meridian, about eight miles north of Fahler station on the Edmonton, Dunvegan and British Columbia railway, and ten miles northwest of Kimiwan and Winagami lakes, which were also investigated as drainage projects by this department. The superficial area of the lake is about 1,700 acres and the adjoining marshes and swamps comprise an additional 1,100 acres; the cost of complete drainage is estimated at about \$2.90 per acre, but until the receipt of the report of the Dominion Chemist regarding the analysis of soil samples taken from the lake, it will not be known whether the land underlying the lake is worth reclaiming.

Winagami and Kimiwan Lakes, Townships 76, 77 and 78, Ranges 18, 19 and 20, West of the 5th Meridian

These two lakes have heretofore been considered as one project but investigation shows that it is not economically feasible to drain them in the same direction, and separate estimates have therefore been prepared for each project.

Lake Kimiwan is a shallow body of water of about 10,000 acres in extent situated at McLennan on the Edmonton, Dunvegan and British Columbia railway. There is no permanent outlet to the lake, but on occasions of extreme high water, there is an overflow easterly to Reed lake and Peavine creek, thence southerly to Smoky river which is the course followed in projecting the main drainage ditch.

The soil of the lake is a good black loam on a clay subsoil which after systematic drainage will make excellent farm land. The drainage area of Kimiwan lake, including that of Reed lake, is about 100 square miles. It is estimated that to drain this lake would cost \$7.15 per acre, but if the further area of land adjoining Peavine creek is included, the cost per acre will be reduced to \$6.29. The investigation of this project has shown it to be entirely feasible, economical and in the public interest and construction is recommended.

Winagami lake is situated about two miles east of Kimiwan lake and from the plans as at present developed it is considered that its partial drainage, reclaiming about 8,500 acres of land, will be the most efficient method of dealing with it. Until further detailed studies have been made in reference to the control of the level of

SESSIONAL PAPER No. 25

Lesser Slave lake, into which the Winagami lake project would drain, it is considered inadvisable to proceed further with the latter at the present time.

Athabaska Project, Townships 67 and 68, Range 20 and 21, west of the 5th meridian

As the result of representations made to the department by the Board of Trade of Athabaska, Alberta, and by Local Union No. 498 of the United Farmers of Alberta, this department made a reconnaissance investigation last season to determine the feasibility of reclaiming by drainage a large tract of swampy land adjacent to the town of Athabaska in the above mentioned townships. It was found that it would be possible to drain some 38,500 acres at a cost of approximately \$3.90 per acre, but before a definite recommendation is made in connection with this project, it is considered desirable to await the result of the tests of the soil which are now being carried out by the Dominion Chemist.

Flooded Areas in the Vicinity of Lesser Slave Lake

In recent years much damage has been done, especially in the years 1919 and 1920, by the abnormal height of Lesser Slave lake which caused serious flooding of the low-lying lands adjoining the lake. This was more serious in the year 1920 than formerly, and upon numerous inquiries being made of the department, it was decided to have an investigation made by engineers of the Reclamation Service to determine the cause and to suggest a remedy.

The abnormal rise of the lake is in part, but only to a small extent, due to unusually heavy precipitation; the principal cause is believed to be the silting up of the outlet channel—Lesser Slave river—which for some thirty miles is tortuous and sluggish and quite inadequate to carry off even the natural drainage. The most serious obstruction is just above Saulteau rapids at the eastern end of the section referred to.

As a result of this investigation two principal plans are being considered for lowering the lake level:—

1. To cut through the Saulteau gravel bar to a depth of six feet and a bed width of 100 feet. This work would involve about 102,237 cubic yards of excavation, which at 25 cents would cost approximately \$25,000.

2. To improve the whole course of the river from the lake to Saulteau Landing, making a number of cut-offs to straighten out the winding course of the river. This work would involve the excavation of 881,685 cubic yards, which at 25 cents a yard would amount to \$220,420.

It has been recommended that a further and more detailed investigation of the outlet of the lake be made, as well as of the whole of the flooded area adjoining the lake and lying west thereof in the watersheds of the East and West Prairie rivers.

Rocky Mountain House Drainage Project

This scheme is contained in townships 36, 37, 38 and 39, ranges 4, 5, 6 and 7, west of the 5th meridian, and lies to the south and east of Rocky Mountain House, Alberta, being roughly outlined by the following towns and stations, all of which are in the province of Alberta: Rocky Mountain House, Dovercourt, Stauffer, Raven, New Hill, Evergreen, Alhambra, and Condor. The district is served by the branch lines of the Canadian Pacific railway from Red Deer, Alberta, and is about 45 miles from that city.

A reconnaissance of the project was made during last season to ascertain if a feasible scheme could be found to drain this large area of open muskeg which is worthless until drained, unsafe to travel on except when frozen and, in the opinion of the settlers, the chief cause of local early frosts that do considerable damage to the crops each year.

12 GEORGE V, A. 1922

The attitude of the resident owners was ascertained by means of a petition circulated among them and it was found that all were in favour of drainage and the most interested ones were those who were obtaining the best livelihood under existing circumstances.

The soil of the district is very good and no trace of alkali was found in any part of the tract examined.

The total cost of the project is estimated as \$229,000, which, based on a reclaimable area of 45,400 acres, makes an average cost per acre of about \$7.

Because of the favourable character of the reconnaissance report, it has been decided to make complete location surveys of the scheme during the season of 1921.

Big Lake Drainage Project

This lake, consisting of about 2,550 acres with a depth of approximately three feet, is situated in township 53, ranges 25 and 26, west of the 4th meridian, quite close to the town of St. Albert and about ten miles northwest of Edmonton, Alberta. The lake during the spring and early summer rises to about four feet above its normal level and as a result usually submerges about 6,000 acres of land. The outlet of the lake is Sturgeon river which flows northeasterly through the settlement of St. Albert, and during freshet periods floods portions of the valley through which it flows.

The great majority of resident owners, whose lands would be affected by the drainage of the lake, are strongly in favour of reclamation, and the only persons who are opposed to the scheme are three owners of land who favour the revival of a scheme for making a summer resort of the lake because, primarily, of its proximity to Edmonton.

It is estimated that the lake may be completely drained at a cost of \$221,000, making the average cost per acre of land benefited approximately \$36.60. A combined scheme of drainage and irrigation is quite feasible and is desirable in this case as it would convert the shallow, unsavoury, mosquito breeding swamp into one of the richest and most productive tracts of land in Western Canada. The situation of the land right on the railway and near the capital of Alberta, the rich nature of the soil well drained and irrigated, is ideal in all respects for intensive market gardening and the increase in value of the land affected, when compared with the cost of reclamation, would undoubtedly make the project a very profitable one for all concerned. A plan for partial reclamation was also worked out but would not be economically feasible.

SASKATCHEWAN

Waterhen Lakes Drainage Project, Townships 44, 45A and 45, Ranges 21 and 22, West

2nd Meridian

A drainage district, designated as No. 18, was erected May 31, 1920, under the drainage laws of the province of Saskatchewan, resultant upon the investigation carried out by the Reclamation Service the preceding year showing the project to be in every respect desirable. Tenders were called for construction of the drainage works and on the 26th October, 1920, the contract was let to the Lount Engineering Company, Limited, Winnipeg, at a unit cost of 21.9 cents per cubic yard for earth work. The total cost of the scheme is estimated as \$169,195, which figures out at approximately \$12.20 per acre reclaimed. The actual work of construction has only commenced and it is expected that the scheme will be completed by the fall of 1922.

SESSIONAL PAPER No. 25

Ponass Lake Extension Drainage Project, Townships 37 to 41, Ranges 15 to 17, West 2nd Meridian.

A reconnaissance of this project was made with a view to adding an additional area to the original scheme investigated in 1919, but it was found that this could not be accomplished as it would decrease the percentage of Crown lands below the necessary 50 per cent.

Whitesand River Project

This scheme is in township 32, ranges 9 and 10, west 2nd meridian, and is the development of an application received by the department for the drainage and purchase of one quarter-section of land under the provisions of Part I of the Drainage Regulations.

Two schemes were investigated, one for partial reclamation to improve the existing hay lands and the other to permanently reclaim all land affected. Partial reclamation was found possible at a cost of \$2.20 per acre, and complete reclamation at a cost of \$5.40 per acre.

Before a definite decision in this case can be reached, it will be necessary to carefully examine the surface soil, as considerable of the area is strewn with small stones and boulders. Otherwise the scheme is feasible and desirable.

East Moose Range Project

A reconnaissance survey was made of the district lying east of the line between ranges 10 and 11, west 2nd meridian, and bounded by the Saskatchewan river on the north, the Sipanok channel on the east, and the Carrot river on the south, comprising altogether about 600 square miles.

While certain portions of this large tract were found to be susceptible of economical drainage, it is considered, on account of the inaccessibility of the district, that drainage under present circumstances is not in the public interest.

Centre Moose Range Drainage Project Townships 49 and 50, Ranges 11, 12 and 13 West 2nd Meridian.

During the field season of 1919 a reconnaissance survey of this project was made and in view of the favourable nature of the report submitted, it was decided to have a complete location survey of the project made, which was accordingly arranged for and carried out during the season of 1920.

It was found impossible to include in the proposed drainage district all of the land owned by settlers desiring drainage and, unfortunately, a considerable area of reclaimable land had to be left out in order that the Federal Government would be in control of 50 per cent of the total area and thus be enabled to undertake its drainage under Part IV of the Drainage Regulations.

Complete plans of the scheme have been drawn up and schedules of assessment prepared covering all the land that will be benefited by the scheme and in arriving at the assessment due consideration has been given the various degrees of benefit which will probably result to the land after reclamation. The total area is 107,400 acres and the total cost is estimated at \$263,600, which permits of the land being reclaimed at the rate of \$2.57 per acre.

This is one of the most favourable drainage projects yet investigated by the department and it is the hope of the settlers that the Dominion Government will undertake the construction of the drainage works in the near future. This project is strongly recommended for construction.

Moose Range West Project

This project is situated in townships 48 and 49, ranges 14, 15 and 16, west 2nd meridian, and as regards nature of the soil, timber and other details, it closely resembles the country lying to the east in the Centre Moose Range District. As in the latter, the settlers are very much in favour of it.

It is estimated that 16,700 acres can be reclaimed at a cost of about \$3.10 per acre. This is a very favourable rate for complete reclamation of land which is considered as fairly "close in." This project presents no engineering difficulties, is very desirable and the investigation fully indicates its economical feasibility. It is strongly recommended for construction.

MANITOBA

Whitewater Lake

This lake is situated in townships 3 and 4, ranges 21 and 22, west of the Principal meridian, and contains some 19,600 acres, including the adjoining low-lying shores. The investigation disclosed that it would be prohibitively expensive to construct works to completely drain this lake in view of the fact that there is no natural outlet. The cost of reclamation is estimated as \$583,000, or approximately \$30 per acre, and in this connection it is to be noted that improved farms in the vicinity may be purchased for \$25 per acre, while prairie land sells at \$18 per acre. This, together with the poor class of soil in which alkali of a considerable quantity is present, makes this scheme undesirable.

PRIVATE DRAINAGE PROJECTS

During the field season of 1920, engineers of the Reclamation Service investigated and inspected fifty-five private drainage projects, of which four were cancelled on voluntary abandonment by the applicants and six, after investigation, showed that they were not feasible under the provisions of Part 1 of the Drainage Regulations. During the year April 1, 1920, to March 31, 1921, 127 applications for private drainage projects were received, but of these and former applications 120 were cancelled, chiefly for non-compliance with the Drainage Regulations or on voluntary abandonment. It is expected that twenty-five of the new applications will be investigated during the present field season and also that some twenty-five projects, authorized and under construction, will require inspection to ascertain what progress has been made in construction of works.

INTERNATIONAL WATERWAYS TREATY

The measurement and apportionment of the waters of the St. Mary and Milk rivers were carried out during the past season under the provisions of an interim order made by the International Joint Commission pending a final decision on this important matter. As in previous years, an engineer of the Reclamation Service acted in co-operation with an engineer of the United States Reclamation Service in the measuring and apportioning of the waters and the collection of data in connection therewith.

PART V

DOMINION WATER POWER BRANCH

REPORT OF THE DIRECTOR AND CHIEF ENGINEER OF WATER POWER, J. B. CHALLIES, C.E., M.E.I.C.

Natural resources may be divided roughly into three classes: exhaustible, semi-exhaustible and inexhaustible. Amongst the first are coal, oil, natural gas and peat produced by the slow evolution of centuries and as these are used up they are not reproduced and their eventual exhaustion is, therefore, inevitable. Amongst the semi-exhaustible are timber; this resource can be reproduced in periods of time within the bounds of practical measures. Water resources are inexhaustible, travelling in the continuous circle ocean-vapour-rain-river and back to ocean again.

Officials charged by the state with the care of these resources have to adopt a course consistent with the nature of the resource with which they have to deal. This course must be dependent upon a policy having adequate and appropriate legal authority, physical foundation and administrative execution.

Legal authority.—Water has probably been the cause of more litigation than any one single natural resource in the history of the world. It is used for domestic purposes, agriculture, navigation, power, to mention but a few of the principal uses, and the law regarding it had its beginning in antiquity and has grown up through the slow process of time by a change here, an addition there, as experience or new uses developed. It happens then that the rapid recent development of the use of water for power purposes due to the strides made in the science of electric generation and transmission has found old established water law unready and inadequate for the new problems, and most of the nations of the world are now treading a difficult path through old laws, precedents and customs to seek for a law that will give authority and facilities commensurate with the importance and needs of modern water-power development without depriving other users of water of their long recognized and essential rights.

Physical foundation.—Any policy for utilization of a natural resource must fail that is not founded on nature; in other words the evolution of a successful policy for the development of water-power depends on adequate knowledge of the laws of nature and the behaviour of water, rivers, streams, lakes in their natural state. Nature can be interfered with within certain limits, but what these limits are can only be determined by careful investigation and study by those skilled in such matters and who investigate and record the ever-changing regimen of their element from season to season and from year to year.

Administrative execution.—The administrator seeks to perform his duties to the state so that the public interest may be best served; that is to say, he seeks the greatest good to the greatest number and injustice to none. This goal is not easy of attainment and many steps, some in the wrong direction, will be taken before even the vicinity of the goal is reached.

12 GEORGE V, A. 1922

The foregoing briefly outlines the genesis of the functions exercised by the Dominion Water Power Branch and indicates the basic principles which prompt it in the initiation of legislation, in the carrying on of water resources investigations and in the framing of administrative regulations.

The first legislation giving specific legal authority for dealing with water-powers under federal jurisdiction was contained in section 35 of the Dominion Lands Act passed in 1908. This section was amended in 1914 and repealed in 1919 when the Dominion Water Power Act provided independent water-power legislation. The systematic study and investigation of water-power and related subjects began in 1911, in which year this branch of the department of the Interior was established. The administration has hitherto been carried out under regulations framed in 1911, but these regulations, though sound in principle, have proved inadequate and sometimes unsuitable in detail; new regulations framed after several years of research and study of data from world-wide sources are now practically complete and, it is believed, will be found sound in principle and applicable in practice.

ORGANIZATION AND SCOPE

Until the Dominion Water Power Branch was created there was no channel available by which facts bearing upon water-power development could be collected and freely and impartially made available to the public. The continuance of the branch with its present organization and scope is designed to provide a channel for the collection and distribution of all the material information necessary to ensure that the water-power resources of the Dominion shall be utilized in a manner to best serve the public interest.

The fiscal year ending March 31, 1921, covers a period of marked expansions in the activities of the branch. A brief summary of the principal features of the year's work follows.

DOMINION POWER BOARD

The Dominion Power Board was created by Order in Council in April, 1919; Chairman, the Minister of the Interior, Vice-Chairman, the Assistant Deputy Minister of Public Works. The members are all officials of Government departments, Federal or Provincial, closely connected with the investigation, administration, production or use of the fuel-power resources of the country. The detail personnel is as follows:—

- Hon. Sir James A. Loughheed, K.C.M.G., Minister of the Interior, Chairman.
- Mr. Arthur St. Laurent, Assistant Deputy Minister, Department of Public Works, Vice-Chairman.
- Mr. H. G. Acres, Chief Hydraulic Engineer, Hydro-Electric Power Commission of Ontario.
- Mr. Arthur Amos, Chief Engineer of the Hydraulic Service of the Province of Quebec.
- Mr. W. A. Bowden, Chief Engineer, Department of Railways and Canals.
- Dr. D. B. Dowling, Geologist, Mines Department.
- Mr. J. B. Challies, Director and Chief Engineer of Dominion Water Power Branch, Department of the Interior (Secretary).
- Mr. B. H. Fraser, Chief Engineer, Marine Department.
- Mr. B. F. Haanel, Chief Engineer, Fuel Testing Division, Mines Department.
- Mr. O. Higman, Chief Electrical Engineer, Department of Trade and Commerce.
- Col. C. N. Monserrat, Consulting Engineer, Department of Railways and Canals.
- Mr. John Murphy, Electrical Engineer, Board of Railway Commissioners of Canada,
- Mr. W. J. Stewart, Consulting Engineer, Department of External Affairs.

SESSIONAL PAPER No. 25

The board was organized as an engineering body for the study and reporting upon of the fuel-power problems of Canada, and for the advising of the Dominion Government in connection with such technical matters as might be referred to the board from time to time. In accordance therewith it has made reports during the year on various questions, such as the export of electrical energy, the refund claim of the Hydro-Electric Power Commission of Ontario, and the deep-water canalization and power development of the St. Lawrence river.

In addition to the above the board has been kept closely informed on all proposals affecting the present or future status of international waters, more especially the question of diversions from the Great Lakes and the Niagara and St. Lawrence rivers. Besides this the work of collecting and collating all available data on the hydraulics of the St. Lawrence river has been continued throughout the year, a compilation that when completed will be of the greatest value in connection with the consideration and solution of the St. Lawrence problem.

LAKE OF THE WOODS CONTROL BOARD

The Lake of the Woods Control Board, composed of the following Dominion and Provincial representatives: W. J. Stewart, Chief Hydrographer of the Naval Service; J. B. Challies, Director and Chief Engineer of Water Power; H. G. Aeres, Hydraulic Engineer of the Hydro-Electric Power Commission of Ontario; and L. V. Rorke, Director of Surveys, Department of Lands and Forests of Ontario, has by virtue of an Order in Council dated January 21, 1919, continued its duties in the regulation of the levels and outflow of lake of the Woods.

The arrangements initiated by the Dominion Water Power Branch for the gathering of hydrological data in the watershed have proved invaluable, as the board is now deriving the benefit from comprehensive basic records extending over a period of several years. This has to a great extent been responsible for the results secured during the past year when lake elevation was held within a range of less than one foot, and at the same time full provision was made for coping with high spring inflow and also for ensuring the needs of power developments on the Winnipeg river.

From July to March, exceptionally low runoff conditions were encountered, but through prompt action in conserving the outflow practically no draught on storage was found necessary.

To ensure permanent status to the board and its functions, concurrent legislation was introduced in the Parliaments of Canada and Ontario. This legislation has been passed by the Dominion but action in the Ontario House is still pending.

WATER-POWER REGULATIONS AND LEGAL RESEARCH

The study of water-power legislation and administration in all countries which have given serious attention to this subject has been continued as in the past few years and the services of a technical translator have been fully occupied in translating the water-power laws of Europe. The work has now reached the stage of presenting in English in a uniform manner the basic laws relating to water rights in general and those in particular by means of which water-power is used, which have been developed through the various legal systems of the civilized world. These laws are now available for comparative study and afford a large and fruitful field for further research.

Many of the regulations dependent upon these laws have also been collected and where necessary translated, but much more remains to be done in this direction as well as in the collection of examples of concessions and licenses under the provisions of which water-power is actually being developed.

12 GEORGE V, A. 1922

The new regulations under the Dominion Water Power Act, the field covered by which was briefly described in the last annual report of this branch, have been further revised and amended in the light of more recent investigations and are now substantially complete with the exception of a few important matters such as the amount of the rentals to be paid and the principals on which they are to be based, also the compensation which should be allowed when the license is terminated with or without the consent of the licensee or expires without having been renewed.

BRITISH COLUMBIA WATER-LANDS REGULATIONS

In the Railway Belt of British Columbia, the waters and water-powers, although they belong to the Dominion, are administered by the provincial authorities (except those within the Dominion parks) under their Water Acts, and in order to enable those who have been granted water privileges by the province to have access to the Dominion lands which they require to use or occupy in the exercise of their water rights, the British Columbia Water-Lands Regulations were adopted by Dominion Order in Council in June, 1918.

The general principles underlying these regulations are, that application for a water privilege and application for the land required in connection with it should be made at the same time, so that during the interval which must necessarily elapse before the water license can be issued by the province, the land which will be required by the applicant in carrying out his works may not be disposed of in such a way as to prejudice his prospective rights, and, after the water license has been issued, to grant the licensee only such rights of access and occupation as are necessary to him, thus making the land permit complementary to the water license.

The Water Rights Branch of the Provincial Government gives every assistance in carrying out the regulations and supplies full information regarding all water privileges applied for or granted which affect Dominion interests.

Due to this co-operation satisfactory progress is now being made with the large number of cases which could not be dealt with until the regulations had come into force, as well as with new applications.

WATER RESOURCES INVENTORY

The systematic analysis of the water resources of the Dominion has proceeded throughout the year in accordance with the principles of the inventory. In co-operation with the officers of the Hydro-Electric Power Commission of Ontario an analysis of the undeveloped water-power resources of Ontario has been carried well towards completion. A similar analysis has been completed in British Columbia in co-operation with the Water Rights Branch of the Provincial Government. In the other provinces similar work is systematically proceeding and at the present time a considerable proportion of water-power resources data of the Dominion is available in standardized and usable form for whatever purpose required. A continuous effort is being made to keep these data authentic and up-to-date.

The fact that various Federal and Provincial departments have adopted the system has greatly facilitated the interchange of water resources information. This is a feature, the value of which will be appreciated more and more as the principles of the system are more widely adopted.

It may be mentioned that after thorough investigation by a specially appointed sub-committee in Great Britain, the principles of the system have been recommended to the Water Power Resources Committee of the Imperial Board of Trade for adoption for the compilation and recording of the water and power resources data of the United Kingdom.

SESSIONAL PAPER No. 25

WATER-POWER RESOURCES OF CANADA

Careful computation has been made of Canada's water-power resources. While these have been exhaustively analyzed in so far as the information available will permit, it should be kept in mind that only very meagre data are to hand for many districts and for many rivers.

The figures given hereunder are based upon rapids, falls and power sites of which the actual existent drop or the head possible of concentration, is definitely known or at least well established. Innumerable rapids and falls of greater or lesser power capacity are scattered on rivers and streams from coast to coast which are not as yet recorded, and which will only become available for tabulation as more detailed survey work is undertaken and completed. This is particularly true in the more unexplored northern districts. Nor is any consideration given to the power concentrations which are feasible on rivers and streams of gradual gradient, where economic heads may be created by the construction of power dams, excepting only at such points as definite studies have been carried out and the results made matters of record.

In brief, the figures hereunder are based on definite rapids, falls and power sites, and may be said to represent the minimum water-power possibilities of the Dominion.

The power estimates have been calculated on the basis of twenty-four-hour-power at eighty per cent efficiency, on the basis of "Ordinary minimum flow," and "Estimated flow for maximum development." The "Ordinary minimum flow" is based on the averages of the minimum flow for the lowest two consecutive seven-day periods in each year, over the period for which records are available. The "Estimated flow for maximum development" is based upon the continuous power indicated by the flow of the stream for six months in the year. The actual method to determine this flow is to arrange the months of each year according to the day of the lowest flow in each. The lowest of the six high months is taken as the basic month. The average flow of the lowest seven consecutive days in this month determines the maximum for that year. The average of such maximum figures for all years in the period for which data are available is the estimated maximum used in the calculation.

This estimated maximum development is based upon the assumption that it is good commercial practice to develop wheel installation up to an amount the continuance of which can be assured during six months of the year, on the assumption that the deficiency in power during the remainder of the year can be profitably divided by the installation of fuel power plants as auxiliaries. The correctness or otherwise of this assumption for any particular site can only be definitely settled by the careful consideration of all circumstances and conditions pertinent to its development. The method, however, enables us to make a fairly satisfactory overall estimate of the maximum hydraulic power available, as distinctive from the estimated ordinary minimum power available.

The recorded power available throughout the Dominion under conditions of ordinary minimum flow and within the limitations set out in the foregoing, is 18,255,000 horse-power. The water-power available under estimated flow for maximum development, i.e., dependable for at least six months of the year is 32,076,000 horse-power.

There are installed throughout the Dominion water-wheels and turbines to the extent of 2,471,000 horse-power. However, it would not be correct to place this figure in direct comparison with the minimum or maximum available power figures quoted above and therefrom deduce the percentage of available water-power resources developed to date. An allowance must be made for the average ratio between the water-wheels installed and the power available.

An analysis of the water-power plants scattered from coast to coast, concerning which complete information is available as to turbine installation and satisfactory

12 GEORGE V, A. 1922

information as to stream flow, gives an average machine installation 30 per cent greater than the six-month flow maximum power. Applying this, the figures quoted above therefore indicate that the at present recorded water-power resources of the Dominion will permit of a turbine installation of 41,700,000 horse-power. In other words, the present turbine installation represents only 5.9 per cent of the present recorded water-power resources.

In spite of the outstanding facts that financial and commercial conditions are still far from normal and that costs of construction are almost prohibitive for all but absolutely necessary undertakings, there has been during the past year, and is now, marked activity in hydro-power construction. This has resulted from a variety of causes, principal among which is the lack of native coal in the central industrial district and the fortunate location of economic water-power sites to industrial centres.

The total hydro-power development installed during the past year or now under construction represents approximately 560,000 horse-power of installed capacity. This figure includes only the initial installation of plants under construction, not their ultimate designed capacity. It is evidence of the manner in which the water-power resources of the Dominion are being put to effective and productive use.

It will be profitable to consider the history of water-power utilization in Canada during the past few years in conjunction with the present activity with a view to making some reasonable forecast of its probable future growth. Should the rate of water-wheel installation during the past fifteen years be maintained, there will be installed in 1925, 3,360,000 horse-power; in 1930, 4,110,000 horse-power; in 1935, 4,860,000 horse-power; and in 1940, 5,600,000 horse-power. In view of the increasing appreciation of the advantages of hydro-power combined with the fortunate location of ample supplies within easy transmission distance of practically every great industrial centre throughout the Dominion, there is every reason to anticipate that the rate of growth in utilization will be accelerated rather than retarded. Reference to the foregoing totals of water-power available will indicate that this anticipated increase in utilization will not seriously reduce the total reserves. Canada possesses sufficient reserves of water-power to meet all anticipated demands for many years to come.

In order to ensure the most beneficial utilization of these reserves and to provide intelligent guidance for their development, two essentials are required:—

First.—An accurate knowledge of the location, capacity and the engineering and economic possibilities of development of the water-powers throughout the Dominion, together with their relationship to other natural resources of mine and forest, to industrial centres and opportunities, to transportation system—rail and navigation, to coal and fuel supplies, to irrigation, drainage and reclamation projects, to alternative sources of power and to market for and uses of power in general.

Second.—A sound governmental administration policy designed to protect the public from inadvisable and ill-designed power schemes and to provide for reasonable regulation and revision of rates and rentals, and at the same time to ensure satisfactory guarantees for the encouragement of legitimate investment in hydro-power enterprises.

True conservation of our water-power resources which are inexhaustible through use lies, not in withholding them from development, but in their efficient utilization in the public interest, for the economic exploitation of our other natural resources, and for the conservation of our exhaustible fuel supplies.

The water-power now developed in Canada represents an investment of \$475,000,000. In 1940, should the rate of growth in installation during the past fifteen

SESSIONAL PAPER No. 25

years be continued, this investment will have grown to over \$1,000,000,000. The present development represents an annual equivalent of 18,500,000 tons of coal which, valued at \$8 per ton, represents \$148,000,000. In the year 1940 these annual figures will, with the foregoing assumption, have become 42,000,000 tons and \$336,000,000. These figures are striking evidence of the outstanding importance and necessity of an intelligent administrative policy governing the development of our water-power resources.

DOMINION HYDROMETRIC SURVEY

By a readjustment of the responsibilities of the Dominion Water Power Branch and the Reclamation Service, the hydrometric surveys of Alberta and Saskatchewan were by an Order in Council, dated July 19, 1920, transferred to the Dominion Water Power Branch. This has resulted in a consolidation of the stream measurement work of the department and the formation of a Dominion Hydrometric Survey to cover all Canada.

This additional work has increased the scope of the branch activities and has not only permitted of maximum efficiency in both administration and field operations but has created one central agency for the compilation and dissemination of stream flow data.

During the early portion of the past year, runoff throughout Canada was of normal amount, but as a result of deficient precipitation in later summer and autumn the runoff in the Prairie Provinces and in Ontario diminished rapidly and in several localities gave rise to an acute power shortage.

Stream measurement work in British Columbia was carried on under the direction of Mr. R. G. Swan, District Chief Engineer, at Vancouver, in the closest co-operation with the Water Rights Branch of the Provincial Government. At the request of the latter, 40 additional stations necessary to provincial irrigation projects were established in the Kamloops and Kootenay districts. As an assistance to the Department of Indian Affairs in the investigation of water rights on Indian reserves, necessary stations were maintained. In all a total of 183 stream measurement stations were in regular operation while miscellaneous measurements were secured at 63 stations.

In Alberta and Saskatchewan, stream measurement work has been carried on under the direction of A. L. Ford, District Chief Engineer at Calgary. The closest co-operation has been maintained with the officials of the Reclamation Service, under whom the work was previously and ably administered. During the year 308 regular gauging stations and 61 miscellaneous gauging stations were maintained. In addition the annual flood prediction survey was made in the Bow River watershed and a rating made of the Calgary power plant at Kananaskis.

Under the direction of C. H. Attwood, District Chief Engineer at Winnipeg, the work in Manitoba has been carried on as in the previous years. Additional to this has been the work in Ontario to the west of lake Nipigon, which for economical operation can best be handled from the Winnipeg office. During the winter invaluable field investigations were made of runoff and ice conditions on the Nelson river at Whitemud falls. A detailed investigation was also made of Lac Seul supply factors and of the storage range necessary to regulation. Regular gauging stations maintained throughout the year numbered 72, while miscellaneous stations numbered 52.

In Ontario stream measurement work has been carried on under the direction of S. S. Scovil, District Chief Engineer at Ottawa, in close co-operation with the Hydro-Electric Power Commission of Ontario and also with many private corporations interested in various phases of power development. To meet the requirements of prospective developments, field operations have been extended to include the more important rivers draining into Hudson bay, and stations in regular operation now total 60.

12 GEORGE V, A. 1922

In New Brunswick, Nova Scotia, and Prince Edward Island, the hydrometric surveys have been continued as in the previous year under the direction of K. H. Smith, the District Chief Engineer at Halifax. In each province the fullest measure of co-operation has been maintained with the provincial authorities. The total number of regular stations in operation was 45, while miscellaneous records were secured at various other locations.

DOMINION WATER POWER AND STORAGE SURVEYS

Power and storage investigations were carried out in various parts of the Dominion by the department during the past year. These activities were for the most part confined to the more active prospective developments. Office studies with regard to the analysis of water-power possibilities throughout the Dominion were also continued throughout the year.

In the Yukon Territory an investigation of the power possibilities of the Mayo district was carried out, embracing Mayo river, Janet creek and Fraser falls on the Stewart river. An adequate supply of economic power is essential to the development of the extensive mineral resources of the district. The investigations made would indicate ample power resources being available.

In British Columbia in conjunction with the collection of fundamental stream flow data, an extensive analysis of the water-power resources of the province has been actively continued in co-operation with the Provincial Water Rights Branch and in accordance with the standard principles of the **Water Resources Inventory**.

In Alberta a detailed investigation was made of the lower fifteen miles of the Kananaskis river to ascertain the amount of storage that might be impounded for the purpose of increasing the flow in the power reach of the Bow river over the period of low flow conditions. At the Bow Falls power site on the Bow river at Banff which had been previously investigated, additional surveys of the left bank were made during the year to provide for alternative designs and estimates. Inspections were also made of the power possibilities of the Raven river in section 22, township 25, range 7, west of the 5th meridian, and the Sturgeon river in sections 31 and 32, township 55, range 23, west of the 4th meridian.

In Saskatchewan an inspection was made of a proposed power site on the Assiniboine river, near Fort Pelly, to determine the feasibility of developing hydro-electric power for transmission to and use in Yorkton and other nearby towns.

In Manitoba an investigation was made of the possibility of developing power for small saw-mill purposes on the Little Bull Head creek, a stream flowing into lake Winnipeg from the west. A reconnaissance investigation was also made of the power possibilities of the Red Deer river between Red Deer lake and lake Winnipegosis to determine the feasibility of developing power for the operation of a pulp and paper mill.

In Ontario a reconnaissance power survey was made of the lower part of the Steel river between Mountain lake and lake Superior, and also of the lower part of the Pic river. A study was made from the existing data of the inflow and outflow of Lac Seul on the English river to determine the regulated outflow available from the lake if properly controlled and regulated by a dam built a short distance below the lake at Ear falls. The comprehensive analysis of the developed and undeveloped water-power and storage resources of the province was actively continued in co-operation with the **Hydro-Electric Power Commission of Ontario**.

In Quebec a systematic analysis of the water-power resources, developed and undeveloped, was continued, based upon the extensive investigatory work carried on by the Quebec Streams Commission and upon other existing sources of reference, both Federal and Provincial.

In New Brunswick general power and storage surveys were carried out during the year on the Miramichi and Shediac rivers. In addition, detailed contour surveys

SESSIONAL PAPER No. 25

were made of the storage basins and power sites on the Lepreau and Musquash rivers in co-operation with the New Brunswick Electric Power Commission who desired accurate information for the design of their developments on these rivers.

In Nova Scotia general power and storage investigations were carried out on the Ship Harbour river, Tangier river, Musquodoboit river, Salmon river—Port Dufferin, Archibald brook, Isaacs Harbour river, Metegan river, Tusket river, Jordan river, Tidney brook, Economy river, Jeffer's brook, Grosses Coques brook, McLellan lake stream, and Avon river. In addition detail contour surveys were carried on in co-operation with the Nova Scotia Power Commission in connection with projected developments on East river, Sheet harbour and Bear river. The commission was also assisted in the location of their transmission line from St. Margaret bay to Halifax. Small power sites were also investigated and reported on at Parks falls, Pietou county, Nappan river, Kennington Cove brook, river Tillard and Eel lake brook, Grand Manan.

In Prince Edward Island power and storage surveys were deferred until the stream measurement work had been brought well under way.

DOMINION LAND SURVEYS

Dominion land surveys of overflowed lands as they affect the administration of water-power were carried on throughout the year under the direction of Mr. T. H. Dunn, D.L.S.

The season of 1920 was spent in completing the survey of the lower Pinawa channel, commenced in 1919, to its outlet in Lac du Bonnet and making a survey of the south and east shores of Lac du Bonnet. The survey of the lake was completed from the east boundary of section 12, township 17, range 12, E.P.M., south and west around the east and south shores of the lake to the north boundary of section 35, township 15, range 11, E.P.M., and including both sides of Bird river as far as the first fall.

The boundary of the area to be reserved around Lac du Bonnet for flooding purposes is being located as near the 830 contour as is consistent with the posting of the traverse corners and the consequent necessity of making these corners as few in number as possible.

During the season 56 miles of chained traverse and 59 miles of section line were run, making a total of 115 miles. This involved the planting of 500 standard and 40 short standard posts, or a total of 540 posts. Of this number 84 were placed at section corners with pits and mounds and 456 were placed at traverse corners. Where traverse corners coincide with section corners the posts are not marked with the traverse number.

INVESTIGATION INTO THE UTILIZATION OF OFF-PEAK CENTRAL STATION POWER

The investigatory work which has been under way during the past year looking to the increased industrial use of off-peak central station power has been productive of results of definite value. Considerable success has been achieved in the development of an electrolytic cell which it is considered will possess marked advantages in the industrial field. Further experimental work is necessary to confirm the preliminary studies in this connection. Other lines of study are receiving continuous attention. Over ninety-one per cent of the installed central station primary power in Canada is water-power. Every step taken towards the end of bettering the load factor of this central station power means a more efficient utilization of our water-power resources. The lines of study under way have this end in view.

PUBLICATIONS

Annual Reports, Water Resources Papers, which embody the results of investigations of the various engineers of the branch, and special pamphlets and bulletins relating to water-power are prepared for distribution to the public.

The following reports, etc., were prepared and published during the year:—

1. Annual Reports of the Branch for the fiscal years ending March 31, 1918, and March 31, 1919, combined in one volume.
2. Report on Water Powers of the Prairie Provinces. This is part nine of the above Annual Report in pamphlet form.
3. Water Resources Paper No. 25—Report of the hydrometric survey work in British Columbia for the climatic year 1918-19. Continues the hydrometric work to September 30, 1919.
4. Water Resources Paper No. 26—Report of the hydrometric survey work in Manitoba for the climatic year 1918-19. Continues the hydrometric work to September 30, 1919.

Report now in Press

1. Annual Report of the Branch for the fiscal year ending March 31, 1920.

Reports in course of preparation

1. Water Resources Paper No. 28—Report of the hydrometric survey work in Ontario for the climatic year ending September 30, 1920.
2. Water Resources Paper No. 29—Report of the hydrometric survey work in the Maritime Provinces for the climatic year ending September 30, 1920.
3. Water Resources Paper No. 30—Report of the hydrometric survey work in British Columbia for the climatic year 1919-20. Continues the hydrometric work to September 30, 1920.
4. Water Resources Paper No. 31—Report of the hydrometric survey work in Alberta, Saskatchewan and Manitoba for the climatic year 1919-20. Continues the hydrometric work to September 30, 1920.

REPORT

OF THE

TOPOGRAPHICAL SURVEYS BRANCH

PART I—FIELD WORK

The amount appropriated by Parliament for the survey of Dominion lands was \$700,000.

Forty-five survey parties were engaged in field work, being three less than the number employed during the previous season. Of this number, ten were employed in Manitoba, eleven in Saskatchewan, fifteen in Alberta, three in the railway belt of British Columbia and six worked partly in one province and partly in another.

The survey of governing lines, which had been sufficiently advanced beyond settlement to permit of the work being suspended during the past two seasons, was resumed in order to provide control for surveys of mineral claims and other scattered surveys in northern Manitoba. One party, however, was sufficient to perform the surveys required.

The acute demand for lands which has resulted from the co-operative efforts of the Soldier Settlement Board and this department to assist intending settlers and soldier settlers in particular in selecting suitable lands for homesteads, necessitated the employment of nine parties on subdivision in Manitoba, Saskatchewan and Alberta as compared with eight last year. Three parties also were required for subdivision work in the railway belt and one party was engaged exclusively on settlement surveys along the Churchill river in northern Saskatchewan.

With the object of rendering more land available for immediate settlement, several surveyors were employed for a short period in the spring, on the work of clearing lands by controlled fires in Porcupine forest reserve and the Peace River district; this method had been tried the previous spring on a small scale and proved to be entirely satisfactory.

The investigation and location of suitable lands for the purpose of directing settlement to areas that will ensure success to the prospective homesteader was continued, four parties being again employed on these surveys.

During the previous season four parties were employed investigating and collecting information for mapping purposes, to supplement that already in the possession of the department, for the purpose of revising the sectional maps issued by this branch and transforming them into topographical maps. Five parties were engaged on the continuation of this work.

BASE LINE SURVEYS

The survey of base lines and meridians, usually a feature of the yearly survey programme, has for the past two seasons been temporarily suspended due to the fact that the progress of settlement has not warranted sufficient new subdivision and other surveys to necessitate the further extension of these governing lines. Surveys of this nature were resumed, however, this year, but a single party was sufficient to complete the work required.

12 GEORGE V, A. 1922

Party No. 1—Surveys North of The Pas, Manitoba

Renewed activity in the mineral district between Amisk and Wekusko lakes, as a result of which many small surveys had been made and requests for scattered subdivision surveys received, rendered it imperative that proper control be provided for these and any other surveys which may be required in the district. The work of establishing governing lines in the vicinity was assigned to this party. The eighteenth base line was produced from the Second meridian westerly across two, and easterly across fourteen ranges, and eleven miles of the boundary between Manitoba and Saskatchewan were surveyed.

Leveller—

A. I. Ponton.

Party—

Seventeen employees.

The establishment of these lines included an exploration of the country for twelve miles on both sides of the lines. In the exploratory work a slight change was made from the usual method employed on base line surveys. Information more accurate and of greater value for mapping purposes was obtained by the introduction of a system of pacing and range-finder traverse, the pacing to measure distances on land and an artillery range-finder with a base of one metre, in conjunction with a prismatic compass, to ascertain the shore-lines of lakes.

Operations in the field were begun on May 31 and closed on October 2, and in addition to the survey of 103 miles of line, 96 miles of levels were run and 624 miles of traverse were completed. Observations for magnetic declination were taken at frequent intervals.

SUBDIVISION SURVEYS

The townships subdivided in Manitoba, Saskatchewan and Alberta were selected in areas close to existing settlement and near to lines of transportation. Surveys in any township were confined to lands which were suitable for settlement, the survey of swamps and muskegs being postponed until such time as they are rendered suitable by drainage. The recent impetus given to settlement is still manifest in the large number of quarter-sections being disposed of and in the number of squatters found in occupation of lands at the time of survey.

In addition to laying out and marking the section boundaries, efforts were made by the survey parties to assist intending settlers by obtaining all available information concerning the purposes for which the lands surveyed were best fitted, the nature and extent of forest cover, climatic conditions in the district, and any other information which would aid development.

Besides the regular subdivision work, all the parties employed, with one exception, were equipped to obtain levelling information in the townships in which they operated.

Party No. 1—Surveys along the Hudson Bay Railway

This party was organized at The Pas, Man., and its work consisted of the subdivision of lands for a mile or two on either side of a portion of the Hudson Bay railway. Field operations were begun on May 20 in tp. 73-1-Pr., and were extended northeasterly along the railway to tp. 77-3-E., comprising the subdivision of 78,370 acres in nine townships. This work occupied the time of the party until November 17. It was then

A. E. Glover, D.L.S., in charge.

Assistant—

G. S. Bayly, D.L.S.

Party—

Ten employees.

SESSIONAL PAPER No. 25a

possible to reduce the number of employees by seven and still have a sufficient number to complete the work of traversing the lakes affecting subdivision in these townships. Most of the lakes presented difficulties for summer traversing which could be more easily overcome after the ice had formed. The traverse was completed and survey operations closed on December 2.

Party No. 2—Surveys in Riding Mountain Forest Reserve

From June 1 to June 11 this party was engaged in the vicinity of Kinistino, Sask., in establishing corners in connection with

PERSONNEL:

G. H. Blanchet, D.L.S., in charge.

Assistant—

A. Fawcett, D.L.S.

Leveller—

Geo. Ross.

Party—

Eleven employees.

the construction of drainage ditches by the Reclamation Service of this department. The next work undertaken consisted of retracement surveys in the neighbourhood of Warman, Sask. Five days were necessary to complete these surveys.

The party then moved to Riding Mountain forest reserve, where the greater and most important part of the season's work was located. This consisted of the subdivision for the Soldier Settlement Board of a major portion of a group of four townships which, after investigation as to their suitability for settlement, had been withdrawn from the forest reserve. In connection with the subdivision work one hundred and sixty miles of levels were run.

In addition to the regular survey work, information regarding the value of different sections of this area for farming purposes was secured by the party. Close observation was made of climatic conditions, and the various kinds of soils occurring throughout these townships were classified from the results of the analysis of soil samples taken from different parts of the area.

The season's operations were concluded on November 30.

Party No. 3—Surveys North of Prince Albert, Saskatchewan

The complete subdivision of one township and the partial subdivision of seven others constituted the work of this party.

PERSONNEL:

J. Hardouin, D.L.S., in charge.

Assistants—

G. W. Bannister, D.L.S.
A. O. Gammon.

Leveller—

G. Palsen.

Party—

Ten employees.

These surveys were necessary as a result of the impetus given to settlement north of Prince Albert by the construction of a railway into the Paddockwood district.

The party was organized at Prince Albert and the location of the first survey camp was reached by trail via Paddockwood. Fire and high water had destroyed the bridges over two creeks on the route followed and these had to be reconstructed before the party could proceed. A considerable portion of the lands selected for subdivision is included in timber berths which have been cancelled. No land was surveyed which was considered unsuitable for settlement.

From the commencement of operations in the field on May 13 until their close on November 15 two hundred and five miles of line were surveyed, sixty miles of traverse completed, and two hundred and forty-four miles of levels run. A total area of 61,510 acres was subdivided.

12 GEORGE V, A. 1922

Party No. 4—Surveys Southeast of Spirit River, Alberta

The townships in which subdivision surveys were made by this party are located along or close to the Sixth meridian at no great distance from the towns of Spirit River and Grande Prairie. Due to bad roads, some difficulty was experienced by the party in reaching the work. Survey operations were begun on June 2 and continued until November 6, when the party was finally disbanded.

Leveller—

E. B. Purdy.

Party—

Twelve employees.

One whole township was subdivided and new surveys were made or subdivision completed in four other townships. The work of the party also included the location for the benefit of settlers in the Bad Heart district of a road to the railway through the proposed Birch Hills forest reserve. This necessitated the survey of two miles of road diversions; the main work consisted of the survey of one hundred and fifty miles of section lines and four miles of traverse. In connection with the subdivision work, which covered 48,260 acres, one hundred and forty-six miles of levels were run.

Parties Nos. 5 and 6—Surveys Northwest of Grande Prairie, Alberta

These two parties were organized at Edmonton and Grande Prairie for the purpose of subdividing land suitable for settlement in several townships adjoining the boundary between Alberta and British Columbia north and south of the nineteenth base line. Transportation to the location of the survey work was attended with difficulties both by rail and trail, the result of heavy snowfalls during the winter and a late and rainy spring. These conditions were also responsible for a late start on actual survey operations. The party working in the southerly townships commenced its surveys on June 3 and the other party on June 22.

Parties—

Twenty-five employees.

Before undertaking subdivision it was necessary to produce the nineteenth base line westerly across ranges 13 and 14 to the boundary between Alberta and British Columbia. The two parties completely subdivided three townships and partially surveyed ten others, covering in all 117,250 acres. Three hundred and fifty-six miles of levels were also run. Some excellent agricultural land in one township was under lease as a sheep ranch which prevented its being subdivided.

Several days were lost on account of inclement weather; operations were closed towards the end of October.

Party No. 7—Travelling Party in the Peace River District

To this party was assigned the work of subdividing scattered areas of land which lay in single townships or partly in one township and partly in an adjacent township, but which were too far distant from the locations of other parties working in this district to permit of their survey being economically done by any of these parties. It was known, however, that most of this land was suitable for immediate settlement and on this account early subdivision was advisable.

Travelling north from Spirit River the party

SESSIONAL PAPER No. 25a

reached its first work and operations were begun on May 24 near the town of Vanrenna. Half a township was subdivided after which the party moved farther north and surveyed a portion of a township which lay outside the proposed Clear Hills forest reserve. Proceeding northwesterly to the Clear Prairie district the greater part of one township was surveyed.

Almost a month was required to move to the location of the next work which lay north of Grouard and on September 29 the subdivision of the lands suitable for settlement in two townships was begun.

Field work was completed on November 14 and the party disbanded.

The scattered nature of the work performed by this party, necessitating as it did frequent moves over long distances, resulted in the loss of much time which under usual conditions would have been devoted to actual survey work. Added to this the party experienced all the difficulties of transportation, the result of the flooded condition of the country, encountered by the other survey parties operating in the Peace River district this season.

As a result of the season's operations 64,900 acres of land were made available for settlement. In connection with the subdivision work, levels were run over one hundred and ninety-eight miles of line.

Party No. 8—Surveys near Fort Vermilion, Alberta

From Edmonton, where organization took place, this party proceeded by rail to Peace River and thence by boat to Fort Vermilion.

Work was begun in a township to the south of Fort Vermilion on June 5, the northerly two-thirds being subdivided. From here the party moved north of the settlement and completed the subdivision of the northerly third of two adjacent townships and of nearly the whole of an adjoining township. In all one hundred and ninety-five miles of line were run and in addition twenty-one miles of traverse were completed. The necessary levelling, covering one hundred and ninety-five miles of line, was done and forty observations for magnetic declination were taken. A total area of 58,400 acres was surveyed by the party.

A fairly satisfactory survey season was concluded on November 4 and on the following day, after joining another survey party working in the same district, a start was made by the overland route on the long journey back to Peace River. Here the party was disbanded on November 22.

Party No. 9—Surveys East of Fort Vermilion, Alberta

The townships in which subdivision surveys were carried on by this party are situated along Peace river in ranges 7 and 8, west of the Fifth meridian.

PERSONNEL:

H. Carmichael.

Party—

Twelve employees.

The party was organized at Edmonton and proceeded via Peace River to the work. Advantage was taken of the use of a scow to transport some of the party from Peace River to the location of the surveys, the regular steamer plying the river being also patronized. Partial subdivision was made in four townships involving the survey of one hundred and eighty-one miles of

12 GEORGE V, A. 1922

section line and forty-four miles of traverse. One hundred and ninety-three observations for magnetic declination were taken during the season and one hundred and sixty-three miles of levels were run.

Operations extended from May 20 to October 30 during which thirteen days were lost on account of rain. An area of 54,350 acres was surveyed during the season.

The return journey to Peace River via Keg River and Notikewin settlements was made in company with another party which had been engaged on subdivision work near Fort Vermilion. The long overland trip was completed on November 22 and the party paid off.

RAILWAY BELT SURVEYS

Owing to the rocky and mountainous nature of the country within the railway belt of British Columbia subdivision cannot, as a rule, be extended over full townships. Only those portions of townships which have actually been applied for or which are likely to be required for settlement in the near future are selected for survey.

The policy of disposing of lands by legal subdivisions has been adopted by this department in districts where land is very valuable and an area in one township was surveyed this season into half legal subdivisions for soldier settlement purposes. The definition of the boundaries of these small parcels involves the running of the interior boundaries of quarter-sections and legal subdivisions and also the retracement of old surveys for the purpose of establishing legal subdivision corners where this has not been done in the original survey.

The necessary surveys in the belt were made by two parties working throughout the whole season and one party which was engaged on miscellaneous surveys for short periods amounting in all to about one month.

Party No. 1—Surveys in New Westminster and Ashcroft Districts

On March 11 this party commenced the subdivision into half legal subdivisions

(part time).

G. S. Walker.

Party—

Seven employees.

of five quarter-sections in township 2, west of the Coast meridian. This work, which included the survey of the right of way for a logging railway through the subdivision, was urgently required by the Soldier Settlement Board and upon its completion the party was disbanded until May 21 when the regular season's work was entered upon.

Further surveys in the interest of soldier settlers, including the necessary traverse, were completed in township 16, east of the Coast meridian after which the party moved to Agassiz and began the investigation and traverse of a number of islands situated in Fraser river in that vicinity. Excessive rains and high water in the river hampered operations on this work. A portion of the north limit of the railway belt between Harrison lake and Chehalis river was next defined. The party then undertook subdivision surveys entailing the running of four miles of line and some traverse in the Nahatlatch valley. It was next engaged upon subdivision northeast of Ashcroft and the investigation of a mill site at the mouth of Nahatlatch river. The season's work was concluded with the traverse of a portion of Cornwall creek in tp. 20-25-6.

Operations were closed on September 30.

SESSIONAL PAPER No. 25a

Party No. 2—Miscellaneous Surveys in New Westminster District

This party was not continuously employed throughout the season but was employed for short periods only on surveys that were urgently required, or which could not be economically executed by the regular party operating in the district.

PERSONNEL:

W. J. Johnston, D.L.S., in charge.

Assistant—

Jas. Gibbon, D.L.S.
(part time).

Party—

Seven employees.

The first work consisted of the subdivision into twenty-acre parcels of portions of two sections in township 2, west of the Coast meridian. This survey occupied the time of the party from March 9 to April 3 and was performed in co-operation with

another party working in adjacent sections in this township. The subdivision was urgent in order to permit of the occupation of the land by soldier settlers in time to commence cultivation. The two parties also co-operated on the survey of the right of way for a logging railway through the subdivision. On the completion of these surveys the party was disbanded.

Later in the season an investigation was made, at the request of the Soldier Settlement Board, of lands selected for subdivision in township 19, east of the Coast meridian and a few days were spent on the survey of lots for summer residence in tp. 5-7-7.

Party No. 3—Surveys in Kamloops District

The work of this party consisted of miscellaneous subdivision, retracement, outline and traverse surveys in several townships between ranges 8 and 20, west of the Sixth meridian.

PERSONNEL:

J. Vicars, D.L.S., in charge.

Assistant—

E. S. Fry.

Party—

Seven employees.

The fact that most of the lines surveyed lay on rough and heavily-timbered mountain-sides and the scattered nature of the work, necessitating the moving of camp at frequent intervals, rendered rapid progress impossible.

In connection with the subdivision, outline and retracement surveys, forty-eight miles of line were surveyed which included the delimitation of a portion of the south boundary of the railway belt through three ranges southeast of Kamloops. Traverse surveys, which included the stadia traverse of six small lakes and of portions of the shore of Shuswap lake, covered eleven miles. An extra mile of traverse was required to locate settlers' improvements.

Operations in the field extended from April 25 to October 22 when on account of inclement weather the party was disbanded.

STADIA SURVEYS

Of eleven parties engaged on stadia traverse ten were employed on the work of determining the present area and permanency of all bodies of water in townships which were surveyed years ago and the plans of which are being revised as this work progresses. In addition to the examination of water areas the condition of the monuments in the townships was noted, small surveys were completed and the necessity of resurveys of whole or partial townships reported upon. Where it was possible to do so without interfering with the progress of the stadia work, information was collected regarding buildings, roads, pack-trails, railways, and telegraph and telephone lines in the areas covered. This information will be used in the compilation of sectional maps. As these parties worked in settled districts motor cars were very generally used for transportation purposes.

Stadia surveys were also conducted by one party in northern Manitoba where investigations in the district north of Thicket Portage, on the Hudson Bay railway,

indicate the probable occurrence of minerals of promising value from a mining standpoint. The main object of the work was the establishment of survey monuments at frequent intervals to serve as reference points for tying in geological surveys, surveys of mining claims or other lots and all future surveys but the work was also of an exploratory nature. Transportation was carried on by means of canoes.

Party No. 1—Surveys in Northern Manitoba

Beginning at a point where the eighteenth base line intersects the east shore of

PERSONNEL:

B. H. Segré, D.L.S.

Party—

Four employees.

Setting lake a line of control by stadia traverse was established following the principal lakes and connecting streams northeasterly to the east boundary of tp. 84-11-E.

The main traverse extended along the east shore of Setting lake, down Grass river, along the north and east shores of Paint lake, through Upper

Ospwagan and Ospwagan lakes and thence down Burntwood river to Split lake. It was continued along the north shore of Split lake and down Nelson river, where a tie was made to the east boundary of tp. 84-11-E. Returning to the head of Clark lake the traverse was carried southwesterly along the south shore of Split lake through Witchai lake, up Grass river, through Teal, Bald Eagle, Natawahunan and Partridge Crop lakes to the twentieth base line. A short section of Partridge Crop lake was omitted but commencing at the northeast corner of section 24, tp. 76-1-Pr., the traverse was carried through the remaining portion of Partridge Crop lake and the intervening streams and lakes, which included Wintering lake, to a station previously located on Paint lake. In addition to this main circuit the line was extended up Burntwood river from its junction with Manasan river forty miles to a point about two miles above Wuskwatim lake. Ties were made to the eighteenth, nineteenth, twentieth and twenty-first base lines, short traverses from the main circuit being necessary in some cases to effect these and other required ties to monuments on township boundaries.

Along the traversed route, monuments consisting of a short iron or wooden post referenced by a stone cairn were erected at intervals of from four to six miles. An attempt was made in the early part of the season to make an accurate traverse of one shore of the lakes encountered but it was realized that this could not be carried out and the proposed circuit completed during the season. The method then adopted was to obtain as much detail as possible by means of a range-finder although the detail in bays often had to be neglected.

Much information bearing on the natural resources of the district was collected and this was supplemented by numerous photographs depicting the general nature of the country, the forest cover, power sites, points on transportation routes, etc.

Surveys were commenced on May 24 and completed on October 18. Progress was delayed to some extent by the many portages encountered along the route.

The mileage traversed comprised seven hundred and twelve miles of shoreline of lakes and islands, four hundred and forty-six miles of river and seven and a half miles of ties and portages. Seventy-five monuments were erected along the route.

Party No. 2—Surveys North of Dauphin, Manitoba

On May 25, stadia surveys were begun by this party along the west shore of lake

Dauphin at the mouth of Valley river and were continued throughout eight townships in that vicinity until July 14. Additional help was then engaged and the subdivision of fractional tps. 36 and 37—19-Pr. was undertaken. Thirty-nine squatters with their families were found in occu-

SESSIONAL PAPER No. 25a

pation of the lands in tp. 37-19-Pr. and the location by stadia traverse of the improvements of these settlers was necessary with a view to devising a suitable scheme of settlement survey. An investigation of a portion of tp. 35-19-Pr. lying south of Pine Creek settlement was also made for the same purpose.

Upon the completion of this work stadia surveys and investigations were resumed and extended over thirty-six townships. Operations were closed on November 26.

During the survey season the party completed, in addition to the subdivision of three thousand acres and supplementary work, the traverse of forty-four lakes and three small rivers. Information regarding roads, trails and settlers' improvements in the district covered by the surveys was obtained and carefully noted and sixteen stations were occupied for magnetic observations.

Party No. 3—Surveys East of Dauphin, Manitoba

The bulk of the survey work carried out by this party consisted of stadia traverse and investigation in thirty-three townships in the vicinity of Dauphin and extending easterly to the west shore of lake Manitoba. This included the traverse of a portion of the shore of lake Dauphin and three small tributary rivers and of portions of the shores of Ebb and Flow lake and lake Manitoba. Stadia surveys were also executed in five townships south of Dauphin in the vicinity of Erickson and Angusville and to the north in tps. 29 and 30-15-Pr.

PERSONNEL:

P. J. McGarry, D.L.S., in charge

Assistant—

A. H. King, D.L.S.

Party—

Three employees.

The subdivision of a surrendered portion of Waterhen Indian reserve in townships 34, ranges 15 and 16, west of the Principal meridian, comprising eleven hundred acres, was completed.

The party also accomplished some supplementary work which included the classification of roads for mapping purposes in portions of the district, some necessary retracement surveys and the taking of magnetic observations.

Surveys were commenced on May 28 and concluded on November 27.

Party No. 4—Surveys East of Lake Manitoba

This party was organized at Winnipeg and proceeded to Oak Point, Man. The stadia traverse of the east shore of lake Manitoba was begun July 19 in tp. 18-5-Pr. and continued through five townships. The shore being soft and marshy and covered with a dense growth of reeds and rushes, progress was slow. In all, twenty-two townships in the vicinity of lake Manitoba were investigated, the party working northerly in the direction of lake St. Martin as surveys of an urgent nature were required in that district. These were completed on November 6.

PERSONNEL:

W. A. Fletcher, D.L.S., in charge.

Party—

Four employees.

Heavy rains and snow flurries during the latter part of October rendered conditions unfavourable for survey operations and transportation was hampered by bad roads. It was accordingly decided to reduce the number of employees on the party and with hired transport to proceed with some work specially required in tp. 25-5-Pr. and tp. 14-3-E. This was finished and the remainder of the party disbanded on November 18.

In addition to the work on the investigation of water areas some retracement surveys were carried out in five townships.

12 GEORGE V, A. 1922

Party No. 5—Surveys South of Weyburn, Saskatchewan

The area covered by Souris sectional map, No. 20, comprising townships 1 to 8,

PERSONNEL:

C. Rinfret, D.L.S., in charge.

Assistant—

P. E. Radley.

Party—

Three employees.

Advantage was taken of this to have the party, in conjunction with the stadia work, obtain accurate and reliable information to be used in the revision of this map. The investigation of water areas was begun on May 12 but was interrupted on May 31 to complete the revision work. It was resumed on September 4 and eighteen townships west of the area covered by Souris sheet were investigated. Operations in the field were closed on October 15.

This party completed the traverse of one hundred and sixty-three lakes and the investigation of three hundred and seventy others. Miscellaneous subdivision and retracement surveys necessitated the running of sixteen miles of section line and the establishment of eleven monuments.

Barometric levels were registered at thirty-six hundred points and forty sets of observations for magnetic declination were taken.

Party No. 6—Surveys North of Yorkton, Saskatchewan

The surveys conducted by this party were confined for the most part to a block of

P. M. H. LeBlanc, D.L.S., in charge.

Party—

Four employees.

townships lying north of township 29 and extending westerly from the Second meridian through eight ranges. A few townships west of this group were also included in the work.

In a total of fifty-nine townships investigated and reported upon two hundred and forty lakes of various sizes were traversed and Assiniboine and Whitesand rivers were surveyed through fourteen townships. Miscellaneous retracements in four townships necessitated the survey of six miles of section line and the establishment of four monuments. A cemetery site was surveyed in the southeast quarter of section 36, tp. 31-2-2.

Supplementary work consisted of the collection of information as to the condition of the monuments and the necessity for resurveys in the townships in which water areas were investigated, the classification for mapping purposes of roads and trails in the district and the taking of thirty observations for magnetic declination.

Survey operations were begun on May 17 and the party was disbanded on November 17.

Party No. 7—Surveys near Prince Albert, Saskatchewan

The greater part of the area in which stadia surveys and investigations were

PERSONNEL:

Wm. Christie, D.L.S., in charge

J. Carroll, D.L.S.

Party—

Three employees.

conducted by this party lies north of North Saskatchewan river, but a number of fractional townships south of the river were also examined. No investigations were made in those portions of townships included in Pines and Nisbet forest reserves. Field work was started on July 6.

Six fractional townships were investigated in which no water areas requiring traversing were found and in all twenty-nine townships and fractions of townships were completely investigated.

SESSIONAL PAPER No. 25a

Two hundred and nine lakes and a portion of South Saskatchewan river were traversed and many more water areas, which were not large enough to survey, were examined. Of the lakes traversed one hundred and sixty-two had not been traversed in the original surveys. These ranged in area from about seventy-five acres down to the minimum area requiring stadia survey, five acres. Eleven were fifty acres, or over, in area.

In the course of the work all roads throughout the district were classified. Fifty-five observations for magnetic declination were taken.

On December 16 field operations were closed and the party was disbanded at Prince Albert on the following day.

Party No. 8—Surveys near Battleford, Saskatchewan

The examination and necessary survey of water areas in thirty-six townships together with retracement surveys in one township constituted the greater part of the work of this party. With the exception of two isolated townships in which special investigations were required the area covered lay in the vicinity of Battleford and North Battleford. Some three hundred water areas were examined, three hundred miles of shoreline traversed and approximately seventy-five miles of section and tie lines were surveyed. Battle river was traversed for a distance of thirty-five miles from its confluence with Saskatchewan river; this work occupied the party for seventeen days.

In the townships investigated fourteen hundred miles of roads were examined and classified, and general information useful in the compilation of maps of the district was collected. Observations for magnetic declination were taken in each township.

It was found impossible to keep the party up to strength during the entire season owing to the difficulty in securing suitable assistance and at times progress was to some extent retarded.

Surveys were conducted south of Saskatchewan river from their commencement on June 7 until September 28 and north of the river from this date until operations were closed on November 25.

Party No. 9—Surveys Northeast of Lloydminster, Saskatchewan

An irregular block of townships lying north of township 53 and extending westerly from the Fourth meridian and the west boundary of Kechiwin forest reserve through nine ranges chiefly comprised the area in which this party carried on stadia work. A few isolated townships north of this block were also included. Progress was retarded during the early part of the season partly on account of the necessity of employing inexperienced help due to the scarcity of men familiar with survey work and partly on account of a period of bad weather during which operations had to be temporarily suspended.

Surveys were begun on June 1 in tp. 53-9-4 and extended to the north and east, thirty-seven townships being completely investigated and the necessary traverses made. Investigations were also carried out in portions of several other townships and retracement surveys covering two miles were made in tp. 58-9-4.

12 GEORGE V, A. 1922

Up to November 13 a full party was engaged on the work and the greater part of it was completed. On this date the services of three members of the party were dispensed with and the surveyor in charge with his assistant completed required surveys in some isolated townships. Operations in the field were closed on November 27.

Party No. 10—Surveys Southeast of Lethbridge, Alberta

The water areas in eighty-one townships in the district south of the towns of Maeleod and Lethbridge between the international boundary and the second range west of the Fifth meridian were covered by stadia surveys and investigations conducted by this party. On portions of the work progress was retarded by the hilly nature of the country and for the greater part of the season the party was one man short of the number of employees authorized owing to the difficulty in securing and retaining a suitable man.

Operations were begun on June 4 and continued until November 9, during which period three hundred and thirty-one miles of traverse were completed. This included the traverse of two hundred and four lakes and twenty-five short stretches along Belly, Waterton, and Oldman rivers.

Information for mapping purposes was collected in the eastern portion of the district as well as in nineteen townships previously investigated and in Blood and Peigan Indian reserves.

Party No. 11—Surveys near Edmonton, Alberta

A total of twenty-one townships, in the majority of which water areas were very numerous, were completely investigated by this party. Some work was also done in five other townships and in a portion of St. Albert settlement. Operations were begun on June 18 a few miles northwest of Edmonton, the general location of the area investigated being west of that city. In the northern part of township 54, ranges 27 and 28, several soldier settlers were found, who, owing to there being no trace of the monuments of the original survey on the ground, were unable to locate the boundaries of their homesteads. A form of petition for a resurvey was left for circulation among those whose lands were affected. Special investigations were made in three outlying townships, one to the north and two south of Edmonton. One of these investigations involved the retracement of a mile of section line and the correction of a corner in tp. 49-23-4.

On October 5 the party closed operations in this district; three members were paid off, and the surveyor in charge, accompanied by his assistant, proceeded to Jasper, Alberta, where the subdivision into lots of an addition to this townsite was urgently required. The necessary work involved the survey of fifty-nine lots and the establishment of seventeen lot corners of the old subdivision.

This work and the survey of a one-acre parcel on the opposite side of Athabaska river occupied the time of the party from October 12 until November 3, when operations were finally closed.

SESSIONAL PAPER No. 25a

MISCELLANEOUS SURVEYS AND RESURVEYS

Some of the early surveys of base lines and meridians, especially those made under contract prior to 1874, were not very accurately made either in direction or measurement. As these are the lines upon which all other surveys depend, it is very necessary to know how they are on the ground, and for this reason retracements of some portions of such governing lines are necessary. One party was employed on this work.

When the marks of the surveys have disappeared it is difficult for new settlers to locate their lands, and numerous applications for the re-establishment of monuments are yearly received. The policy of the department is to renew the survey lines, provided this can legally be done, after an investigation by an officer of the department has shown that it is impossible to locate the lands without a new survey. Such an investigation of a number of complaints regarding lost and obliterated monuments in a single township sometimes reveals the necessity for a resurvey of the whole or greater part of that township. Provided this condition obtains in a sufficient number of townships in one district to justify the necessary expenditure, a complete survey party, equipped as to number and transport as for original subdivision, is organized and assigned to the work. One such party was employed.

As a general rule, however, resurveys are not confined to single townships or a group of townships but are located at widely separated points and do not require much work to complete them. These include retracements in order to locate and correct errors in the original survey, the re-establishment of lost section and quarter-section corners, the renewal of monuments for important latitude observations and the alteration of small settlement surveys. To effect such surveys the employment of a large party is neither practical nor economical and they are accordingly assigned to a surveyor who, with only one helper, travels from point to point, engages his transport in the locality of his work and secures additional assistance as near as possible to the location of his surveys. Two such travelling parties were required to complete necessary surveys.

Mr. T. H. Dunn, D.L.S., of the Water Power Branch, who was engaged on surveys in connection with the development of water-power sites along the Pinawa channel of Winnipeg river, made closings on monuments of the Dominion lands system and, where necessary, surveyed section lines, made retracements and erected or restored monuments.

Mr. E. W. Hubbell, D.L.S., Chief Inspector of Surveys, supervised the work of mounding and planting standard survey posts in eight townships situated in Keg River prairie, in the lower Peace River valley. These townships were subdivided in 1918 but owing to the prevalence of gravel and large boulders the mounding could not be completed at the time of survey.

A preliminary survey was also made of Keg Prairie settlement.

Party No. 1—Retracement of Block Outlines in Southern Manitoba

Retracement surveys carried out by this party were confined to a portion of the Second meridian and portions of correction lines and a base line adjoining.

PERSONNEL:

R. B. McKay, D.L.S., in charge.

Assistant—

J. T. Fullerton, D.L.S.

Party—

Five employees.

The Second meridian was retraced through townships 11 to 24, inclusive, and all the correction lines between the second and eighth were retraced easterly from the meridian through from two to four ranges. The fourth base line was also retraced easterly from the Second meridian through three ranges.

12 GEORGE V, A. 1922

The party was organized at Regina on May 17 and commenced survey operations in the vicinity of Wawota, Saskatchewan, a few days later.

One hundred and seventy-two miles of line were retraced and offset ties were measured to four hundred and thirty-eight monuments. At only eighty-five of these monuments were iron bars or iron posts found, the remainder being obliterated, and in some cases completely lost. All measurements were made with a tape graduated in links and checked with one graduated in feet. Forty-one sets of azimuth observations were taken on the surveys.

Since the surveys lay in well settled country and the wages offered for farm labour were much higher than those allowed for survey work, difficulty was experienced in keeping the party up to strength.

Good progress was made, however, until a heavy snowfall and rough weather rendered it advisable to close operations on November 8.

Party No. 2—Resurveys in Manitoba

The greater part of the work of this party consisted of resurveys in isolated townships, but some retracement and correction surveys were also executed.

PERSONNEL:

A. L. Cumming, D.L.S., in charge.

Assistant—

J. H. Patterson, D.L.S.

Leveller—

J. A. Cameron.

Party—

Ten employees.

Operations were begun on June 26 in the district east of Poplarfield and included the complete resurvey of tp. 22-1-Pr. and the retracement of seventeen miles of line in the township to the south.

From there operations were transferred to tp. 24-12-Pr. which lies east of Shergrove. All the portion of the township not included in the Ebb and Flow Indian reserve was resurveyed and the party then moved to Cowan in tp. 35-23-Pr. The resurvey of this township was also completed and on November 26 the party was disbanded.

With the exception of five days in October, when it was necessary to temporarily suspend survey operations on account of heavy snow and rain-storms, favourable weather was experienced throughout the season.

The party completed the survey of two hundred and twenty-seven miles of line and in addition one hundred and thirty-four miles of levels were run.

Parties Nos. 3 and 4—Travelling Parties

The surveys carried out by Mr. Purser lay, with one exception, in the province of Alberta. They consisted for the most part of resurveys, retracements, corrections and investigations at widely separated points.

PERSONNEL:

R. C. Purser, D.L.S.

E. S. Martindale, D.L.S.

Party—

One engineering helper to each party.

Five weeks were spent on surveys in the vicinity of Cadomin, Alberta, in connection with application by the Cadomin Coal Company for a lease of the surface rights of certain additional

lands in that district.

Survey operations were begun on May 29 and completed on September 11. In addition to the regular work six stations were occupied with a Dover dip circle for magnetic dip and total force. Three complete sets of observations were taken at each station.

Mr. Martindale was engaged on surveys of a miscellaneous nature extending over most of the older portions of Manitoba and part of southern Saskatchewan.

Commencing on May 11 operations were conducted throughout the season at twenty-two separate locations and were not completed until January 9. The work included all the different varieties of surveys usually assigned to a party of this kind

SESSIONAL PAPER No. 25a

from the erection of mounds to complete surveys previously performed, to the more complicated resurveys involving the establishment of new monuments.

Difficulty was experienced, particularly during the harvest season, in securing local assistance on the survey work.

TOPOGRAPHICAL SURVEYS

Survey work in connection with the revision of sectional maps, which was begun in 1919, was continued. Based on the experience gained during the previous season many improvements in the method of conducting these surveys were introduced; motor cars were used exclusively for transportation purposes. Five parties were employed and, as compared with last year, much greater progress was made, eight complete sheets and a portion of another being revised. The value of the revision work is enhanced by carefully prepared and exhaustive reports on the districts examined which are furnished by the surveyors in charge. These reports cover the topography, soil, agricultural possibilities, roads, transportation, markets, settlement, rural development and natural resources.

One party was employed on further topographical surveys in Bow River and Clearwater forest reserves.

Party No. 1—Revision of the Emerson sectional map and a portion of the Dufferin sectional map, Nos. 23 and 22, respectively

A late spring and heavy rains at frequent intervals during the month of May left the roads in poor condition for travel and survey operations could not be commenced until June 4.

PERSONNEL:

G. H. Herriot, D.L.S., in charge.

Assistant—

R. D. Davidson.

Party—

Four employees.

Work was first undertaken in the area covered by the Emerson sectional map. This area comprises townships 1 to 8, ranges 1 to 11, east, and ranges 1 to 4, west of the Principal meridian. The party also completed the revision of the easterly one-third of the Dufferin sheet comprising townships

1 to 8, ranges 5 to 9, west of the Principal meridian.

In all, one hundred and sixty townships were investigated and the necessary information required for mapping the area collected. Fifteen thousand miles were travelled by motor car and several hundred miles on foot. Approximately twelve thousand five hundred barometer readings were taken and reduced, one hundred and twenty miles of levels run and two hundred and twenty miles of streams traversed by the compass and pace method.

Before starting operations in the field the surveyor in charge of the party was engaged for some time collecting information from the Land Titles offices and other provincial sources including the Reclamation Branch of the Department of Public Works, the Manitoba Drainage Commission and the Manitoba Roads Board.

Field operations were closed on October 26.

Party No. 2—Revision of the Brandon sectional map and a portion of the Dufferin sectional map, Nos. 72 and 23, respectively

The area in which surveys were carried out by this party included the westerly two-thirds of the Dufferin sectional map, comprising townships 1 to 8, ranges 10 to 19, west of the Principal meridian, and the whole of the Brandon sheet which comprises townships 9 to 16, ranges 5 to 19, west of the Principal meridian.

PERSONNEL:

P. E. Palmer, D.L.S., in charge.

Assistant—

W. P. Daly, D.L.S.

Party—

Four employees.

Before commencing operations in the field some time was spent in collecting available surveys infor-

12 GEORGE V, A. 1922

mation from the provincial Department of Public Works and other sources at Winnipeg, and from the Land Titles office and the office of the Manitoba Highways Engineers at Brandon.

The revision of the Brandon sheet was begun on May 15 and completed on August 12. Work on the Dufferin sheet occupied the party for the remainder of the season and operations were closed on October 19.

The season's work involved the collection of topographical mapping information covering two hundred townships. Plans of the built-up areas of forty-eight towns and villages were prepared and more than eighteen thousand barometric elevations were taken and reduced. A considerable amount of traverse by pacing and the running of several hundred miles of levels was necessary in connection with the surveys.

Party No. 3—Revision of the Moose Jaw and Regina sectional maps, Nos. 69 and 119, respectively

Moose Jaw sectional map, together with Regina sectional map, which adjoins it to the north, comprises townships 9 to 24 from range 16, inclusive, west of the Second meridian westerly to the Third meridian.

PERSONNEL:

W. J. Boulton, D.L.S., in charge.

Assistants—

E. C. Coursler, D.L.S.
S. C. Akins.

Party—

Three employees.

The party engaged on the investigation of this area was organized at Regina. Ten days were spent in collecting information from the Provincial Government offices at this point and surveys were commenced on May 12. Until June 14 the work was carried on without the services of a senior assistant and progress was somewhat retarded on this account. Twenty-three days were lost throughout the season on account of inclement weather and bad roads. The investigation of the Missouri Coteau, which occupies the southwesterly portion of the Moose Jaw sheet, presented some difficulties, especially in the rougher parts where roads are comparatively scarce.

In connection with the revision work, which covered two hundred and thirty-four townships, approximately two thousand barometric readings were taken. Some stadia traverse was done by the party in tps. 20-20-2 and 22-27-2.

Operations were closed on October 30.

Party No. 4—Revision of the Rosebud sectional map and a portion of the Calgary sectional map, Nos. 165 and 114, respectively

This party was organized at Calgary and survey operations were begun on May

PERSONNEL:

J. R. Akins, D.L.S., in charge.

Assistant—

F. H. Wrong, D.L.S.

Party—

Four employees.

Before commencing field work the information available at head office was supplemented by much additional information obtained by the surveyor in charge from the Surveys Branch and the Telephone Branch of the Alberta Provincial Government and from the offices of the Director of Levelling and the Commissioner of Irrigation at Calgary.

Attention was first given to the work required on the easterly portion of the Calgary sectional map comprising townships 17 to 24, ranges 1 to 4, west of the Fifth meridian. Work in the foot-hills district was rendered difficult on account of thick growths of willow scrub, and progress was retarded in that portion covered by Sarcee Indian reserve by the lack of surveys within the reserve upon which to base the revision work.

SESSIONAL PAPER No. 25a

The surveys in connection with the Calgary sheet were completed on July 9 and the revision of the Rosebud sheet, which comprises townships 25 to 32, ranges 16 to 29, west of the Fourth meridian, was begun on the following day.

In connection with the revision work spirit-levels were run where there did not exist sufficient control, and a rough classification of the soil was made. Some traverse surveys were also made in tps. 29 and 30-21-4 and a small correction survey in tp. 29-21-4.

Field operations were closed on October 19.

*Party No. 5—Revision of the Red Deer and Peace Hills sectional maps,
Nos. 215 and 265, respectively*

Previous to organizing his party at Edmonton the surveyor in charge was occupied for several days in collecting information at the offices of the Director of Surveys and of the Telephone, Highways and Drainage Departments of the Provincial Government, as well as from various other sources, to supplement that already prepared for use on the surveys.

PERSONNEL:

J. W. Pierce, D.L.S., in charge.

Assistant—

F. W. Beatty, D.L.S.

Party—

Four employees.

On June 15 the field work in connection with the revision of Peace Hills sectional map was begun and the work was continued throughout this and the Red Deer sheet immediately adjacent to the south. This whole area comprises townships 33 to 48 from range 15, inclusive, west of the Fourth meridian, westerly to the Fifth meridian, a total of two hundred and forty townships.

The traverse of the trails through four Indian reserves, which occupy a considerable area between Wetaskiwin and Ponoka, was necessary in order to show the same topographical information as elsewhere. These traverses were effected by the use of the compass and speedometer and were used as a base for further investigation in the area.

Survey operations were closed on November 12.

Party No. 6—Photo-topographical Surveys in Bow River and Clearwater Forest Reserves

The area covered by additional photo-topographical surveys in Bow River and Clearwater forest reserves comprises a portion of the district lying south of James river between it and Red Deer river, all the country between James and Clearwater rivers, and a narrow strip along the north side of the latter river. This territory lies principally in townships 32 to 35, ranges 8 to 11, west of the Fifth meridian, and the total area to be mapped is approximately six hundred square miles. Ninety-six camera stations were occupied.

In connection with these surveys a stadia traverse totalling thirty-one miles was carried up James river, through James pass and down Eagle creek, to connect with a station previously established on Red Deer river.

On completion of the work in this district the party moved to tp. 28-14-5 and surveyed an area of between fifty and seventy-five square miles in the vicinity of Bonnet Mt. This work involved the occupation of fifteen camera stations.

The topography of this district is of an extremely rough and rugged nature. Bonnet Mt., the dominating peak in the vicinity, is 10,662 feet above sea-level and other peaks close by range from 9,000 to 10,000 feet.

Survey operations were completed and the party disbanded on September 11.

LAND CLASSIFICATION SURVEYS

The object of these surveys is to provide intending settlers with accurate and reliable information that will enable them to select lands offering the best inducements for settlement.

Although this work was first undertaken for the purpose of assisting soldier settlers, and they are still given the preference in the selection of desirable homesteads, the beneficial results of these surveys are not restricted to this class alone. The information collected by the survey parties employed on the investigation and classification of lands is made available to the public in the form of maps, plans and reports which are intended to direct settlement to desirable areas, to keep from settlement areas that are not suitable, and to save the land-seeker time and money that might be lost in examining lands not offering a fair chance for successful settlement.

Four parties were employed on these surveys. Two of the districts selected, one lying north of Prince Albert and the other northeast of Edmonton, were investigated in the interest of soldier settlers. An area in the Peace River district, and the district north and east of Lake Manitoba were examined for general settlement.

Party No. 1—Surveys North and East of Lake Manitoba

The work of this party consisted of the investigation and classification of lands in the district lying along the north and east shores of Lake Manitoba including the area surrounding Waterhen lake and river.

PERSONNEL:

C. S. Macdonald, D.L.S., in charge.

Assistants—

J. F. Fredette, D.L.S.
A. M. Perry, D.L.S.

Party—

Four employees.

A total of 10,223 quarter-sections were examined. The area as a whole is more suited to stock-raising and dairying than to any other branch of agriculture. Many abandoned homesteads were found, the majority of which would never have been taken up had information such as is made available by

classification surveys been at the disposal of the settlers.

Besides the investigation surveys the roads throughout the district were classified and the condition of existing monuments noted.

Field work was begun on May 21 and completed on October 11.

Party No. 2—Surveys North of Prince Albert, Saskatchewan

With the exception of a few townships in the northeast portion of the block, east of Candle lake, this party examined all the townships from township 50 to township 56 inclusive, easterly from the Third meridian to range 17, west of the Second meridian.

PERSONNEL:

M. D. McCloskey, D.L.S., in charge.

Assistants—

E. F. Gorman, D.L.S.
S. Hunt, D.L.S.

Party—

Four employees.

Exclusive of forest reserves and water areas 960,640 acres were investigated. Surveys were extended into adjoining forest reserves and some parcels of land considered more suitable for agricultural purposes were recommended for withdrawal

from reservation. Roads throughout the district were classified and the location of gravel pits noted for the information of the Dominion Highways Commission. Elevations were recorded by means of aneroids where levelled lines or bench-marks could be found to serve as control.

Survey operations were begun on May 27, some delay being occasioned by the scarcity of men suitable for work on the surveys. Favourable progress was made

SESSIONAL PAPER No. 25a

during most of the season. In the parts of the district remote from settlement it was necessary to cut trails for moving camp. This frequently required the services of the entire party and the investigation work was somewhat impeded.

Field work was closed on October 11 and the party disbanded.

Party No. 3—Surveys in the St. Paul des Métis District, Alberta

The district examined by this party is located northeast of Edmonton and comprises an irregular area lying north of North Saskatchewan river and the proposed Keliwin forest reserve from the Fourth meridian westerly to range 17, west of the Fourth meridian.

PERSONNEL:

S. L. Evans, D.L.S., in charge.

Assistants—

P. A. Shaver, D.L.S.

E. F. Browne, D.L.S.

Party—

Four employees.

Approximately 1,528,000 acres were included in the investigation surveys which extended over eight-three townships. In addition to all open lands every homesteaded quarter section in the area was visited and those which had been abandoned were reported upon. Lands held under grazing leases were also examined. The roads throughout the district were classified and numerous soil samples were taken for purposes of analysis. Information regarding the available water supply, climatic conditions and other data was collected.

Survey operations were begun on May 24 and completed on October 31.

Party No. 4—Surveys East of Grande Prairie, Alberta

The area examined by this party lies principally between Little Smoky and Smoky rivers from township 70 to township 75; some townships west of Smoky river were also included in the investigation.

PERSONNEL:

L. Brenot, D.L.S., in charge.

Assistants—

A. O. Gorman, D.L.S.

N. S. Clouston, D.L.S.

Party—

Four employees.

The party was organized at Edmonton. Some difficulty was experienced in securing suitable men for work on the surveys, which, together with the temporary suspension of transportation service over the Edmonton-Dunvegan and British Columbia railway due to landslides along the Smoky river, was responsible for a delay in the commencement of survey operations. Field work was begun on June 18.

Fifty-three whole and fractional townships comprising 7,392 quarter-sections were examined but on account of many of the quarter-sections being divided into separate parcels by rivers and the boundaries of Indian reserves and timber berths the number actually classified was 7,597. While most of the quarter-sections examined and still available for settlement require extensive improvements many can be economically improved and some are suitable for immediate settlement. A tract of 445 square miles located in the centre of the district might well be reserved for forestry purposes.

Field work was concluded on October 14.

SURVEYS OF SETTLEMENTS AND TOWNSITES

The work required in connection with the survey of settlements and townsites is as a rule limited and is usually executed by parties engaged on regular surveys in the vicinity of the points at which the necessity for settlement surveys arises, or by travelling parties.

A small survey involving the laying out of a few additional lots was made on Matheson island in tp. 32-4-E. and the subdivided portion of the townsite of Jasper, Alberta, was extended by the survey of fifty-nine lots.

At several points in northern Saskatchewan in the area drained by Churchill river, trading companies, their employees, church missions and persons engaged in

12 GEORGE V, A. 1922

the fur trade have taken up small holdings. At present it is not advisable to extend regular subdivision surveys to these points. A small party was detailed to lay out settlement lots to include the lands applied for and lands which are likely to be required for settlement in the near future. Surveys were made at Ile-à-la-Crosse, Patunak, Bélanger, Stanley and La-Ronge. Canoes were used for transportation and additional labour, when required, was engaged at the points where surveys were being made.

Settlement Surveys in Northern Saskatchewan

This party was organized at Prince Albert and proceeded to Ile-à-la-Crosse settlement, where work was begun on June 11.

PERSONNEL:

S. D. Fawcett, D.L.S., in charge.

Assistant—

C. A. R. Lawrence, D.L.S.

Party—

Two employees.

Although individual squatters have located and built houses at widely separated points along the shores of lac Ile-à-la-Crosse, their parcels were not included in the surveys, which were confined to those points where several settlers were located on a small area and where disputes regarding boundaries were likely to arise. Several lots varying in area from five to ten acres were laid out in the old settlement and in the Canoe River and Beaver River sections.

From here the party moved to Patuak settlement, distant forty miles up the east arm of lac Ile-à-la-Crosse. Small lots were surveyed here for the Roman Catholic Mission and the Revillon Frères Trading Company. A few additional lots were also surveyed to accommodate the representatives of other trading companies who may seek locations at this settlement.

The party left Patunak on August 17 for Bélanger settlement, situated on Churchill river between Snake and Sandy lakes. At this point ten lots were surveyed, which were considered sufficient to supply the demand for some years to come.

On completion of the work at Bélanger the party moved to La-Ronge over a long and tedious route broken by numerous rapids and portages. A parcel of land containing eighty-four acres was surveyed for the Indian Mission and twenty additional lots were required to accommodate the settlers and provide each with a small plot for gardening purposes.

Surveys at La-Ronge were temporarily suspended in order to lay out some lots at Stanley settlement before freeze-up, which occurs at an early date in this district. This settlement is located fifty miles northeasterly from La-Ronge, and the work consisted of the survey of a sufficient number of lots to meet the requirements of the present settlers and the representatives of the trading companies who have posts at this point.

Returning to La-Ronge, surveys were completed and the party left for Prince Albert on October 18.

Much time was consumed in transporting the party between the points at which the surveys were located and in travelling to and from the district. Over six hundred miles were covered by canoe and one hundred and fifty miles on foot. The season's surveys entailed the running of seventy miles of line.

ALBERTA AND BRITISH COLUMBIA BOUNDARY

The topographical division under Mr. Wheeler was organized for field work at

PERSONNEL:

R. W. Cautley, D.L.S., A.L.S.,
Commissioner for Canada and
Alberta.

A. O. Wheeler, D.L.S., B.C.L.S.,
Commissioner for British Col-
umbia.

Banff with the object in view of closing the gap in the survey of the boundary between the point where work was discontinued in 1919, about one mile north of Fortress lake, and the point where it had been discontinued south of Yellowhead pass in 1917.

SESSIONAL PAPER No. 25a

Assistants—

D. M. Robertson, D.L.S.
A. J. Campbell, D.L.S.

Parties—

Eighteen employees.

The location of the watershed north of Fortress lake was begun on June 27 and surveys were carried on until September 9, when rain and snow set in and continued almost without intermission until September 20, rendering the further occupation of camera stations impossible. Some exploration work was done by the party while waiting for the weather to clear, but on September 25 preparations were made for returning to Banff. The late melting of the snow in the spring and its early arrival in the fall caused the failure of the division to complete the topographical work as far as Yellowhead pass, as intended. The terminal point of the season's surveys is located a short distance north of Athabaska pass.

Mr. Cautley continued the production of the 120th meridian south from the north boundary of township 73 with the intention of completing its survey to the point where it intersects the summit of the Rocky mountains, an estimated distance of ninety-three miles.

Owing to the fact that very little was known of the country to be traversed, and particularly of the possible sources of gravel supply or of how far it would have to be packed, it was doubtful whether it would be found possible to provide monument material fast enough to keep pace with the progress of the survey. The season's work therefore was restricted to cutting out the line, selecting sites for monuments, and supplying each site with two thousand pounds of gravel required for the construction of the monuments. In addition, a topographical survey of the country for a mile and a half on either side of the meridian was made. The building of the monuments, precise chaining, levelling and general completion of the survey was postponed until the next season.

Owing to the flooded condition of the country, particularly at the crossing of Smoky river, and the interruption of traffic on the Edmonton-Dunvegan and British Columbia railway, much time was lost by the party in reaching the location of the work, and progress was also retarded throughout the season by bad weather conditions. Additional difficulties were also presented by the nature of the country in which the surveys were conducted. The greater part of the line ran through heavy windfall, piled four to six feet high, and interwoven with scrub and second growth timber. Wet muskegs, which made transportation difficult, were also encountered.

The preliminary survey of forty-three and a half miles was completed, the southerly extremity of the line being left at the top of a cut-bank six hundred feet high on the northerly side of Wapiti river at chainage 112.55 south from the north boundary of township 66.

Forty-four monument sites were selected and cleared to a distance of twenty feet from wooden hubs marked with the numbers of the monuments to be constructed and also by old-style iron posts driven to the surface of the ground on the exact line of the meridian and at a distance of a few feet from the actual sites of the monuments.

Of the forty-four sites selected the northerly thirty-three were supplied with gravel from Redwillow river; the remaining eleven sites will have to be supplied from Wapiti river when a crossing has been found and a trail cut to it.

Survey operations in the field extended from July 1 to September 30.

MINERAL CLAIMS

Mining activity has continued in the Rice Lake district in southeastern Manitoba and a larger number of mineral claims than in any previous year was surveyed. In northern Manitoba an important find of gold at Copper lake, north of The Pas, has resulted in some surveys in that locality but mining development in the Flinflon district has been held up by the lack of a railway through the district.

12 GEORGE V, A. 1922

The most important new field to be opened up is at Keno Hill in the Mayo district, Yukon Territory, where exceedingly rich deposits of silver have been found. The only surveyor in the territory has been engaged on surveys in this district during the year. The returns of survey of two hundred and twelve mineral claims in all were received in the department.

CLEARING OF LAND BY CONTROLLED FIRES

One of the problems encountered by the Soldier Settlement Board in its task of settling returned men on the land was that of providing a sufficient number of homesteads suitable for immediate settlement. Considerable areas of land of good agricultural quality were available but these were covered with windfall and *brûlé*.

Early in the season of 1919 experiments were conducted on a limited scale, under the direction of the surveyors employed by this branch, in the clearing of these lands by controlled fires with a view to determining the feasibility of this method of reclamation in assisting intending settlers.

These experiments were entirely successful and, at the request of the Soldier Settlement Board, several surveyors were detailed, previous to undertaking regular survey work for the past season, to conduct similar operations on a more extensive scale in two selected areas, one being located in the Peace River district and the other in Porcupine forest reserve. In the latter area operations were supervised by Mr. G. J. Lonergan, D.L.S., the work being carried on by two parties under Messrs. A. L. Cumming, D.L.S., and Wm. Christie, D.L.S.; in the Peace River district two parties in charge of Messrs. R. H. Knight, D.L.S. and W. A. Fletcher, D.L.S., operated under the supervision of Mr F. V. Seibert, D.L.S.

Great care was taken in the preparations for burning. The surveyors were on the ground early but the work of creating fire-guards around the areas to be burned and for the purpose of safeguarding settlers' improvements and adjacent areas of valuable timber was somewhat retarded by a backward spring. Although the preliminary work was completed the weather proved very unfavourable for firing operations in both districts and the results were not as satisfactory as anticipated.

While waiting for favourable weather the parties continued the construction of fire-guards in preparation for continuing this work next season. These will prove of great value in the meantime in safeguarding timber areas in the districts in the event of the occurrence of forest fires.

During the remainder of the season Mr. Seibert with one assistant was engaged on the investigation and selection of areas in the Peace River district suitable for clearing by this method.

LEVELLING

The amount of levelling of all classes run during the twelve months ending March 31, 1921, was 2,830 miles. There was an increase in mileage of secondary control, base-line, and subdivision levelling over the corresponding amounts done in the previous year, but no township outline levels were run during the season.

One party was engaged on precise levels throughout the season, four parties were engaged on secondary control levels and one party ran levels along base lines during the original survey.

Nine parties on subdivision surveys ran a total of 1,596 miles of levels along section lines. While only intended to serve the immediate surroundings and to afford a general record of the topography, this class of levels has been so well carried out that the records may be confidently relied upon in all matters which depend on a knowledge of the relative elevations of a local district.

The work of recording all the results in a clear and readily accessible form has been kept up to date and there is no difficulty in quickly obtaining any one of the many hundreds of thousands of elevations already recorded.

SESSIONAL PAPER No. 25a

The number of miles of the various classes of levels run during the year and the total at the end of the year are as follows:—

	Season 1920	Total
Precise levels..	305	4,222
Secondary control levels..	833	3,014
Meridian and base-line levels..	96	12,364
Township outline levels..		902
Subdivision levels..	1,596	9,795
Other lines of levels..		399
Totals..	2,830	30,696

Party No. 1—Precise Levels along Railways

Precise levels were run by this party along the Canadian Pacific railway from Weyburn easterly to Findlay Crossing, then along the Canadian National railway southeasterly via Hartney and Minto to Hartney Junction and then northwesterly to Brandon; also along the Canadian National railway from Eyebrow to Moose Jaw. The latter is the completion of the line from Lacombe to Moose Jaw commenced last season. Levelling was started at Weyburn on June 1 and completed to Brandon on September 14. The work at Eyebrow was begun on September 20 and finished to Moose Jaw on October 4 which was the end of the field season. The distances levelled were from Weyburn to Brandon—259 miles, and from Eyebrow to Moose Jaw—46 miles, a total of 305 miles.

The usual procedure for precise levelling was followed throughout. On the line from Weyburn to Brandon sixty-three permanent bench-marks were established. These are either on the standard concrete piers made for the purpose or on permanent masonry structures. Connection was made to bench-marks of precise level lines—Weyburn to Govenlock, Stephen, Minnesota to Moose Jaw, Brandon to Estevan, and Portage la Prairie to Saskatoon, also to control levels along the east outline of range 13, west of the Second meridian and tertiary levels along the east outline of range 21, west of the Principal meridian. On the line from Eyebrow to Moose Jaw, connection was made to control levels along the sixth base line, tertiary levels along the Third meridian, and to bench-marks of several precise level lines radiating from Moose Jaw.

Party No. 2—Secondary Levels along Base Lines

The first work done by this party was the levelling of the seventh base line across ranges 13 and 14 west of the Second meridian. The sixth base line was then levelled westerly from the east of range 13, to the east of range 6, west of the Third meridian, where the line was turned north through one township to avoid very rough country and then was continued westerly to connect with the levels along the east of range 13, west of the Third meridian.

Field levelling commenced on June 2 and ended on September 28, during which time 190 miles of main levels and 45 miles of connections were run. Ties were made to three precise level lines at Lebreton, Bethune and Valeport, and also to three secondary lines of levels, along the Third meridian, the east boundary of range 13 west of the Second meridian, and of the same range west of the Third meridian. Permanent

12 GEORGE V, A. 1922

bench marks of the usual pattern were planted every third mile, one being placed near township corners and one midway. In addition a bench-mark of a similar pattern but with the top buried one foot below the surface was placed near the end of every second range. The instruments used were a Zeiss level, two precise levelling rods and steel turning pins.

The line was characterized by many deep valleys, coulées and ravines. Qu'Appelle river was crossed three times, Little Arm river twice, and South Saskatchewan river once. The valleys of these rivers at the points of crossing are about 300 feet deep.

Party No. 3—Secondary Levels along Base Lines

This party ran a line of control levels along the east outline of range 13, west of the Third meridian. Levels were run south from

PERSONNEL:

E. W. Berry, D.L.S., in charge.

Party—

Six employees.

the main line of the Canadian Pacific railway in township 16, near Swift Current, to the international boundary. This portion was begun on June 6 and finished on August 6. The party

then moved back to the point of commencement and worked north to township 27 near Wiseton, beginning August 13 and ending on September 29. In all 173 miles were levelled; of these 165 were on the main line and the remaining 8 were on connections.

Permanent bench-marks of the standard pattern, appearing above the surface of the ground, were placed at intervals of three miles. In addition, similar bench-marks completely buried to a depth of one foot were planted every twelve miles.

Connection was made to precise level lines along the main line of the Canadian Pacific railway and along the line from Assiniboia to Govenlock, to secondary levels along the fifth and seventh base lines, and to tertiary levels along the second base line and section outlines in townships 20, 21 and 22. Connection was also made to monument 472 of the international boundary survey.

From township 9 to the rim of South Saskatchewan valley in township 20 the land is used for grain growing, although generally more broken and hilly than the average land utilized for this purpose on the prairie. The remainder of the country traversed by the line is mainly rough pasture land. The valleys of Frenchman and South Saskatchewan rivers were crossed. Their depths are respectively three hundred and six hundred feet at the crossings of the line.

Party No. 4—Secondary Levels along Base Lines

The fifth base line was levelled from the east of range 13, west of the Third meridian, to the Fifth meridian.

PERSONNEL:

R. H. Montgomery, D.T.S., in charge.

Party—

Six employees.

Field levelling was started on May 31 and ended on September 30 during which time 277 miles of main levels and 26 miles of connections were run. Ties were made to three precise lines of

levels, at Swift Current, Mesekum and Vulcan, and to two tertiary lines of levels on the Third and Fourth meridians.

Permanent bench-marks of standard pattern were planted every third mile, one being placed near township corners and one midway. In addition a bench-mark of a similar pattern but with the top buried one foot below the surface, was placed near the end of every second range. The instruments used were a Zeiss level, two precise levelling rods, and steel turning pins.

SESSIONAL PAPER No. 25a

Party No. 5—Secondary Levels Along Base Lines

Levelling was commenced on the twelfth base line on May 28. This line was levelled westerly from the Fourth to the Fifth meridian, the latter being reached on August 28.

PERSONNEL:

J. B. Alexander, D.L.S., in charge.

The party was then moved south to the tenth base line, stopping on the way at Lacombe to re-level nine miles of line which had been levelled the previous year but in which a small error was

Party—
Six employees.

suspected. The result confirmed the original levelling. Work started on the tenth base on September 7 and was carried easterly from the Fifth meridian to the east of range 23, where levelling was ended for the season. Levels run during the season totalled 256 miles, made up of 165 miles on the twelfth base, thirty-six miles on the tenth base, and fifty-five miles of connection.

The early part of the season was very wet and transport was difficult on account of flooded roads and unopened road allowances. Many bridges and culverts were washed out during the spring freshets, and the regular routes of communication became impassable. Conditions, however, improved greatly in the latter part of the season.

One deep valley, that of Battle river, crosses the twelfth base four times. The only other valley of great size which was crossed was that of Red Deer river on the tenth base.

The party was disbanded on September 30.

CONTROL OF SURVEYS

A. M. Narraway, D.L.S., Controller of Surveys

On May 24 the Controller of Surveys left Ottawa to commence his field duties, proceeding to Edmonton, where matters pertaining to survey equipment and the organization of survey parties were dealt with.

The inspection of survey parties was begun on June 11 when the controller visited a party engaged on the revision of sectional maps south of Edmonton. Mr. Narraway's subsequent itinerancy lay through central Alberta and Saskatchewan and southern Manitoba, and included the inspection of various parties engaged on land classification surveys, levelling, revision of sectional sheets and retracement surveys.

Returning to Edmonton a trip was made into the Peace River country to Fort Vermilion, where two parties were engaged on subdivision surveys. A close study was made of this district generally with regard to its future possibilities and its immediate requirements in so far as surveys were concerned.

The latter part of August was spent in central Alberta and all of September in northern Manitoba, visiting parties in these areas.

In the latter province an extended trip was made to inspect a party engaged on the traverse of a chain of lakes and rivers lying to the north of the Hudson Bay railway, and another party subdividing lands along that railway.

In addition to the general survey business attended to, eighteen parties were visited in the field and the controller returned to Ottawa on October 16 in order to complete the necessary arrangements for the preparation, during the winter, of the surveyors' plans and reports.

Throughout the season Mr. Narraway was assisted in his field duties by Messrs. T. H. Bartley, D.L.S., and T. A. McElhanney, D.L.S., Assistant Controllers of Surveys. The latter was engaged for part of the season on the work of opening up

12 GEORGE V, A. 1922

forest reserve areas for soldier settlement. A total of thirty-six visits to survey parties was made by Messrs. Bartley and McElhanney, either in company with the Controller of Surveys or individually.

During the winter, in addition to his usual duties, the controller gave considerable attention to improving the methods employed by surveyors in the preparation of their returns of survey with a view to having this work done, as far as possible, in the Ottawa office, where better results can be obtained under uniform and improved methods than by the old arrangement whereby each surveyor prepared his returns at his home.

The compilation of maps and the preparation of reports in connection with land classification surveys were carried out under the supervision of the Controller of Surveys. As the information collected by surveyors employed on this work is intended for the use of prospective settlers, efforts were made to present it in the best possible form to meet the requirements of the public.

Methods of constructing and utilizing relief maps for development purposes were originated by Mr. Narraway's office. Much time was necessary for experiments, but while this work is still in its early stages the maps already available have been of very practical assistance to the Soldier Settlement Board and other government offices.

G. J. Lonergan, D.L.S., Inspector of Surveys

From May 5 until June 21 the inspector was engaged on the supervision of firing operations being conducted by two parties in Porcupine forest reserve.

Previous to beginning inspection work some time was spent in hiring labourers for some of the surveyors who found it difficult to keep their parties up to strength. Subdivision parties working in the Peace River district were first inspected, considerable time in addition to that spent with each party being required to travel from one location to another. Four parties of this kind and a party engaged on the survey of the boundary between the provinces of Alberta and British Columbia were inspected.

On the completion of inspection work in this district an inventory was made of all articles of outfit stored in the government warehouse at Peace River for the purpose of sorting out and disposing of those worn out or unfit for use.

Two parties subdividing lands in the railway belt of British Columbia were next visited, after which the inspector returned to Edmonton. One party engaged on stadia surveys north of this city was inspected.

The remainder of the season was spent in securing suitable quarters for wintering surveyors' horses, notifying the surveyors as to where they should forward their outfits on the completion of the season's surveys, examining all horses to determine their fitness for use during the next season and disposing of those considered unfit for further work. Articles of outfit stored at different points were also examined, worn-out portions were discarded and others of little use were sold. The inspector returned to Ottawa on November 25.

PART II.—OFFICE WORK

The office staff of the Topographical Surveys Branch, which has for some years been divided between the building on the northeast corner of Metcalfe and Slater streets and the Imperial Building on Queen street, has been consolidated and is now located in the Labelle Building, 105 George street.

SESSIONAL PAPER No. 25a

The need of new quarters which would accommodate the entire staff has long been felt, as, apart from the resultant inconvenience of being located in separate buildings, the Imperial Building was especially unsuited to the requirements of the office. The efforts of the draftsmen to produce high-class work were considerably hampered by unsatisfactory lighting, and the efficiency of the printing plant, which, with the storage room for paper, was located in the basement, was even more seriously affected. The lack of good daylight, most essential to satisfactory colour printing, and the impossibility of maintaining an even degree of humidity, which so affected the paper as to interfere greatly with the proper registration of colours, nullified to a large extent the efforts of the staff to produce work of high quality.

The building at present occupied by this branch, while by no means an ideal one for office purposes, is a great improvement. It has also the advantage of being of fire-proof construction, thus affording greater protection to the valuable records of the department which are stored in this office.

General reorganization of the work of the branch was begun in conjunction with the consolidation of the staff and is being continued with a view to increased efficiency.

The Survey Records Branch, which has been lately reunited with this one, is also being reorganized. It is proposed to transfer a portion of their duties to the Land Patents Branch of the department, but the greater part will in future be carried on as part of the work of this office.

SUPERVISION OF FIELD WORK AND ACCOUNTS DIVISION

The estimates for the year 1920-21, which were prepared in this division, provided for an appropriation of only \$700,000, whereas the appropriation previous to the war was over one million dollars. Careful study was necessary to allot the reduced appropriation so as to meet all pressing requirements arising from settlement and development in the western provinces. Information was obtained as to the trend of settlement, the discovery of minerals, the development of water-powers, etc., and preparations were made to extend the surveys to offset all danger of claims conflicting and of erroneous locating.

Two hundred and thirty applications for surveys were received and examined during the year. For every case that was found worthy, arrangements were made to have the surveys carried out without delay. One hundred and fifty-one instructions for surveys were drafted and submitted to the Surveyor General and later were issued to the surveyors in the field.

Fifty-nine accounts for expenditure in the field were received, examined and passed for the approval of the Surveyor General. The examination of these accounts involved extensive correspondence with the chiefs of parties. In addition, 550 local accounts for office expenses, supplies, etc., totalling \$21,100, were examined and passed. The greatest possible care is taken when examining these accounts to see that the orders have been issued to the firms quoting lowest prices, that the merchandise received is of good quality and that the prices are fair and just. There were also 208 accounts from the various railway companies amounting to \$16,600 for transportation of our employees over their lines.

Monthly progress estimates were made of the cost of the operations in the field and the office expenses. This enabled the staff to so control operations as to keep well within the appropriation made by Parliament.

Applications for employment as chief of party, assistant, articled pupil and assistant leveller were received and forwarded to the Civil Service Commission to have certificates of employment issued to those who were selected as best qualified for the work.

12 GEORGE V, A. 1922

During the season three surveyors and their parties met with accidental losses from fire or from the capsizing of canoes and submitted to the department claims for compensation. The claims were carefully examined and recommendations with reference thereto were submitted for the consideration of the minister.

The clerical staff prepared full information as to the appointments, classification, etc., of the staff as required by the Civil Service Commission and reports to the Commissioner of Taxation as to the incomes of the staff both at the head office and in the field. The attendance and leave records were also kept and the pay lists for all temporary employees checked.

In all, 5,520 draft letters and memoranda were prepared in this division.

SURVEYS INFORMATION DIVISION

The duties assigned to this division are, in general, the preparation of plans and sketches for the instruction of the chiefs of survey parties in the field, the dealing with general technical correspondence relating to surveys, the issue of all preliminary township plans, the registering of all survey returns furnished by the surveyors, the purchase, storage and distribution of all office supplies for both the office and field staffs, the distribution of the maps and publications of the branch, the editing of the annual report of the branch and of other special reports, and other miscellaneous technical work.

In connection with the distribution of maps it is noted that since the issue of the sectional maps in the new style giving greater topographical detail there has been a marked increase in the demand for them. Another map for which there has been a large demand is the new map of the Mackenzie and Slave rivers.

On the whole the amount of work turned out was approximately the same as for the previous year.

EXAMINATION OF SURVEY RETURNS DIVISION

The returns of survey of all Dominion lands are examined and all the official plans thereof are prepared in this division. Besides the surveys carried on by this department, this includes the examination of the returns of survey of all mineral claims and timber berths, the plans of provincial roads and railways, and topographical and boundary surveys.

The desirability of having the instructions for surveys prepared by the staff who examine the returns became more generally recognized during the year. Instructions for the survey of townsites and of northern waterways became a part of the work of this division. In co-operation with the Geological Survey who were about to examine and map a tract in the vicinity of Paint lake and Burntwood river in northern Manitoba where control surveys are very far apart, instructions were prepared for a survey party to make a control survey along Grass, Burntwood and Nelson rivers and intermediate lakes. Some 1,100 miles of shoreline were defined and reference monuments erected at suitable intervals for tying in the details of the geological survey of the adjacent country and all other future surveys. This survey was mapped during the winter by means of the Universal protractor and furnished to the Geological Survey as a base for the geological map.

The discovery of oil near Fort Norman, in the Mackenzie district, rendered imperative the proper mapping of this remote district where heretofore geographical positions were only known relatively. Towards the close of the year instructions were being framed for the traverse of northern waterways from the 30th base line where it crosses Slave river northerly, crossing Great Slave lake and continuing down Mackenzie river a total distance of approximately a thousand miles, this traverse to be made with sufficient care for reliable mapping and to be controlled by four longitude stations to be established by wireless telegraphy by the staff of the Dominion Observatory.

SESSIONAL PAPER No. 25a

The year closed with the prospect of a much larger part of the instructions being prepared in this division than heretofore.

The preparation of the town-planning scheme and accompanying plans that had to be approved by the Director of Town Planning for Saskatchewan before the plan of subdivision of the townsite of Lens could be submitted for registration, took considerable time. The scheme is a very comprehensive set of building restrictions, governing the uses to which certain areas may be put, the height and distance apart of buildings, the construction of roads and walks and generally all matters that require to be foreseen in the growth of a city. The town of Lens is intended to be the trading centre and shipping point for soldier settlers who have taken up a large tract of land some miles to the south in what was formerly a portion of Porcupine forest reserve.

In connection with making available to the public, through the Soldier Settlement Board and Dominion land offices, the information collected on land classification surveys, a large part of the staff was engaged for several months in the preparation of plans of the townships examined. This work was carried on from the beginning of the year in order to make the information collected available to intending settlers as quickly as possible. The plans for some 200 townships were prepared.

The returns of survey of the British Columbia-Alberta boundary along the 120th meridian from township 73 to a point in township 66, range 14, and from a point about one mile north of Fortress lake, in township 40-27-5, to township 43-3-6, consisting of reports, maps and field notes, were examined. The survey along the 120th meridian was incomplete, the monuments not having been erected. These will be constructed at a later date.

At the request of the British Columbia Lands Branch, a revision of the regulations for the survey of Dominion lands in the railway belt of British Columbia was prepared. Information was also supplied to the Surveyor General of British Columbia for the adjustment of provincial surveys along the Columbia river north of Revelstoke.

Owing to continued activity in the mining districts of Manitoba and Saskatchewan the surveys of two hundred and twelve mineral claims were received for examination, as compared with ninety-two for the preceding year. Many of the plans of these mineral claims were in triplicate. In the Yukon some rich finds of silver ore were located and as a result eleven mineral claims were received and two group lots surveyed and the returns examined.

Plans of roads to the number of 763, totalling 1,526 miles, were received from the Provincial Governments of Manitoba, Saskatchewan and Alberta and were examined. These plans were submitted by the provinces under the provisions of chapters 99 and 100, R.S.C., 1906. This was an increase over the three preceding years. Railway plans covering rights of way exceeding 800 miles were examined for approval. In some cases more than one copy of the plan was submitted; the gross mileage was 2,167.

During the year 294 township plans, 14 plans of miscellaneous surveys such as settlements, townsites, etc., and 40 special plans were prepared for the draftsmen. This involved among other returns, the examination of 114 books of stadia field notes and 517 stadia plots.

The preparation of special plans of quarter-sections for the Land Patents Branch was an increasing part of the work. It may not be feasible to issue a new township plan when it is desired to grant a patent for some particular quarter-section, but a plan of the particular quarter-section is compiled, sufficient copies being made by hand in the Drafting Division for attaching to the patent sent to the Registrar of the Land Titles Office, and to the copy of the patent registered in the department, as well as for those offices where the plans are necessary for reference.

12 GEORGE V, A. 1922

From other branches of the department and from the public 1,067 requests for information concerning surveys were dealt with. In this connection 965 sketches were prepared and 2,012 areas for parcels of land were calculated and furnished. Progress report sketches numbering 636 were received from the surveyors in the field and examined.

DRAFTING AND PRINTING DIVISION

In other divisions of the branch plans are compiled from returns of survey. The Drafting and Printing Division prepares these for reproduction by carefully drawing them again so as to make neat, clear copies. From these copies, by means of photography, a zinc plate is prepared which the lithographer uses to print editions of the plans. The preparation of these copies constitutes the main work of the division, but other work closely related thereto is also undertaken as the staff is qualified and equipped for such work. The staff consists of draftsmen, stampers and printers. The draftsmen do the drawing, the stampers put on the lettering by means of type and the printers set up the foot-notes, titles, etc., for pasting on the plans.

Township Plans.—The preparation of township plans for printing still constitutes the most important item of work. As the staff has been engaged on this for many years the work has become standardized and township plans are made with greater facility as compared with miscellaneous jobs. The total number of township plans prepared was 658 of which 364 were reprints of plans formerly in colours the editions of which had become exhausted.

Miscellaneous Plans of Survey.—These include plans of settlements, subdivisions, townsites, group lots, and, generally speaking, any plans of survey other than township plans from which title to lands may be obtained. They also include plans of a section or parts of a section, to be used for issue of patents urgently required, when for some reason the complete township plan is not available. The total number of miscellaneous plans prepared was 201.

Mounting Plans and Maps.—Much of this work is done to accommodate surveyors going into the field. They require maps and plans of the districts covered by their surveys. As these are subject to hard usage in all kinds of weather they are generally mounted on cotton, and frequently dissected and folded to fit the pocket. In many cases several maps have to be fitted together to cover an area of which a map is required. Maps to the number of 282 were mounted.

Topographical Maps.—The drafting of such maps requires the services of men of the very highest skill. Much new work was required on the new-style sectional maps and several of the best draftsmen in this division were assigned to aid in preparing copy for reproduction. Four men are now working on them. No sharp, clear division can be made between the work of this division and that of the mapping division proper, but generally speaking this division does the drawing of all line work for roads, telegraph lines, section lines, etc., and the drawing of townsites and city areas, while the mapping division add the contour lines and the stamping of the lettering and symbols. The Edmonton, Saskatoon, Blackfoot and Winnipeg sheets have been completed.

Under this heading may be considered a series of land classification maps. Maps of Fort Vermilion, St. Paul des Métis and Prince Albert districts were prepared as well as second editions of maps of Peace River district and the district west of lakes Winnipegosis and Manitoba. As these are intended for general distribution among prospective settlers, large editions are being printed.

SESSIONAL PAPER No. 25a

Miscellaneous Jobs.—Seven plans to accompany Orders in Council were prepared for printing, twenty-two commissions for Dominion land surveyors were engrossed, eighty-four printing jobs were done on the small hand-press, seven sets of astronomical field tables were made besides 807 other jobs of a miscellaneous nature.

SECTIONAL MAP DIVISION

Compiling

Sectional Maps, New Style.—The revision of sectional maps, based on the work of special revision parties, which was begun in 1919, was continued during the season of 1920 on a more extensive scale. Nine sheets were chosen for revision as follows: in Manitoba—Dufferin, No. 22, Emerson, No. 23 and Brandon, No. 72; in Saskatchewan—Moose Jaw, No. 69 and Regina, No. 119; in Alberta—Calgary, No. 114, Rosebud, No. 165, Red Deer, No. 215, and Peace Hills, No. 265.

Immediately on the selection of these sheets, steps were taken to have the office copies of the township plans covering the several areas brought up to date by the addition, from the records of the branch, of information concerning road diversions, railways, water areas, etc., and all the information obtainable from other departmental offices. Owing to the need of furnishing this information to the surveyors before leaving for the field so that they might plan their season's work to the best advantage, it was necessary to have a number of the plans prepared in other divisions of the office. Copies of all the plans thus amended were then made for the surveyors.

Accurate theoretical projections, on a scale of two miles to one inch, were made for the nine sheets and these were later adjusted for irregularities of survey in the governing and subdivision lines. All information on the township plans was transferred to these projections in pencil and they were made ready to hand to the surveyors when needed on their return from the field.

One part of the returns from the revision surveyors consists of plots on a large scale showing the built-up areas of villages, towns, and cities. Drawings of 246 of these were made for reduction by photography to the two-mile scale, the small photographic prints thus obtained being pasted in place on the finished black drawing.

Sectional Maps, Old Style.—The revision of sheets based on the work of special parties is restricted to the older settled parts of the country. The revision of sheets covering outlying districts and the compiling of new sheets by the office staff was continued. Two sheets, Fort Alexander, No. 123, and Shaftesbury, No. 513, revision of which had been begun last year, were completed, and one new sheet, Lake Claire, No. 665, was compiled. The revision of Donald sheet, No. 163, was begun.

Map of Mackenzie and Slave Rivers.—The eight-sheet map of Canada, which is the only map available of the Mackenzie River district, was taken as the base map. This was revised in this office by the addition of all available information and preparations were made to issue an up-to-date map of convenient size which could be placed in the hands of Government officials and others going into the north country.

The examination of surveyors' returns for names was continued as in past years and required the examination of 1,508 sketches, plans and plots, 209 field books, and 46 general reports. Considerable correspondence with surveyors and the Geographic Board was handled.

Mapping

Sectional Maps.—The great amount of information made available for use on the sectional maps by the work of the revision surveyors called for changes in the style of the maps themselves. The British ordnance maps were taken as the standard

12 GEORGE V, A. 1922

and the sectional maps were made to conform to them as closely as possible, due allowance being made for the widely different conditions under which our sheets are compiled and reproduced.

One very objectionable feature of the sectional maps has always been their checkerboard appearance due to the prominence of the section lines of the Dominion lands system of survey. This was overcome by printing section and township lines in a neutral tint which, while distinct enough for all purposes, does not obtrude itself on the eye. Water features and their names are in blue, contour lines are in brown, and woods, bush, scrub, etc., and the boundaries of forest reserves are in green. Railways, roads and trails, except Class 1 roads, telegraph and telephone lines, buildings, schools and churches, and all type matter for land features are in black. Gasoline stations, the boundaries of Indian reserves, and Class 1 roads are in red.

In making the finished drawings the programme is as follows: The original map on the two-mile scale, containing all information except contours, is photographed on the same scale and zinc plates are made. From these plates prints are made on heavy Joynson paper showing all lines in light blue. A separate drawing is then made for each colour, black, blue, brown, green and neutral, by selecting and tracing the proper lines of the prints, and these colour drawings are afterwards reduced to the three-mile scale by photography and zinc plates made therefrom for printing. No red drawing is made, this colour being handled as an offset proposition from the black plate after reduction to the three-mile scale.

The old-style maps are printed in four colours instead of six. They are made to conform to the new-style maps as far as possible.

Increased clearness and uniformity in text has been secured by the employment of type in place of hand lettering.

During the year the necessary colour drawings were prepared for four old-style sheets, namely: Fort Alexander, No. 123; Swan River, No. 221; Shaftesbury, No. 513, and Lake Claire, No. 665; and for four new-style maps, namely: Winnipeg, No. 73; Blackfoot, No. 114; Saskatoon, No. 218, and Edmonton, No. 315. Brandon, No. 72, is in hand.

Maps of the Boundary between Alberta and British Columbia.—The original sheets on the scale of 1/40,000 are photographed and zinc plates are made from which prints in light blue on heavy Joynson paper are taken as for the sectional maps. The colour drawings, namely black for surveyed lines, railways, boundaries and names, blue for water features, brown for contours, and red for roads and trails, are afterwards reduced to the scale of 1/62,500 for printing. Eight sheets were dealt with requiring thirty-two colour drawings each twenty inches by twenty-four inches.

SPECIAL SURVEYS DIVISION

Governing Surveys

Instructions were prepared for the survey of a portion of the Manitoba-Saskatchewan boundary line, a portion of the 18th base west of the Principal meridian, and a portion of the 18th base west of the Second meridian. Special care has been exercised to ensure that these lines, which are located in mining districts, are accurately laid down in their proper places. The field correspondence during the season was carried out, and the accuracy of the surveys when completed was carefully checked.

Retracement of Governing Surveys.—The work of retracing a portion of the Second meridian and the correction lines easterly therefrom through two or three ranges, which was begun in 1919, was continued and completed. The bearings of the lines in the three ranges immediately east of the Second meridian vary considerably

SESSIONAL PAPER No. 25a

from theoretic. This was caused by the difference in latitude between lines in Manitoba which depend on the survey of the Principal meridian, and corresponding lines in Saskatchewan which depend on the survey of the Second meridian, the lines of the old surveys in Manitoba being long distances north of their correct positions. In order to have correct returns of survey, it would be necessary to retrace nearly all the lines in two ranges immediately east of the Second meridian from township 1 to township 13, and in three ranges from township 14 to township 30. On account of the cost that this would entail, the retracements were limited to base lines and correction lines only.

The instructions for this work were prepared, the field correspondence carried out, the returns of survey examined, and the positions of corners in the Dominion lands survey system computed from the returns of survey of the lines retraced.

Revision of Sectional Maps

Instructions were prepared for five parties employed on the topographic revision of sectional maps. This division is also responsible for the preparing of all preliminary information and the examination and checking of all field work connected with the contouring or showing of the relief of the country. The necessary preliminary work consisted of collecting, examining and compiling all available level information in the areas to be surveyed. Our principal sources of information were the spirit-levels run by this branch and the profiles of the different railways. Use was also made of the results of engineering work done by the Reclamation Service, Geodetic Survey of Canada, Geological Survey and by the different provincial and municipal governments. About 1,300 miles of spirit-levels have been run by this branch in the areas selected for revision. Profiles of approximately 3,500 miles of railway lines in these areas were examined, equations obtained to reduce them to mean sea-level datum and the corrected elevations of all road crossings, railway stations and topographical features along the lines obtained. The information obtained from all other sources, with the exception of the Geodetic Survey, had also to be reduced to sea-level datum.

From these sources the elevations of all known points were compiled and supplied to the revision surveyors in convenient form, enabling them to complete their topographical work with little or no spirit-levelling. These elevations served as control for the aneroid readings from which are deduced the elevations required for contouring.

Each revision party is supplied with ten aneroids, six for field use, three for spare and one camp aneroid. The field aneroids are packed in specially designed padded cases, each containing three aneroids. They are read at all section and quarter-section corners, at notable topographical features, such as streams, lakes, edges and bottoms of valleys, and at ridges and points where the slope of the ground changes, the time being recorded as well as the aneroid readings. The resulting elevation is thus derived from the mean of readings on three different aneroids.

The field aneroids are controlled by readings on points of known elevation selected by the surveyor from skeleton sheets of his district compiled in the office. Wherever possible he is required to read on points of known elevation not more than two hours apart, but when the interval of time elapsing between checks on points of known elevation exceeds two hours the work is arranged to include repeat stations, that is to say, the route is crossed at some intermediate point on a subsequent day, thus obtaining two entirely independent sets of readings on that point. Comparison of these readings furnishes a good criterion of the accuracy of the work.

The camp aneroid is read at hourly intervals throughout the day. These readings show the changes in atmospheric pressure at different times throughout the day and provide corrections which are applied to the readings of the field aneroids.

12 GEORGE V, A. 1922

The aneroid records are reduced and examined in the office. The revision work of the season 1920-21 included 3,884 sheets of field records each containing the readings of three aneroids on 25 different points, making a total of upwards of 290,000 individual aneroid readings in addition to the camp aneroid readings.

The examination includes inspection and comparison of the readings to detect irregularities in behaviour of the aneroids, checking and plotting the changes recorded by the camp aneroids, taking out the means of the three aneroid readings in the field, applying the correction derived from the camp readings, converting readings in inches of barometric pressure to feet of elevation, checking the known elevations and applying the "correction to datum" which is the correction derived from readings of the aneroids at points of known elevation.

Astronomical Work

Azimuth Observations.—The examination of azimuth observations on governing lines surveyed and retraced during the season of 1920-21 included observations on the survey of the east boundary of townships 53 and 54, range 30, west of the Principal meridian, which forms part of the boundary between the provinces of Manitoba and Saskatchewan, the survey of parts of the eighteenth base line, west of the Principal and Second meridians, and the retracement of parts of the Second meridian, fourth base line, third, fourth, fifth, sixth and seventh correction lines, all west of the Principal meridian.

Altogether two hundred and fifteen individual observations were examined and the results tabulated and compared with the bearings recorded in the field books. The observation stations numbered sixty-two, controlling two hundred and seventy-three miles of line. The average number of observations at a station was 3.5 with an average range per station of eleven seconds.

Astronomical Field Tables.—Four sets of field tables for the position of the pole star were computed and printed. Two of the tables gave the azimuth of Polaris for every twentieth township for use by surveyors on Dominion lands and two give the azimuth for every second degree of latitude for use by surveyors in other parts of Canada. The periods covered are:—

October 12 to December 24, 1921.

August 23 to October 14, 1922.

June 13 to August 26, 1923,

and

December 25, 1921, to March 13, 1922.

March 17, 1923, to June 12, 1923.

Tables giving the apparent right ascension and declination of the sun for every day of the year with a table of corrections for refraction and parallax were also issued.

Magnetic Surveys

Thirty-three surveyors were instructed to observe for magnetic declination in the districts covered by their surveys. Separate instructions were issued to each surveyor together with a list of stations founded previously in the neighbourhood of his work at which repeat observations might be made. About nine hundred and fifty declination observations, including about thirty-five repeat observations, were obtained during the season. Observations for magnetic dip and total force were taken at six stations, which included two repeat stations.

SESSIONAL PAPER No. 25a

The above observations for magnetic dip and force and the declination repeat observations for 1919 will appear in the *Journal of the Royal Astronomical Society of Canada*.

The observations for declination, dip and force have been reduced to International Magnetic Standard, by direct comparison at the beginning and end of the season with the magnetic standards at the Magnetic Observatory, Agincourt, by courtesy of the Director of the Meteorological Service of Canada. The declination observations were reduced, as usual, to mean-of-month by direct comparison with the continuous declination magnetograms of the Magnetic Observatory at Meanook, Alberta, supplied by the Director of the Meteorological Service of Canada.

A publication entitled "Magnetic Observations in Western Canada with Three Isomagnetic Maps" was completed and is now in the hands of the printers. It shows in concrete form the very large amount of magnetic work that has been accomplished by this branch.

To supplement the construction of magnetic maps researches were made into various magnetic problems including magnetic deviations, secular change in declination, dip and total force, etc.

Many magnetic maps were distributed to applicants and several special maps of the Mackenzie River district were supplied to oil prospectors and others travelling to Fort Norman. Correspondence in regard to magnetic information was carried on with many individuals and commercial firms and scientific and government authorities.

Surveying Instruments

Repairs were made to sixty-three transits, nine levels, four levelling rods, fifteen aneroid barometers, three kodaks, twelve instrument cases, five tripods and seventeen miscellaneous instruments. Eleven sidereal watches were overhauled and readjusted.

Incidental to the inspection of instruments and outfitting of surveyors, 244 cases aggregating five tons (10,561 pounds) were shipped from this office, and 238 cases weighing six tons (12,155 pounds) were received.

A statement of instruments on hand on March 31, 1921, showing also the instruments purchased and sold during the year is given in Appendix No. 5.

Miscellaneous Work

The computations required for determining the latitudes and longitudes of the new sectional sheets issued during the year have been made and the necessary data furnished. In addition, memoranda of all known irregularities of survey in the areas covered by the sheets issued have been prepared.

A new index map was printed showing precise, secondary, meridian and baseline levels run by this branch up to December 31, 1920.

Information was furnished the Air Board of Canada showing latitude, longitude and height above sea-level of aerodromes throughout Canada.

The usual supplies of survey posts were provided. Engraved brass plates for concrete monuments were supplied for the Alberta-British Columbia interprovincial boundary survey. Standard survey posts, short rock survey posts and engraved brass plates for the concrete monuments were designed for the Ontario-Manitoba interprovincial boundary survey. These were suitably inscribed with the names and coats of arms of the respective provinces executed in colours. The various other devices and tools necessary on this survey were also designed and constructed by this division.

A new "Nomogram for Use in Sunlight Engineering" was designed and published. A full description will appear in the April, 1921, number of the *Journal of the Royal Astronomical Society of Canada*, together with a general review of azimuth tables, nomograms, abaci, diagrams, etc., dealing with the same subject.

SURVEYS LABORATORY

The additional space now available at the Surveys Laboratory has made it possible to conduct the work, which continues to grow in volume, much more efficiently. It is gratifying to note in this connection that increasing use is being made of the laboratory by interested persons and by other departments. The various bulletins describing the tests and equipment are in great demand.

Metrology.—The construction of the main portion of the 1^m comparator has been completed and the comparator partly installed. Due to the delay on the part of the contractor and pressure of other work at the laboratory, it has not been possible to make as good progress as was anticipated. Specifications were prepared for two micrometer microscopes of special construction for use with this comparator. Quotations on these microscopes have been received from various optical firms and it is hoped that an order for the microscopes will be placed shortly. Until these are received two of the regular laboratory microscopes will be utilized.

The delivery of the 1^m nickel and 1^m forty-two per cent nickel-steel rules has been further delayed, but the work of verifying these rules at the International Bureau has now been completed and they should be received very shortly.

The 32^m base was verified twenty-seven times with the 4^m rule, and the 4^m rule eleven times with the standard 1^m rule.

The laboratory standard tapes and wires were compared with the base one hundred and thirty-four and forty-four times respectively.

The lengths and weights of sixty-six tapes of all kinds were determined.

A bulletin entitled "Standardization of Measures of Length at the Laboratory of the Dominion Lands Surveys" has been prepared, and is now in the press. This gives a very complete description of the building and apparatus used in verifying measures of length.

Transits, Levels, etc.—The work of this section has increased, particularly in the case of optical tests, due to the number of instruments received from other departments. Tests were made of eighty-four D.L.S. transits, twenty-seven levels, two hundred and ninety-seven aneroid barometers, fifteen surveying cameras, eleven watches, one stornograph, three aeroplane cameras, eleven thermometers, twenty-one level vials, six range-finders, one planimeter, thirty binoculars, and fourteen telescopes and objectives.

Thermometers.—The thermometer-testing apparatus, including the oil-bath comparator, has been installed in one of the new rooms specially fitted for this work.

The distribution of Bulletin No. 45, on the testing of mercury thermometers, has stimulated public interest in the work of this section and a number of thermometers, including clinical thermometers, have been received with requests that they be tested. In this connection it may be pointed out that the Surveys Laboratory is the only one in Canada possessing facilities for the accurate testing of thermometers.

Aneroids.—The aneroid-testing apparatus has been installed in the new quarters. The increased space now available has made it possible to provide additional testing receivers and a greater number of aneroids can be handled without undue delay. Further additional pieces of apparatus have been installed to aid in the testing and experimental work of this section. Among these might be mentioned a mercury air-pump for the complete exhaustion of aneroid diaphragms, a "Ceneo" air-pump for exhausting the receivers, and an automatic apparatus for ageing the aneroids by repeatedly working them over their ranges.

The work of this section would be greatly benefited if it were possible to obtain a small refrigerating outfit for low-temperature tests. The present method of circu-

SESSIONAL PAPER No. 25a

lating ice-water around the receiver, besides being unsuited for the large number of aneroids now dealt with, does not permit of the attainment of the low temperatures at which instruments intended for use in this climate should be tested.

A certain amount of investigation has been conducted with the object of reducing the errors in the indications of the aneroid barometers. The errors considered were those due to hysteresis effect and to defects in the standard design and construction of the mechanism. The results so far obtained in the work appear to be very promising.

SURVEY RECORDS DIVISION

The essential work of the Survey Records Office consists in recording the original plans, field notes and other returns of surveys of Dominion lands and furnishing copies of the same.

This office was at one time a part of the Topographical Surveys Branch but, on account of lack of filing space for the large number of books and plans recorded, it was located in a separate building remote from that occupied by the branch proper. With the addition of other work based upon the information contained in these records the office became a separate branch of the department.

This office is more closely related to the Topographical Surveys Branch than to any other branch in the service, as all original field notes and plans, numbering to date approximately 17,000 and 31,000 respectively, are sent there for record and are being constantly referred to in answering the numerous inquiries about surveys. It was considered advisable both for convenience and in the interest of economy to reunite the records office with this branch, and all the records have accordingly been recently moved to a building adjoining the new quarters in which this branch is now located.

Rearrangement and reorganization of the Survey Records Office is under way. It is proposed to transfer a portion of the work to the Land Patents Branch of the department. This will necessitate the transfer of several members of the staff who are familiar with the work.

The essential work of recording returns of survey and attending to the distribution of plans printed by the Topographical Surveys Branch will be retained. Copies of these plans are sent out to officials whose names are on the mailing lists and the balance of the stock is kept in store for distribution and sale as required.

In connection with the reorganization, arrangements have been made to prepare a new and improved index for all field books and plans recorded or to be recorded in the future.

PHOTOGRAPHIC DIVISION

The staff consists of general photographers and process workers.

Although much delay and inconvenience was occasioned this division by the removal of the branch to new quarters, the output of work by the general photographers shows an increase over that of the previous year. It consisted principally of developing, printing and enlarging, but additional work included the repairing and testing of surveyors' cameras and plate-holders and the indexing of negatives.

The bulk of the work completed was in connection with photo-topographical surveys of Bow River and Clearwater forest reserves and the survey of the boundary between the provinces of Alberta and British Columbia. Photo-enlargements were supplied to the surveyors in charge and extra prints were made and mounted in albums for office reference. More experience in the use of the pocket camera by surveyors in the field resulted in a greater number of negatives being sent in for developing and printing. The photographs continue to show much improvement and add greatly to the value of the surveyors' reports.

12 GEORGE V, A. 1922

Some new work consisting of photographing, printing and tinting relief maps was undertaken and work of an experimental nature was also done in connection with an aerial survey of Ottawa and vicinity. A mosaic map on a scale of 1,000 feet to an inch was compiled and prepared from negatives supplied by the Air Board of Canada.

The delayed installation of the photo-mechanical plant resulted in a decrease in the yearly output of wet-plate process negatives and photo-lithographic plates. In order to cope with the accumulated work reproduction by blue-printing from tracings and Vandyke negatives was resorted to whenever possible. The Vandyke process of zincography was used with varying success. The method of reproducing township plans showing land classification by blue-prints from Vandyke negatives did not give as satisfactory results as the wet-plate process formerly used.

Eight sectional maps, five of which were of the new series, were reproduced for printing. Since the new-style maps are in six colours as compared with three colours on the old-style maps the work of photographing, retouching and printing is more than doubled.

There was an increased demand for line and half-tone etchings for office use and departmental publications and although the division is not thoroughly equipped for such work good service was maintained.

Only during the latter part of the year was the staff in a position to attend to the demands of other branches and departments.

Details and figures of the work executed are given in Appendix No. 4.

LITHOGRAPHIC DIVISION

A comparison with the previous year shows a decrease of about sixty-nine per cent in the output of this division.

This was principally due to the temporary suspension of work occasioned by the removal of the branch to new quarters. The dismantling to facilitate moving, and the setting up again of the printing presses and other apparatus, together with the delay in the transfer and installation of the photo-mechanical plant, which is closely connected with the work of the lithographic office, resulted in this division being idle or not running to capacity for a period of more than four months. There was a decrease in the number of copies of about sixty-one per cent and a decrease of about forty-six per cent in the number of impressions.

The following table shows the costs for the last two years of the lithographic work turned out by this office estimated at Printing Bureau rates, or what it would have cost the Government had this work been done by commercial firms through the Bureau:—

Item	Number printed		Cost at Bureau rates	
	1919-20	1920-21	1919-20	1920-21
			\$ cts.	\$ cts.
Township plans.....	1,020	254	42,251 42	9,223 51
Sectional maps.....	75	49	4,338 79	4,673 82
Sundry jobs.....	940	338	24,230 60	23,855 57
	2,035	641	70,820 81	37,752 90

Adding to this the cost of the paper and percentage for handling allowed by the Bureau (\$6,125.80 and \$4,702.20), gives totals of \$76,946.61 and \$42,455.10, respectively.

Considering the decreases in the number of sectional maps and sundry jobs printed, as compared with the previous year, the cost of these items for 1920-21 is comparatively higher. In the case of sectional maps the high cost is due to the

SESSIONAL PAPER No. 25a

printing of larger stocks and the use of more colours than formerly, particularly on the new-style maps. Of the three hundred and thirty-eight sundry jobs turned out, one hundred and sixty-one were reprints of township plans the majority of which required from two to five colours, thus increasing greatly the number of impressions and consequently the cost. Sundry jobs also included forty-one miscellaneous maps many of which required several colours.

The statement given below is an estimate of the cost of maintenance of this division such as would be prepared by a private firm engaged in this kind of work; it includes such items as interest, depreciation, and other overhead charges which are not actually paid by the Government. The saving to the Government is shown in the statement.

	1919-20		1920-21	
	\$	cts.	\$	cts.
Process Photographers—				
Chemicals, zinc, glass, stationery, etc.....	1,260	86	1,405	96
Rent.....	562	50	1,215	00
Power and light.....	127	84	115	06
Heating, cleaning, fireman, caretaker, etc.....	310	00	310	00
Interest and depreciation.....	577	25	577	25
Insurance.....	12	51	12	51
Salaries.....	10,715	93	6,445	61
	13,566	89	10,081	39
Less one-third for time on other than lithographic work.....	4,522	30	3,360	46
Total.....	9,044	59	6,720	93
Lithographers—				
Supplies.....	1,630	07	1,612	56
Rent.....	875	00	1,890	00

Paper.....	6,125	80	4,702	20
Interest and depreciation.....	2,772	61	2,772	61
Insurance.....	60	07	60	07
Wages.....	13,642	27	16,255	20
Total.....	25,271	84	27,442	06
SUMMARY				
Process Photographers.....	9,044	59	6,720	93
Lithographers.....	25,271	84	27,442	06
Total.....	34,316	43	34,162	99
Value of work at Bureau rates.....	76,946	61	42,455	10
Saving.....	42,630	18	8,292	11

It will be observed from the above schedule that the cost of maintenance of the division varies little from year to year as the staff generally remains the same and the amount of paper used from year to year is fairly uniform.

The difference for the two years of more than \$34,000 in the value of work at Bureau rates is partly due to the long period of enforced idleness of the lithographic plant during the year 1920-21. It is also partly due to the fact that for different reasons there was a decrease of approximately seventy-five per cent, as compared with the previous year, in the number of township plans printed. It is a peculiarity of the work of our lithographic office that for plans and maps, which constitute the greater part of the output, the number printed is large while the number of copies of each is small. Commercial firms are not equipped for doing this work as economically as it can be done in this branch.

GEOGRAPHIC BOARD

The Geographic Board, of which the secretary is an officer of the Department of the Interior, published in book form lists of Micmac place-names recorded by Rev. Dr. Silas T. Rand, who spent over forty years, from 1849 till his death in 1890, as a Baptist missionary among the Micmac Indians of the Maritime Provinces. The names were arranged and indexed by Lieut.-Colonel W. P. Anderson, C.M.G., F.R.G.S., a member of the board, and the book was photo-lithographed from typed manuscript and printed at the Surveyor General's office.

During the year Mr. E. V. Johnson, representative of the Department of Railways and Canals, resigned from the board on retirement from the public service and was replaced by Mr. H. LeBreton Ross.

BOARD OF EXAMINERS FOR DOMINION LAND SURVEYORS

The Board of Examiners for Dominion Land Surveyors held two meetings.

The first was a special meeting lasting from May 3, 1920, to June 15, 1920, during which examinations were held at Ottawa, Montreal, Winnipeg, Calgary and Edmonton.

The second was the regular annual meeting called for by section 9 of the Dominion Lands Survey Act. It began on February 14, 1921, and lasted until March 17, 1921. During this meeting examinations were held at Ottawa, Winnipeg, Calgary, Edmonton and Vancouver.

The total number of candidates who presented themselves at the examinations was eighty-five. Of these, forty tried the preliminary examination, sixteen tried the final examination, twenty-eight tried the leveller's examination, and one tried the examination for Dominion topographical surveyors.

Four candidates were successful at the preliminary examination, as follows:—

Davis, Sydney Herbert, Ottawa, Ont.

Haney, Reuben John, Regina, Sask.

Lewis, David Joseph, Ottawa, Ont.

Radley, Percy Edward, Ottawa, Ont.

Seven candidates were successful at the final examination, as follows:—

Gammon, Albert Osborne, Ottawa, Ont.

Lawrence, Charles Albert Rutter, Ottawa, Ont.

MacDonald, Leslie Stuart, Ottawa, Ont.

McDonald, John Nicholson, Ottawa, Ont.

Roe, Bertie James, Ottawa, Ont.

Underhill, Frederick Clare, Vancouver, B.C.

Underhill, James Theodore, Vancouver, B.C.

Thirteen candidates were successful at the leveller's examination as follows:—

Bryden, Richard Burns, Edmonton, Alta.

Butchart, Harold Tremayne, Edmonton, Alta.

Cameron, John Albert, Calgary, Alta.

Denmark, Donald Ernest, Winnipeg, Man.

Forward, Frank Arthur, Ottawa, Ont.

Fraser, Arthur, Calgary, Alta.

Greenwood, Howard Fraser Stewart, Edmonton, Alta.

Haw, John Leonard, Edmonton, Alta.

Jewitt, William Gladstone, Edmonton, Alta.

Lawrence, Charles Albert Rutter, Ottawa, Ont.

Lebourveau, Homer B., Calgary, Alta.

Patterson, William Bennett, Winnipeg, Man.

Trueman, James Cobden, Winnipeg, Man.

SESSIONAL PAPER No. 25a

One candidate was successful at the examination for Dominion topographical surveyors, namely:—

Montgomery, Royal Harp, Calgary, Alta.

The time of the board during the meetings was largely taken up with the reading and valuation of the candidates' answer papers; complete sets of question papers to be used at the following examination were also prepared. In addition to this the evidence submitted by candidates at the final examination, in proof of their eligibility therefor, had to be examined. This evidence consisted of certificates of provincial land surveyors and of affidavits of service under articles of apprenticeship. The finished plans and notes as well as the plans and notes executed under field conditions, furnished by the candidates at the final examination, had also to be examined and valued.

Nine commissions were issued to candidates who had passed the final examination and had furnished oaths of office and allegiance and bonds for the sum of one thousand dollars, as required by section 25 of the Dominion Lands Surveys Act.

Five certificates of preliminary examination were issued to successful candidates who had complied with the requirements of the law.

Sixteen certificates as levellers were issued to candidates who had successfully passed the examination.

One certificate of Dominion topographical surveyor was issued to a candidate who had successfully passed the examination and complied with the requirements of the law.

Mr. R. H. Montgomery, D.T.S., was appointed a presiding examiner by Order in Council in accordance with section 12 of the Dominion Lands Surveys Act, and is therefore qualified to conduct examinations for Dominion land surveyors at any centre where the board may direct.

Section 35 of the Dominion Lands Surveys Act provides that every Dominion land surveyor shall be in possession of a subsidiary standard of length, and that such standards are to be tested by the department at least once every four years.

Moreover, it was found that the graduations on the old style of standard measures, possessed by a great many surveyors, were too coarse to permit of the fine and delicate tests which are applied to these instruments from time to time at the departmental laboratory. In consequence of this the Dominion land surveyors who were actively engaged on surveys of Dominion lands were invited to provide themselves with standard measures of a new and approved pattern, the price of which is at present \$10. Surveyors who sent in their old standard measures were furnished with new ones upon the payment of \$2, the difference in price between the old and new tapes.

During the year fifty new standard measures were issued to surveyors: twelve of these were secured by Mr. T. S. Gore, D.L.S., secretary of the Association of British Columbia Land Surveyors, to be distributed to British Columbia land surveyors. Fourteen Dominion land surveyors sent in their old measures in exchange for the new style of tape approved by the department. Seven surveyors already in possession of approved standards sent them in to be tested. Three standards were also inspected by the staff of the laboratory; one was found to be in good condition, while the other two were condemned as obsolete. One duplicate certificate of test was issued to a surveyor who had lost the original document.

On December 15, 1920, the Secretary of the Board of Examiners for Dominion Land Surveyors was appointed Secretary of the Instrument Committee of the Department of the Interior. This committee is made up of the following:—

Chairman—

R. J. Burley, Reclamation Service.

Members—

A. M. Beale, Dominion Water Power Branch.
D. F. Blyth, Supply and Stationery Branch.
J. D. Craig, International Boundary Commission.
G. B. Dodge, Topographical Surveys Branch.
A. Gorman, Forestry Branch.
T. S. Mills, Dominion Parks Branch.
J. L. Rannie, Geodetic Surveys.
Thos. Shanks, Assistant Surveyor General, Topographical Surveys Branch.
R. M. Stewart, Assistant Director, Dominion Observatory.

Secretary—

J. Aurele Côté, Topographical Surveys Branch.

The object of this committee is to consider the purchase of all scientific instruments and apparatus in connection with the engineering and surveying requirements of the Department of the Interior, to see that the best conditions are taken advantage of both as regards prices and the quality and standard of the instruments, and to recommend to the deputy minister the purchases from certain specified firms.

When any of the branches require instruments, the secretary is notified and furnished with details and specifications. He then calls for sealed tenders from reliable firms who deal in such instruments and tabulates the tenders when they are received, in order that they may be expeditiously considered by the members of the committee. A meeting is then called at which the committee discusses the different tenders, and recommends that the purchase be made from the firm offering the most advantageous terms. The secretary must notify the members and make arrangements for all the meetings, keep the minutes of these meetings and furnish copies of all the transactions to the deputy minister and the different members. During the three and one-half months from December 15, 1920, to April 1, 1921, five meetings were held, 240 letters were received, and 1,125 letters, circulars and notices were sent out.

The secretary of the board also assisted Mr. E. W. Hubbell, D.L.S., Chief Inspector of Surveys, in the preparation of a pamphlet describing in detail a section of northern Alberta surrounding Fort Vermilion and comprising some 14,000 square miles. The work of compiling and editing this pamphlet is now almost completed.

On April 29, 1920, the Secretary of the Board of Examiners for Dominion Land Surveyors moved from the Imperial Building, 138 Queen street, to new offices at 130 Wellington street.

The board room, which was formerly located in the secretary's office in the Imperial Building, is now situated at 130 Wellington street.

SESSIONAL PAPER No. 25a

APPENDIX No. 1

AREA OF SURVEYED LAND IN MANITOBA, SASKATCHEWAN, AND ALBERTA

Period	Acres	Number of Farms of 160 Acres each

APPENDIX No. 2

SCHEDULE of surveyors employed and work executed by them:—

Akins, J. R., Ottawa, Ont.—

Topographical mapping for the revision of the Rosebud sectional map, comprising townships 25 to 32, ranges 16 to 29, west of the Fourth meridian, and of the easterly portion of the Calgary sectional map, comprising townships 17 to 24, ranges 1 to 4, west of the Fifth Meridian. Correction survey in tp. 29-21-4. Traverse in tp. 29-21-4; tp. 30-21-4.

Alexander, J. B., Calgary, Alta.—

Secondary levels along the 10th base line across ranges 23 to 28, west of the Fourth meridian and along the 12th base line from the Fourth meridian to the Fifth meridian, 201 miles.

Bennett, G. A., Tillsonburg, Ont.—

Stadia surveys in tp. 31-17-Pr.; tps. 26 to 31-18-Pr.; tps. 27 to 37-19-Pr.; tps. 27 to 30, 33 to 35 and 37-20-Pr.; tps. 27 to 30-21-Pr.; tps. 27 to 33-22-Pr.; tps. 26 to 30 and 32 to 35-23-Pr. Retracement in tps. 35 and 37-20-Pr. Investigation of settlement and subdivision surveys in tps. 35, 36 and 37-19-Pr.

Berry, E. W., Calgary, Alta.—

Secondary levels along the east boundary of range 13, west of the Third meridian, from the international boundary to township 27, 165 miles.

Blanchet, G. H., Ottawa, Ont.—

Survey of the east outline of tp. 53-30-Pr. and of part of the east outline of tp. 54-30-Pr., being a portion of the boundary between the provinces of Manitoba and Saskatchewan. Part subdivision for the Soldier Settlement Board, in Riding Mountain forest reserve, of tp. 19-18-Pr.; tps. 19 and 20-19-Pr.; tp. 19-20-Pr. Retracement in tp. 17-18-Pr.; tp. 20-20-Pr.; tp. 41-3-3; tp. 39-4-3. Establishment of corners in tp. 44-21-2.

Boulton, W. J., Wallaceburg, Ont.—

Topographical mapping for the revision of the Moose Jaw sectional map, comprising townships 9 to 16, from range 16 west of the Second meridian westerly to the Third meridian, and of the Regina sectional map, comprising townships 17 to 24, from range 16 west of the Second meridian westerly to the Third meridian. Stadia survey in tp. 20-20-2; tp. 22-27-2.

Bowman, E. P., West Montrose, Ont.—

Exploration and the establishment of a line of control by stadia traverse of the larger lakes and connecting rivers and streams in northern Manitoba from a point where the 18th base line intersects the easterly shore of Setting lake in tp. 68-9-Pr. northeasterly to the east boundary of tp. 84-11-E.

Brenot, L., Ottawa, Ont.—

Investigation and classification of land for general settlement in fifty-three townships adjacent to the Sixth meridian, east of Grande Prairie, Alta.

Bridgland, M. P., Calgary, Alta.—

Photo-topographical survey of portions of the Bow River and Clearwater forest reserves in tps. 31 to 34-8-5; tps. 31 to 35-9-5; tps. 31 to 35-10-5; tps. 31 to 35-11-5; tps. 32 to 35-12-5; tp. 28-14-5. Stadia surveys in tps. 33 and 34-8-5; tps. 32 and 33-9-5; tp. 32-10-5; tp. 32-11-5.

Calder, J. A., Ashcroft, B.C.—

Subdivision in tp. 22-21-6; tp. 12-28-6; tp. 3-29-6; tp. 16 E.C.M. Traverse in tp. 20-25-6; tp. 3-28-6. Delimitation of the north limit of the railway belt in tp. 6-30-6; tp. 7-30-6. Survey of lots for the Soldier Settlement Board and location of right of way for logging railway in tp. 2 W.C.M. Investigation in tp. 12-26-6.

Cautley, R. W., Edmonton, Alta.—

Preliminary survey of a portion of the 120th meridian (interprovincial boundary) being the west boundaries of townships 67 to 73 and part of the west boundary of township 66. Traverse in tp. 70-13-6; tp. 70-14-6.

Christie, W., Prince Albert, Sask.—

Clearing of land by controlled fires in tps. 42 and 43-7-2; tps. 42 and 43-8-2. Stadia surveys in tps. 50 and 51-24-2; tps. 49 to 52-25-2; tps. 49, 51 and 52-26-2; tps. 48 to 52-27-2; tps. 48 to 51-28-2; tps. 45, 46, 48 and 49-1-3; tps. 45, 46 and 48 to 50-2-3; tps. 45, 46, 48, 49 and 51-3-3; tps. 49, 51 and 52-4-3; tps. 48 to 52-5-3; tps. 49 to 52-6-3.

SESSIONAL PAPER No. 25a

Cowper, G. C., Ottawa, Ont. —

Stadia surveys in tps. 1 and 2-18-4; tps. 1 to 4-19-4; tps. 1 to 4-20-4; tps. 1 to 4-21-4; tps. 1 to 4, 6 and 7-22-4; tps. 1 to 6-23-4; tps. 1 to 5 and 7-24-4; tps. 1 to 7-25-4; tps. 1 to 3 and 5 to 7-26-4; tps. 1 to 6-27-4; tps. 1 to 7-28-4; tps. 1 to 9-29-4; tps. 3 to 8-30-4; tps. 4 to 10-1-5; tp. 6-2-5.

Cumming, A. L., Cornwall, Ont.—

Clearing of and by controlled fires in tp. 43-8-2; tp. 43-9-2. Retracement and resurvey in tps. 21 and 22-1-Pr.; tp. 24-12-Pr.; tp. 35-23-Pr.

Davies, T. A., Ottawa, Ont.—

Stadia surveys in tp. 56-23-4; tp. 53-25-4; tps. 51, 52 and 53-26-4; tps. 52 and 53-27-4; tps. 52 and 53-28-4; tps. 52 and 53-1-5; tps. 52 and 53-2-5. Miscellaneous survey in tp. 45-1-6. Correction survey in tp. 49-23-4. Survey of additional lots and establishment of lot corners at Jasper, Alta., in tp. 45-1-6.

Dozois, L. O. R., Calgary, Alta.—

Precise levels along the Canadian Pacific railway from Eyebrow to Moose Jaw; along the Canadian Pacific railway from Weyburn easterly to Flindlay Crossing, thence along the Canadian National railway southeasterly via Hartney and Minto to Hartney Junction, thence northwesterly to Brandon. Total—305 miles.

Evans, S. L., Corinth, Ont.—

Examination and classification of land for soldier settlement in eighty-three townships in the St. Paul de Metis district, from range 1 to range 17 west of the Fourth meridian.

Faweett, S. D., Ottawa, Ont.—

Settlement surveys at Patunak, Bélanger, Stanley, La-Ronge and Ile-à-la-Crosse, in the Churchill river basin, in northern Saskatchewan.

Fletcher, W. A., Barrie, Ont.—

Investigation of land and clearing of portions by controlled fires in tps. 73 and 74-2-6; tps. 73 and 74-3-6. Stadia surveys in tp. 23-4-Pr.; tps. 18 to 20, 22 and 23-5-Pr.; tps. 19 to 23 and 32-6-Pr.; tps. 20 to 24 and 32-7-Pr.; tps. 21, 22 and 24-8-Pr.; tps. 22, 23 and 31-9-Pr.; tp. 22-10-Pr. Retracement surveys in tp. 14-3-E.; tps. 22 and 24-7-Pr.; tp. 24-8-Pr.; tp. 31-9-Pr.

Fontaine, L. E., Quebec, P.Q.—

Part subdivision of tp. 107-13-5; tp. 110-13-5; tp. 109-14-5; tp. 110-14-5; tp. 109-15-5. Stadia traverse in tp. 110-15-5.

Glover, A. E., Edmonton, Alta.—

Part subdivision of tps. 74, 75 and 76-1-E.; tps. 75 and 76-2-E.; tps. 76 and 77-3-E.; tps. 73 and 74-1-Pr.

Hardouin, J., Ottawa, Ont.—

Subdivision of tp. 55-26-2. Part subdivision of tp. 53-23-2; tp. 54-26-2; tp. 53-1-3; tp. 53-2-3; tp. 53-3-3; tp. 53-4-3. Stadia traverse in tp. 52-2-3; tp. 54-4-3.

Herriot, G. H., Winnipeg, Man.—

Topographical mapping for the revision of the Emerson sectional map, comprising townships 1 to 8, ranges 1 to 11, east, and ranges 1 to 4, west of the Principal meridian, and of a portion of the Dufferin sectional map, comprising townships 1 to 8, ranges 5 to 9, west of the Principal meridian.

Hutchkiss, C. P., Ottawa, Ont.—

Part subdivision of tps. 108 and 109-7-5; tps. 107 and 108-8-5. Stadia traverse in tp. 109-6-5.

Johnston, W. J., Vancouver, B.C.—

Survey of lots for the Soldier Settlement Board and location of right of way for a logging railway in tp. 2 W.C.M. Survey of lots in tp. 5-7-7. Investigation in tp. 19 E.C.M.

Knight, R. H., Edmonton, Alta.—

Investigation of land and clearing of portions by controlled fires in tps. 81 and 82-19-5; tps. 81, 82 and 83-20-5; tps. 82 and 83-21-5. Part subdivision of tps. 74 and 75-12-6; tps. 73 to 76-13-6; tp. 74-14-6.

LeBlanc, P. M. H., Ottawa, Ont.—

Stadia surveys in tps. 30 to 37-1-2; tps. 31 to 37-2-2; tps. 30 to 37-3-2; tps. 31 to 38-4-2; tps. 31 to 38-5-2; tps. 31 to 37-6-2; tps. 31 to 34 and 37-7-2; tps. 30 and 31-8-2; tp. 30-9-2; tp. 30-10-2; tps. 30 and 31-11-2; tps. 29 and 30-12-2; tps. 29 and 30-15-2; tps. 28, 29 and 30-16-2. Retracement in tp. 37-5-2; tps. 33 and 34-6-2. Survey of cemetery in southeast quarter of section 36, tp. 31-2-2.

12 GEORGE V, A. 1922

Loneragan, G. J., Buckingham, P.Q.—

Supervision of the clearing of lands by controlled fires in Porempine forest reserve by survey parties under A. L. Cumming, D.L.S., and W. Christie, D.L.S. Inspection of survey parties under the following Dominion Land Surveyors:—On subdivision—J. A. Calder, R. H. Knight, W. H. Norrish, H. E. Pearson, N. C. Stewart, J. Vicars. On stadia surveys—W. Christie. On the survey of the Alberta-British Columbia boundary—R. W. Cautley.

Martindale, E. S., Aylmer, Ont.—

Retracement in tp. 48-1-E.; tp. 28-5-E.; tp. 22-8-E.; tp. 26-9-E.; tp. 48-1-Pr.; tp. 15-3-1r.; tp. 6-25-1r.; tp. 7-25-Pr.; tp. 6-26-Pr.; tp. 28-31-1r.; tp. 20-17-3; tp. 24-23-3; tp. 23-24-3; tp. 24-24-3; tp. 23-25-3; tp. 24-25-3. Correction survey in tp. 7-17-E.; tp. 8-17-E.; tp. 20-1-2. Retracement and correction surveys in tp. 25-9-E.; tp. 15-2-Pr.; tp. 16-5-2; tp. 19-5-2. Stadia surveys in tp. 14-2-Pr.; tp. 25-16-2. Mounding in tp. 19-4-E.; tp. 32-32-Pr. Investigation in tp. 9-26-1r.; tp. 9-27-Pr. Survey of historical site in tp. 32-32-Pr. Survey of lots at Sandy Lake in tp. 18-20-Pr. Survey of settlement lots and location of road on Matheson island in tp. 32-4-E.

Melhuish, P., Vancouver, B.C.—

Stadia surveys in tps. 53 to 55-24-4; tps. 53 to 55-25-4; tp. 54-26-4; tps. 53 to 55-27-4; tps. 53 and 54-28-4; tps. 53 and 54-1-5.

Montgomery, R. H., Calgary, Alta.—

Secondary levels along the 5th base line from the east boundary of range 13, west of the Third meridian, to the Fifth meridian—277 miles.

Macdonald, C. S., Ottawa, Ont.—

Investigation and classification of lands for general settlement in the area surrounding Waterhen lake and river and extending southeasterly along the north and east shores of lake Manitoba.

McCloskey, M. D., Ottawa, Ont.—

Investigation and classification of lands for soldier settlement in fifty-two townships north of Prince Albert, Sask.

McGarry, P. J., Merrittton, Ont.—

Stadia surveys in tps. 23 to 26-10-Pr.; tps. 23 to 27-11-Pr.; tps. 24 to 28-12-Pr.; tps. 23 to 28-13-Pr.; tps. 23 to 26-14-Pr.; tps. 23 to 26, 29, 30, 34 and 35-15-Pr.; tps. 23 to 26, 30, 34 and 35-16-Pr.; tps. 23 to 26-17-Pr.; tps. 24 to 26-18-Pr.; tps. 17 and 24 to 26-19-1r.; tps. 17 and 26-20-Pr.; tp. 18-21-Pr.; tps. 18 to 20-26-Pr.; tps. 19 and 20-27-1r. Retracement in tp. 25-11-1r.; tp. 26-12-Pr.; tp. 25-14-Pr.; tp. 26-16-Pr. Subdivision in tp. 34-15-Pr.; tp. 34-16-Pr.

McKay, R. B., Vancouver, B.C.—

Retracement of the Second meridian through townships 11 to 24; the 3rd correction line through ranges 33 and 34 west of the Principal meridian; the 4th correction line through ranges 31 to 34 west of the Principal meridian; the 5th, 6th and 7th correction lines through ranges 31 to 33 west of the Principal meridian and the 4th base line through ranges 32 to 34 west of the Principal meridian.

Narraway, A. M., Ottawa, Ont.—

Inspection of survey parties under the following Dominion Land Surveyors:—On base line surveys—B. W. Waugh. On subdivision—G. H. Blanchet, L. E. Fontaine, A. E. Glover, J. Hardouin, C. P. Hotchkiss. On stadia surveys—G. A. Bennett, E. P. Bowman, W. Christie, G. C. Cowper, T. A. Davies, P. M. H. LeBlanc, P. Melhuish, P. J. McGarry, C. Rinfret, C. H. Taggart, C. M. Walker. On topographical surveys—J. R. Akins, W. J. Boulton, G. H. Herriot, P. E. Palmer, J. W. Pierce. On land classification surveys—L. Brenot, S. L. Evans, C. S. Macdonald, M. D. McCloskey. On levelling—J. B. Alexander, E. W. Berry, L. O. R. Dozois, R. H. Montgomery, H. E. Read. On retracement and resurveys—A. L. Cumming, R. B. McKay.

Norrish, W. H., Guelph, Ont.—

Survey of the 19th base line through ranges 13 and 14 west of the Sixth meridian. Part subdivision of tps. 69, 70 and 71-13-6; subdivision of tp. 72-13-6; tps. 71 and 72-14-6. Stadia surveys in tp. 73-12-6; tp. 73-13-6.

Palmer, P. E., Ottawa, Ont.—

Topographical mapping for the revision of the Brandon sectional map comprising townships 9 to 16, ranges 5 to 19, west of the Principal meridian, and of a portion of the Dufferin sectional map comprising townships 1 to 8, ranges 10 to 19, west of the Principal meridian.

Pearson, H. E., Edmonton, Alta.—

Part subdivision of tps. 77 and 78-13-5; tp. 85-4-6; tp. 82-5-6; tps. 87 and 88-10-6. Stadia surveys in tp. 78-14-5.

SESSIONAL PAPER No. 25a

Pierce, J. W., Ottawa, Ont.—

Topographical mapping for the revision of the Red Deer sectional map, comprising townships 33 to 40 from range 15 west of the Fourth meridian, westerly to the Fifth meridian, and of the Peace Hills sectional map, comprising townships 11 to 48 from range 15 west of the Fourth meridian westerly to the Fifth meridian. Stadia surveys in tps. 42 and 44-21-4; tp. 13-22-4; tps. 41 and 43-23-4; tp. 11-27-1.

Parser, R. C., Ottawa, Ont.—

Resurvey of the 8th correction line across ranges 27, 28 and 29 west of the Fourth meridian and across range 1 west of the Fifth meridian. Retracement in tp. 31-1-5; tp. 52-1-5. Retracement and miscellaneous surveys in tp. 26-5-3; tp. 61-12-1. Renewal of monuments on part of east outline of tp. 48-1-6. Investigation of lakes in tp. 25-1-4; tp. 34-11-4. Survey of coal areas in tps. 16 and 47-23-5.

Read, H. E., Calgary, Alta.—

Secondary levels along the 6th base line from the east boundary of range 13 west of the Second meridian to the east boundary of range 6, west of the Third meridian, thence north along the east boundary of township 21, thence west along the north boundary of township 21 to the east boundary of range 13, west of the Third meridian. Along the 5th base line across ranges 13 and 14 west of the Second meridian. Total—190 miles.

Reinfret, C., Ottawa, Ont.—

Stadia surveys in tps. 1 to 8-1-2; tps. 1 to 8-2-2; tps. 1 to 5, 7 and 8-3-2; tps. 1 to 8-4-2; tps. 1 to 6 and 11 to 13-5-2; tps. 1 to 6 and 12-6-2; tps. 1 to 6-7-2; tps. 1 to 6-8-2; tps. 1 to 6-9-2; tps. 1 to 6-10-2; tps. 1 to 6-11-2; tps. 1 to 6-12-2; tps. 1 to 6-13-2; tps. 1 to 6-14-2; tps. 1 to 6-15-2; tps. 1 to 6-16-2; tps. 1 to 6-17-2; tps. 1 to 6-18-2. Subdivision in tp. 3-13-2. Retracement in tp. 15-4-2; tp. 5-18-2.

Seibert, F. V., Edmonton, Alta.—

Supervision of survey parties in charge of R. H. Knight, D.L.S., and W. A. Fletcher, D.L.S., engaged on the clearing of land by controlled fires, and investigation of lands for future clearing in the Peace River district.

Stewart, N. C., Vancouver, B.C.—

Subdivision of tp. 74-1-6. Part subdivision in tp. 74-26-5; tps. 75 and 76-1-6; tp. 77-3-6. Survey of road diversions for highway across proposed Birch Hills forest reserve in tp. 77-3-6.

Taggart, C. H., Kamloops, B.C.—

Stadia surveys in tps. 50 and 53-7-3; tps. 44 to 46-12-3; tps. 44 to 46-13-3; tps. 41 to 45-11-3; tps. 41 to 45-15-3; tps. 41 to 45-16-3; tps. 41 to 44-17-3; tps. 41 to 44-18-3; tps. 41 to 44-19-3; tps. 12 to 44-20-3. Retracement in tp. 43-16-3.

Vicars, J., Kamloops, B.C.—

Subdivision surveys in tps. 22 and 23-8-6; tps. 22 and 23-9-6; tp. 22-10-6; tp. 22-11-6; tps. 16 and 21-14-6; tp. 21-15-6; tp. 17-18-6; tps. 17, 21 and 22-19-6; tp. 17-20-6. Stadia surveys in tp. 22-18-6. Delimitation of the south limit of the railway belt in tp. 17-18-6; tp. 17-19-6; tp. 17-20-6.

Walker, C. M., Banff, Alta.—

Stadia surveys in tp. 55-1-4; tps. 54 to 56-2-4; tps. 54 to 56-3-4; tps. 54 to 58 and 63-4-4; tps. 53 to 58 and 63-5-4; tps. 54 to 57-6-4; tps. 54 to 58-7-4; tps. 53 to 57-8-4; tps. 53 to 59-9-4; tps. 53 and 54-10-4; tps. 61 and 63-11-4. Retracement in tp. 58-9-4.

Waugh, B. W., Ottawa, Ont.—

Survey of the 18th base line across ranges 17 to 29 west of the Principal meridian and ranges 1 and 2 west of the Second meridian. Exploratory survey for mapping purposes of the country adjacent to the portion of the 18th base line surveyed.

APPENDIX No. 3

SCHEDULE showing for each surveyor employed the number of miles surveyed of section lines, township outlines, traverses of lakes and rivers, and resurvey; also the cost of the same. Surveyors whose work cannot be reckoned in miles are omitted from the statement.

Surveyor	Miles of Section	Miles of Outline	Miles of Traverse	Miles of Resurvey	Total Mileage	Total Cost	Cost per mile
						\$ cts.	\$ cts.

AUTHORITY AND MEMBERSHIP OF THE GEOGRAPHIC BOARD.

The Geographic Board was created by order in council of the 18th December, 1897. The order directs that all questions concerning geographic names in the Dominion which arise in the departments of the public service shall be referred to the Board, and that all departments shall accept and use in their publications the names and orthography adopted by the Board.

According to the original order, the Board was to consist of one member for each of the departments of the Geological Survey, Railways and Canals, Post Office and Marine and Fisheries, such members to be appointed by the ministers, of the Surveyor General of Dominion lands, of such other members as might, from time to time, be appointed by order in council, and of a secretary. The Geological Survey, Railways and Canals, Militia and Defence, Marine and Fisheries, Naval Service, Archives and Interior Departments are actually represented on the Board; the place of the Post Office Department is vacant.

By order in council of the 14th of December, 1899, each province was invited to appoint a representative on the Board, and all the provinces, except Manitoba, are now represented. All names are submitted to the provincial representative concerned for advice and report, before being dealt with by the Board.

A further Order in Council grants the Board authority to investigate and advise upon geographic questions arising in the departments of the public service such as the compilation of new maps, the avoiding of duplication where good maps already exist, the selection, unification, and improvement of scales, the uniformity of symbols and conventional signs, the representation of relief, the use of colours, the methods of reproduction and other cognate subjects.

The present membership of the Board is as follows:—

Chairman

E. DEVILLE, LL.D., F.R.S.C., Surveyor General of Dominion Lands.

Executive Committee

D. B. DOWLING, D.Sc., F.R.S.C., Geologist, Geological Survey, Department of Mines.

C. O. SENÉCAL, C. E., B.A.Sc., Geographer and Chief Draughtsman, Geological Survey, Department of Mines.

JAMES WHITE, F.R.G.S., F.R.S.C., Assistant to Chairman, and Deputy Head, Commission of Conservation.

Members

Lieut.-Col. WM. P. ANDERSON, C.M.G., M. Inst. C.E., F.R.G.S., Department of Marine and Fisheries.

W. H. BOYD, Chief Topographer, Geological Survey, Department of Mines.

J. E. CHALIFOUR, Chief Geographer, Department of the Interior.

Major J. B. COCHRANE, M. Inst. C.E., Assistant Director of Military Surveys, Militia Department.

A. G. DOUGHTY, C.M.G., Litt. D., Dominion Archivist and Deputy Head.

H. LEBRETON ROSS, C.E., Archivist, Department of Railways and Canals.

W. J. STEWART, M. Inst. C.E., Chief Hydrographer, Department of the Naval Service.

12 GEORGE V, A. 1922

Provincial Representative Members

(Order in council, 14th December, 1899.)

Ontario—

L. V. RORKE, Director of Surveys, Department of Lands and Forests,
Toronto, Ont.

Quebec—

EUGÈNE ROUILLARD, F.R.S.C., Quebec Geographic Board, Quebec, Que.

New Brunswick—

WM. S. CARTER, M.A., LL.D., Superintendent of Education, Fredericton,
N.B.

Nova Scotia—

A. H. MacKAY, B.A., LL.D., F.R.S.C., Superintendent of Education,
Halifax, N.S.

Prince Edward Island—

HON. WALTER M. LEA, Provincial Secretary (ex-officio), Charlottetown,
P.E.I.

British Columbia—

WM. FLEET ROBERTSON, B.A.Sc., Mining Engineer, Provincial Mineralogist,
Victoria, B.C.

Alberta—

L. C. CHARLESWORTH, Chairman, Irrigation Council, Edmonton, Alberta.

Saskatchewan—

JOHN WILLIAM McLEOD, Clerk of the Executive Council, Regina.

Secretary

R. DOUGLAS, M.A., Department of the Interior.

INTRODUCTION.

The present report of the Board contains the decisions since April 1, 1919, and like its predecessor the sixteenth, which contained the decisions from April 1, 1917, to March 31, 1919, is a supplement to the fifteenth report, which contained all the decisions from the formation of the Board to March 31, 1917.

During the period covered by the present report, a great portion of the work done by the Board has been on references from the various map-making departments of the Dominion Government as well as from the similar organizations of the Provincial governments.

Naming peaks of the Rocky Mountains

Through the Interior Department lists of names were submitted in connection with the British Columbia—Alberta Boundary Survey, the supervision of the mountain nomenclature on which has been an interesting phase of the Board's work in recent years. The survey began in 1913 and has now been completed from the United States frontier at the 49th degree of latitude as far north as the Yellowhead pass in latitude 53°.

The boundary follows the watershed line of the Rocky mountains which divides the waters flowing to the Pacific ocean from those flowing elsewhere, to the most northerly crossing of the 120th meridian and thence along the meridian to the 60th degree of latitude.

The early travellers through the mountains named many peaks on their journeys. The identification of these from their written descriptions has sometimes presented difficulties. All distinctive early names have been retained. Names, however, required to be provided for a large number of unnamed peaks. The Board has endeavoured to incorporate the history of Canada in the new names given and, in the designations approved, preference has been given to those of early explorers, traders, travellers and other pioneers, and to those of men and places associated with Canada's part in the world war. The total number of named peaks shown on the boundary maps as far as surveys have gone is well over 200.

Both the Geological Survey and the Department of the Naval Service submitted lists of names in connection with the mapping work resulting from the explorations of and discoveries of new Canadian territory by the Canadian Arctic Expedition, 1913-18.

Duplication of lake names in Nova Scotia

Unlike other provinces, Nova Scotia is burdened with a host of Long lakes and Grand lakes, the latter designation being used in the French sense of "big". The best way to deal with this duplication was considered, in connection with the preparation of a series of maps submitted to the Board by the Department of Militia and Defence. It was pointed out that it would cause confusion locally to drop the word "Long" at once and that if any improvement was to be secured it would have to be introduced gradually. The Board, therefore, recommended the retention of the name Long, but with the addition of a prefix, the name Long further to be bracketed. It is hoped it may eventually be possible to drop it entirely. The prefixes to be preferred in such cases are firstly, those of the locality or of the river draining the lake and secondly, those of residents in the districts. Thus new maps of Halifax county will show a Bennery (Long) lake, a Salmon River (Long) lake, a Kinsack (Long) lake and many others. The circulation of these maps should do much to hasten the everyday use of the new names without the "Long".

12 GEORGE V, A. 1922

Rulings on names on the Manitoba—Dakota boundary were given in connection with the survey of the International boundary.

A proposal was submitted to name the falls in the Rideau river, Carleton county, Ontario, at Hogsback in commemoration of the visit of the Prince of Wales. The Board thought that a more appropriate feature would be the Ottawa—Prescott road. This suggestion was found acceptable to His Royal Highness and to the Ontario Government and was carried into effect.

An example of the confusion that careless nomenclature causes came to the notice of the Board from British Columbia. South of Windermere lake was the railway station called Radium. The post office name was Fairmont Springs. North of the lake at Sinclair creek was the railway station of Firlands (where, by the way, there were no fir trees). The post office name was Radium Hot Springs. The result was that mail for Radium went to Radium Hot Springs and freight for Radium Hot Springs went to Radium. The Board first suggested that the names Firlands and Radium Hot Springs be cancelled, substituting for both the name Sinclair, which was that of the post office prior to February, 1915, the name of Radium station to be changed to Fairmont at the same time. It was found, however, there was already a Sinclair station in Manitoba and the railway company had an agreement with the Radium town-site, which prevented a change of name. The Board finally recommended that the Post Office Department change the name of Radium Hot Springs to some other designation.

Report on map-making

Other activities of the board included a report on map-making in the departments of the Dominion Government prepared at the request of the Joint Committee on Parliamentary Printing.

A set of rules was also prepared for the guidance of the translator of the reports and other publications of the Board, the existence of two official languages in Canada requiring both English and French editions. The general European practice is not to translate names, unless they are adjectival in nature. The rule adopted permits the translation of the latter class of names, subject to the approval of the Board. In particular cases of names other than adjectival, where forms of the same name in different languages have been fixed by statute, it is recommended that the forms appear in the translation as well as in the original edition. According to accepted French definition large rivers flowing into oceans are called fleuves, authorities being divided on the size of the rivers thus called. In Canada there are many large rivers flowing into the oceans. For the purpose of the rule the largest six only, namely the St. Lawrence, Mackenzie, Yukon, Columbia, Nelson and Fraser may be called fleuves, the others being called rivières.

In July, 1919, the Secretary of State for the Colonies laid before the Dominion Government a proposal for the formation of a committee for preparing an authoritative list of geographical names for official use. The committee was to consist of representatives of the Admiralty, War Office, India Office, Colonial Office, Foreign Office, Board of Trade, Board of Agriculture, Post Office and Royal Geographical Society. It was further proposed that a representative of the Dominion Government should be appointed for dealing with Canadian geographical names. The proposal was accepted by the Dominion Government and the chairman of the Geographic Board of Canada was appointed to represent the Dominion on the committee.

Prefix "Fort" in place-names

In line with the modern tendency to simplify and shorten place-names by dropping unnecessary prefixes and affixes the Board has a rule of nomenclature which recommends that the use of the words "city", "town" or "ville" as part

SESSIONAL PAPER No. 25b

of the name of a city, town or village is to be avoided. This has been very widely observed in Canada, though from some non-Canadian literature one would gather that such barbarous names as Sunset City and Star City are the rule in the Dominion. A prefix that is still much abused is that of fort. In the majority of cases it can be dropped with advantage as has been done in that of Edmonton, Alberta, which no one now refers to as Fort Edmonton. It should not be used in the following names: Chimo, Chipewyan, Churchill, Fitzgerald, Good Hope, Liard, MacKay, Macleod, McMurray, McPherson, Norman, Providence, Rae, Resolution, Simpson, Steele, Wrigley. In some cases the use of the word fort is entirely erroneous. For instance the post office designation of Fitzgerald, Slave river is Fort Fitzgerald. There never was a fort there. The only reason forthcoming for the presence of the prefix is that it would be invidious to drop it when there are other post offices where there actually have been forts in the Mackenzie region bearing the prefix.

Publication of place-name data

The Records of the Board contain many data relative to the place names of the Dominion which it is hoped to print from time to time. A beginning is made with the publication of a list of Canadian city names with meanings which forms part II of the present report. Each province has its own definition of a city. The minimum population necessary in British Columbia is 100 male British subjects, 21 years of age. In Ontario the minimum population is 15,000 inhabitants. This explains the inclusion in the list of towns of comparatively small population and the exclusion of such a large town as Brockville, Ontario which has not the provincial status of a city. Much that is current about the origin of city names will not stand investigation. Every effort has been made to verify the facts now published.

Parts III and IV are lists of the Place-names of Anticosti island and Magdalen islands in the gulf of St. Lawrence. In both lists instances will be observed of two sets of names, English and French, one generally a translation of the other.

The preparation of the Anticosti list, was undertaken because of duplication and confusion of nomenclature found on existing maps, and because it was discovered that a large number of place-names in use were still unpublished.

The Magdalen islands were resurveyed by the Department of the Naval Service in 1921, and the opportunity offered by the visit of hydrographic surveyors to the islands of securing information about the place names was taken advantage of to revise data in the possession of the Board which are now published.

A few copies of a list of some 300 Micmac Indian names of places in the Maritime Provinces were photolithographed at the Surveyor General's Office and distributed. The basis of the list, which was edited by Lt.-Col. W. P. Anderson, member of the Board, was two manuscripts prepared by the late Rev. Dr. Silas T. Rand who spent over forty years as a missionary among the Indians, and whose linguistic attainments it was thought made the lists worthy of publication.

A few copies of a manuscript Eskimo Grammar by the Rev. E. J. Peck, a veteran Ungava missionary, were also photolithographed for use in connection with geographical work in the Arctic regions. The grammar is the only one in English.

Catalogue of Canadian maps

A second edition of the Catalogue of Maps in the Collection of the Board is now nearing completion. The first edition of the catalogue, which is now out of print, contained 1,000 entries. The new edition contains over 1,500 and embodies all recently published maps of the many survey organizations of the Dominion and provinces, as well as the majority of important maps dealing with Canada published in Canada and abroad in earlier years.

GEOGRAPHIC BOARD OF CANADA

BY-LAWS

I—Officers and Secretary of the Board

The officers shall consist of a chairman (who shall be elected by ballot), of an executive committee of three to be nominated by the Chair and approved by the Board, all of whom shall serve for one year or until their successors shall be chosen. An officer of the Department of the Interior designated by the minister shall act as secretary but shall not be a member of the Board.

II—Duties of Officers and Secretary

(a) The chairman shall preside at the meetings and shall certify to the decisions of the Board. He shall appoint all committees not specially named by the Board. In his absence, the Board shall have the power to elect a temporary chairman.

(b) The secretary shall keep the minutes of the proceedings of the Board and shall record the decisions or other acts of the Board. He shall maintain files of papers and correspondence relating to each case submitted to the Board, conveniently arranged for reference. He shall, under the instructions of the Board, conduct the general correspondence and shall receive communications presented for the consideration of the Board.

(c) The executive committee shall receive, through the secretary, all communications requiring decision by the Board, shall investigate the questions presented, and after securing information from all available sources, shall report to the Board with recommendations for dealing with the questions.

(d) Before dealing with any name within a province represented upon the Board, such name shall be submitted to the representative of said province for examination and report.

(e) Upon the receipt of a communication submitting names for the consideration of the Board, it shall be the duty of the secretary to transmit at once a copy of such communication together with any papers relating thereto, to the member of the Board for the province affected; and also, in the case of coast names appearing on Admiralty charts, or charts of the Naval Service, to the hydrographer of the Admiralty or to the chief hydrographer of the Naval Service, as the case may be.

(f) So soon as the report of the provincial representative, and in the case of chart names, the report of the hydrographer of the Admiralty or of the chief hydrographer of the Naval Service, are received, the secretary shall submit the whole correspondence to the executive committee, who shall promptly prepare the names for submission to the Board.

• (g) The secretary shall enter upon every record submitted for the consideration of the Board the recommendation of the provincial representative and, if any, the recommendation of the hydrographer of the Admiralty or of the chief hydrographer of the Naval Service.

SESSIONAL PAPER No. 25b

III—Names to be Accepted

(a) The names of counties, electoral districts, mining districts, townships, cities, towns and incorporated villages, as found in the statutes, proclamations, orders in council, or other official acts of a province establishing such counties, districts and townships or incorporating such cities, towns and villages, shall be accepted by the Board. Such names shall be entered in the records of the Board if they are furnished by the provincial authorities.

(b) The statute, proclamation, order in council or other official act of a province designating any of the names mentioned in the next preceding clause shall be held to cancel any previous decision of the Board respecting such name so far as it affects the name of such county, electoral district, mining district, township, city, town and incorporated village.

IV—Maps

Maps presented for criticism and advice under the provisions of the order in council of 24th April, 1915, shall be referred for report to the executive committee before being submitted to the Board. Such maps shall, as a general rule and as far as consistent with their nature, comply with the rules adopted for the International Map of the World with regard to lettering, conventional signs, etc.

V—Meetings

The Board shall hold regular meetings on the first Tuesday in each month. Special meetings may be called by the chairman or the executive committee. Five members of the Board shall constitute a quorum, but, on the written request of any member filed with the secretary within a month from the date of a meeting, any decision adopted at such meeting shall be reserved for approval by a majority of the full Board. The affirmative vote of a majority of all the members of the full Board shall be required for the final decision in any case. All motions presented for the consideration of the Board shall be in writing.

VI—Reports

The Board shall publish its decisions on geographic names in *The Canada Gazette* and in bulletins, the same to be consolidated in a general report of the Board's work, to be issued from time to time as required.

VII—Amendments

These by-laws may be amended at any regular or special meeting by a majority vote of all the members of the Board, provided that copy of the proposed amendment has been sent by the secretary to the members of the Board at least twenty days previous to the time the vote is taken.

RULES OF NOMENCLATURE

1. **Local use to have preference.**—Unless good and sufficient reasons to the contrary exist, that name which is in common local use shall be given preference over alternative names.

2. **Priority to be recognized.**—When the priority of a name has been established by publication, particularly when such publication has occurred in any standard or authoritative work or works, that name should, if possible be retained.

3. **Names corrupted or changed.**—A name which has been corrupted or changed should, if not too firmly established by usage, be restored to its original form.

4. **Various spellings. When to be accepted.**—In cases where what was originally the same word appears with various spellings, sanctioned by local usage or otherwise, the various spellings when applied to different features should be regarded as in effect different names, and as a rule it is inadvisable to attempt to produce uniformity.

5. **Choice between two or more names.**—Where a choice is offered between two or more names for the same place or feature, all sanctioned by local usage, that which is most appropriate and euphonious should be adopted.

6. **English possessive form.**—In English nomenclature, the possessive form should be avoided whenever it can be done without destroying the euphony of the name or changing its descriptive application. Where the possessive form is retained, the apostrophe should be dropped.

7. **Names consisting of several words.**—Names consisting of more than one word may be connected by hyphens or combined in one word, as may be advisable.

8. **City, town or ville as part of names.**—The use of the words "city," "town," or "ville," as part of the name of a city, town or village, is to be avoided.

9. **Canyon, Cañon or Gorge.**—"Canyon" may be used instead of "cañon," but the form "canon" without the tilda sign must not be used. The word "gorge", which has the advantage of being both English and French, may often be substituted.

10. **Creek and Brook.**—The term "brook" is considered preferable to "creek" for very small streams.

11. **Branches of rivers.**—The practice of naming branches of rivers "South branch," "North branch," "East fork," etc., is objectionable. Each branch should be given an individual name, and when practicable, the name of the main stream should be continued to the most distant source.

12. **Duplication of names.**—Duplication of names, especially within one province, is objectionable. This excludes such common descriptive names as Bear, Deer, Duck, Eagle, Fish, Maple, Moose, Pigeon, Pine, Sturgeon, Trout, Turtle, Wolf, Wood, Black, Clear, Green, Red, White, Mud, etc. Duplication also renders undesirable a number of descriptive names which are less common, such as many of the names applied to mountain peaks.

13. **Alternative names.**—The use of alternative names should be discontinued where possible or not inconvenient.

SESSIONAL PAPER No. 25b

14. Initial letters. When not to be capitals.—Except on maps, the initial letters of generic or descriptive parts of geographical names, should not be capitals.

15. French names in Canada.—French names in Canada are to be spelled, accented, hyphenated, etc., according to the rules of the French language. In English text and map printing, however, hyphenation although recommended for French composite names, shall not be considered obligatory.

16. English and French forms of a name.—In cases where English and French forms of a single name have been published and have the sanction of long usage, no attempt shall be made to abolish either form, but both may be recognized and published in the Board's list of decisions, and it shall be deemed correct to use the English form in official documents in the English language and the French form in official documents in the French language. In all other cases, any duplication of form shall be discouraged and preference shall be given to the form which has priority of origin whether this be English or French.

17. Descriptive terms—when to be translated.—A generic descriptive term, such as cape, bay, river, etc., added to a name, may be translated into French for use in French publications. Likewise, the corresponding French term may be translated into English for use in English publications, but when such term is part of the name as in "Murray Bay", and "Deux-Rivieres," it shall not be translated.

18. Objectionable combination of words.—As a general rule, the combination of words in different languages is objectionable.

19. Names in foreign Countries.—Geographic names in a foreign country should be rendered in the form adopted by that country, except where there are English or French equivalents already fixed by usage, in which case the English equivalents are to be used in English publications, and the French equivalents in French publications.

20. Hyphens in Indian names.—Hyphens between syllables of Indian names are to be avoided.

21. Names of native origin.—In a name of native origin the true sound of the word, as pronounced in the native tongue shall be taken as the basis of the spelling.

22. Rules of the Royal Geographical Society.—For spelling names of native origin, the rules of the Royal Geographical Society, which are substantially in accord with official practice in France, shall be adhered to. Their broad features are as follows:—

- (a) The vowels are pronounced as in Italian, and the consonants as in English.
- (b) Every letter is pronounced, and no redundant letters are introduced. When two vowels come together, each one is sounded, though the result, when spoken quickly, is sometimes scarcely to be distinguished from a single sound, as in ai, au, ei.

12 GEORGE V, A. 1922

The following amplification of the foregoing rules is given by the Royal Geographical Society to explain their application.

Letters	Pronunciation and Remarks	Examples
a	ah, a as in <i>father</i>	Java, Banana, Somali, Bari
e	eh, a as in <i>fate</i>	Tel el Kebir, Oleleh, Yezo, Medina, Levuka, Peru.
i	English <i>e</i> ; i as in <i>ravine</i> ; the sound of <i>ee</i> in <i>beet</i> . Thus, not <i>Feejee</i> , but	Fiji, Hindi. Tokyo.
o	o as in <i>mote</i>	
u	long u as in <i>flute</i> ; the sound of <i>oo</i> in <i>boot</i> . <i>oo</i> or <i>ou</i> should never be employed for this sound..... Thus, not <i>Zooloo</i> , but <i>All vowels are shortened in sound by doubling the following consonant</i> .. Doubling a vowel is only necessary when there is a distinct repetition of the single sound.	Zulu, Sumatra. Yarra, Tanna, Mecca, Jidda
ai	as in <i>aisle</i> , or English i as in <i>ice</i>	Nuulua, Oosima.
au	ow as in <i>how</i> Thus, not <i>Foochow</i> , but	Shanghai.
ao	is slightly different from above.	Fuehau.
aw	when followed by a consonant or at the end of a word, as in <i>law</i>	Macao.
ei	is the sound of the two Italian vowels, but is frequently slurred over, when it is scarcely to be distinguished from <i>ei</i> in the English <i>eight</i> or <i>ey</i> in the English <i>they</i>	Cawnpore.
b	English <i>b</i> .	Beirut, Beilul.
c	is always soft, but is so nearly the sound of <i>s</i> that it should be seldom used. If <i>Celebes</i> were not already recognized it would be written <i>Selebes</i> .	Celebes.
ch	is always soft as in <i>church</i>	Chingchin.
d	English <i>d</i> .	
f	English <i>f</i> . <i>ph</i> should not be used for the sound of <i>f</i> . Thus, not <i>Haiphong</i> , but	Haifong, Nafa. Galapagos.
g	is always hard. (Soft <i>g</i> is given by <i>j</i>).....	
h	is always pronounced when inserted.	
hw	as in <i>what</i> ; better rendered by <i>hw</i> than by <i>wh</i> , or <i>h</i> followed by a vowel, thus <i>Hwang ho</i> , not <i>Whang ho</i> , or <i>Hoang ho</i> .	Hwang ho, Ngan hwei.
j	English <i>j</i> . <i>Dj</i> should never be used for this sound	Japan, Jinchuen.
k	English <i>k</i> . It should always be put for the hard <i>c</i> Thus, not <i>Corca</i> , but	Korea.
kh	The Oriental guttural.....	Khan.
gh	is another guttural, as in the Turkish.....	Dagh, Ghazi.
l		
m	As in English.	
n		
ng	has two separate sounds, the one hard as in the English word <i>finger</i> , the other as in <i>singer</i> . As these two sounds are rarely employed in the same locality, no attempt is made to distinguish between them.	
p	As in English.	Chemulpho, Mokopho.
ph	As in <i>loophole</i> .	
th	stands both for its sound in <i>thing</i> , and as in <i>this</i> . The former is the more common.	Bethlehem.
q	should never be employed, <i>qu</i> (in <i>quiver</i>) is given as <i>kw</i> When <i>qu</i> has the sound of <i>k</i> as in <i>quoit</i> , it should be given by <i>k</i> .	Kwangtung.
r		
s		
sh		
t	As in English.	
v		
w		Sawakin.
x		
y	is always a consonant, as in <i>yard</i> , and therefore should never be used as a terminal, <i>i</i> or <i>e</i> being substituted as the sound may require. Thus, not <i>Mikindany</i> , but not <i>Kwaly</i> , but	Kikuyu. Mikindani.
z	English <i>z</i>	Kwale.
zh	The French <i>j</i> , or as <i>s</i> in <i>treasure</i>	Zulu. Muzhdaha.

REGULATIONS

The following regulations have been adopted for the guidance of those submitting names to the Geographic Board.

1. Names submitted to the Geographic Board should be accompanied by a map showing the position of the features for which the names are proposed. If the features already bear names which appear on any published map, a reference to this map is sufficient.

2. Names received by the Board for consideration are referred to the member of the Board representing the province concerned, as well as to the executive committee of the Board. It is desirable, therefore, that lists and maps should be submitted in duplicate, where this can be done conveniently.

3. The memorandum submitted should state whether the suggested names are new, or have been published, and whether the features they apply to are unnamed, or possess names. If a suggested name is new, full particulars respecting the origin must be given. If a suggested name has already been published, the date of publication as well as the circumstances of the origin, if known, should be given.

4. If a proposed name is intended to replace a published or existing one, the latter should be given with the place and date of publication, if known, as well as the arguments for the proposed change.

5. Blank forms for lists of names are furnished by the secretary on application.

DECISIONS.

FROM APRIL 1, 1919 TO MARCH 31, 1921

The names printed in **heavy-faced type** have been approved by the Board. The names in *italics* are discarded forms.

A

Abitibi lake. See Oblats (lac des).

Active cove. See Kynumpt harbour.

Akolkoletx; river, tributary to Columbia river, above Revelstoke, Kootenay district, B.C. (Not Isaac.)

Alan Campbell; mount, lat. $51^{\circ} 44'$, long. $117^{\circ} 03'$, Rocky mountains, B.C.

After Alan Campbell, D.L.S., Interprovincial Boundary Survey. See also Campbell glacier and icefield.

Alcock; mount, between forks of Warneford and Kwadaecha rivers, Finlay river, Cassiar district, B.C.

After late Sir John Alcock, first airman to fly across the Atlantic.

Aliska village. See Ellazga.

Amundsen; gulf, south of Banks island, Franklin district, N.W.T.

After Roald Amundsen, Norwegian explorer who carried his ship the Gjoa through the Northwest passage from the Atlantic to the Pacific, 1903-1906.

Anderson; lake, northeast of Bedford basin, Halifax county, N.S. (Not Gough.)

Anderson point. See Horseblock.

Animoosekagaging lake and bay. See Watchorn.

Arctic; sound, west of Banks peninsula, Bathurst inlet, Coronation gulf, N.W.T.

Named by Franklin, 1821.

Arctomys; mountain, 9,162 feet, and creek, lat. $51^{\circ} 56' 30''$, long. $117^{\circ} 00'$, Rocky mountains, Alberta.

Referring to whistlers (*arctomys columbianus*) seen in the valley.

Ardoise (pointe à l'); point St. Lawrence river, mouth of Boyer river, Bellechasse county, Que. (Not Slate).

Descriptive; French for "slate."

Aristazabal; island, Hecate strait, Coast district, B.C. (Not Aristazable.)

Named by Lt. Com. Caamaño of the Spanish corvette Aranzazu, 1792.

Arras; mountain, 10,180 feet, lat. $51^{\circ} 49'$, long. $117^{\circ} 05'$, Rocky mountains, B.C.

Commemorating the battlefield of Arras, Pas de Calais, France, where Canadians participated in the first battle, April, 1917, and in the second battle, August, 1918.

B

Baker creek. See Redding.

Ballantyne; strait, between Prince Patrick island and Borden island, Arctic ocean, Franklin district, N.W.T.

After Hon. C. C. Ballantyne, Minister of Marine and Fisheries and Minister of the Naval Service, 1921. Name given by V. Stefansson and submitted by the Department of the Naval Service.

Banks; island, Hecate strait, Coast district, B.C.

Named by Capt. Charles Duncan of the Princess Royal in 1788, after Sir Joseph Banks Bart, (1743-1820), president of the Royal Society.

Banks; peninsula, Bathurst inlet, Coronation gulf, MacKenzie district, N.W.T.

Named by Franklin, 1821, after Sir Joseph Banks (1743-1820).

Barlow; mountain, lat. $51^{\circ} 42'$, long. $116^{\circ} 48'$, Rocky mountains, Alberta and B.C.

After A. E. Barlow, who served a term as president of the Canadian Mining Institute; geologist and associate professor of Geology, McGill University. Dr. Barlow and his wife were lost on the Empress of Ireland.

Barnard; mount, 10,955 feet, lat. $51^{\circ} 42' 50''$, long. $116^{\circ} 55'$, Rocky mountains, Alberta and B.C.

After Sir Frank S. Barnard, K.C.M.G., former Lieut. Governor of British Columbia.

Barrell channel. See Houston Stewart.

SESSIONAL PAPER No. 25b

Barrier; mountain, Tp. 31—R. 12—W. 5th, Alberta.

The highest point of a ridge extending northwest from Panther river to Red Deer river.

Barrier; ridge, head of Langton creek, Tatshenshini river, close to Yukon boundary, Cassiar district, B.C.

Barrow; cape, Coronation gulf, Mackenzie district, N.W.T.

Named by Franklin, 1821, after Sir John Barrow (1766-1845), second secretary to the Admiralty, 1807-45.

Barry; islands, Bathurst inlet, Coronation gulf, Franklin district, N.W.T.

Named by Franklin, 1821, after Col. Henry Barry (1750-1822), Newton Barry, Wexford, Ireland.

Basil; bay, north of cape Hearne, west shore of Coronation gulf, Mackenzie district, N.W.T. (Not Basil Hall.)

Named by Richardson, 1826, "after Capt. Basil Hall of the Royal Navy."

Basil Hall bay. See Basil.

Bathurst; inlet, south shore of Coronation gulf, Mackenzie district, N.W.T.

Named by Franklin, 1821, after Henry, 3rd Earl of Bathurst (1762-1834).

Beatton; river, tributary to Peace river from north, below Fort St. John, Peace River district, B.C. (Not North Pine nor Terrace.)

After F. W. Beatton, Hudson's Bay Co. factor at Fort St. John.

Beaufort; range, east side of Ash and Stamp rivers, Vancouver island, B.C.

After Sir Francis Beaufort, sometime British hydrographer.

Beaver; harbour, Queen Charlotte sound, Vancouver island, B.C.

After Hudson's Bay Co., steamer Beaver. Name on Arrowsmith map, 1859.

Bécancour; river, rising in Bécancour lake, Thetford township, Megantic county and flowing into St. Lawrence river in Nicolet county, Que. (Not Black, Clyde, Noire nor Thetford.)

Bectobee lake. See Oblats (lac des).

Bélanger; trading post and river, tributary to Churchill river, Sask. (Not Souris.)

After late Chief Factor Bélanger, Hudson's Bay Co. for a number of years in charge of this territory and his son, still in the company's service, sometime in charge of the company's winter outpost on the river.

Beresford; lake, Tp. 22-R. 16-E 1st., Manigotagan river, Man.

After G. H. Beresford, D.L.S., surveyor of mineral claims in the district.

Bergne; mount, 10,420 feet, lat. 51° 46', long. 116° 52', Rocky mountains, Alberta.

Name given by A. O. Wheeler after Frank Bergue, Alpine club, England, killed while climbing with Wheeler in Switzerland, 1907.

Bernard; harbour, trading post and mission station, about lat. 68° 47' long., 114° 50' 27". Mackenzie district, N.W.T.

After Captain Joseph F. Bernard of Tignish, P.E.I., master of schooner Teddy Bear, who discovered its suitability as a harbour and wintered there, 1912-13.

Bexley; cape, Dolphin and Union strait, Mackenzie district, N.W.T.

Named by Richardson, 1826, after Rt. Hon. Nicholas Vansittart, Lord Bexley (1766-1851) chancellor of the Exchequer, 1813-23, chancellor of the Duchy of Lancaster. 1823-28.

Big river. See Hornaday.

Big Black river. See Mukutawa.

Big Sheep; creek, flowing south across International boundary, west of Rossland, B.C., into Columbia river near Northport, Washington, U.S. (Not Sheep, White Sheep nor Yomelsin.)

Billots (rivière aux); river, tributary to Abenakis river, Bellechasse and Dorchester counties Que. The source of the river is lac Vert.

French for "log" river.

Bingay; mount, lat. 50° 09', long. 115° 01'; also creek, Elk river, B.C.

Name on "Plan of Elk River Coal Lands," 1905. After T. W. Bingay, comptroller,

The Consolidated Mining and Smelting Coy. of Canada, Trail, B.C.

Bitobee lake. See Oblats (lac des).

Bitobi lake. See Oblats (lac des).

Black River. See Bécancour.

Black brook. See St. Agapit.

Black; river, flowing into lake Winnipeg in Tp. 21-R.9-E.1st, Man.

Blackfriars mountain. See Quiney.

Blackwater river. See Mukutawa.

Blackely cove. See Blakney.

Blakely cove. See Blakney.

Blakney; cove, Jeddore harbour, Halifax county, N.S. (Not Blackely nor Blakely.)

12 GEORGE V, A. 1922

Bleasdel; mount, lat $50^{\circ} 21'$, long. $114^{\circ} 57'$; also creek, Elk river, B.C.

After Arthur Wellesley Bleasdel, druggist, Fernie, B.C. The creek was named about 1904.

Blindman; river, tributary to Red Deer river in Tp. 39-R.27-W.4th Alberta. (Not Paskapoo, Istapta, Chambathnadab nor North branch of Blindman.) The source of the river is at the head of the North branch.

Translation of Cree Indian name Paskapoo.

Bonilla; island, Hecate strait, B.C. (Not Bonila.)

So named by Lt. Com. Caamaño, 1792. Diminutive of Spanish bueno meaning "good."

Bonilla; point, north entrance point to Juan de Fuca strait, Vancouver island, B.C. (Not Bonila.)

So named by Sub. Lt. Quimper, 1790.

Borden; island, northeast of Prince Patrick island, Arctic ocean, Franklin district, N.W.T.

After Sir Robert Borden. Name given by V. Stefansson and submitted by the Department of the Naval Service.

Bottle; lake, Tp. 19-R. 19-W. 1st, Man. (Not Long.)

Translation of Indian name.

Boulder creek. See Bruce.

Boulder creek. See Flamcau.

Boundary river. See O'Connor.

Bowman; creek, tributary to Shand creek, above MacNab creek, in Tps. 42, 43-R. 6-W. 2nd, Sask.

After E. P. Bowman, engaged on survey of soldier settlement watered by the creek.

Bras (rivière le). See St. Victor.

Brent; mount, on height of land between Similkameen and Okanagan rivers, about 15 miles west of Penticton, B.C. (Not Snow.)

After Brent family, ranchers.

Brittany; creek, tributary to Chilko river, Lillooet and Coast districts, B.C.

Brochet; trading post and settlement, Reindeer lake, Man. (Not Fort du Brochet nor Du Brochet.)

French for "pike."

Brock; river, flowing into Darnley bay about lat. $69^{\circ} 25'$ long. $123^{\circ} 20'$, Mackenzie district, N.W.T. (Not Little.)

After R. W. Brock, sometime deputy minister Department of Mines, deeply interested in organization of Canadian Arctic expedition, 1913-18.

Brown inlet. See Portland.

Brown; mount, 9,156', lat. $52^{\circ} 23'$, long. $118^{\circ} 13'$, Athabaska pass, Rocky mountains, Alberta and B.C.

Named by David Douglas, 1827, after Robert Brown (1775-1858), British botanist.

Bruce; creek, flowing northeasterly from Glacier lake into Horseshief creek, Kootenay district, B.C. (Not Boulder nor Slade).

After R. Randolph Bruce, vice-president, Columbia Valley Irrigated Fruit Lands, Ltd. Former decision revised.

Buchanan; river, flowing into Amundsen gulf, Mackenzie district, N.W.T.

Named by Richardson, 1826, after James Buchanan, H.M. consul at New York.

Bulyea; mount, 10,900 feet, lat. $51^{\circ} 43'$, long. $116^{\circ} 55'$, Rocky Mountains, Alberta and B.C.

After G. H. V. Bulyea, first Lieut. Governor of Alberta.

Bunting; mount, 6,600', lat. $56^{\circ} 05'$, long. $129^{\circ} 57'$, Cassiar district, B.C.

After pioneer of district.

Burke; mount, 8,340' lat. $50^{\circ} 17'$, long. $114^{\circ} 31'$, Rocky mountains, Alberta.

After D. C. Burke, rancher and forest ranger.

C

Cairnes; mount, 10,120 feet, lat. $51^{\circ} 41'$, long. $116^{\circ} 46'$, also glacier, Rocky mountains, B.C.

After D. D. Cairnes, geologist of 141st meridian survey, and late geologist in Geological Survey.

Caldwell; river, tributary to Chaudière river from east, Beauce county, Que. (Not Calway nor Calloway nor Colway.)

Calloway river. See Caldwell.

Calway River. See Caldwell.

Cambrai; mountain, 10,380 feet, lat. $51^{\circ} 50'$, long. $116^{\circ} 59'$, Rocky mountains, Alberta and B.C.

After Cambrai, a fortified town on the Scheldt, in French Flanders, which the Canadians entered 9 October, 1918.

SESSIONAL PAPER No. 25b

Campbell; icefield and glacier, Rocky mountains, B.C.

See Alan Campbell mount.

Caribou lake. See Quesnel.

Castelets, The; mountain, lat $52^{\circ} 04'$, long. $117^{\circ} 08'$, Rocky mountains, Alberta.

Descriptive: the mountain has two peaks 9,440' and 9,002' like little castles.

Castleguard; mountain, 10,090 feet, glacier, and river, lat. $52^{\circ} 07'$, long. $117^{\circ} 15'$, Rocky mountains, Alberta.

Descriptive: has a castellated appearance, and rises as a guardian over the southern part of the Columbia icefield.

Cayuquet sound. See Kyuquot.

Chaba; peak, 10,540, lat. $52^{\circ} 12'$, long. $117^{\circ} 40'$, also glacier, Rocky mountains, Alberta and B.C.

Chambathnadab river. See Blindman.

Chantry; island, Dolphin and Union strait, Franklin district, N.W.T.

Named by Richardson, 1826.

Chantrey; inlet, at mouth of Backs river, also range of mountains, west of inlet, Keewatin district, N.W.T.

Mountains named by Back, 1834, after Sir Francis Legatt Chantrey (1781-1842,) sculptor.

Chapman; island, in southern portion of Coronation gulf, east of cape Barrow, Franklin district, N.W.T.

Named by Thos. Simpson, after A. Chapman, M.P., director of the Hudson's Bay Company.

Chapman; mount, lat $51^{\circ} 57'$, long. $118^{\circ} 15'$, west of Kinbasket lake, Columbia river, Kootenay district, B.C.

After late R. H. Chapman, who with Howard Palmer made surveys in the region, 1915.

Cheere; islands, off Kater point, in southern portion of Coronation gulf, Franklin district, N.W.T.

Named by Franklin, 1821.

Cherry creek. See Mather.

Chesterfield; mount, lake and creek, headwaters of Warneford river, Cassiar district, B.C.

After Alban P. Chesterfield, companion of P. L. Haworth on exploratory trip, 1919.

Chisel; peak, 10,005', lat. $52^{\circ} 21'$, long. $117^{\circ} 49'$, south of Fortress lake, also creek, flowing into lake, Rocky mountains, B.C.

Descriptive of shape of peak.

Churchill; trading post, Churchill river, Man. (Not Fort Churchill.)

Cleveland; point, north shore of St. Margaret bay, Halifax county, N.S. (Not Cleaveland.)
Decision revised.

Spelling on Church's map of Halifax county, 1864. After family then living at the point.

Clifton; point, Amundsen gulf, Mackenzie district, N.W.T.

Named by Richardson, 1826, after Waller Clifton, secretary of Victualling Board.

Clinton; creek, Bonaparte river, Lillooet district, B.C. (Not Junction). The source of the creek is north of Cutoff valley, whence it flows southeasterly through the town of Clinton.

Clinton; point, Amundsen gulf, Mackenzie district, N.W.T. (Not De Witt Clinton.)

Named by Richardson, 1826, after De Witt Clinton (1769-1828), governor of New York, 1817-23 and 1825-28.

Clupananol arm. See Thupana.

Clyde river. See Bécancour.

Coalpit lake. See Colbart.

Coaticook; river, Stanstead, Compton and Sherbrooke counties, Quebec. (Not Coaticooke nor Kawatikouck.)

Abenakis Indian name meaning "pine river."

Cockscomb; mountain, lat. $51^{\circ} 56'$ long $117^{\circ} 17'$, Rocky mountains, B.C.

Descriptive of shape of mountain.

Cockscomb mountain. See Coxhill.

Cogllstiko; river, tributary to Baezacko river, Coast and Cariboo districts, B.C.

Colbart; lake, south of Halifax and west of Purell cove, Halifax harbour, Halifax county, N.S. (Not Coalpit.)

After family of the name.

Coles; bay, Saanich inlet, Vancouver island, B.C. (Not Cole.)

Named by Capt. Richards, H.M.S. Plumper, 1860, after John Coles, sometime mid-shipman R.N. Resided near the bay, 1857-66; member of Legislative Assembly, Vancouver island, second parliament, for Saanich, 1860-63; curator, Royal Geographical Society, 1877-1900.

Colway river. See Caldwell.

Connor; mount, 8,410' lat. 50° 25', long. 115° 05', also lakes, Forsyth creek, Elk river, B.C.
After trapper and prospector.

Conrod; island, Chezzeteook inlet, Halifax County, N.S. (Not Conroy nor Conroyd.)

Conroy island. See Conrod.

Conroyd island. See Conrod.

Coppermine; river, flowing into Coronation gulf, Arctic ocean, Mackenzie district, N.W.T.
Named by Hearne, 1771, after the copper reported found to be on its banks.

Cornwallis island. See McNab.

Coronation; gulf, Arctic ocean, Mackenzie district, N.W.T.

Named by Franklin, 1821, George V's Coronation gulf, the latter name being added to mark the time of its discovery.

Coxhill; a foothill, near headwaters of Jumpingpound creek, Alberta. (Not Coekscomb.)
Decision revised.

Named by A. L. Wheeler, after an assistant named Cox.

Crammond; islands, Bras d'Or lake, Inverness county, Cape Breton island, N.S. (Not Smith.)

Croker; river, flowing into Amundsen gulf, Mackenzie district, N.W.T.

Named by Richardson, 1826, after John Wilson Croker (1780-1853), secretary to the Admiralty, 1809-30.

Crown Prince Gustav; sea, between Axel Heiberg island and Ringnes islands, Arctic ocean, Franklin district, N.W.T.

Named by Sverdrup after the Crown Prince of Sweden.

Cyclamen; ridge, lat. 50° 04', long. 114° 34', Rocky mountains, Alberta.

After the flower.

D

Dan lake. See Moore.

Darnley; bay, Amundsen gulf, Mackenzie district, N.W.T.

Named by Richardson, 1826, after John (Bligh), 4th Earl of Darnley (1767-1831).

David; mount, 8,986 feet, lake and creek, Howse river, lat. 51° 50', long. 116° 49', Rocky mountains, Alberta.

After David Thompson, who travelled through Howse pass 1806-7 and later years.

Davy; hill, Melville chain, Amundsen gulf, Mackenzie district, N.W.T. (Not Sir. H. Davy.)

Named by Richardson, 1826, after Sir Humphrey Davy (1778-1829), English chemist.

Deas Thompson; point, Amundsen gulf, Mackenzie district, N.W.T.

Named by Richardson, 1826, after John Deas Thompson, commissioner of His Majesty's navy.

Dent; mount, 10,720 feet, lat. 51° 45', long. 116° 58', Rocky mountains, Alberta and B.C.

After Clinton Thomas Dent, past president, Alpine club, England.

Desbarats; brook, tributary to Etchemin river from south in Jolliet seigniory, Dorchester county, Que. (Not Des Baret's.)

Desbarats; inlet between cape Barrow and Detention harbour, about lat. 67° 55', long. 110° 05', Coronation gulf, Mackenzie district, N.W.T.

After G. J. Desbarats, deputy minister, Department of Naval Service, in charge of Canadian Arctic expedition operations, 1913-18.

Desbarats; strait, between Bathurst island and the Findlay group, Arctic ocean, Franklin district, N.W.T.

After G. J. Desbarats, deputy minister of the Naval Service. Name given by V. Stefansson and submitted by the Department of the Naval Service.

Detention; harbour, east of cape Barrow, Coronation gulf, Mackenzie district, N.W.T.

Named by Franklin, 1821, because driven in and delayed by ice.

De Witt Clinton point. See Clinton.

Diadem; peak, 11,060', lat. 52° 19', long. 117° 00', Sunwapta river, Rocky mountains, Alberta.

Climbed by J. Norman Collie, 1898, and named by him.

Dillon river. See Newport.

Division; mountain, 9,843 feet, lat. 51° 53' 30'', long. 117° 01', Alberta and B.C.

Descriptive: named by Dr. C. D. Walcott.

Doghung lake and bay. See Watchorn.

Dormer; river, tributary to Panther river in Tp. 30-R11-W.5th, Alberta. (Not South branch of Panther).

From ridges terminating like dormer windows above the valley.

SESSIONAL PAPER No. 25b

- Douai;** mountain, 10,230 feet, lat. $51^{\circ} 59'$, long. $117^{\circ} 11'$, Rocky mountains, Alberta and B.C.
After the celebrated fortified town in northeastern France, in commemoration of its occupation on 18 October, 1918, by the Canadians in conjunction with other allied troops.
- Downie;** peak, lat. $51^{\circ} 33'$, long. $118^{\circ} 17'$, and creek flowing into Columbia river in lat. $51^{\circ} 27'$, long. $118^{\circ} 28'$, B.C. (Not Eldorado mountain).
Doubtless after Wm. Downie, prospector employed by Sir James Douglas, 1858.
- Drake;** river, flowing into Duck bay, lake Winnipegosis in Tp. 37-R. 20-W. 1st, Man. (Not North Duck nor Insect.) Decision revised.
Male duck.
- Dromore;** lake, Tp. 1-R. 22-W. 1st, Man.
Name on 1880 township plan.
- Du Brochet trading post.* See Brochet.
- Duck lake.* See Ilind.
- Duck;** river, flowing into Duck bay, lake Winnipegosis, Man. (Not North Duck.) Decision revised.
- Durand;** creek, flowing into Kamloops lake from south, Kamloops district, B.C. (Not Three-mile.)
After V. Durand, early settler.

E

- East Fork of Kettle river.* See Rendell.
- Eaton;** river, rising in Auckland township and falling into St. Francis river in Westbury township, Compton county, Quebec. (Not South.)
- Eau Chaudé** (ruisseau à l'); brook, tributary to Etchemin river from northeast in Frampton township, Dorchester county, Que. (Not Wares.)
- Echo lake.* See Squakum.
- Eldorado.* See Downie mountain.
- Ellazga;** Indian village, Tp. 109-R. 16-W. 5th, Alberta. (Not Alaska nor Liska.)
Indian name meaning "salt place."
- Epworth;** port, Coronation gulf, Mackenzie district, N.W.T.
Named by Franklin, 1821, after Epworth, Lincolnshire, Eng.
- Eramosh;** lake, Tp. 22-R. 1-W. 1st, International boundary, Man. and North Dakota, U.S. (Not Kippax nor Ross.)
Name on 1880 township plan.
- Ericht lake.* See Squakum.
- Erich lake.* See Squakum.
- Evelyn;** pass, from Athabaska falls, Athabaska river to Maligne lake, Jasper park, Alberta.
After Evelyn, Duchess of Devonshire, who visited it, 1920.

F

- Farbus;** mountain, 10,550 feet, lat. $51^{\circ} 58'$, long. $117^{\circ} 08'$, Rocky mountains, Alberta and B.C.
After Farbus on the eastern slope of Viny ridge, about 5 miles south of Lens, in commemoration of Canadians fighting there.
- Faucher island.* See Ferguson.
- Fay;** small islands, west of Axel Heiberg island and north of Amund Ringnes island, Crown Prince Gustav sea, Arctic ocean, Franklin district, N.W.T.
Name given by V. Stefansson and submitted by the Department of the Naval Service.
After S. Prescott Fay, secretary, Harvard Travellers' club.
- Ferguson;** island, Chezzetcook inlet, Halifax county, N.S. (Not Faucher.)
- Ferrer inlet.* See Nuchatlitz.
- Findlay;** group of islands, between Ellef Ringnes island and northwestern extremity of Bathurst island, Arctic ocean, Franklin district, N.W.T. (Not Finlay.)
- Fish creek.* See Gwillim.
- Fish lake.* See Metigoshe.
- Fitzgerald;** settlement, Slave river, Alberta. (Not Fort Fitzgerald nor Smith landing.)
After Inspector Francis Joseph Fitzgerald (1867-1911), Royal Northwest Mounted Police who with constables Kenny and Taylor and ex-constable Carter perished on Peel river, February, 1911 on McPherson-Dawson patrol.
- Fivemile creek.* See Hayes.

12 GEORGE V, A. 1922

- Flameau**; creek, flowing south into Ingenika river, Cassiar district, B.C. (Not Boulder.)
After trapper, fort Grahame.
- Ford** (*ruisseau du*). See Fort.
- Forsyth**; mount, lat. $50^{\circ} 16'$, long. $115^{\circ} 07'$, also creek, Elk river, B.C.
After Wm. Forsyth, Elk River prospector; killed in the World war.
- Fort Churchill**. See Churchill.
- Fort du Brochet**. See Brochet.
- Fort Liard**. See Liard.
- Fort McPherson**. See McPherson.
- Fort Rae**. See Rae.
- Fort Wrigley**. See Wrigley.
- Fort** (*ruisseau du*); brook, tributary to Chaudière river, below Beauceville, Beauce County, Que. (Not Ford.)
Holland's map of Lower Canada, 1803, shows "blockhouse" in vicinity.
- Foxe**; basin and channel, Baffin island, Franklin district, N.W.T. (Not Fox).
- Fresnoy**; mountain, 10,730 feet, lat. $52^{\circ} 00'$, long. $117^{\circ} 13'$, Rocky mountains, Alberta and B.C.
After Fresnoy, in the Department of Aisne, France, ten miles northeast of St. Quentin, in commemoration of its capture by Canadians, 13 April, 1917.
- Frosty**; mountain, 7,900', lat. $49^{\circ} 01'$, long. $120^{\circ} 50'$, also creek, Yale district, B.C. (Not Frost).
Name Frosty mountain on map accompanying R. A. Daly's "Geology of the North American Cordillera at the Forty-ninth Parallel," 1912.

G

- Gable**; mountain, Tp. 31-R12-W. 5th, Alberta.
Descriptive; a long ridge with gradual slopes facing the west.
- Gaetz**; head, near west entrance to Chezzeteook inlet, Halifax county, N.S. (Not Gates nor Gatz.)
- Galena**; point, near Detention harbour, east of cape Barrow, Coronation gulf, Mackenzie district, N.W.T.
Named by Franklin, 1821, because a small vein of galena was discovered on the beach.
- Gardner**; canal, Devastation channel, Coast district, B.C.
Named by Vancouver, 1793, after Rear Admiral Alan Gardner, afterwards Lord Gardner, his friend and captain on the Europa and Courageux.
- Gardner**; mount, Bowen island, Howe sound, New Westminster district, B.C.
Named by Capt. Richards, 1860, after Lord Gardner.
- Garland**; river, tributary to Pine river in Tp. 34-R. 20-W. 1st, also railway station, Man. (Not Pine.)
Name of railway contractor.
- Garth**; mount, 9,970 feet, lat. $51^{\circ} 48'$, long. $116^{\circ} 54'$, Rocky mountains, Alberta.
After John McDonald of Garth, furtrader.
- Gates head**. See Gaetz.
- Gatz head**. See Gaetz.
- Geneva**; lake, Tp. 52-Rs. 8, 9-W.4th, Alberta.
Named when Lake Geneva post office was opened 15 April, 1910.
- Glace**; bay, Cape Breton island, N.S.
- Glace Bay**; town and harbour, Glace bay, Cape Breton island, N.S.
- Gold river**. See Mayer.
- Golden Eagle**; peak, 10,000 feet, lat. $51^{\circ} 51'$, long. $116^{\circ} 56'$, Rocky mountains, Alberta.
Referring to number of golden eagles seen in vicinity of peak.
- Gordon**; channel, Queen Charlotte sound, Coast district, B.C. (Not New.)
- Gough lake**. See Anderson.
- Government island**. See Morris.
- Governor**; lake, St. Margaret Bay road, west of Halifax, Halifax county, N.S.
- Governor lake**. See Parr.
- Grande Baie de Piashtibaie** (*Rivière*). See Quetachu.
- Grays**; bay, Coronation gulf, Arctic coast, N.W.T. (Not Gray.)
Named by Franklin, 1821, "after Mr. Gray, principal of Belfast academy."
- Greenhills**; range, between Elk and Fording rivers, B.C.
Descriptive; referring to the green appearance of the hills as against the limestone ranges to the east and the burnt areas to the west of the valley.

SESSIONAL PAPER No. 25b

Green Island. See Labrecque.

Gull lake. See Meyers.

Gwillim; river and lake on it, tributary to Murray river, Peace River district, B.C. (Not Fish creek, Neilson creek nor Rocky Mountain lake.)

After John Cole Gwillim (1868-1920), professor of Mining, Queens University, who made surveys in the region.

H

Habel; creek, tributary to Athabaska river about lat. $52^{\circ} 15'$, long. $117^{\circ} 31'$, Rocky mountains, Alberta.

Halifax island. See McNab.

Hamitah lake. See Hobiton.

Happy; lake, Tp. 21-R14-E. 1st, draining into Manigotagan lake, Manigotagan river, Man.

After two prospectors nicknamed "Happy" White and—

Harding; river, flowing into Amudsen gulf, Mackenzie district, N.W.T.

Named by Kendall of the second Franklin expedition, 1826, after a friend, Lt. Harding of the Royal Navy.

Hartland point. See Hartlen.

Hartlen; point, east of entrance to Halifax harbour, Halifax county, N.S. (Not Hartland.)

Hartley; lake, Sec. 2, Tp. 1-R.21-W.1st, International boundary, Man. and North Dakota, U.S.

Haworth; lake, falls and creek, headwaters of Warneford river, Cassiar district, B.C.

After P. L. Haworth, Eastover, West Newton, Indiana, who made exploratory trips in the region, 1916 and 1919.

Hazen; strait, between Melville and Borden islands, Arctic ocean, Franklin district, N.W.T.

After Hon. Sir J. D. Hazen, formerly Minister of Marine and Fisheries and Minister of the Naval Service. Name given by V. Stefansson and submitted by the Department of the Naval Service.

Hayes; creek, tributary to Similkameen river, about five miles below Princeton, Similkameen district, B.C. (Not Fivemile.)

Head; bay, Thupana arm, Nootka sound, Vancouver island, B.C.

Hearne; cape, Coronation gulf, Mackenzie district, N.W.T.

Named by Franklin, 1821, after Samuel Hearne (1745-92), first white man to sight the Arctic coast of North America.

Helmer; mount, lat. $51^{\circ} 42'$, long. $116^{\circ} 50'$, Rocky mountains, Alberta and B.C.

After the late Brig.-General R. A. Helmer, Inspector of Musketry, and Alexis Helmer, his only son, killed in the World war.

Henderson; creek, tributary to Pouce-coupé river from the east in Tp. 79-R. 13-W. 6th, Alberta and B.C.

Name suggested by R. W. Cautley, D.L.S., 1919, after Ex-Sergeant Henderson, M.C. D.C.M., 49th Batt. C.E.F., one of his picketmen.

Hepburn; island, west of Wentzel river, Coronation gulf, Franklin district, N.W.T.

Named by Franklin, 1821, after John Hepburn, his personal attendant.

Herblet; lake, Tps. 68 and 69-R. 16 and 17-W. 1st, Man. (Not Little Herb nor Wekusasis.)

Herschel; island, Arctic coast, Yukon territory. (Not Herschell.)

Named by Franklin 1821, presumably after his friend Sir John Frederick Wm. Herschel (1792-1871) astronomer and physicist, son of Sir Wm. Herschel, astronomer (1738-1822).

Herschel; post, Herschel island, Arctic coast, Yukon territory. (Not Herschel Island.)

Hesquiat; lake, harbour, point and village, west coast of Vancouver island, B.C.

After Indian tribe whose name comes from a word meaning "to tear asunder with the teeth." At Hesquiat village a salt water grass drifts on shore in large quantities especially at the time of the herring spawning, which the Indians are in the habit of tearing asunder with their teeth to disengage the spawn—a great delicacy.

Hicks; lake, Buckland township, Dorchester county, Que. (Not Rond.) This is the southern of two "Rond" lakes on upper waters of Abenakis river.

Name on Bouchette map, 1831.

Hind; lake, Tp. 49-R. 5-W. 4th, Alberta. (Not Duck.)

After Thomas Hind, postmaster, Hindville.

Hobart lake. See Hobiton.

Hobectid lake. See Hobiton.

12 GEORGE V, A. 1922

- Hobiton**; lake, west of and draining into Nitinat lake, west coast of Vancouver Island, B.C. (Not Hobart, Hamitah, Homitan, Hobitan nor Hobeetid.)
Indian name meaning "snoring;" descriptive of the sound which the stream from the lake makes near its confluence with Nitinat arm.
- Holben**; mount, northeast of junction of Kwadaeha and Warneford rivers, Cassiar district, B.C. After a trapper, who was a member of P. L. Haworth's exploratory party, 1919.
- Homitan lake**. See Hobiton.
- Hood**; river, flowing into Arctic sound, Coronation gulf, Mackenzie district, N.W.T.
Named by Franklin, 31 July, 1821, after Robert Hood, lieutenant in the expedition, who was murdered by a half breed in October of the same year.
- Hooge**; mountain, 10,550 feet, lat. $52^{\circ} 00'$, long. $117^{\circ} 01'$, Rocky mountains, Alberta.
After the village 2 miles east of Ypres, in the Ypres salient, where the Canadians regained ground on 2 June, 1916.
- Hooker**; mount, 10,782', lat. $52^{\circ} 24'$, long. $118^{\circ} 05'$, Athabaska pass, Alberta and B.C.
Named by David Douglas, 1827, after Sir Wm. Jackson Hooker (1685-1865) British botanist.
- Hope**; cape, Dolphin and Union strait, Mackenzie district, N.W.T.
Named by Richardson, 1826, after Vice-Admiral Sir Wm. Johnstone Hope (1766-1831), one of the Lords of the Admiralty.
- Hornaday**; river, flowing into Darnley bay about lat. $69^{\circ} 20'$, long. $123^{\circ} 50'$, Mackenzie district, N.W.T. (Not Big.)
After W. T. Hornaday, director, New York zoological park. Name used by A. J. Stone in Bull. Amer. Mus. Nat. Hist., Vol. XIII, New York, 1900.
- Hornickel**; mount, lat. $50^{\circ} 15'$, long. $115^{\circ} 06'$, also creek, Elk river, B.C.
After G. H. Hornickel, superintendent Elk Valley Coal and Coke Co., Ltd., coming from Cleveland, Ohio, in the spring of 1910.
- Horseblock**; point, Lansdowne township, Leeds county, Ont. (Not Anderson.) Decision revised.
Named by early settlers from its proximity to an island, resembling in shape and position a block of stone used to mount on horseback.
- Horse Island**. See Selkirk.
- Hose**; strait, between Meighen island and the island to the north of it, Arctic ocean, Franklin district, N.W.T.
After Capt. Walter Hose, R.N., stationed at Esquimaux when Canadian Arctic expedition was outfitting. Name given by V. Stefansson and submitted by the Department of the Naval Service.
- Houston Stewart**; channel, Queen Charlotte islands, B.C. (Not Ibbertson nor Barrell.)
Named, 1853, after Wm. Houston Stewart, his predecessor, by Commander Prevost, H.M.S. Virago.
- Howe**; sound, on north side of entrance to Burrard inlet, New Westminster district, B.C., 1792.
Named by Vancouver, 1792, after Admiral the Rt. Hon. Richard Serope, Earl Howe.
- Hunter**; channel, between Hunter and Campbell islands, connecting Queens sound and Lama passage, Coast district, B.C. (Not Plumper.)

I

Ibbertson channel. See Houston Stewart.

Icefall; peak, 10,420 feet, and brook, lat. $51^{\circ} 51'$, long. $117^{\circ} 11'$, Rocky mountains, B.C.
Descriptive: there are striking icefalls along its sides.

Inman; harbour, west of cape Barrow, Coronation gulf, Arctic coast, Mackenzie district, N.W.T.

Named by Franklin, 1821, after James Inman (1776-1859), professor of navigation at Royal Naval College, Portsmouth.

Inman; river, flowing into Amundsen gulf, Mackenzie district, N.W.T.

Named by Kendall, 1826, after Professor Inman.

Insect; river, flowing into lake Winnipegosis, in Tp. 37-R. 20-W. 1st, Man. (Not North Duck.)

Isola; peak, lat. $50^{\circ} 08'$, long. $114^{\circ} 30'$, Rocky Mountain, Alberta. (Not Isolated.)

An isolated mountain.

Istapta; creek, tributary to Blindman river in Tp. 43-2-5, Alberta. (Not West branch of Blindman.)

Istapta is a Stoney Indian name for the Blindman river.

Istapta river. See Blindman.

SESSIONAL PAPER No. 25b

J

Jervils; inlet, New Westminster district, B.C.

Named by Vancouver, 1792, after Rear Admiral Sir John Jervis, later Earl St. Vincent.

Johnson; See Johnston creek.

Johnston; creek, tributary to Bow river in Tp. 26-14-5, also cañon, Alberta. (Not Johnstone nor Johnson.)

After a prospector about 1882 who subsequently moved to Columbia valley and died there.

Johnstone creek. See Johnston.

Johnstone; strait, separating mainland of British Columbia from north side of Vancouver island.

Named by Vancouver, 1792, after James Johnstone, R.N. master of armed tender Chatham, who made the first examination of the channel.

Junction creek. See Clinton.

K

Kaipaha creek. See Waiparous.

Kapuskaing; lake, river tributary to Mattagami river, township, post office, and railway station, Algoma district, Ont.; river also in Timiskaming district.

Cree indian name meaning "branch" river.

Karmutzen; mountain, southwest of Mimpkish lake, Vancouver island.

Indian name meaning "waterfall".

Kater; point, Coronation gulf, Mackenzie district, N.W.T.

Named by Franklin, 1821, after Capt Henry Kater (1777-1835), one of the commissioners of the Board of Longitude.

Kaufmann peak. See Mons.

Kaufmann; peaks, 10,200' and 10,150', lat. 51° 53', long. 116° 45', Rocky mountains, Alberta.

Name on Collie map, Geographical Journal, 1903. After Christian and Hans Kaufmann, Swiss guides. The former was with Outram when the mountain was first climbed.

Kawatikouek river. See Coaticook.

Keats; point, Amundsen gulf, Mackenzie district, N.W.T. (Not Sir R. G. Keats.)

Named by Richardson, 1826, after Admiral Sir Richard Goodwin Keats (1757-1834), governor of Greenwich hospital.

Kelowna; creek, flowing southwesterly into Okanagan lake at Kelowna, Osoyoos district, B.C. (Not Mill.)

Kemmel; mountain, 10,160 feet, lat. 51° 53', long. 117° 11' Rocky mountains, B.C.

After Kemmel, about five miles south of Ypres, France, where the Canadians were heavily engaged on 26 April 1918.

Kemsquit river. See Kimsquit.

Kemswith river. See Kimsquit.

Kendall; cape, Coronation gulf, Mackenzie district, N.W.T.

Named by Richardson, 1826, after Lt. E. N. Kendall, R.N., assistant surveyor to the expedition.

Kimsquit; river, flowing into Dean channel, also village, Coast district, B.C. (Not Kemsquit, Kenswith nor Quinsquilt.)

King Christian; island, lat. 77° 45', long. 112° 00', Arctic ocean, Franklin district, N.W.T.

Named by Sverdrup expedition, 1901.

Kingcome mountains, river and inlet. See Kingcome.

Kingcome; mountains, river and inlet, Coast district, B.C. (Not Kingcombe.)

King Edward; mount 11,400 feet, lat. 52° 10', long. 117° 30', Rocky mountains, Alberta and B.C.

Named by Mrs. Schaffer, 1907, after Edward VII (1841-1910), succeeded to the throne, 1901.

Kinuso; falls, east branch of South Pine river, about lat. 54° 55', long. 120° 50', Cariboo district, B.C.

Cree Indian for "fish." Name suggested by S. Prescott Fay, owing to the great numbers of trout seen both above and below the falls, 1914.

Kippax lake. See Eramosh.

Kitchener; lake, five miles west of source of Finlay river (Thutade lake), Cassiar district, B.C.

After Lord Kitchener (1850-1916.)

Kitsahwall inlet. See Observatory.

Kittigazuit; native village east of delta of Mackenzie river, Mackenzie district, N.W.T. (Not Kittigaruit nor Kittigagzyt.)

Klewnuggit; inlet, Grenville channel, Coast district, B.C.

12 GEORGE V, A. 1922

Koch; river, east fork of Little Slocan river, Kootenay district, B.C. (Not East fork of Little Slocan nor Little Slocan.)

After W. E. Koch, mill owner and settler, 1896.

Koskemo sound. See Quatsino.

Krusenstern; cape, at eastern entrance to Dolphin and Union strait, Mackenzie district N.W.T.

Named by Richardson, 1826, after Adam Johann Krusenstern (1770-1846), Russian admiral and navigator.

Kynumpt; harbour, Scaforth channel, Coast district, B.C. (Not Active cove.)

Kyuquot; sound and village, west coast of Vancouver island, B.C. (Not Cayuquet nor Kuyu-quot.)

After Indian tribe.

L

Labrecque; island, Chezzetcook inlet, Halifax county, N.S. (Not Green.)

La Clytte; mountain, 9,505 feet, lat. $51^{\circ} 54'$, long. $117^{\circ} 09'$, Rocky mountains, B.C.

After a divisional reserve point in France, used by Canadian troops, from Oct. 1915 to Feb. 1916.

Lacs (rivière des); river, rising in Tp. 1-R. 2-W. 2nd, Sask., and flowing across the international boundary into Souris river, North Dakota, U.S. There is no River lake nor lac des Rivières at the head of this stream.

Lafamme island. See Morris.

Lambe; mount, 10,438 feet, lat. $51^{\circ} 44'$, long. $116^{\circ} 49'$, Rocky mountains, Alberta and B.C. Also glacier, Alberta.

After the late L. M. Lambe, vertebrate palaeontologist to the Geological Survey.

Lambert; cape and island, Dolphin and Union strait, Arctic coast, N.W.T.

The island was named by Richardson, 1826, after Aylmer Bourke Lambert (1761-1842), vice-president of the Linnean Society.

Lavan island. See Morris.

Lavan point. See Lavergne.

Lavanne point. See Lavergne.

Lavergne; point, with lighthouse thereon and bay adjoining, Morris island, Fitzroy township, Carleton county, Ont. (Not Lavan, Lavanne, nor Levan.)

After the late Francois Lavergne (often written Levan) a former keeper of the light.

Lawler island. See Lawlor.

Lawlor; island, entrance to Halifax harbour, Halifax county, N.S. (Not Lawler nor Webb.) After local family of this name.

Leaches lake. See Wallace.

Lecches lake. See Wallace.

Lens; mountain, 10,160 feet, lat. $51^{\circ} 55'$, long. $117^{\circ} 09'$, Rocky mountains, B.C.

After the town of Lens, Dept. of Pas de Calais, France, in commemoration of the battle there in which the Canadians participated. They entered Lens 21 August, 1917.

Levan point. See Lavergne.

Lewes; island, Coronation gulf, Franklin district, N.W.T. (Not Lewis.)

Lewis on Arrowsmith map of date 1843. Named by Simpson, 1838-39, probably after John Lee Lewes, chief factor, Hudson's Bay Company.

Lewis island. See Lewes.

Liard; trading post, Liard river, Mackenzie district, N.W.T. (Not Fort Liard.)

Lindeborg; mount, 6,500', lat. $56^{\circ} 07'$, long. $130^{\circ} 06'$, Cassiar district, B.C.

After Dan Lindeborg, pioneer who was of great assistance to the International Boundary surveyors in 1905, 1910 and 1920.

Liska village. See Ellazga.

Listening; mountain, 10,330', lat. $52^{\circ} 15'$, long. $117^{\circ} 44'$, Rocky mountains, Alberta.

Liston; island, Dolphin and Union strait, Franklin district, N.W.T.

Named by Richardson, 1826, after Sir. R. Liston.

Little river. See Brock.

Little Black river. See O'Hanly.

Little Forbes mountain. See Outram.

Little Herb lake. See Herblet.

Little Leach lake. See Wallace.

SESSIONAL PAPER No. 25b

Little Slocan; river, rising about lat. $49^{\circ} 47'$, long. $117^{\circ} 47'$, and flowing south and southeast into Slocan river, Kootenay district, B.C. (Not Koch.)

Lizzie lake. See Metigoshe.

Locker; point, south of cape Krusenstern, Coronation gulf, Mackenzie district. (Not Lockyer.)
Named by Richardson, 1826, after Edward H. Locker, secretary to the Royal hospital at Greenwich.

Lockyer point. See Locker.

Long lake. See Bottle.

Low; mount, 10,075 feet, lat. $51^{\circ} 43'$, long. $116^{\circ} 48'$, Rocky mountains, Alberta and B.C.
After A. P. Low, retired arctic explorer and formerly director of the Geological Survey, and deputy minister.

Luke; mount, northeast of junction of Kwadacha and Warneford rivers, Cassiar district, B.C.
After Frank Luke, U.S. airman, killed at front, 29 September, 1918. Name suggested by P. L. Haworth.

Lyon; cape, Amundsen gulf, Mackenzie district, N.W.T.

Named by Richardson, 1826, after Capt. George Francis Lyon R.N. (1795-1832), Arctic explorer.

M

McConnell; glacier, north of Quentin lake, headwaters of Warneford river, Cassiar district, B.C.
After R. G. McConnell, late deputy minister of Mines, an explorer of the region. Name suggested by P. L. Haworth.

McConnell; mount, 10,200', lat. $51^{\circ} 39'$, long. $116^{\circ} 00'$, Red Deer river, Alberta.
Named by Dr. G. M. Dawson, 1885, after R. G. McConnell, his assistant, 1882, later, deputy minister, Dept. of Mines.

McCrae; mount, northwest of junction of Kwadacha and Warneford rivers, Cassiar district, B.C.
After Lt.-Col. John McCrae, author of "In Flanders Fields." Name suggested by P. L. Haworth.

McDonald lake. See Morris.

McKillop; creek, tributary to Shand creek in Tp. 43-R. 7-W. 2nd, Sask.
After Miss McKillop, Soldier Settlement Board, Prince Albert, who visited the soldier settlement watered by the creek and advised in domestic matters.

Maclean; strait, between King Christian island and the other islands of the Findlay group, Arctic ocean, Franklin.

After Hon. A. K. Maclean, M. P., some time Minister without portfolio. Name given by V. Stefansson and submitted by the Department of the Naval Service.

McLeod; lake, Parsnip river, Cariboo district, B.C.
Named by Simon Fraser, 1805, after Archibald Norman McLeod.

MacNab; creek, tributary to Shand creek in Tp. 42-R. 6-W. 2nd, Sask.
After fire-ranger, who acted as referee in the draw for position of entry on the soldier settlement watered by the creek, 2 July, 1919.

McNab; island, Halifax harbour, Halifax county, N.S. (Not Maenab, Halifax nor Cornwallis.)
After Peter McNab who bought the island for £1,000 in 1783. So named on Colonial Office map, 1815.

McPherson; trading post, Peel river, Mackenzie district, N.W.T. (Not Fort McPherson.)

Malaspina; strait, between Texada island and mainland of B.C. (Not Nuestra Señora del Rosario.)

Named 1859, by Capt. Richards, after Capt. Alexandro Malaspina, the Italian seaman in the service of Spain, after whom Malaspina inlet was named, 1792, by Galiano and Valdes.

Malloch; mount, 10,067', lat. $51^{\circ} 50'$, long. $116^{\circ} 08'$, head of Clearwater river, Alberta.
After George Malloch, geologist, who mapped the area overlooked by this peak; also climbed it; perished in Canadian Arctic expedition.

Maquilla point. See Maquinna.

Maquinna; point, southern extremity of Nootka island, Vancouver island, B.C. (Not Maquilla, Moquina nor Moeuina.)

Named by Spaniards, 1791, after a well known Indian chief of Nootka.

Marcet; island, Coronation gulf, Franklin district, N.W.T.

Named by Franklin, 1821, after Dr. Marcet, inventor of an improved water bottle.

Marconi; mount, 10,190' lat. $50^{\circ} 23'$, long. $115^{\circ} 07'$, Rocky mountains, B.C.
After Guglielmo Marconi (1874—.)

Margaret; lake, Sees. 2 and 11, Tp. 1-R. 22-W. 1st, Man.
Name on 1880 township plan.

12 GEORGE V, A. 1922

Margerie (de); mount, 9,890 feet, lat. 51° 44', long. 116° 47', Rocky mountains, B.C.

After Emmanuel de Margerie, geographer, Paris, translator and editor of French edition of Suess' great work "La face de la Terre."

Marpole mount. See Tuxford.

Mather; creek, tributary to Kootenay river from the west, seven miles above Steele, Kootenay district, B.C. (Not Cherry.)

After R. D. Mather, owner of ranch at mouth of creek.

Mayer; river, falling into Hecate strait, with lake at its head, Graham island, Queen Charlotte islands, B.C. (Not Gold, Meyer nor Nahgun.)

After George Mayer, settler in vicinity.

Mazarredo island. See Nootka.

Meighen; island, Crown Prince Gustav sea, Arctic ocean, Franklin district, N.W.T.

After Rt. Hon. Arthur W. Meighen, Prime Minister, 1921. Name given by V. Stefansson and submitted by the Department of the Naval Service.

Meisener head. See Meisner.

Meisner; head, between Chezzetcook inlet and Petpeswick inlet, Halifax county, N.S. (Not Meisener, Misner, nor Mizner.)

Messines; mountain, 10,290 feet, lat 51° 50', long. 116° 59' 30". Rocky mountains, Alberta and B.C.

After Messines in West Flanders, about 5½ miles south of Ypres, in commemoration of the fighting there of Canadians.

Metigoshe; lake, Sec. 4, Tp. 1-R. 22-W. 1st, International boundary, Man. and North Dakota, U.S. (Not Fish nor Lizzie.)

Meyer river. See Mayer.

Meyers; lake, Black and Lee townships, near height-of-land, west of railway, Timiskaming district, Ont. (Not Gull.)

After vice-president of pulp company.

Milbanke; sound, lat. 52° 13', long. 128° 38', Coast district, B.C. (Not Milbank.)

Named 1788, by Capt. Charles Duncan of the sloop Princess Royal, after Vice-Admiral Mark Milbanke, third son of Sir Ralph Milbanke, fourth baronet.

Mill creek. See Kelowna.

Mineral; mountain, near headwaters of Klehini river, Cassiar district, B.C.

Misner head. See Meisner.

Mizner head. See Meisner.

Mocuina point. See Maquinna.

Mohr; island, Ottawa river, about three miles below Quyon, Pontiac county, Quebec. (Not Mohrs, Monk nor Six-mile.)

Monchy; mountain, 10,530 feet, lat. 52° 0' 30", long. 117° 01' 30", Rocky mountains, Alberta.

After the village which the British attacked and took on 26 August, 1918.

Monk island. See Mohr.

Mons; peak, lat. 51° 52', long. 117° 02', Rocky mountains, Alberta and B.C.; also creek, B.C., and icefield and glacier, Alberta. (Not Kaufmann, Snow, nor Victor.)

After the Belgian town which saw the first British fighting in the world war, 23 August, 1914, and which was recaptured and entered by the Canadians immediately before the armistice, 11 November, 1918.

Montagneuse creek. See St. John.

Montagneuse; lake and river, tributary to Peace river in Tp. S4-R. 6-W. 6th, Alberta.

Moore; bay, Coronation gulf, Arctic coast, N.W.T.

Named by Franklin, 1821, after Daniel Moore of Lincoln's Inn, to whom "the expedition was indebted for the use of a most valuable chronometer."

Moore; lake, north of Shag bay, Halifax county, N.S. (Not Dan nor Moor's.)

Moore; lake, Tps. 22-23-R. 6-E. 1st, Manigotagan river, Man.

After E. S. Moore, Geological Survey, who worked in that region in 1912.

Moquina point. See Maquinna.

Moresby; island, Queen Charlotte islands, B.C.

Named by Com. Prevost, 1853, after his father-in-law, Rear Admiral Fairfax Moresby, commander-in-chief, Pacific station, 1850-53.

Morris; island, with lighthouse thereon, Mississippi river, head of Chats rapids, Ottawa river, Fitzroy township, Carleton county, Ont. (Not Government, Laflamme, Lavan nor Victoria.)

So named on T. C. Clarke's survey of Chats canal, dated 2 January, 1860. May be after Wm. Morris (1812-71), lumber men, who operated on the Madawaska, Bonnetchère, Petawawa and Montreal rivers, branches of the Ottawa from 1838 to 1866.

SESSIONAL PAPER No. 25b

Morris; lake, southeast of Dartmouth, Halifax county, N.S. (Not McDonald.)

After Indian family of Morris living at the lake.

Mukutawa; river, flowing into lake Winnipeg, in Tp. 48-R 1-E. 1st, Man. (Not Big Black nor Blackwater.)

Cree for "It is black" (water).

N

Nahgun river. See Mayer.

Nanga Parbat; mountain, lat. 50° 42', long. 116° 52', Rocky mountains, Alberta and B.C.

After the mountain of the same name in the Himalayas on which A. F. Mummery perished.

Nanoose; bay, north of Nanaimo, strait of Georgia, Vancouver island, B.C.

An adaption of the name of the Indians residing here adopted for the bay by Capt. Richards, H.M.S. Plumper, 1859.

Nasparti; inlet, west coast of Vancouver, island B.C. (Not Nasparte, Nasparto, Naspatte nor Nespod.)

Adaption of name of Indian tribe adopted by Capt. Richards, 1862.

Naufi point. See Nauffts.

Nauffts; point, at west entrance to Musquodoboit harbour, Halifax county, N.S. (Not Naufi.)

Family name.

Neilson creek. See Gwillim.

New Channel. See Gordon.

Newport; river, rising in Ditton township and flowing into Eaton river in Eaton township, Compton county, Que. (Not North nor Ditton.)

Nichols; lake, Prospect river, Halifax county, N.S. (Not Nichol nor Nicholson.)

Nigel; peak, 10,535', lat. 52° 14', long. 117° 10', Rocky mountains, Alberta.

Named by J. Norman Collic, 1898, after Nigel Vavasour, mountain-climbing companion

Niverville; mount, 9,720 feet, lat. 51° 47', long. 116° 56', Rocky mountains, Alberta and B.C.

After Joseph Bouher, Chevalier de Niverville whose party of ten men in two canoes sent up the Saskatchewan river from The Pas, Manitoba, built fort Lajonquière, 1751.

Noire (rivière). See Bécaneour.

Nootka; island, and sound, west coast of Vancouver island, B.C. (Not Nutka nor Mazarredo.)

Sound discovered and named Nootka by Capt. Cook, April, 1778, after he had named it King George's sound, the change being made because he thought Nootka was the Indian name.

North Pine river. See Beaton.

North point. See Rabast.

North river. See Newport.

North branch of Blindman river. See Blindman.

North branch of Ghost river. See Waiparous.

North Duck river. See Duck.

North Duck river. See Insect.

North Pine river. See Pine.

Nuchatlitz; inlet, Nootka island, Vancouver island, B.C. (Not Nuchalitz not Ferrer.)

Nuestra Senora del Rosario strait. See Malaspina.

Nutka island. See Nootka.

O

Oblats (lae des) lake, Maniwaki township, Ottawa county, Quebec. (Not Abitibi, Beetobee Bitobee nor Bitobi.)

After the Oblate Fathers, who have a house on the lake.

Observatory; inlet, Cassiar and Coast districts, B.C. (Not Kitsahwatl.)

Named by Vancouver, 1793, because he set up his observatory in Salmon cove in this inlet to correct his positions and ascertain the rates of his chronometers.

O'Connor; river, tributary to Alsek river, Cassiar district, B.C. (Not Boundary.)

After T. O'Connor of Rainy Hollow.

O'Hanly; river, tributary to Black river in Tp. 21-R. 9-E. 1st, Man. (Not Little Black.)

After J. L. P. O'Hanly, who surveyed Black River Indian reserve, 1878.

Oppy; mountain, 10,940 feet, lat. 51° 58', long. 117° 09', Rocky mountains, Alberta and B.C.

After the village about six miles southeast of Lens, in commemoration of the fighting that took place there.

12 GEORGE V, A. 1922

Osborn; small island, west of southern portion of Borden island, Arctic ocean, Franklin district N.W.T.

After Dr. Henry Fairfield Osborn, president of the American Museum of Natural History of New York. Name given by V. Stefansson and submitted by the Department of the Naval Service.

Outram; mount, lat. $51^{\circ} 53'$, long. $116^{\circ} 52'$, Rocky mountains, Alberta. (Not Little Forbes.) Also Sir James, glacier on the south side of mount Outram.

After Sir James Outram, Bart, noted mountain climber.

Oweekayno lake. See Owikeno.

Owikeno; lake, northeast of Rivers inlet, Coast district, B.C. (Not Oweekayno.)

P

Pangman; mount, 10,420 feet, lat. $51^{\circ} 46'$, long. $116^{\circ} 58'$, Rocky mountains, Alberta and B.C. Also glacier, Alberta.

After Peter Pangman, fur trader.

Parr; lake, east of Sambro road, south of Halifax, Halifax county, N.S.

Paskapoo river. See Blindman.

Pasley; cove, west of cape Krusenstern, Dolphin and Union strait, Mackenzie district, N.W.T. Named by Richardson, 1826, after Lt. Col. Pasley, R.E., inventor of a portable boat.

Pasque; mountain, $8,337'$, lat. $50^{\circ} 10'$, long. $114^{\circ} 34'$, Alberta.

From the abundance of pasque-flowers found near the summit.

Patterson; island, Findlay group, Arctic ocean, Franklin district, N.W.T. (Not Paterson.)

So called in "Further Papers relative to the Recent Arctic Expeditions in search of Sir John Franklin," 1855.

Pearce; point, Amundsen, gulf, Mackenzie district, N.W.T. (Not Pierce.)

Named by Kendall, 1826, after a friend.

Peck; mount, $9,584'$, lat. $50^{\circ} 08'$, long. $115^{\circ} 03'$, Elk river, B.C.

After H. M. Peck, assistant on Geological Survey party; killed in World war.

Phillips; strait, between Borden island and the island to the west of it, Arctic ocean, Franklin district, N.W.T.

After George Phillips, Naval Store officer at Esquimalt, 1913-16. Accompanied Canadian Arctic Expedition as far as Nome. Name given by V. Stefansson and submitted by the Department of the Naval Service.

Pikwitonei; river, flowing across railway into Natawahunan lake, Grass river in Tp. 77-R-2-E, 1st M., Man. Also post office. (Not Piquitonay nor Piquitona.)

Indian name meaning "brokenmouth."

Pilkington; mount, 10,830 feet, lat. $51^{\circ} 43' 50''$, long. $116^{\circ} 55'$, Rocky mountains, Alberta and B.C.

After Charles Pilkington, past president, Alpine Club, England.

Pine river. See Garland.

Pine; river, tributary from south to Peace river, below fort St. John, Peace River district B.C.

Pine; river, flowing into lake Winnipegosis in T. 35-R. 19-W. 1st, Man. (Not North Pine.)

Pine River railway station and Pine River Indian reserve are near this river.

Plumper channel. See Hunter.

Polly; lake, Secs. 3 and 10, Tp. 1-R. 21-W. 1st, Man.

Name on 1880 township plan.

Port Elizabeth; harbour, south shore of Gilford island, Knight inlet, Coast district, B.C.

Named by Capt. Pender, about 1867, after Elizabeth Henrietta, wife of Lord Gilford and daughter of Sir. A. E. Kennedy, governor of Vancouver island, when the frigate Tribune under Lord Gilford's command was on Pacific station, 1862-64.

Port Hawkesbury. See Port San Juan.

Portland; inlet, Coast district, B.C. (Not Brown.)

The inlet was named Brown by Vancouver, 1793, but the name Portland, given by him to the canal after the house of Portland, was transferred to it later.

Port San Juan; harbour, first anchorage within entrance to Juan de Fuca strait, Vancouver island, B.C. (Not Port Hawkesbury.)

Named 1790, by Sub. Lieut. Manuel Quimper "puerto de San Juan o de Narvacz."

Port Simpson; village at northwest corner of Tsunpsean peninsula, north of Prince Rupert, Coast district, B.C.

After Captain Aemilius Simpson, lieutenant, R.N. and, later, an officer in the marine service of the Hudson's Bay Co., chief trader; died September, 1831, at fort Nass, 20 miles up Nass river renamed shortly after fort Simpson; in 1834 a new fort nearer the ocean was built and named Port Simpson.

SESSIONAL PAPER No. 25b

- Prince of Wales;** highway, between Ottawa and Prescott, Carleton and Grenville counties Ont.
After H.R.H. the Prince of Wales.
- Princess Royal;** island, Coast district, B.C.
Named by Capt. Charles Duncan, 1788, after his sloop *Princess Royal*.
- Principle;** channel, between Banks and Pitt islands, Coast district, B.C.
Named by Caamaño, 1792.
- Prior;** mount, 10,250 feet, lat. $51^{\circ} 43'$, long. $116^{\circ} 56'$, Rocky mountains, B.C.
After Col. Hon. E. G. Prior, Lieut. Governor of British Columbia.
- Pyke;** river, tributary to Etechemin river from south in Frampton township, Dorchester county, Que. (Not Pykes nor Pikes.)

Q

- Quatsino;** sound, northwest coast of Vancouver island, B.C. (Not Quatsinough nor Koskeemo).
Adaptation of name of Indian tribe.
- Quéant;** mountain, 10,200 feet, lat. $52^{\circ} 0' 50''$, long. $117^{\circ} 14'$, Rocky mountains, Alberta and B.C.
After the village captured by Canadian troops, 2 September 1918.
- Queen Charlotte;** channel, Howe sound, New Westminster district, B.C.
Named by Capt. Richards, about 1860, after H.M.S. *Queen Charlotte*.
- Queen Charlotte;** islands, Coast district, B.C. Named by Dixon, 1787, after his ship.
- Queen Charlotte;** sound, that body of water, British Columbia, the northerly boundary of which is a line from the most southerly point of Aristazabal island, to cape St. James the most southerly point of Kunghit island, the westerly boundary being a line starting at cape St. James thence southerly passing to westward of Triangle island to cape Scott on Vancouver island. The southerly boundary is from cape Scott eastward along the northerly coast of Vancouver island to cape Sutil, thence to cape Caution on the mainland along the line forming the northwesterly boundary of Queen Charlotte strait. The eastern boundary starts at cape Caution, thence follows northerly the mainland and Coastal islands, to the most southerly point of Aristazabal island, the point of commencement.
- Queen Charlotte;** strait, the restricted body of water between Vancouver Island and the mainland of British Columbia, from a line between cape Sutil and cape Caution southeastward to the several narrow channels northward and eastward of Malcolm island.
- Queen Maud;** gulf, Arctic coast, Mackenzie and Keewatin districts, N.W.T.
Named by Amundsen, 1904, after Maud, Queen of Norway.
- Quemsquill river.* See Kimsquit.
- Quentin;** lake, headwaters of Warneford river, Cassiar district, B.C.
After Quentin Roosevelt, U.S. airman, killed at front 14 July, 1918. Name suggested by P. L. Haworth.
- Quesnei;** lake, below Manigotagan lake, Manigotagan river, Man. (Not Caribou.)
After Bidou Quesnel, a settler at the mouth of Manigotagan river.
- Quetachu;** river, flowing into Quetachu bay, east of Piashti river, north shore, gulf of St. Lawrence, Saguenay county, Que. (Not rivière Grande Baie de Piashtibaie.)
- Quincy;** mount, 10,400', lat. $52^{\circ} 20'$, long. $117^{\circ} 40'$, Rocky mountains, Alberta. (Not Blackfriars.)
Named by A. P. Coleman, 1892, after his brother Lucius Quincy Coleman, rancher, Morley, Alberta.

R

- Rabast** (eap de); cape, north point of Anticosti island, Saguenay county, Que. (Not North)
French name used by Cartier, 1535, meaning "where the land begins to fall away."
- Rae;** river, flowing into Backs inlet, Coronation gulf, Mackenzie district, N.W.T.
After Dr. John Rae (1813-93), Arctic explorer.
- Rae;** trading post, north arm, Great Slave lake, Mackenzie district, N.W.T. (Not Fort Rae.)
Raumur island. See Roma.
- Redding;** creek, tributary to St. Mary river from west, Kootenay district, B.C. (Not Baker.)
- Rendell;** creek, flowing parallel to Kettle river on the east and tributary to it below Dumfries creek, Osoyoos and Similkameen districts, B.C. (Not East Fork of Kettle.)
After G. A. Rendell, active in development of the mining district at the head of the creek.
- Rice;** glaciers, Alberta and B.C., and brook B.C. Refer to Spring-Rice.
- Richardson;** river flowing into Backs inlet, also bay, south of Backs inlet Coronation gulf, Mackenzie district, N.W.T.
Named by Franklin after Dr. (later Sir) John Richardson (1787-1865), surgeon and naturalist, 1819-20 and 1825-27 expeditions.

Rivers; inlet, Coast district, B.C.

Named by Vancouver, 1792, after George Pitt, first Baron Rivers.

Riverside; mountain, lat. $50^{\circ} 28'$, long. $115^{\circ} 00'$, Elk river, B.C.

Descriptive.

Rocky Mountain lake. See Gwillim.

Roma; island, Chezzetcook inlet, Halifax county, N.S. (Not Raumur.)

Rond (lac). See Hicks.

Roscoc; river, flowing into Amundsen gulf, Mackenzie district, N.W.T.

Named by Richardson, 1826, after Wm. Roscoc (1753-1831), English historian.

Ross lake. See Eramosh.

Rostrum; peak, 10,770 feet, lat. $51^{\circ} 50'$, long. $170^{\circ} 11'$, Rocky mountains, B.C.

Descriptive of the appearance of the summit.

Round lake. See Sartigan.

Rover; brook, tributary to ruisseau à l'Eau-Chaude, Etchemin river, Dorchester county, Que. (Not Rovers nor Rower.)

Rudey; head, Wedge island, Three Fathom harbour, Halifax county, N.S.

S

St. Agapit; village and brook, tributary to Beaurivage river from west, Lotbinière county, Quebec. (Not Black.)

St. John; creek, tributary to Beatton river, Peace River district, B.C. (Not Montagneuse.)
Named after Indian reserve through which it flows.

St. Julien; mountain, 10,740 feet, lat. $57^{\circ} 50'$, long. $117^{\circ} 01'$, Rocky Mountains, Alberta and B.C.

After the village about 3 miles northeast of Ypres, where a gallant fight by the Canadians occurred, 26 April, 1915.

St. Mary's island. See Walpole.

St. Ronan; hill, Buckland township, Bellechasse county, Que. (Not St. Romans nor St. Roonaes.)

St. Victor; village and brook, tributary to Chaudière river, Beauce county, Que. (Not rivière du Bras nor rivière Le Bras.)

Sartigan; lake and post office, Beauce county, Que. (Not Round lake.)

A map of d'Anville, 1780, shows a post called "Sartigan" below the forks of Etchemin river.

Sclater; river, flowing into Duck bay, lake Winnipegosis, also railway station, Man. (Not South Duck.) Decision revised.

Name of railway contractor.

Scottie; mountain, west of Parton river, Tatshenshini river, Cassiar district, B.C.

Selkirk; island, northern portion of lake Winnipeg, Man. (Not Horse.)

So named on Hind map, 1859.

Sellers; head, near east entrance to Three Fathom harbour, Halifax county, N.S. (Not Seller nor Sellers.)

Seller Head. See Sellers.

Shaler; mountains, south of Glenelg bay, north coast of Victoria island, Arctic ocean, Franklin district, N.W.T.

After late Prof. N. S. Shaler, geologist, Harvard University. Name given by V. Stefansson and submitted by the Department of the Naval Service.

Shand; creek, tributary to Etomami river in Tp. 42-R. 4-W. 2nd, Sask.

After homesteader, who drew the attention of the Soldier Settlement Board to the region watered by the creek.

Sheep creek. See Big Sheep.

Sir H. Davyhill. See Darvy.

Sir James; glacier, mount Outram, Rocky mountains, Alberta. See Outram mount.

Sir R. G. Keats point. See Keats.

Six-mile island. See Mohr.

Skene; mount, 10,100', lat. $51^{\circ} 46'$, long. $116^{\circ} 51'$, Rocky mountains, Alberta.

After Peter Skene Ogden, fur trader.

Slade. See Bruce creek.

Smith; island, Skeena river, Coast district, B.C. (Not McGrath.)

After Marcus Smith, Canadian Pacific Ry. surveys engineer.

SESSIONAL PAPER No. 25b

Smith islands. See Crammond.

Smith Landing. See Fitzgerald.

Snow mountain. See Brent.

Snow mountain. See Mons peak.

Snow Dome; mountain, 11,340', lat. $52^{\circ} 11'$, long. $117^{\circ} 19'$, Rocky mountains, Alberta and B.C.
(Not Dome.)

Solitaire; mountain, 10,800 feet, lat. $51^{\circ} 45'$, long. $116^{\circ} 50'$, Rocky mountains, Alberta.
Descriptive of its position at centre of Conway glacier.

Songars. See Songhees.

Songhees; point, Victoria harbour, Vancouver island, B.C. (Not Etzanish, Songars, Songees, Songlies, Songisch, Songish, Thongeth, Tsunas, nor Tsong.)

From the name of the Indian tribe of which the point formed part of the reserve.

Souris River and trading Post. See Bélanger.

South river. See Eaton.

South branch of Panther river. See Dormer.

South Duck river. See Slater.

Taylor island. See Tailor.

Souths; bay, Dolphin and Union strait, Mackenzie district, N.W.T. (Not South.)

Named by Richardson, 1826, after Sir James South (1785-1867), first president, 1829, of the Astronomical Society.

Spring-Rice; mount, 10,745 feet, lat. $52^{\circ} 01'$, long. $117^{\circ} 14'$, Rocky mountains, Alberta and B.C. Also Rice glaciers.

After the late Sir Cecil Spring-Rice, G.C.V.O., G.C.M.G., British Ambassador to U.S.; died 14 February, 1918.

(NOTE.—Mount Bryce rises on the opposite side of the valley.)

Squakum; lake, west of Harrison bay, near Harrison Mills, Tp. 24-R. 1-W. 7th, New Westminster district, B.C. (Not Echo, Errich, Eriecht, Squawkum nor Squacum.)

Stapylton; bay, Amundsen gulf, Mackenzie district, N.W.T.

Named by Richardson, 1826, after Major General the Hon. G. A. C. Stapylton, chairman of the Victualling Board.

Stevenson; mount, lat. $56^{\circ} 03'$, long. $129^{\circ} 57'$, Cassiar district, B.C. (Not Shorty Stevenson.)

After "Shorty" Stevenson, prospector, killed in World war.

Stockport; island, Coronation gulf, Franklin district, N.W.T.

Named by Franklin, 1821.

Strahan; mount, 9,960 feet, lat. $51^{\circ} 47'$, long. $116^{\circ} 50'$, Rocky mountains, Alberta.

After Dr. Aubrey Strahan, director, Geological Survey of Great Britain.

Sundial; mountain, 10,438', lat. $52^{\circ} 14'$, long. $117^{\circ} 38'$, Rocky mountains, Alberta.

Resembles the index arm of a sundial.

Sunwapta; pass, between North Saskatchewan and Sunwapta rivers, also peak, 10,883', lat. $52^{\circ} 21'$, long. $117^{\circ} 16'$, Rocky mountains, Alberta.

Survey; peak, lat. $51^{\circ} 57'$, Howse river, north of Glacier lake, Rocky mountains, Alberta.

Climbed by Collic, long. $116^{\circ} 54'$, 11 August, 1898, to enable him to begin his plane table survey. Named by him.

Sutton; island, Dolphin and Union strait, Franklin district, N.W.T.

Named by Richardson, 1826, after Manners Sutton.

Tahsish; river and arm, Kyuquot sound, Vancouver island, B.C.

Descriptive Indian name meaning "road" or "passage."

T

Tailor; island, Bras d'Or lake, Inverness county, Cape Breton island, N.S. (Not Taylor.)

John McRae, first settler on the island, was a tailor by trade.

Tangle; ridge, 9,859', lat. $52^{\circ} 18'$, long. $117^{\circ} 17'$, also creek, Sunwapta river, Rocky mountains, Alberta.

The creek was so named by Mrs. Schaffer, 1907, because the valley was difficult to travel through.

Tasis; river, canal and narrows, Nootka sound, Vancouver island, B.C. (Not Tahsis.)

Taylor island. See Tailor.

Termier; mount, 9,385 feet, lat. $51^{\circ} 44'$, long. $116^{\circ} 45'$, Rocky mountains, B.C.

After T. M. Termier, director of Geological Service, France.

Terrace; mountain, 9,570 feet, lat. $52^{\circ} 05' 30''$, long. $117^{\circ} 10'$, also creek, Rocky mountains, Alberta
Descriptive name.

12 GEORGE V, A. 1922

Terrace river. See Beaton.

Thetford river. See Bécancour.

Thongcith. See Songhees.

Threemile creek. See Durand.

Thurlow; islands, Johnstone strait, Coast district, B.C.

Named by Vancouver, 1792, after Lord Chancellor Thurlow (1732-1806).

Tinney; point, Amundsen gulf, Mackenzie district, N.W.T.

Named by Richardson, 1826, after W. H. Tinney, Lincoln's Inn.

Tlupana; arm, Nootka sound, Vancouver island, B.C. (Not Clewpaneloo, Clupananul, Tlupananul, Hapana, Tlupananoutl nor Tlupananuig.)

After an Indian chief.

Tough; brook, tributary to Etchemin river, above St. Malachie railway station, Frampton township, Dorchester county, Que.

Tree; river, flowing into port Epworth, Coronation gulf, Mackenzie district, N.W.T.

So named by Franklin in the belief that it was the Napparktoktowoek or "spruce-tree" river of the Eskimos, whereas this river is the one immediately to the east of Coppermine river. The present Eskimo name for the Tree river, on which there are no trees near the coast, is the Kogluktualuk or "river with big rapids or falls."

Trutch; mountain, lat. $51^{\circ} 42'$, long. $116^{\circ} 53'$, Rocky mountains, Alberta and B.C.

After Sir Joseph Trutch, first Lieut.-Governor of B.C.

Tsaumas. See Songhees.

Tsong. See Songhees.

Turnbull; mount, lat. $50^{\circ} 13'$, long. $114^{\circ} 50'$, Fording river, B.C.

Name on "Plan of Elk River Coal lands," 1905; after J. M. Turnbull, later, professor of Mining, University of British Columbia, Vancouver, B.C.

Turnour; island, Knight inlet, Coast district, B.C. (Not. Turner.)

Named by Capt. Pender about 1866 after Capt. Nicholas Edward Brooke Turnour, commanding on Pacific Station, 1864-68, H.M. steam corvette Clio, 22 guns.

Tuxford; mount, 8,365', lat. $50^{\circ} 17'$, long. $114^{\circ} 52'$, Fording river, B.C.

After Brig. General C. S. Tuxford, C.B., C.M.G.

Twins (The); peaks, lat. $52^{\circ} 13'$, long. $117^{\circ} 26'$, Rocky mountains, Alberta.

A double-headed mountain, named by J. Norman Collie, 1898.

Tyrrell; mount, 8,919' lat. $51^{\circ} 42'$, long. $115^{\circ} 51'$, also creek tributary to Red Deer river, Alberta.

Named by Dr. G. M. Dawson, 1885, after J. B. Tyrrell, M.E., his assistant, 1883.

V

Valenciennes; mountain, lat. $51^{\circ} 49'$, long. $117^{\circ} 00'$, Rocky mountains, B.C.

After the French town, captured by the allies, and entered by the Canadians, 2 November, 1918.

Veits; mount, lat. $50^{\circ} 20'$, long. $114^{\circ} 52'$, Fording river, B.C.

Name on "Plan of Elk River Coal lands," 1905; after late J. D. Veits, sometime accountant of the Mining and Smelting Dept. of the Canadian Pacific Ry.

Victor. See Mons peak.

Victoria; island, Fitzroy harbour, Ottawa river, Carleton county, Ont.

Name appears on all maps and plans since 1845.

Victoria island. See Morris.

W

Waiparous; creek, tributary to Ghost river in Tp. 27-R. 6-W. 5th, Alberta. (Not Kaipaha, North branch of Ghost river, Waipiuse nor Waiparow.)

Name on Palliser map, 1865; corruption of Stoney Indian name meaning "Crow (Indian) scalp."

Walker; mount, 10,835 feet, lat. $51^{\circ} 43'$, long. $116^{\circ} 55'$, Rocky mountains, Alberta.

After Horace Walker, past president, Alpine Club, England. Name first appears in Collie's map in Geog. Journal, 1899.

Wallace; lake, Tps. 23-24-R. 15-E. 1st., Wanipigow river, Man.

After R. C. Wallace, professor of geology and mineralogy, University of Manitoba.

Wallis lake. See Wallace.

SESSIONAL PAPER No. 25b

- Wallace;** lake, international boundary, Compton county, Quebec. (Not Leaches, Leeches, Little Leach nor Wallis.)
Name on Arrowsmith map, 1880.
- Walpole;** island, St. Clair river, Lambton county, Ont. (Not St. Mary's).
On a chart of lake St. Clair prepared for Commodore Sir Edward Owen in 1815, the island is called St. Mary's but a bay and channels are called Walpole, probably after Lt. Arthur Walpole, R.E., 1st Lt. 1813; died 1842; served in Canada; prepared Fort Erie plan, 1818-19.
- Wares brook.** See Eau Chaude.
- Warwick;** mountain, lat. $52^{\circ} 14'$, long. $117^{\circ} 33'$, Athabaska river, Rocky mountains, Alberta.
A castellated mountain.
- Watchman;** peak, 9,873 feet, lat. $52^{\circ} 02' 30''$, long. $117^{\circ} 14'$, Rocky mountains, Alberta.
Descriptive.
- Watchorn;** lake and bay, lake Manitoba, Tp. 26-R. 8-W. 1st, Man. (Not Doghung nor Ani-moosekagaging.)
After H. T. D. Watchorn, postmaster, Bayton, settler about 1903.
- Webb island.** See Lawlor.
- Wekuskasis lake.** See Herblet.
- West branch of Blindman river.** See Istapta.
- White;** mount, 9,040', lat. $51^{\circ} 39'$, long. $115^{\circ} 51'$, Red Deer river, Alberta.
Named by Dr. G. M. Dawson, 1885, after James White, his assistant, 1884, later, assistant to chairman, Commission of Conservation.
- Whiteaves;** mount, 10,300 feet, lat. $51^{\circ} 43'$, $50''$, long. $116^{\circ} 48'$, Rocky mountains, Alberta and B.C.
After the late J. F. Whiteaves, LL.D., F.R.S.C., palaeontologist, Geological Survey.
- White Sheep creek.** See Big Sheep.
- Willerval;** mountain, 10,420 feet, lat. $52^{\circ} 01'$, long. $117^{\circ} 01'$, Rocky mountains, Alberta.
After the village about five miles south of Lens, France, captured by Canadians, 13 April, 1917.
- Wise;** point, Amundsen gulf, Mackenzie district, N.W.T.
Named by Kendall, 1826, after Capt. W. F. Wise, R.N., under whose command he sailed in H.M.S. Spartan.
- Wollaston;** point, Coronation gulf, Mackenzie district, N.W.T.
Named by Franklin, 1821, after Wm. Hyde Wollaston (1766-1828), English chemist.
- Wooden;** cove, mouth of Hosier river, St. Margaret bay, Halifax county, N.S. (Not Woodin.)
Family name.
- Woolley;** mount, 11,170', lat. $52^{\circ} 18'$, long. $117^{\circ} 25'$, Sunwapta river, Rocky mountains, Alberta.
Named by J. Norman Collie, 1898, after H. Woolley, fellow climber.
- Wrigley;** trading post, Mackenzie river, Mackenzie district, N.W.T. (Not Fort Wrigley.)

Y

- Yomelsin creek.** See Big Sheep.
- Young;** cape, Amundsen gulf, Mackenzie district, N.W.T.
Named by Richardson, 1826, after Thos. Young, secretary to the Board of Longitude.
- Yuen;** mount, southeast of junction of Kwadacha and Warneford rivers, Cassiar district, B.C.
After Nap Yuen, Chinese member of 1914 exploratory party. Yuen was engaged on railway survey work in 1885.

Z

- Zillebeke;** mountain, 9,750 feet, lat. $51^{\circ} 47'$, long. $117^{\circ} 04'$, Rocky mountains, B.C.
After the village about $1\frac{1}{2}$ miles east of Ypres, in commemoration of the heavy fighting in the Ypres salient.

PART II.

MEANING OF CANADIAN CITY NAMES

COMPILED BY

R. DOUGLAS, M.A.

Secretary, Geographic Board of Canada.

ALBERTA

Calgary was so named in 1876 by Colonel James Farquharson Macleod of the Royal Northwest Mounted Police. It is the name of the ancestral estate of his mother's family, the Mackenzies, on the island of Mull, Scotland, which he had visited shortly before. Calgary is a Gaelic word the meaning of which is disputed. In the fall of 1875 there was trouble with halfbreeds and Indians in Prince Albert region and Major-General E. Selby Smyth, commanding the Canadian Militia, was sent from the east to investigate. He travelled across the prairie northwesterly from Winnipeg. Colonel Macleod, then in command of the mounted police, whose headquarters were fort Macleod, which he had built the previous year, was advised by telegraph to meet General Smyth at Red Deer with fifty men. At the conference one of the matters agreed on was that a police post should be established on Bow river. On his return south Colonel Macleod, who had earlier in the year established fort Walsh in the Cypress hills, on 6 August, 1875, sent E troop under Inspector E. A. Brisebois to erect barracks on the west side of the Elbow and south side of the Bow, in the angle between the two rivers, a site evidently selected by Colonel Macleod before he went north. The buildings were erected by the I. G. Baker Co., a fur-trading concern which had a trading post of its own in the vicinity but on the east side of Elbow river. The circumstances under which the name was given are narrated in the following letter with endorsement by Edward Blake, minister of Justice sent by Asst. Commr. A. G. Irvine from fort Macleod, 29th February, 1876, to Lt.-Col. Bernard, C.M.G., Deputy Minister of Justice, Ottawa:—"As we have now a post or fort at Bow River it would be as well if it was known by some name, I visited the post about a fortnight ago with Colonel Macleod, and when we were there Inspector Brisebois (who is in command of the station) issued an order without consulting either Colonel Macleod or myself—stating that all public documents sent from his Fort were to be headed Fort Brisebois. I, of course, cancelled the order at once, as in the first place Inspector Brisebois had no authority to issue such an order and in the second place the Fort was not built by Inspector Brisebois' Troop and neither the Troop or the people about there wish the place called Brisebois. Colonel Macleod has suggested the name of Calgary which I believe in Scotch means running water, a very appropriate name I think. Should the Minister be pleased to approve of this name I will issue an Order to that effect". The endorsement is "Do not interfere with Asst. Comr's. discretion in choosing the name he mentions. E.B". Brisebois resigned from the force 16 August, 1876. A mounted police report dated 30 December, 1876, states that there were stationed at Fort Calgary at that time, one inspector, one sub-inspector and thirty-five constables and sub-constables. This same year the Hudson's Bay Company opened a trading station close to the site of the fort with Angus Fraser in charge. There were three structures—a store, a residence for the manager and an interpreter's cabin—which were made of logs floated down the river from the west. Information from G. C. King, postmaster, Calgary, James F. Stanford, Great Falls, Montana, former members of the force and other sources. Post office opened 1 October, 1883.

SESSIONAL PAPER No. 25b

Edmonton takes its name from fort Edmonton, built 1795, twenty miles distant down the North Saskatchewan river by George Sutherland, Hudson's Bay Co., and so named probably as a compliment to his clerk, John Prudens, a native of Edmonton, near London, England. The site of the fort was on the north bank of the river a mile and a half above the mouth of Sturgeon river. Beside fort Edmonton stood Fort Augustus of the North West Company, built a year or so earlier. Both trading posts were destroyed by the Indians and abandoned in 1807. New forts of the same names were built by the rival traders in 1808 on the slope of the high bank within the present city of Edmonton. The city is shown by its present name, that is, without the prefix "fort" on the map accompanying Milton and Cheadle's "The Northwest Passage by Land", published 1865. J. B. Tyrrell in David Thompson's Narrative, Toronto, 1916, page 432. Post office opened 1 February, 1877.

Lethbridge was staked out in the spring of 1885 and named after Wm. Lethbridge (1824-1901) the first president of the North Western Coal and Navigation Company, Ltd. Mr. Lethbridge was a partner in W. H. Smith and Son, booksellers, London, England. Prior to 1885 called Coal Banks. Information from C. A. Magrath, Ottawa and W. H. Smith and Son, London, England. Post office opened 1 October, 1885.

Medicine Hat is a translation of the Blackfoot Indian name of the place Saamis, meaning "headdress of a medicine man". About 1882 W. Johnson, a member of the Royal Northwest Mounted Police erected the first house of the future city on a site which is still known as the Johnson subdivision. The origin of the name Saamis is uncertain; one explanation connects it with a fight between the Cree and Blackfoot tribes, when the Cree medicine man lost his war bonnet in the river; another with the slaughter of a party of white settlers and the appropriation by the Indian medicine man of a fancy hat worn by one of the victims; another with the rescue of a squaw from the South Saskatchewan river by an Indian brave, upon whose head a well known medicine man placed his own hat as a token of admiration of the act of the rescuer; still another story says the name was given to the locality because an Indian chief saw in a vision an Indian rising out of the South Saskatchewan wearing the plumed hat of a medicine man; it is also alleged that the name was applied to a hill east of the town, from its resemblance to the hat of an Indian medicine man. Post office opened 1 July, 1883.

Red Deer takes its name from the Red Deer (in Cree Indian *waskasu*) river on which it is situated. Three miles west of the present city is a ford where the trail from the south to Edmonton crossed the river. Traffic north over the prairie greatly increased after the Canadian Pacific Railway reached Calgary in 1883 and in the fall of that year a stopping place and a trading post were erected at the Red Deer crossing. As time passed the word "crossing" dropped out of use. In the early summer of 1891 steel was laid on the Calgary and Edmonton railway as far as Red Deer river and the company proceeded to lay out the present town on the banks of the river at a point, as already stated, three miles below the original settlement or crossing and, after considerable discussion between the late James Ross, representing the railway company and the late Rev. Leonard Gaetz, representing the early settlers, it was agreed to retain the name Red Deer for the new town. During the summer, both of the traders who were located at the crossing moved down the river to the new town-site. The postmaster, who was one of the traders referred to, received permission from the postmaster general to move the office from where it was established 1 December, 1884, to the new location. Information from R. L. Gaetz son of Rev. L. Gaetz.

Wetaskiwin came into being about the year 1892, when the Calgary and Edmonton railway was in course of construction. The Calgary and Edmonton Townsite Company, Ltd., which laid out the settlement, adopted the Indian name, Wetaskiwin, of the neighbouring "hills of peace", where in earlier days certain Indian tribes had met and made peace. Post office opened 1 December, 1892.

BRITISH COLUMBIA

Alberni, situated in Somas river at the head of Alberni canal, takes its name from the canal which was named in 1791 by Lieutenant Francisco Eliza after Don Pedro Alberni. Alberni was in command of the soldiers taking part in the Spanish expedition under Eliza sent by the Viceroy of Mexico to occupy the coast, 1790. A sawmill was established at the head of the canal in 1860. Captain Richards, H.M.S. Hecate called the locality Alberni in 1861. Post office opened July, 1886, under name of Sayward Alberni; name changed to Alberni, 1 July, 1891.

Armstrong was named in 1892 after Hector Armstrong of London, England, who was head of the firm of underwriters who negotiated the bonds of the Shuswap and Okanagan railway. Mr. Armstrong was in British Columbia for a brief period when the railway was under construction. Post office opened 1 August, 1892.

Chilliwack is an Indian name. The first white settlers in the valley arrived in 1862 and adopted the Indian name of the district. The name Chilliwack or Chilliwhack would appear to have actually entered official records when the Yale road was surveyed through the valley in 1864. Information from P. J. Brown, city clerk. Post office probably opened 1872 as first record appears in Postal Guide, 1873.

Courtenay townsite, Comox harbour, Vancouver island, was laid out in 1891 and named after the river on the banks of which it is situated. The river was named about 1860 after Captain (later Rear Admiral) George William Conway Courtenay, H.M.S. *Constance*, 50 guns, on Pacific Station 1846-49. (Walbran, British Columbia Coast names.) Post office opened 1 July, 1893.

Cranbrook was so named about the year 1885 by Colonel James Baker, sometime Minister of Mines and Education, B.C., because the "Bakers" had lived at Cranbrook, Kent, England. There was no settlement to speak of before this time, but earlier the place was known as Joseph's Prairie after an Indian chief. The Indians call it yet "Joseph Achnadate". Cranbrook became important in consequence of the opening of the Crowsnest branch of the Canadian Pacific Railway. Information from R. L. Galbraith, Fort Steele. Post office opened September, 1898.

Cumberland, mining centre, Vancouver island, was originally known as Union, but was renamed by James Dunsinuir, 1891, after Cumberland, the north of England mining county. Union post office opened 1 August, 1889; named changed to Cumberland 1 April, 1898.

Duncan, Vancouver island, prior to 1886 was known as Alderlea. In that year the Esquimalt and Nanaimo railway was constructed. A level crossing near Alderlea, close to the farm of the late Wm. Chalmers Duncan, an 1862 pioneer, was called Duncan's Crossing. In 1887 a station was opened at the crossing and called Duncan's Station. Information from James Craig, city clerk. Post office of Duncan's Station opened 1 September, 1899.

SESSIONAL PAPER No. 25b

Enderby was named after Enderby village, Lincoln, England. Post office opened 1 November, 1887.

Fernie commemorates Peter and William Fernie, early settlers. William discovered coal in the Crowsnest pass. Post office opened 1 August, 1898. Wm. Fernie, now a resident of Victoria, B.C., thus describes his experiences; "I went into the pass per pack trail in the spring of 1887 to prospect for coal on one of the tributaries of Michel creek, which is one of the tributaries of Elk river and I found several seams of coal there and took up some thousands of acres there and applied to the British Columbia government to purchase same, but failed to finish the survey of them until the following year. In the spring of 1889 I went back to the valley of the Elk river and prospected for coal on Coal creek and adjacent lands in the Elk River valley and found many seams of coal and applied to purchase 10,000 acres of same. I was engaged from that time steadily in prospecting and developing the property of the company until 1900 when I retired from the service of the company. In 1898 the townsite of Fernie was cleared and the site surveyed into streets and lots. The town was named after me as being the discoverer of the coal, a director of the company and having had control of all the field work until the work got too big for one man to handle."

Greenwood was incorporated as a city in 1897. The first settler was Robert Wood in 1895. Origin indefinite, but general opinion is that as the townsite was covered with green timber and Wood owned the townsite, Greenwood was considered an appropriate name. Information from A. N. Mowat, postmaster. Post office opened 1 March, 1896.

Kamloops celebrated its centenary in 1912, because, a century earlier in May, 1812, Alexander Ross established a post at "Cumcloups"—the meeting of the waters—at the junction of the North Thompson and South Thompson rivers. He was representing the Pacific Fur Company; his trade during the ten days of his visit was extensive, and he found himself in the midst of a good beaver country. The previous summer the Pacific Fur Co. had sent David Stuart from Astoria to explore the territory lying between the Columbia and Fraser rivers. Ascending the Okanagan to the height of land he reached the South Thompson river, and was compelled to spend the winter with the Shuswap and other Indian tribes in the neighbourhood; his report led to the visit of Alexander Ross. Alex. Ross, *Adventures of the First Settlers on the Oregon or Columbia River*. In 1812 the Nor'-Westers built a post close to that of the Astorians, whose whole undertaking was acquired in 1813; eight years later the amalgamation of the Hudson's Bay Company with their rivals led to the establishment of the Company in Kamloops. The Postal Guide for 1872 contains the first records of the opening of a post office.

Kaslo was named in 1890 after the river of the same name by the present postmaster and his brother, pioneer settlers. The name is not Indian. An old trapper told the postmaster that in the days when the Hudson's Bay Co. went to Kootenay lake to get lead from the Blue Bell mine for bullets, there was a Frenchman with the party by the name of John Kaslo or Kasleau who came up the lake to the head looking for placer gold and called the river after himself. Information from D. P. Kane, postmaster. Post office opened 1 August, 1892.

Kelowna is an Indian word meaning "grizzly bear." The name was selected by the late John Coryell, C.E., of the firm of Coryell and Burnyeat of Vernon who surveyed the site of the present city in 1891-92 for Lequime Bros., the owners of the land. Prior to this survey the nearest settlement was Okanagan Mission, three and a half miles distant. The first hotel and store

12 GEORGE V, A. 1922

were erected in 1892. About the time the Kelowna townsite was surveyed, Mr. G. G. McKay purchased from an old Red River half-breed named John McDougall certain lands adjoining the Kelowna townsite and sold a portion of same to Lord Aberdeen, who gave the name Guisachan to the land purchased by him. Mr. McKay endeavoured to form a townsite at Benvoulin, near Okanagan Mission but this site is three miles distant from the lake and the venture was not successful. Information from Police Magistrate E. Weddell. Post office opened 1 February, 1893.

Ladysmith, Vancouver island, was so named in 1900 by James Dunsmuir proprietor of neighbouring coal mines, after Ladysmith, South Africa, when he heard 1 March of the relief of that town the previous day by the British army after a four months siege by the Boers. Post office opened under the name Oyster Harbour, on which Ladysmith is situated, 1 October, 1899. Name changed to Ladysmith 1 January, 1901. The name Oyster Harbour was adopted on the chart by Captain Richards in 1859, because there were large oyster beds on the flats at the head of the bay. Walbran, British Columbia Coast Names.

Merritt was named August, 1906, after Wm. Hamilton Merritt, promoter of the railway running from Spence Bridge through the Nicola valley. Information from W. R. Langstaff, postmaster. Post office opened 15 August, 1907.

Nanaimo, the name of a coal centre on Vancouver island, is the Indian name of the locality and the home of the five bands, forming a loose confederacy (Nanaimo). A letter from Governor Douglas dated 24 August, 1852, directs Joseph W. McKay "to proceed to Wintuhuysen inlet, commonly known as Nanyimo bay and formally take possession of the coal beds lately discovered." Letters for the settlement, previous to 1859 were usually addressed "Colville Town, Nanaimo V.I. (after Andrew Colville, governor of the Hudson's Bay Company, 1852-56.) After that date the first name was gradually discontinued and has not been used since 1860. (Walbran, British Columbia Coast Names.) First record of post office appears in Postal Guide, 1872.

Nelson may be said to date from 1887, when its present site was located by a Mr. Sproat. In the following year, using a rope and some pickets, he roughly subdivided it into town lots, which sold readily. The first name of the city was Salisbury, after Lord Salisbury, then Stanley after Governor General Lord Stanley of Preston. Later in the year, 1888, it was named Nelson after Hon. Hugh Nelson (1830-1896) then Lieutenant Governor of B.C. Information from J. A. Gibson, postmaster, also Schooling (Sir Wm.) The Hudson's Bay Co., 1670-1920, London, 1920. Post office opened 1 August, 1889.

New Westminster was the name given to the capital of the new colony of British Columbia by Queen Victoria, 20 July, 1859. The site was selected in January of the same year by Col. R. C. Moody. On 5 February Governor Douglas wrote to the Colonial Secretary, expressing a desire that Queen Victoria would signify her will as to the name to be given, mentioning that meantime it had been determined to distinguish it by the name of Queensborough. On 5 May the Colonial Secretary replied that Her Majesty had been graciously pleased to decide that the capital should be called New Westminster. Accts & Papers, Colonies 1859. Vol. XXII. On 19 November, 1866, the two colonies of British Columbia and Vancouver island were united as British Columbia, and in 1868 the capital was removed to Victoria. Walbran, British Columbia Coast Names. First record of post office appears in Postal Guide, 1877. From another record it is stated that a general post office was established on the main land late in 1864 with New Westminster as headquarters.

SESSIONAL PAPER No. 25b

North Vancouver post office opened in March or April, 1874, under the name of Moodyville; post office name changed to North Vancouver 1 August, 1902. Moodyville was further up the inlet than present North Vancouver. See Vancouver.

Port Alberni is situated at the head of Alberni canal, one mile south of Alberni. Post office opened 1 December, 1900, under the name of New Alberni; name changed to Port Alberni 1 March, 1910. See Alberni.

Port Coquitlam. Post office opened 1 March, 1891, under the name of Coquitlam 1 July, 1913. The name Coquitlam is that of a Salish tribe in the locality speaking the Cowichan dialect.

Port Moody, Burrard inlet, commemorates Major-General Richard Clement Moody (1813-87), commissioner of lands and works of B.C., 1858-63. It was named in 1860 by Captain Richards, H.M. surveying vessel *Plumper*, Port Moody was originally the western terminus of the Canadian Pacific Railway, but lost much of its importance when the railroad was extended to Vancouver in 1886. Walbran, British Columbia Coast Names. Post office opened 1 October, 1882.

Prince Rupert was named in 1906 by the Grand Trunk Pacific Railway Co on the establishment of the western terminus of the Company's transcontinental line after Prince Rupert, first governor of the Hudson's Bay Co. The name was selected by open competition, the prize offered by the railway company for a suitable name being \$250. Post office opened 1 December, 1906.

Revelstoke commemorates the first Lord Revelstoke, head of the British banking firm of Baring Bros., whose taking over of \$15,000,000 of the first bond issue of the Canadian Pacific Railway was an important event in its financial history; name first applied to Canadian Pacific Railway station. Post office opened 1 February, 1886, as Farwell, name of railway contractor, name changed 1 June, 1886, to Revelstoke.

Rossland takes its name from Ross Thompson, native of Bruce county, Ont., one time prospector; in 1893 pre-empted a portion of land on which the city now stands. Post office opened 1 March, 1895.

Salmon Arm takes its name from Salmon arm of Shuswap lake, where quantities of salmon were caught by the Indians. Post office opened 1 November, 1890.

Trail is named after Trail creek, which takes its name from the Dewdney trail which follows the course of the creek to the Columbia river; from 1894 to 1901 known as Trail Creek. Post office opened 1 July, 1891 under, the name of Trail Creek; name changed to Trail 1 January, 1897.

Vancouver, before the Canadian Pacific Railway reached it in 1886 was a small collection of houses named Granville. In that year the city was incorporated under the name of Vancouver in honor of Captain George Vancouver (1757-1798) who ninety four years before had explored and named Burrard inlet. Reference, Walbran, British Columbia Coast Names. Post office opened March or April, 1874, under the name Granville and the name changed 1 May 1886 to Vancouver.

Vernon was originally known as Priests Valley, then as Centreville and finally the name was changed to the present one in the 80's after Forbes G. Vernon (sometime British Columbia Minister of Mines) and his brother Charles, both of whom owned large properties in the district. Information from C. Lafroy, postmaster. Post office opened 1 November, 1884, under the name of Priests Valley; name changed to Vernon, 1 November, 1887.

12 GEORGE V, A. 1922

Victoria, capital of the united provinces of Vancouver island and British Columbia since 1868, commemorates Queen Victoria. The Hudson's Bay Co. trading post at this point, the foundation of the future city, was established in 1843 by a minute of council of the Northern Department of Ruperts Land on a site selected in 1841 and was ordered to be named fort Victoria. The place was known to the Indians as Camosun or Camosack. The town was laid out in 1851-52 and was called Victoria. Publications of Canadian Archives, No. 9, The Canadian Northwest, Ottawa 1915, p. 862. Walbran, British Columbia Coast Names. No record of opening of post office. There was a mail service arranged for Victoria in 1858 from San Francisco.

MANITOBA

Brandon takes its name from Brandon house, a trading post of the Hudson's Bay Co. founded in 1794 on the Assiniboine river, seventeen miles below the present city. Several years before Brandon house was named, the head of the Douglasses, the 8th Duke of Hamilton, had taken his seat in the House of Lords as Duke of Brandon, Suffolk, and the name of the trading post probably commemorates the family's connection with the Hudson's Bay Co. When Thos. Douglas, fifth Earl of Selkirk succeeded in buying 116,000 square miles of land from the company in 1811 he and his friends, it is said, held more than \$175,000 worth of stock out of the whole \$525,000. Everything goes to show that the family held largely of Hudson's Bay Co. stock before the young Earl came into his inheritance in 1799 and that he was led to take steps to emigrate to Ruperts land from this circumstance. Information from Rev. George Bryce, Winnipeg. Brandon hills to the south of the city are found first so named on the map accompanying the report of the Hind Assiniboine and Saskatchewan Exploring Expedition in the year 1858, when the terms Blue hills of Brandon or Moose Head mountain are used. Post office opened 1 November, 1880.

Portage-la-Prairie is French for prairie portage. It was hereabouts that the fur traders crossed from the Assiniboine river to lake Manitoba. The portage was also known as Meadow portage (Thompson) and the Plain portage (Harmon). Post office opened between July and October, 1871. The locality is mentioned by Verendrye in his journal for 1739 as a carrying place from the Assiniboine over to lake Manitoba used by the Assiniboine Indians on their trading expeditions to the English posts at Hudson bay. The city stands on the Assiniboine river at the south end of the portage, where Verendrye built fort La Reine in 1738. It continued to be one of the chief trading ports of the French in the west until the cession of Canada to Great Britain. Since that it has been occupied from time to time by traders. In 1832 a post was established by the Hudson's Bay Co. on the bank of the Assiniboine about two miles from the centre of the present city. The post was moved to the west end of the city $1\frac{1}{2}$ miles from the old site in 1866-67 and moved again in 1870 to Saskatchewan avenue. Destroyed by fire in 1913 it has not been rebuilt. Information from Fur Trade Commissioner, Hudson's Bay Co., Winnipeg.

St. Boniface commemorates an English missionary called the apostle of Germany. It originated with Abbé (later Bishop) Joseph Norbert Provencher who, with Rev. Sévère Dumoulin reached Red River in 1818 to attend to the spiritual needs of the Roman Catholic settlers. These included members of a Swiss regiment, which under Lt. Colonel De Meuron had been brought to Canada to assist in the war against the United States and had been stationed at

SESSIONAL PAPER No. 25b

Montreal for a time. That part of Abbé Provencher's house which was to serve as a temporary chapel was used for the first time as such on All Saints Day, 1818. The chapel was placed "under the patronage of St. Boniface, in order to draw God's blessings on the German Meurons, Catholics none too fervent, through the intercession of the Apostle of their nation. By extension the name was soon applied to the little Catholic settlement. January 15, 1819, is the very first time that we see that place thus denominated in Provencher's correspondence." Reference Morice, *History of the Catholic Church in Western Canada*, Toronto, 1910.

Winnipeg is Indian for muddy water, a name applied to lake Winnipeg, which is turbid after a storm. Fort Garry, Hudson's Bay Co. fort, was the nucleus of the city of Winnipeg. The name is first found on the title page of the *North-Wester* of 24 February, 1866. The previous issue is headed *Red River Settlement, Assiniboia*. The first house in Winnipeg was built in 1862. Maps of 1870 show the "town of Winnipeg." Post office opened in or about 1870 under the name of Fort Garry; name changed to Winnipeg, 1 May, 1876. Dr. King in his "Narrative of a Journey to the Arctic" states that the Indians ascribe the muddy character of the lake to a deity who, in some way having annoyed them, was taken captive by an elderly woman and so besmeared with every kind of dirt that it took all the water of the lake to purify him, and by way of retaliation he has ever since employed himself in keeping up the discoloration occasioned by that event.

NEW BRUNSWICK

Fredericton commemorates the second son of George III. On 22, February, 1785, Thomas Carleton, the first governor of the province of New Brunswick, formed in 1784 by detaching a portion from Nova Scotia, formulated in council a series of regulations "for the speedy building and orderly settlement of a town at St. Anne's point on the River St. John, to be called Frederick Town, after His Royal Highness the Bishop of Osnaburg"; named a year or two earlier Osnaburg by Loyalist settlers; prior to this known as St. Anne's.

Moncton, commemorates, no doubt, Lt.-Gen. the Hon. Robert Monckton, who was wounded in the battle of the Plains of Abraham in 1759; died 1782. The township of Monckton was named, 1765. The parish of Moncton was erected, 1786. As a township, from 1755-85 it was always spelled Monckton. The New Brunswick Law of 1786 establishing the Parishes, calls it Moncton, presumably by clerical error and such it has ever since remained.

St. John takes its name from the river discovered by Champlain on St. John Baptist's day, 24 June, 1604. Its charter dates from 18 May, 1785, the second anniversary of the landing of the Loyalists within its limits. It was known for the first two years as Parr or Parrtown, a name given to it by request of Governor Parr of Nova Scotia. The part of the present city lying west of the harbour was named Carleton in 1784, in honor of Sir Guy Carleton (Baron Dorchester), commander in chief of the British forces in North America. Report on Canadian Archives, 1894, p. 413. The name was dropped on its union with St. John, (it was previously a separate municipality) in 1889, since which it has been known as St. John West, West St. John. The name Carleton, however, still survives in common usage, where the Carleton side of the harbour is referred to. Information from Professor W. F. Ganong, Northampton, Mass, and H. Vroom, St. Stephen, N.B.

NOVA SCOTIA

Halifax was founded, 1749, at the expense of the Imperial government under the direction of the Lords Commissioners of Trade and Plantations, and was named after George Montague Dunk, second Earl of Halifax, first Lord Commissioner. The scheme for a settlement is said to have originated with the people of Massachusetts, who in calling the attention of the government to the claims and encroachments of the French on the territory of Acadia, suggested the necessity as well as the great commercial advantage to be derived from such an undertaking. A plan was accordingly submitted to the government in the autumn of 1748, and being warmly supported by Lord Halifax, advertisements soon appeared under sanction of His Majesty's authority offering to convey to Nova Scotia army and navy veterans and workmen generally, to maintain them for twelve months at the public expense and to supply them with arms and ammunition for defence and with materials and articles proper for clearing the land, erecting dwellings and prosecuting the fishery. In a short time 1,176 settlers and their families volunteered, and Parliament voting £40,000 (the first of several grants), early in May, 1749, thirteen transports and a sloop of war, under the command of the Honourable Edward Cornwallis, M.P., appointed captain-general and governor of Nova Scotia 9 May, 1749, sailed for that country. The town was laid out and the plan completed 14 September, 1849. The settlers drew for their lots. T. B. Akins' Prize Essay on the History of the Settlement of Halifax. Halifax 1847. Miemac Indian name for Bedford basin, Chebooktook. Micmae name for actual site of the town Gwowanicktook (White Pine forest). The main entrance to Halifax harbour is "Dwiddden," the big passage.

Sydney was established 1783 by Governor Des Barres and named after Thomas Townshend, Viscount Sydney, 1732-1800, secretary for the colonies. Micmac Indian name Egchigank.

ONTARIO

Belleville, Hastings county, was surveyed and laid out in 1816; in early documents the name is spelled Belleville; this spelling prevails on the old tokens of the Church of Scotland and also on the silver communion sets of St. Andrews church, the oldest in the district; may have been named after Colonel Bell, one of the original patentees of the Thurlow lots. Scadding says Governor Francis Gore, Lt. Governor of Upper Canada 1806-11, 1815-17 was appealed to and named it after his wife Arabella, whom he addressed familiarly as Belle. Previous to 1816 Belleville was known as Meyers Creek.

Brantford, Brant county, is situated on what was the Six Nation Indian Reserve at the point where the Indians were accustomed to cross the Grand river, known as Brant's ford, after their leader, Joesph Brant (Thayendanaga) 1742-1807. The Indians surrendered the townplot to the Government 19 April, 1830. The first lot sold by the government was to Wm. Muirhead, 15 October, 1830, being lot eight on the north side of Colborne street. Brant's Ford or The Ferry was for many years the name applied to the village.

At **Chatham**, Kent county, mouth of the Thames, 600 acres were reserved for a townplot by Governor Simcoe in 1795. The town, however, may be said to have commenced only in 1834. It is named after Chatham, England. The Thames and all the towns about London had names taken from the Thames district in England.

SESSIONAL PAPER No. 25b

Fort William commemorates Wm. McGillivray, one of the leading members of the North West Company who directed the construction of the fort on the Kaministiquia river to serve as the company's headquarters instead of Grand Portage in Minnesota. Apparently the movement began in 1801. Building went on in 1802 and 1803. In the latter year the fort was complete, but dwelling houses had still to be erected. Harmon notes there were 1,000 labouring men there in July, 1805. He calls it the "New Fort" in this year. Coues, *New light on the Early History of the Greater Northwest*, New York, 1897 p. 222. A letter from George H. Monk, dated Leech lake, April 18, 1807 (Masson Papers, McGill university) refers to "Fort William." Wm. McGillivray succeeded Peter Pond as a partner in the North West Company about 1790; member of the House of Assembly of Lower Canada 18 June, 1808-2 October, 1809 for Montreal West; member Legislative Council of Lower Canada 19 June, 1814-16 October, 1825, on which date he died in Scotland.

Galt, Waterloo county, takes its name from John Galt (1779-1839), the Scottish novelist. He was commissioner of the Canada Company and lived in Canada from 1826 to 1829. The city was founded by Wm. Dickson, a school fellow of Galt, and Galt post office was opened in 1816. However, the settlers called the village (Absalom) Shade's Mills till 1827 when it was changed on the occasion of a visit from the novelist. "On the 22nd of April. . . . I went to Galt. . . . which my friend the Honourable William Dickson. . . . named after me long before the Canada Company was imagined; it was arrived at the maturity of having a post office before I heard of its existence."

Guelph, Wellington county, was named by John Galt, 23 April, 1827, after the family name of the Royal House of Brunswick. It was after sunset when the site selected for the town was reached. There "a large maple tree was chosen: on which, taking an ax from one of the woodmen, I struck the first stroke. . . after the tree fell. . . . the doctor pulled a flask of whisky from his bosom and we drank prosperity to the city of Guelph. The name was chosen in compliment to the Royal Family, both because I thought it auspicious in itself, and because I could not recollect that it had ever been before used in all the King's dominions."

Hamilton, Wentworth county, is named after George Hamilton, son of Honourable Robert Hamilton who moved to the district from Niagara in 1812 and bought land there. In 1813 he divided a portion of his farm into building lots and his surname was given to the village. The first lots sold were on John street, south of King. Ont. Hist. Socy. Papers and Records Vol. III, 1907 p. 24-33.

Kingston, Frontenac county, occupies the site of the Indian village of Cataraqui and of the French fort Frontenac built there, 1673. On 11 September, 1783, General Haldimand wrote to John Collins, land surveyor, that it was his "intention to establish settlements for the provision of part of the distressed loyalists resorting to this province and in the neighbourhood of Cataraqui upon lake Ontario" and directing Collins "to proceed to that place without loss of time for the purpose of surveying and laying out the several lands in townships and lots." Township No. 1, now known as Kingston was outlined the same year and subdivided in 1784. With the opening of spring in the latter year, settlers took up locations on the surveyed lands. In 1785 there were fifty houses in Kingston. Ont. Archives Rep. 1905, p. LXIX. Documents quoted in Ontario Archives Report dated 1786, 1787, 5 May, 1788, refer to the town as "Cataraqui." A letter dated Quebec, 7 July, 1788, and signed John Collins, deputy surveyor general, refers to "Kingston". Ont. Archives Rep. 1905, p. 309. The city name appears to antedate the township name and to have been given some time after the Loyalist settlement in honor of George III.

12 GEORGE V, A. 1922

Kitchener, Waterloo county was named in 1916 after Lord Kitchener, earlier it was known as Berlin. The origin of the city is described as follows: in "Busy Berlin", a jubilee souvenir pamphlet issued in 1897;—"Joseph Schneider a native of Pennsylvania first settled on the site.....in 1807. Joseph and Jacob Shantz took up adjoining tracts in 1808 and Benjamin Eby.....about the same year. The location was then often called the Sand Hills and later Mt. Pleasant.....Early in the Thirties.....a group of villagers were one evening seated in the village inn, discussing the matter of a name, when two strangers walked in and called for refreshments.'Where are you from' was asked. 'Berlin, Germany and we are looking for homes' 'Then', said the questioner 'Settle here and Berlin shall be the name of this village.'"

London, Middlesex county, on the Thames is named after London, England. It was laid out in 1826 on land visited in 1793 and reserved by Governor Simcoe and settlement commenced in 1827. Simcoe wished to call it Georgina after King George III. His successor preferred the name London. London township, surveyed in 1796 by A. Iredell, was known by name years before any other name than "The Forks" was applied to the site of the present city.

The city of **Niagara Falls**, Welland county, has not the antiquity of the town of Niagara-on-the-Lake, Lincoln county, fourteen miles distant. The latter was settled by Loyalists about 1782, and selected by Simcoe in 1792 as the capital of Upper Canada, and named by him, Newark. Niagara Falls owes its importance to being an international gateway, and to its proximity to the falls. It was formerly known as Clifton or Suspension Bridge. Niagara is an Indian word of uncertain meaning.

Ottawa, Carleton county, was so named in 1854 after the river on which it stands. The name commemorates an Indian tribe living in the early part of the seventeenth century on Manitoulin island and the shores of Georgian bay. The Ottawas, whose name comes from "adawe" to trade, were noted as inter-tribal traders and barterers. They claimed exclusive control of the Ottawa river reached by way of lake Nipissing, which was the trade route to Montreal and, says the Jesuit Relation for 1667, it was for this reason that, although very different in nationality, all those who went to the French to trade, bore the name Ottawa, under whose auspices the journey was undertaken. Queen Victoria selected Ottawa as the capital of the Dominion in 1857.

The report of the Bureau of Archives, Ontario, for 1905, contains a copy of a minute of the Land Committee dated, Quebec, 5 August, 1791, recommending that "the Site of a Town may be laid off at the forks of the River Reddo, as delineated in a plan drawn by Mr. Chewett, 28 March, 1791, and referred to by the Land Office Board of Lunenburg, to serve as a Town Plot in the Center of four adjoining Townships, two on each side of the Main Branch of the aforesaid River....." Lord Dorchester, the governor general approved of the recommendation. The land upon which the present city of Ottawa originally stood comprised six lots, three lots of concession C and three lots of Concession D, the boundary line between them being Cumberland street. Grace McQueen received the patent of two of these in 1801, a tract of land extending from Laurier Ave. to Gladstone and Bronson Ave. to Rideau river. In 1802 Jacob Carman received a patent of two lots comprising the area between Pooley's Bridge and the Rideau between Ottawa and Cathcart streets on the north and Wellington and Rideau on the south, which included Parliament hill and Major Hill park. The intervening lots were obtained by John Burrows. W. H. Smith in Canada, Past, Present and Future, (Toronto, 1851) says of Ottawa "In the year 1826 not a house was standing within its present limits except one old log house where the Upper Town has since been erected, and three houses on what

SESSIONAL PAPER No. 25b

was then known as Nepean Point, near the Union Bridge." Ottawa practically came into existence in 1827, in the spring of which year Col. By broke the first sod in the construction of the Rideau canal, to unite the Ottawa river and lake Ontario, which took six years to complete. By 1828 there were 38 stores and 150 houses. The village came to be known as Bytown. Another boom came in 1837 when the first timber slides were constructed and Bytown became a lumbering centre. At this time there were two small villages of Upper and Lower Town separated by a wooded spur of the hill. As stated the name Bytown was changed to Ottawa, when it was incorporated as a city, 18 Dec. 1854. Much earlier a weekly paper entitled the "Ottawa Advocate" had been published in Bytown. Post office opened as Bytown, 1829; name changed to Ottawa, January, 1855.

Owen Sound was known as Sydenham after the township of that name till 1 January, 1857, when the act incorporating the "town of Owen Sound," assented to 16 May, 1856, became operative. W. H. Smith in "Canada, Past, Present and Future," Toronto, 1851, speaks of Sydenham village as "commenced about nine years ago." At this time there was a newspaper, the "Owen Sound Comet," published in the village. The Canadian Pacific Railway Company lake steamer City of Owen Sound was built at Owen Sound in 1875 and ran under this name till 1886 when she ran ashore at Clapperton island. Owen Sound was incorporated as a city in 1920. It is named after the sound which commemorates Admiral Sir Edward William Campbell Richard Owen (1771-1849). As commodore, he was for a time commander in chief of H.M. ships and vessels on the great lakes, returning to England 1815-16. His brother Vice Admiral William Fitzwilliam Owen (1774-1857) made surveys of the Great lakes under his direction.

Peterborough, Peterborough county, commemorates Peter Robinson, who in 1825 came in charge of 2,000 immigrants and founded the town. It was previously known as Indian Plain or Scott's Landing. The Indian name was Nogojiwanong.

Port Arthur, Thunder Bay district, was named Prince Arthur's Landing by Wolseley in 1870, after Prince Arthur, now Duke of Connaught, then serving with the Rifle Brigade in Montreal. In 1883 the name was changed to the present one to correspond with Port Moody, the then accepted western terminal of the Canadian Pacific Railway. Extract from "Correspondence relative to the Recent Expedition to the Red River settlement; with Journal of operations presented to both Houses of Parliament by command of Her Majesty, 1871" p. 55. "Wednesday, May 25, 1870. . . . Landed troops and camp equipment immediately and Colonel Wolseley named the place 'Prince Arthur's Landing,' in honour of His Royal Highness." On their way west the troops were told that they were going to "Thunder Bay" or "Fort William" or "Dawson's landing" or "the other end of the lake." "Dawson's landing" seems to have been the proper name of the place before Wolseley's arrival. There Dawson had a small wharf and there the Dawson road commenced. At the time the only buildings were those of the Public Works Department, one general store and a couple of small dwelling houses. S. J. Dawson C.E. proposed a scheme for a road by land and water from lake Superior to Red River settlement in 1859. The government adopted it in 1867. In his Report, p. 11, Ottawa, 1868, Dawson calls the starting place of the route "The Depot" situated on "Thunder bay about three miles to the eastward of the mouth of the Kaministiquia and at this point, there is in my opinion, every facility for constructing wharves and forming a perfectly safe harbour."

12 GEORGE V, A. 1922

St. Catharines, Lincoln county. Somewhere between 1791-94 an episcopal church mission station was established in Grantham township where St. Catharines now is and the heading of a subscription list in 1796 in connection with this church contains the first known reference to the name. The heading reads as follows:—

“1796 Apinement to the Church at St. Catherines with the Respective sums next to their Names”.

Feb. 17.....

On this Canon Broughall, makes the following comment:—“The first word may be assinment (?) The second letter instead of a ‘p’ may be the old way of writing ss. Compare the way Catherines is spelt above. The ‘e’ in St. Catharines in each case might almost be ‘i’. The writing is evidently not that of a particularly well educated person.” St. Catharines commemorates Mrs. Catharine Askin Robertson (died 1796,) the first wife of Honourable Robert Hamilton, who married in the following year Mrs. Mary Herkimer McLean, also a widow. Honourable Robert Hamilton, who died in 1809, is described as a merchant of Niagara, a member of the first executive council of Upper Canada in 1791 and the first judge of the district of Nassau, which extended from river Trent on the bay of Quinte to Long point, Lake Erie. Information from Miss Janet Carnochan, Niagara-on-the-Lake, Canon L. W. B. Broughall, St. Catharines and Rev. R. Ker’s book “St. George’s Parish,” a historic and centenary review.

St. Thomas, Elgin county, commemorates Colonel Thomas Talbot (1771-1853) sometime private secretary to Governor Simcoe, who received a grant of 5,000 acres in the county and settled there in 1803, subsequently bringing in other settlers. The first two log houses on the site of St. Thomas were built about 1810 by Daniel Rapelje and David Mandeville. Ermatinger says; “St. Thomas.....in 1817 was no more than a hamlet, chiefly under the hill at the extreme west end of the present city. The hamlet in the valley was at one period called Stirling, but as the village crept up the hill and along the crest of the heights immediately above Kettle creek, it acquired the name of St. Thomas, after Thomas Talbot.” Ermatinger (C.O.) K.C. The Talbot Regime, St. Thomas, 1904.

Sarnia, Lambton county, is the Roman name of the isle of Guernsey where Sir John Colborne was governor before he came to Canada. The town was surveyed, laid out, and first settled in 1833, and called “The Rapids,” after the rapids at the foot of lake Huron; in 1836 it was enlarged by Hon. Malcolm Cameron and others, and the name was changed to port Sarnia after the township; it was changed to the present name in 1886.

Sault Ste. Marie, Algoma district, takes its name from the rapids in the St. Mary river and was so named by French missionaries who in 1640 founded the mission of “Sainte Marie du Saut.” Previously it was known as Sault de Gaston, after the younger brother of Louis XIII; this is the name on Champlain’s map, 1632.

Stratford, Perth county, was a town on paper in the Canada Company’s offices before a house was built on the Avon. In 1831 one Wm. Sergeant was presented by the Company with a lot in the proposed town on condition of his starting a tavern there. Thus Stratford came into being. It was incorporated in 1853. It is named after Stratford-on-Avon, England.

SESSIONAL PAPER No. 25b

Toronto is an Indian name originally applied to lake Simcoe. The lake, for instance, is called lac de Taronto on an anonymous map of date 1679 in the library of the Dépôt de la Marine Paris, entitled "carte de la region située aux environs du lac Ontario ou de Frontenac". From lake Simcoe it was extended at an early date through the Severn river, also named Toronto to the lower part of Georgian bay, and even to the whole bay. Later through the use of the portage from lake Simcoe to Toronto via the Humber, the name was extended to the lake Ontario end of the portage. Similarly Rice lake and other lakes on the upper waters of the Trent river were first called Kentio or Quento, which name was afterwards carried down the Trent to the bay into which it entered, with the same modern result as in the case of Toronto. The meaning of the word is disputed. J. S. Clark deals with it at length in the Archaeological Report for Ontario for 1899.

Welland, Welland county, formerly known as Merrittsville, takes its name from the nearby Welland river, which itself was named in 1792 by proclamation of Governor Simcoe after the Welland river, Lincolnshire, England.

Windsor, Essex county, laid out in 1834, takes its name from Windsor, England.

Woodstock, Oxford county, surveyed and laid out in 1833, was named after Woodstock, Oxfordshire, England.

PRINCE EDWARD ISLAND

Prince Edward Island was known as St. John island till 1799. As early as 1780 confusion caused by the resemblance of the name to St. Johns, city Newfoundland and St. John city, New Brunswiek, had led Governor Patterson to propose that it be changed to New Ireland and an act was passed for the purpose 17 July, 1780, but disallowed, the reason given being that the name of New Ireland was already appropriated. In November, 1798, an act with a suspending clause was passed by the provincial legislature to change the name to Prince Edward after the Duke of Kent, father of Queen Victoria, then in command of the troops at Halifax, N.S. The order was confirmed by the King, 5 February, 1799, receipt of the order in council to that effect being acknowledged by Gov. Fanning on 13 June, 1799, on which day the name appears to have been first used in official despatches from the governor. Report on Canadian Archives in 1895. Rand gives the Micmac Indian name of the island as Abagweit, Abegweit, Apagwit or Epagwit and the meaning as "Home on the wave." The island owes the names of its counties and county towns to King George III, who directed the settlement of the island after its cession to Great Britain in 1763. In 1764 Captain Holland, surveyor general of the Northern District of America made a survey of the island and names were given in commemoration of the Royal Family as follows; Kings county, **Georgetown**, capital; Queens county, **Charlottetown**, capital; Prince county, **Princetown** (after Prince Edward, Duke of Kent). of Princetown, Rev. G. Sutherland writing 1861 says—"The ploughshare still turns up the sod, where it was intended the busy thoroughfare should be. There is no present prospect of the original intention being realised." The capital of Prince county is now Summerside.

QUEBEC

Granby, Shefford county takes its name from the township shown by name on a map of part of Lower Canada by Samuel Gale and J. B. Duberger, 1795, as one of the townships ordered to be laid out in 1792 and 1793. The village of Granby was erected by proclamation 1 July, 1858, effective 1 January, 1859.

Hull, Ottawa county, takes its name from the township shown by name on a map of part of Lower Canada by Samuel Gale and J. B. Duberger, 1795, as one of the townships ordered to be laid out in 1792 and 1793. The city was first known as Wright village after Philemon Wright, (1760-1839), the pioneer settler in the township. Wright paid a visit to the township in 1797 and permanently settled in it in 1800. He surveyed it in 1801. The name Hull has no connection with the Wright family. See *The White Chief of the Ottawa*, By Bertha Wright Carr-Harris, Toronto, 1903. Post office opened 1819.

Joliette, Joliette county, was the name assented to 15 October, 1863, for the village of Industrie founded by Hon. Barthelemy Joliette, (1787-1850) M.P., who built a mill on the rivière L'Assomption, 1823-24.

The name of **Lachine**, Jacques Cartier county, dates from 1669 when La Salle set out from the fort there for China. The name was given derisively. Montreal marriage registers for 2 January, 1673, refer to the marriage of a "habitant de la Chine."

Lévis, Lévis county, commemorates François Gaston, marquis de Lévis, Marshal of France who won the last French victory in Canada at the battle of Ste. Foy; died in 1787. The act founding the town was assented to 18 May, 1861. The adjacent point Lévy commemorates Henri de Lévy, duc de Ventadour, viceroy of New France, 1625-27. The name is first mentioned by Champlain who in narrating the arrival of the Kirkes before Quebec in 1629 says: "My servant told me he had seen the said English vessels a league from our habitation, behind cape Lévy (derrière le cap de Lévy)"; on Champlain map, 1632.

Maisonnette, Hochelaga county, is named after Paul de Chomedey, sieur de Maisonnette, founder of Montreal. In 1918 it was annexed to Montreal.

Montreal, Hochelaga county, Quebec, takes its name from the mountain at whose base it lies, named Mont Royal by Jacques Cartier in 1535. The city was founded 17 May, 1642. Champlain had selected the site thirty-one years before as adapted for a settlement.

Outremont, Jacques Cartier county dates from 23 February, 1875, when it replaced the name Côte-St. Catherine. The name was suggested by that of the home of the Le Bouthillier family, the principal residence in the village. The house was probably so called because "on the other side of Mt. Royal."

Quebec is an Indian word meaning "The river narrows here." It is the oldest city in Canada, having been founded in 1608 when Champlain built a fort (Abitation de Quebec) where he spent the ensuing winter. Seventy-three years earlier Jacques Cartier had sailed up the St. Lawrence and landed near the same spot, wintering in a creek not far from the native town of Stadacone.

Rivière-du-Loup, Temiscouata county, is the official name given 4 March, 1919 to Fraserville. Earlier it was the popular name. It is derived from that of the river which is so called on Jallot's map, 1685. The village of Fraserville was proclaimed 26 June, 1850. The name was in existence much earlier as that of a range of concession.

SESSIONAL PAPER No. 25b

St. Johns (English usage) or **St. Jean** (French usage) Iberville county, Quebec, commemorates fort St. Jean constructed in 1748. A parish was formed in 1828 and the village erected by proclamation 20 July, 1848.

St. Hyacinthe, St. Hyacinthe county is named after Hyacinthe-Simon Delorme, who bought the seigniory, 1753. Bouchette "Topographical Dictionary" London, 1815, mentions it as a village of 80 to 90 houses.

Sherbrooke, Sherbrooke county, "derived its name, in 1818 from Sir John Sherbrooke, then Governor-General who is said to have visited the village at that time. There is no authentic record of his ever having made the visit. Previous to that time it was known as the Lower Forks." L. S. Channell "History of Compton County," Cookshire, 1896.

Sorel, Richelieu county, commemorates the sieur de Saurel or Sorel, who, 21 October, 1672, obtained a concession of lands surrounding fort Richelieu, whose construction in 1665, at this point, he had superintended.

Thetford Mines, Megantic county, formed in 1878 after the discovery of asbestos in the township of Thetford is named after the latter, which itself, is shown by name on a map of part of Lower Canada by Samuel Gale and J. B. Duberger, 1795, as one of the townships ordered to be laid out in 1792 and 1793. It is named after Thetford, Norfolk, England.

Three Rivers (English usage) **Trois-Rivières** (French usage) St. Maurice county, Quebec, was the name given by French traders before Champlain's time, to the St. Maurice river, which enters the St. Lawrence at the city by three mouths.

Valleyfield, or more properly Salaberry of Valleyfield, Beauharnois county, dates its prosperity from 1853 when Mr. Thomas F. Miller of MacDonald, Logan & Miller, Portneuf, Quebec, went to what was then known as pointe du Lac or pointe aux Voleurs, to start a paper industry, there being at this place excellent water power; the erection of the paper mills, begun in 1853 and completed in 1854, made the place quite a village and when a name was in question Mr. Miller suggested Valleyfield in honor of his then manager, John Green who had come direct from the Valleyfield Paper Mills of Alex. Cowan & Sons near Edinburgh, Scotland; this was accepted and the new village designated Valleyfield. Mr. Miller formed a partnership with Alexander Buntin, but retired in 1856, when Alexander and James Buntin continued the business. In 1861 James Buntin died and Alex. Buntin became sole proprietor; for more than 25 years these paper mills were the most prominent industry in Valleyfield; after having been operated as paper mills for 46 years, the site and power was bought by The Montreal Cottons, to be used for the extension of the large cotton factories. It is the proud record of the Buntin Paper Mills that during their 46 years of operation, they never experienced a strike nor missed a pay-day. In 1855 the Roman Catholic Parish of Ste. Cécile was erected at this point by Mgr. Bourget. The official cadastre de La Seigneurie de Beauharnois, 1860, has the following heading over Column of land, proprietors along Main street, Valleyfield, viz.—Catherinestown (Village de Ste. Cécile ou Valleyfield). When the town was incorporated there was a division of opinion as to a name. This led to a compromise, and Salaberry of Valleyfield was made the official name, but in all matters of correspondence the word Valleyfield only is used. This also applies to the post office, the railway stations, and is also recognized by L'Evêque de Valleyfield. Communicated by Honorable James A. Robb, M.P.

12 GEORGE V, A. 1922

Verdun, Jacques Cartier county, was first known as Côte-de-Gentilly, later it was called Verdun, probably by La Salle in honor of Verdun, France. In 1830 it was named La Rivière-St. Pierre. P. G. Roy "Les Noms Géographiques de la Province de Québec" Lévis, 1906. An act changing the name anew to Verdun was assented to 28 December, 1876.

Westmount, Hochelaga county, was originally Notre-Dame-de-Grâces. Assent was given to a change of name to Côte-St-Antoine, 31 October, 1879, and again to Westmount, 12 January, 1895. The name refers to the location relatively to Mount Royal.

SASKATCHEWAN

Moose Jaw takes its name from Moose Jaw creek, which Captain Palliser reached 16 September, 1857, and where he found a Cree Indian encampment. Palliser's Journal for the month refers several times to Moose Jaw creek. The name Moose Jaw creek appears on the Palliser map lithographed by John Arrow-smith, 1859. Moose Jaw's fork is the name on H. Y. Hind Expedition map, Legislative Assembly, Toronto, 1859, and Jaw Bone river that on S. T. Dawson's map published by Legislative Assembly, Toronto, in the same year. The present Indian name is Monsochapiskanis sipi signifying Moose Jaw creek. The name is popularly derived from a supposed Indian name which means literally "The place where the white man mended the cart wheel with the jaw of the moose" and the white man is variously named as Lord Dunmore and the Earl of Mulgrave. No evidence to support these traditions can be found. The first settlers arrived in the spring of 1882. The Canadian Pacific railway reached Moose Jaw in the fall of the same year. Post office opened 1 June, 1883.

North Battleford lies upon the bank of the river immediately north of Battleford, which was capital of the Northwest Territories from 1877 to 1883, taking its name from its position at the "ford of Battle" river, on which in early days the Indians fought many battles. The growth of North Battleford at the expense of Battleford is due to the fact that the Canadian Northern Railway line to Edmonton was run on the north side of the river. Post office opened 12 September, 1905.

Prince Albert was named in 1866 after the Prince Consort by Rev. James Nisbet (died 1874), who established a Presbyterian mission station in the locality in that year. Previously there were perhaps half a dozen settlers in the district, which was un-named or went by the general term of Saskatchewan River Settlement. Post office opened 1 January, 1879.

Regina is Latin for "queen" and commemorates Queen Victoria. The name was suggested in 1882 by Princess Louise, Duchess of Argyll, the Queen's daughter and wife of the Governor General. When a southern route across the prairies was chosen for the Canadian Pacific railway it became expedient to remove the capital of the Northwest Territories from Battleford to a central point on the line. W. D. Barclay, C.E., ran the survey line for the railway across the Waskana, then known as Pile of Bones creek, Tp. 17- R 20- W 2nd, at present Regina, 13 May, 1882. The only settlers he found in the vicinity of the crossing were Thos. Sinclair Gore and Henry George Forsyth on section 24 and John Scott Johnson on section 18. On 24 June, 1882, the Saskatchewan Herald, Battleford, announced that the crossing had been selected by Lieutenant Governor Dewdney as the site of a new seat of government and headquarters of the Royal Northwest Mounted police whose chief station then was fort Walsh. On June 30, Lt. Gov. Dewdney issued the following proclamation:—

SESSIONAL PAPER No. 25b

NOTICE

I hereby give notice that all government land in Township 17, range 20, west of 2nd meridian is Reserved and will continue to be so until otherwise ordered. By order E. Dewdney, Lieutenant Governor.

Pile of Bones,

June 30, 1882.

On 1 August, Sir John A. Macdonald, Minister of Interior, telegraphed to the Deputy minister at Ottawa from Rivière-du-Loup:—

“Hope you have sent instructions to reserve township and a half at Pile Bones creek. John A Macdonald.”

On August 7 and 8 Wm. Pearce of the Dominion Lands staff reserved Tp. 17-R 20-W 2nd and the west $\frac{1}{2}$ of Tp. 17- R 19-W 2nd and advised the squatters on them, now numbering 39 to change their locations. Apparently the governor general was appealed to for a name to replace that of Pile of Bones, for in a letter of date 14 September, 1910, he writes:—“I remember well the Princess suggesting Regina and my writing the telegram in answer to an enquiry from Ottawa as to how to christen the ‘Pile o’ Bones’ with a more attractive title.” The railway reached Regina 23 August, 1882. Correspondence in Ottawa relating to Dominion Lands contains a telegram from Winnipeg dated 30 September in which reference is made to Regina. The name Pile of Bones creek was changed to Waskana in the fall of the year following a suggestion of General Sir Sam Steele, then an officer in the Royal Northwest Mounted Police, Waskana being the Sioux Indian for “Pile of Bones.” Captain Palliser reached Waskana creek 15 September, 1857, and calls it “The creek where the bones lie”. On the maps accompanying the reports it is called “Many-bone” creek. On S. J. Dawson Expedition map, Legislative Assembly, Toronto, 1859, the creek is called “Where the bones lie.” On H. Y. Hind Expedition map, Legislative Assembly, Toronto, 1859, it is called “Elbow Bone creek.” The reference is doubtless to buffalo bones. John McDonnell, Journal, 18 May, 1795, reports counting in one day the carcasses of 7,360 drowned buffaloes when descending Qu’Appelle river. On this subject Mr. Wm. Pearce, who, as inspector of Dominion Land Offices, saw Regina both before and after the railway reached it, writes: “The preliminary line for the railway in the neighbourhood of Regina run in 1881 crossed Pile of Bones creek about five or six miles below where Regina now is, the most southerly point the said creek had timber growing on it to any considerable extent and where there was generally water, which if not running could be found in pools in the bed of the stream. This point was a favourite place for the makers of pemmican. Those who made pemmican were almost wholly half-breeds, only to a slight extent did Indians or Whites manufacture that article. Wherever pemmican was made of course a large number of buffalo bones accumulated which accumulation gave the name to the creek. Their camp was where the trail from Moose Jaw to Qu’Appelle crossed said creek, and a reference to the map will show a large area lying to the southwest and southeast of that point which is totally devoid of timber and on which buffalo roamed to a very large extent, hence the selection of this place for making pemmican, the nearest point to where buffalo was secured for obtaining wood and water.”

12 GEORGE V, A. 1922

Saskatoon is the saskatoon or service berry. The original townsite, a quarter section on the east bank of the river, was surveyed in 1883 by Frank L. Blake, D.L.S. It was located on a grant of 100,000 acres made to the Temperance Colonisation Society, Toronto, which was chartered 14 March, 1882. The company paid \$200,000 for this area. A few houses, some of sods, but mostly of logs were built in 1883. Says James M. Eby of Saskatoon:—"In August there was a gathering of all the settlers on the site of the prospective city on which were two or three tents, but no other buildings. There were perhaps a score, possibly a few more of us all told. We raised a flag pole on which floated a Union Jack and amid speeches and merrymaking celebrated the founding of the city of Saskatoon." The day in August was the 19th, the 49th birthday of Mr. John N. Lake of Toronto, who had selected the townsite for the company and chosen the name Saskatoon for it in 1882. About a dozen names had been suggested but none had seemed appropriate. Then, in the words of Mr. Lake, "On the first Sunday in August, I was lying in my tent about 3 p.m. when a young man came in with a handful of bright red berries and gave them to me. After eating some, I asked where they were found. He said 'along the river bank.' I asked if people had a name for them. He said they were Saskatoon berries.—I at once, exclaimed 'You have found the name of the town—SASKATOON.' The name was formally accepted by the directors that winter and entered in the minutes." Post office opened 1 October, 1884.

Swift Current was named by the Canadian Pacific Railway Company in 1882, when the line reached the site of the city. It is the translation of the Indian name of the nearby river "Saskatchewan." Hill Gregory, the first settler and first postmaster, came in the spring of 1883. Information from Hill Gregory. Post office opened 1 August, 1883.

Weyburn was named about 1891-92 by the late Sir Wm. Whyte, then vice-president of the Canadian Pacific Railway. The meaning of the name is obscure. The first settlers, Henry J. Powley and W. H. Hunt, settled about 1894. Post office opened 1 August, 1895.

PART III.

PLACE-NAMES ON ANTICOSTI ISLAND, QUE.

BY

LT.-COL. W. P. ANDERSON, C.M.G., F.R.G.S.,

Member Geographic Board of Canada.

In May, 1915, the writer, in his capacity of Chief Engineer of the Marine Department of Canada, was sent to select sites for new lighthouses and fog-alarm stations to safeguard shipping navigating the channel north of the island of Anticosti and on that occasion, as many times previously, he circumnavigated the island.

The master of the C.G.S. *Montcalm*, on which the trip was made, had for reference a copy of the British chart, No. 1621, of the island, borrowed from Captain Pouliot, master of the Anticosti Company's steamer *Savoie*, on which had been inserted in manuscript a large number of place-names used by the company which were not on the original chart or otherwise published. So much duplication and confusion as to locations were found to exist on this chart that an attempt was made to revise it. Ultimately the writer consulted all known authorities and prepared for submission to the Geographic Board the subjoined complete list of place names on the island.

In doing the work all available maps, charts and printed articles have been utilized, but the chief sources of information have been the beautiful charts in the Atlantic Neptune of Des Barres, the Admiralty chart and Sailing Directions; Schmitt's monograph on the island, published in 1904, which contains a good list of place-names and a map; and a wreck chart prepared in manuscript by Mr. David Tétu, Receiver of Wrecks, Quebec, in 1879, though this is marred by a large number of clerical errors, for which the draughtsman is evidently responsible.

The writer has also been greatly assisted by Captain Georges Martin-Zédé, governor of the island, a friend of the late M. H. Menier, who has been connected with the enterprise since the time of M. Menier's purchase, and by M. Alfred Malouin, whose life has been spent on the island, first as a Dominion Government lightkeeper, and later as a lieutenant of M. Zédé. To these authorities acknowledgments are due.

The island was discovered by Jacques Cartier on 15th August, 1534, and after his record only casual mention appears until 1680, when it was granted to Louis Jolliet as a seignior, and Jolliet and his family lived and traded on the island at intervals until 1690, when Phipps landed there, destroyed the settlements, and carried Jolliet a prisoner to Quebec. There he was exchanged and ultimately returned to his seignior and died, probably on the island, between 1699 and 1701. The title descended to his heirs, and subsequently to 1725 became complicated, and the island frequently changed owners, finally being purchased by the late M. Henri Menier, of Paris, in 1895, and since his death has been administered as a part of his estate.

That indefatigable hydrographer, Lieutenant H. W. Bayfield, R.N., reached Anticosti in his survey of the St. Lawrence about 1836, and his very clear description of the island in the St. Lawrence Pilot of 1837 is the first considerable record published of it. Bayfield evidently was the first to give names to many prominent features, for convenience in description. Mr. James Richardson, of the Geological Survey of Canada, made a geological survey of the whole island in 1856, and his valuable report with a map appears in the Survey's annual report for that year. He adheres closely to the names on the Admiralty chart. The most pretentious and complete record of the island is a monograph written in 1904 by Dr. Joseph Schmitt and published by M. Menier. It contains a valuable list of place names, but it is to be noted that these do not always agree with those on the map that accompanies his book.

The population of the island has always been sparse. A few fishermen have lived from time to time at Fox bay, Ellis bay, English bay, and Anse aux Fraises. Bayfield states that in 1837 only the lightkeepers and their families, and one fisherman at Fox bay resided on the island; the census of 1881 gave a total population of 676, reduced in 1891 to 253, and again increased to 500 in 1903. Since then it is probable that the number has not greatly varied. The inhabitants are now principally grouped at Port Menier, Ellis bay, and Baie-St. Claire the heads of families being in the employ of the Menier estate.

In the matter of name, the island has for the most part had the changes rung on various spellings of Natiskotek, a word of Montagnais origin, meaning "where bears are hunted," and Anticosti, which according to Schmitt, the Mother Superior of Sillery convent, a Spaniard, derived from the Spanish words Ante, before, and Costa, coast. This derivation the writer believes to be altogether fanciful, and prefers to think that the present name is a clerical transposition of the Indian name. Such transpositions are common, and the many variations in the name as found recorded strengthen this belief.

Jacques Cartier named the island *Isle de l'Assomption*, in commemoration of the day of its discovery, the feast of the Assumption, 1534. Eight years later Roberval and his pilot called the island *Isle de l'Ascension*, but neither of these names was perpetuated. Thevet, in *Grand Insulaire*, 1586, calls it Naticouti; Hakluyt, about 1600, and then Jean de Laet, has it Natiscotee, this form also appearing as the name of a bay only, on Eman Bowen's map of 1768; Charlevoix in his *Histoire de la Nouvelle France* has Natashkouch; Abbé Ferland in his *Cours d'histoire du Canada* gives Natascoutek with the meaning "where bears are taken;" he also uses the form Natascotek; the name Natiskotek bay appears on the Province of Quebec map of 1789; Natascoueh is used by Louis Jolliet and later by E. Gagnon; and Natiskuan is given by Mgr. C. Guay as the Indian name. The form Anticosty first appears to have been used by Champlain in 1603; it also appears in the deed to Jolliet in 1680; in 1626 Champlain writes Enticosty, though on the maps in the 1613 edition of the *Voyages* it is Antiscoty, a form also used by Jacques Duchesneau in 1680; Jaillot's map of "Partie de la Nouvelle France" calls it Antieosti as does Cotton Mather writing of the defeat of Phipps (circa 1690) in a French map of Fleuve St. Louis (the St. Lawrence) published in 1719 the name reads Ile Danti Costie; and d'Anville's map of 1755 gives "Antieosti ou Natiscosee encor L'Assomption" and the same year le Rouge's translation of Jeffery's map has "Natiskotek ou L'Anticoste." On the same map the name of a bay is on the north side of the island is spelled Natiscotek. From this time on usage has favoured the present spelling of the name, though popular French Canadian variants are L'Anticoste and L'Anticosse.

SESSIONAL PAPER No. 25b

Old maps of the seventeenth century contain very few place-names on the island and most of those used have disappeared. The association of bears with the island is persistent; d'Abbéville's map of 1656 shows Port aux Ours on the north shore, somewhere east of Cap de Rabast; d'Anville's map, 1755, puts Baie des Ours near West point, probably baie Ste. Claire, formerly English bay. West point used to be C. St. Louis or C. Louis, and East point, C. St. Laurent. A French factory was shown at southwest point or Jupiter river. An island, Isser island, or a group of islands persists on many old maps off the north shore where no islands exist nearer than the Mingan group close to the north mainland.

Until comparatively recent years Anticosti bore an unsavory reputation as the scene of too numerous shipwrecks. The formation of the island was principally to blame for this. It consists essentially of bedded limestone strata sloping very gradually from high cliffs along the north shore to a low beach along the south. Beyond the south shore line flat-bedded rocks continue as shoals of almost level rock extending out in some cases two or three miles. In the days of the old sailing vessel these outlying reefs surprised many unwary sailors and several shipwrecks were accompanied by tragical loss of life, and at least one settler, Gamache, has been accused, but without any trustworthy evidence being adduced, of deliberate wrecking. The substitution of steam for sail, the establishment of light-houses and fog alarms, and the connection of the island with the Gulf telegraph system have had the effect of decreasing the number of shipwrecks and of late years Anticosti has proved no more dangerous than a similar length of coast line in other localities. The names of some of the wrecked vessels have contributed, as will be seen, to the place names on the island.

In consequence of the occupation of the island first by English-speaking and subsequently by French-speaking interests, the names in vogue are a queer jumble of the two languages, and today English and French forms are indifferently used. Where both forms are commonly met both are given, the more usual first. In some cases where the names are easily translatable only one form is given, that most used. As a great many of the names were allotted by illiterate fishermen and sailors, no conspicuous originality or imagination could be expected in their choice of designations.

Many of the harbours, so called, do not exist as shelters, the coast is very straight and the coves are usually only slight indentations. The streams too are many of them insignificant; some run dry in the summer season.

A very real and very great difficulty was found in the great duplication of names, nearly all of which has been eradicated, and in the location of features. In many cases the localities allotted by different authorities to a name differed by many miles. The present list will remove those two great inconsistencies.

A complete list of all place names now in use on the island, with the authority for both accepted and discarded forms is now submitted. The names are arranged in geographical order, following round the island from West point via the north side to East point, and returning via the south shore. The geographical list is followed by an alphabetical index and accompanied by a plan.

WM. P. ANDERSON, F.R.G.S.,

Member Geographic Board of Canada.

P	Admiralty chart used on Str. <i>Savoie</i> with names inserted in manuscript by Captain Pouliot.
Q	Province of Quebec map, Laurie & Whittle, 12th May, 1794. The names on this map differ from those on "X" though issued on same date by same publishers.
R	James Richardson's plan and report of 1856 in Geological Survey of Canada. Report of Progress for the years 1853-54, 55-56. Toronto 1857.
S	Schmitt's "Monographie de l'île d'Anticosti," 1904. Some of the names on his map do not agree with his text.
T	Tétu's M.S. chart of wrecks on Anticosti, 1879.
X	Map of British Colonies, Laurie & Whittle, 12th May, 1794.
Z	Information from Captain Martin-Zédé.

1. **Anticosti**; island, the well known large island in the Gulf of St. Lawrence. (Not Ile de l'Assomption, Jacques Cartier, 1534; Ile de l'Ascension, Roberval, 1542; Natiscouti; Natiscoteck; Natashkouch; Natascouteck; Natascotek; Natiskotek; Natascouch; Natiskuan; Anticosty; Enticosty; Antiscoty; Anticosta; Danti Costie; Natiscosee; l'Anticoste; nor L'Anticosse.)

Either a variation of the Indian name Natiseouti, meaning "where bears are taken," or from the Spanish ante costa "before the coast."

2. **West point, D;** } the west extremity of the island. (Not West end, R.S.; Northwest point, **Ouest (pointe)** } B, E, X; C. St. Louis, Popple 1731, French maps of 1719, E. Bowen, 1752; nor C. Louis.

Geographically descriptive. The lighthouse built in 1858 stands 1½ miles south from the extremity.

3. **Goëlette (pointe à la), S;** } point, a long reef a short distance north of West point, between **Schooner Point** } it and baie St. Claire. (Not Wreck, S. See 36, 88, 95.)

A schooner capsized on it and crew drowned, circa 1855-60.

4. **Malouin S;** brook, emptying into baie Ste Claire. (Not ruisseau du Bonhomme Gervais, S.) Named after M. Alfred Malouin, deputy governor of the island.

5. **Ste. Claire (baie), S. P.;** bay, 1½ miles northeast of West point. (Not English bay. A.T; baie des Anglais, S; Otter cove, R.S.D.E.; anse à la Loutre, S.; Indian cove, R.S.; anse Indienne, S; Bear bay Q; nor baie des Ours, d'Anville, 1755).

Renamed by M. Menier after his mother, whose name was Claire.

6. **Baie-Ste. Claire;** one of the largest settlements, on the shore of the bay. Originally English Bay.

7. **Isaïe (lac), lake, S;** on baie Ste. Claire road, about ¼ mile from coast. (Not lac aux Cochons S.)

8. **Marl lake, R, S;** } south southeast from baie Ste. Claire, about ¼ mile from shore.
Marne (lac à la) S. }

Named by Richardson; marl abundant.

9. **English;** head, R, S; the headland forming the east limit of baie Ste. Claire. (Not tête Anglaise, S; nor Ste. Clair, cap, S.)

The first settlers in English bay were of that nationality.

10. **Sanatorium;** S, P; near shore east of baie Ste. Claire.

The name of a building has been extended to describe the whole locality.

11. **Groseilles (pointe aux); S;** the first point east of English head. It is not prominent.

SESSIONAL PAPER No. 25b

12. **Seche (pointe),** } the second point east of English head, $1\frac{1}{2}$ miles therefrom.
Dry point }
13. **Makasti;** river, falling into Petit Makasti. (Not McKarty, G.)
14. **Petit Makasti;** a stretch of shore, $9\frac{1}{2}$ miles west of cap de Rabast, being a place of resort.
 (Not Petit McCarthy, S, P.)
 The name is of Indian origin and appears as MacCarthy, Macastey, MacCashthie, etc., but has no connection with any Celtic derivation.
15. **Grand Makasti;** settlement, $5\frac{1}{2}$ miles west of cap de Rabast.
16. **Makasti;** hill, south from Makasti bay. (Not Macastey, R.)
17. **Makasti;** bay, S, B, $5\frac{1}{2}$ miles west of cap de Rabast.
18. **Wakeham;** point, Z, 4 miles west of cap de Rabast.
 After late Dr. Win. Wakeham, commander, Fishery Protection Service.
19. **Rabast (cap de);** The north extreme of the island (Not North point, A, D, E, S, T, B, R, X; pointe Nord, S; nor Wakeham point.)
 Name given by Jacques Cartier in 1535, because beyond the land began to fall away "se rabastre." Lighthouse erected on the extremity in 1915.
20. **Trois Ruisseaux, S;** locality $3\frac{1}{2}$ miles east of cap de Rabast. Marked by three brooks discharging.
21. **Whitecliff;** a cape, 5 miles east of cap de Rabast. (Not White cliff, D, E, S, T, B, R; cap Blanc, S; nor galets Blancs, G) P erroneously places this 3 miles farther east.
22. **Caron, cove, P;** $6\frac{1}{2}$ miles east of cap de Rabast. Camp Caron, S, is in this cove.
23. **Blanc (cap), S;** the west headland of Martin bay.
24. **Martin;** bay, S, $8\frac{1}{2}$ miles east of cap de Rabast.
25. **Nord (cap), S;** rounding point east of Martin bay and $4\frac{1}{2}$ miles west of Highcliff point.
 (Not North cape, S.)
26. **Gagnon;** cove, S, $3\frac{1}{2}$ miles west of Highcliff point.
27. **Kakawis;** point, S, $2\frac{1}{2}$ miles west of Highcliff point.
28. **Sauvage (havre), S;** cove, $1\frac{1}{2}$ miles west of Highcliff point. (Not Havre du Bric, S.) This is merely a shallow cove.
29. **Martin Grand Camp;** camp and its surroundings, near the shore of havre Sauvage.
 Martin was an old resident.
30. **Highcliff;** point, 13 miles east of cap de Rabast. (Not High Cliff point, A; High Cliff, S, T, R; falaise Haute, S; nor Black rocks, B, of which location is whereabouts, but uncertain.)
 Richardson shows the land behind 500 feet high.
31. **Brick (havre du), P;** } the cove immediately east of Highcliff point. The S map shows
Brig harbour } havre du Bric immediately west of Highcliff point.
 Name given because a brig was wrecked there. There is no harbour.
32. **Hulle (rivière à l'), S;** small river, about 4 miles east of havre du Brick, P, S shows it falling into havre du Brick, which is wrong.
33. **Girard;** cove, S, $5\frac{1}{2}$ miles east of Highcliff point. There is no shelter, merely a camp on the open shore.
34. **Nugg;** river, $8\frac{1}{2}$ miles east of Highcliff point. (Not Nigg T.)
35. **Hacket;** cove, P, S, 20 miles west of Carleton point. There is or was a camp here.
 A man named Hachet (?) of Douglastown fished in this little bay. S.
36. **Beaver;** cove, Z, $15\frac{1}{2}$ miles west of Carleton point. (Not Wreck cove, P.) No cove shows here on A.
37. **Lady beacon;** S; prominent landmark on west end of de Puyjalon cliff. (Not balise de la Dame. S).
 Name suggested by shape of beacon.
38. **de Puyjalon;** cliff, Z, 27 miles east of Highcliff point. (Not West cliff A, R, S, T; falaise Ouest, S; nor cap de l'Ouest, S.) Black rocks of E are whereabouts.
 Named after Comte de Puyjalon, a pioneer on the coast.
39. **Indian;** cove S, 3 miles east of de Puyjalon cliff. (Not Indian Harbour, S; havre de l'Indien, S; nor havre Sauvage, S.)
40. **Squaw;** cove, S, P, 6 miles east of de Puyjalon cliff. (Not baie de l'Indienne, S; baie de la Sauvagesse, S; nor Squaw harbour.)
41. **Corbeau (nid de), S;** small cliff, $2\frac{1}{2}$ miles west of Carleton point.
42. **MacDonald;** large bay, S, 2 miles west of Carleton point. (Not baie McDonald, S. map; nor MacDonald's cove, H.)
 MacDonald was an old inhabitant who lived here many years; died 1906, Z.
43. **MacDonald;** river, Z, falls into MacDonald bay. (Not Macdonald, S, P, H.)

12 GEORGE V, A. 1922

44. **Carleton**; D, E, X, prominent point, 10 miles east of de Puyjalon cliff. R. gives height as 100 feet. (Not Charleston T; Charleton, A, S; nor pointe à Patate, local fishermen's usage.)
45. **Caplan** (ruisseau au), S; the fourth stream east of Carleton point. Named from the prevalence of caplin (Fr. caplan or capelan.)
46. **Caplan** (baie au), S; the bay immediately east of Carleton point. (Not baie du Capelan, S.)
47. **Patate** (rivière) } ; the third stream east of Carleton point. (Not rivière à la Patate, S; Potato river, S } nor rivière aux Patates, Z, P.)
48. **Spruce**; point, R, T, S, 2 miles east of Carleton point. (Not pointe à l'Epinette, S.)
49. **Cow**; cove, P, 4 miles east of Carleton point.
50. **Cow**; point, B, the east headland of Cow cove, 5 miles from Carleton point. (Not Low, D, E, nor pointe à la Vache, S.)
51. **Observation**; bay, S, T, R, 3½ miles west of cape Observation. (Not baie Cloutier, S; nor anse à Cloutier, P.)
52. **Observation**; river, S, T, R, flows into Observation bay. (Not Wreck, P.)
53. **Observation**; cape, A, 10 miles east of Carleton point. (Not Observation cliff S, T, R.) Gascoine point, X, and Gascoigne point, E, is probably here.
54. **Tap**; cove, P, first indentation east of cape Observation. (Not Tape cove, S; shown on his plan as third cove east of cape.)
55. **Acadiens** (anse des) S; cove, second east of cape Observation.
56. **Vauréal**; river S.P, 5½ miles east of cape Observation. (Not rivière Maujerol, S; Magderol, S; Mozerold, S; nor Morsal S.)
A Huguenot of some such name as Maujerol spent 45 years near the river which was originally named after him. Renamed by M. Menier after his property near Pontoise in France.
57. **Guy**; point, A, S, T, B, R, 9 miles east of cape Observation.
58. **Bear bay**, S, T, R } ; the indentation immediately west of Bear head.
Ours (baie de l'), S } Translation of the Indian name.
59. **Bear**; head, A, S, T, R, 4 miles east of Guy point. (Not tête de l'Ours, S; cap à l'Ours S; Bear point, D; nor Bear cape, E.)
60. **Easton**; bay, R, S; the first indentation east of Bear head. (Not Euston bay, T.)
Name of one of Richardson's assistants.
61. **Tower bay**, S } ; second indentation east of Bear head.
Tour (baie de la) S }
62. **Tower** (point) A, S, R } ; 2½ miles southeast of Bear head. (Not Steam head, P; nor **Tour** (pointe de la), S } Steamer head, Z, because a steamer was wrecked there.) Probably White point of D and B.
Descriptive; cliffs in strata resemble towers, Bayfield, 1837.
63. **Natiskotek**; river, empties immediately east of Tower point. (Not Bear river, A, R, S, T, X, nor rivière à l'Ours, S.)
64. **Natiskotek**; bay, Q, Carver new map of province of Quebec 1776, between Tower point and cape Robert. (Not Bear bay, A, R, S, T; baie de l'Ours, S, H; Natiscotek bay, d'Anville, 1755 and E; Metallic bay, S; baie Metallique, S, after a vessel wrecked there; Green bay, P; White bay, R. S. T; Mitalique, P; nor Allison bay, L, after an old inhabitant of the locality.)
Montagnais "where bears are taken." This very old name, once used for the whole island, as well as for this bay, is now revived. Note the references to bears in 58, 59 and 63.
65. **Robert**; cape, A, S, T, R; 4 miles east of Tower point. (Not Robert point, D.)
Robert was master gunner of La Renommée.
66. **Lobster**; bay, P, immediately east of cape Robert.
67. **Harvey**; point, D, B, 3 miles east of cape Robert. (Not cap Henri; cape Henry, A, R, S, T, nor cape Wright, Z.)
An old name replaced to avoid duplication of 182.
68. **Harvey**; cove, B, between Harvey point and Broom point. (Not Wall bay, P; nor Brion bay, P.) The identity of Harvey cove is uncertain, but it is probably that immediately east of Harvey point.
69. **Broom**; bay, P, 2½ miles east of Harvey point (Not Salmon River bay, S, T, R; nor baie de la rivière aux Saumons, S.)
70. **Salmon**; river, R, S, T, } falls into Broom bay. (Not rivière au Saumon, P.)
Saumons, (rivière aux) S }
71. **Battery**; point, R, T, S } 3½ miles east of Harvey point. (Not pointe de la Batterie, S.
Batterie (pointe à la) S } map).

SESSIONAL PAPER No. 25b

72. **Batterie** (rivière de la) S; river falling into Harvey cove. (Not rivière de la Pointe à la Batterie, S; nor Petite rivière aux Saumons, S.)
73. **Joseph**; point, A, D, 5 miles east of Harvey point. (Not cape Joseph, R. (100 feet), T, S.)
74. **Mill**; bay, P; between Joseph point and cape James. (Not baie du Gros Caillou, S map). Dean cove, D, Deane, E, is probably this indentation.
75. **Grindstone**; cape, R, S, in bottom of Mill bay.
76. **James**; cape, A, R (100 to 160 feet), T, S, 3½ miles east of Joseph point. (Not cap Jacques S; nor James point, D.)
77. **Tunnel**; head, 1½ miles east of cape James.
Descriptive; there was a tunnel, but it was washed away by the sea some years ago.
78. **Prinsta**; bay, B, D, A, R, S, 3 miles west of Table head. (Not Deep, T, nor Pringle, E.)
79. **Table**; head, A, R, (150 feet) T, S; 7 miles east of cape James. (Not cap de la Table, S).
A lighthouse was built on the extremity in 1915.
Descriptive.
80. **Table**; hill, A, flat-topped hill behind Table head. (Not mont de la Table, S map).
Descriptive.
81. **Fox**; point, A, R, T, S, 4 miles southeast of Table head. (Not Fox cape, D, E, X.)
82. **Fox**; lake, R, T, eastward of Fox bay.
83. **Fox bay**, D, B, A, R, T, S, } 5 miles southeast of Table head. (Not Belle bay, T.)
Renard (baie de), S. }
84. **Fox Bay**; settlement on the shores of the bay.
85. **Fox**; river, R, discharges Fox lake into Fox bay. (Not Fox Bay river, L.)
86. **Reef**; point, A, R, T, S, eastern headland of Fox bay. (Not Pointe du Reef, S.) Z suggests changing the name to Osborne point, after an inhabitant of the place.
87. **Innommée** (baie) S map; shallow bay between Reef and Wreck points. (Not Gull cove, R.)
88. **Merrimack**; point, 9 miles southeast of Table head. (Not Wreck point, A; Gull cape, R, T; nor marrimac point, Z).
Name of vessel wrecked there in 1905.
89. **Sandtop**; bay, between Merrimack point and cape Sandtop. (Not Sand Top bay, R, S; baie à Crete de Sable, S; nor baie à Sommet de Sable, S.)
90. **Sandtop**; cape, 4½ miles north of East point. (Not cape Sand Top, D; nor Sand-Top cape, R, T, S; nor cap à Crete de Sable, S.)
Descriptive.
91. **Gull cliff** } 1½ miles south of cape Sandtop. (Not Gull cape, S; cap aux
Goélands (cap aux) } Goélands, S, nor cap des Oiseaux, S.)
92. **Gulcliff**; bay, A, 2 miles north of East point. (Not Gull cove, S; nor anse aux Goélands, S; nor Wrech bay, S; nor baie des Oiseaux, S; nor baie aux Oiseaux, S, map; nor Goéland cove, S; nor Circe bay, Z, after a vessel wrecked there.)
93. **Gannet**; brook, Z, at east extreme of Gulcliff bay, S. (Not rivière, or ruisseau, de la Chute S.) Name changed to avoid duplication. See 141.
A number of gannets nest here.
94. **East**; point, C, D, E, X, B, R, (100 to 120 feet), T, S, the eastern extreme of the island. (Not East cape, A, S, cap de l'Est, S, Southeast point Q; nor cap St. Laurent, French map of Fleuve St. Louis, 1719, nor pointe d'Anticosti, d'Anville map, 1755.)
Geographically descriptive.
95. **Wreck**; bay, A, R, S, between East and Heath points. (Not baie du Naufrage, S; nor Wreck cove, D.)
96. **Heath**; point, D, A, R, T, S; 3½ miles south of East point. (Not pointe aux Bruyères, T, S; nor pointe de la Lande, S.) A lighthouse has stood on the extremity since 1835.
97. **Little**; river, T, immediately west of Heath point. Not shown on A.
98. **Cybele**; bay, 3 miles west of Heath point. (Not West bay, A, S; baie de l'Ouest, S; nor Cormorant bay, T.)
99. **Cormorant**; bay, 4 miles west of Heath point.
100. **Cormorant**; river falls into Cormorant bay. (Not Cormorant Bay river, T.)
101. **Cormorant**; point, D, B, A, R, T, S, 5 miles west of Heath point. (Not pointe des Cormorans, S; pointe du Cormoran, H; nor Shag point, E, T.)
102. **Seal**; river, T, 2 miles west of Cormorant point.
103. **Duck**; pond, B, 3½ miles west of Cormorant point (Not Ducks pond, D.)
104. **Otter lake**, R, T, S, } 4½ miles west of Cormorant point.
Loutre (lac de la), H, S. }
105. **Goose**; point, A, T, S, 5½ miles west of Cormorant point. (Not pointe de l'Oie, S.)

12 GEORGE V, A. 1922

106. **Anguilles** (rivière aux) Z } ; 1½ miles west of Goose point. (Not Otter river A, T, S, Eel river duplication of 151; nor rivière de la Loutre, S.)
Descriptive; eels abound.
107. **Orient**; lake, immediately east of pointe de la Croix. (Not Little lake la Croix, T.)
After name of vessel wrecked there.
108. **La Croix** (pointe de la); point, 4 miles west of Goose point. (Not La Croix point, A, Z; Laeroix point, S; nor pointe la Croix, S.)
109. **Croix** (lae de la); lake, immediately west of pointe La Croix. (Not lake nor lae Laeroix, S; nor lae de la Croix, H.)
110. **Bell**; river, A, S, Z, 6 miles west of pointe de la Croix. (Not Belle, R, T; nor Bell rivière, nor Belle rivière, S.)
A bell from a wrecked ship taken ashore and suspended from a branch at the mouth.
111. **South point**, D, E, B, Q, X, A, R, T, S, } ; 1½ miles west of Bell river.
Sud (pointe) }
Geographically descriptive.
112. **Bagot**; bluff, 1 mile west of South point. (Not Bagot point, A, S; nor pointe Bagot, S.)
There is no point, but the place is marked by a lighthouse built in 1871, and always known as Bagot Bluff lighthouse.
113. **Canot** (ruisseau du) Z; brook, 2 miles west of Bagot bluff. (Not rivière au Canot, S; nor rivière du Canot, S, H, P.) Z. describes this as a very small stream.
114. **Shandon**; point, A, S, 5 miles west of Bagot bluff.
The clipper ship Shandon was lost here in 1874.
115. **Box**; brook, Z, 1 mile west of Shandon point. (Not Box river, A, S, T; nor rivière à la Boite, S.)
116. **Dauphiné** (rivière); river, S, P, 4½ miles west of Shandon point. (Not Dauphine river, T; nor rivière Dauphine, H.) Possibly Goose creek of D.
117. **Nelson**; lake, a short distance east of Shallop river. (Not Big lake, T.)
Named after a ship wrecked nearby.
118. **Shallop creek**, D, E } ; mouth of Shallop river expands into a creek inside a bar.
Chaloupe (erique de la) } (Not Shaloupe lake, R, S.)
119. **Shallop river**, T, Z } ; 4 miles west of rivière Dauphiné. Not Shallop creek.
Chaloupe (rivière de la) S, H. } S; Chaloupe creek, S; Chaloupe river, R, S; nor erique de la Chaloupe, S; nor Jupiter river, as it was erroneously named on old issues of A.)
120. **Shallop**; telegraph station at the mouth of Shallop river.
121. **Bradley**; brook, Z, between Shallop and Bilodeau rivers.
Name of a man born on the island, who lived all his life at Shallop river.
122. **Bilodeau**, river, Z, 2 miles west of Shallop river. (Not Bilaudeau river, T; rivière du Canot, P, H; Little river, R, S; nor Petite rivière, S.)
123. **Bilodeau**; point, southwest of Bilodeau river, between it and Maeann river.
124. **Maccan**; river, R, S, 4½ miles west of Shallop river. (Not MacKane river, S; rivière Mae-Kane, S; river McKaine, P; river Maeann, T; nor rivière Etienne, S.)
125. **Iron**; river, R, T, S, about 6 miles west of Shallop river. (Not rivière Ferées, S; rivière Ferré, P, Z; nor rivière du Fer, H.) No river shown here on A.
126. **Martin**; brook, R, T, S, 7½ miles west of Shallop river.
127. **Pavillon** (rivière du); river, S, 11 miles west of Shallop river. (Not Heath river, B; Nor Pavillon river, A, R, H, T, S.)
128. **Caps** (eap des), S; eape 4 miles west of rivière du Pavillon. (Not Heath point, which X erroneously shows hereabouts) D and E both have Heath point here, and D has the name both here and where now established.
129. **Cap** (rivière du), S; river, 5 miles west of rivière du Pavillon.
130. **Chicotte**; river, P, Z, R, 6¾ miles west of rivière du Pavillon. (Not Chieote S. nor Chieot T.)
131. **Babineau**; brook, Z, 9½ miles west of rivière du Pavillon. (Not Plate river, S; nor rivière Plate, S; nor river du Plat, T; nor rivière aux Plats, S.)
132. **Morts** (pointe des) S; point, 12½ miles west of rivière du Pavillon.
133. **Galiote**; river, S, Z, 13½ miles west of rivière du Pavillon. (Not rivière Gahot, T; river Galiotte, Z; Sabotte river, P; nor Galti river, P.)
134. **Petit lac Salé** (pointe du) S map; point, 15½ miles west from rivière du Pavillon.
135. **Little Salt lake**, R, T, S } ; 3 miles east of Peat point.
Petit lac Salé, S }
136. **Great Salt lake**, R, T, S } ; 2 miles east of Peat point. (Not lae Salé, H.)
Grand lac Salé, S }

SESSIONAL PAPER No. 25b

137. **Sandy**; bay, B, R, S, D, E, immediately east of Peat point. (Not Salt Lake bay, A; nor Baie du lac Salé, H.)
138. **Peat**; point, A, S, 22 miles west of rivière du Pavillon. (Not pointe Peat, S; nor pointe de la Tourbe, S.)
139. **Brick** (rivière du) S, P } ; 3 miles west of Peat point. (Not rivière du Bug, T.)
Brig river }
140. **Jumpers**, ledges, S, T, R; $4\frac{1}{2}$ miles east of Southwest point. (Not les Sauteurs, S.)
 Ledges of reef of varying thickness some as high as; 5 or 6 feet, which travellers along the shore have to jump. Z.
141. **Chûte** (rivière à la) S; river, 3 miles east of Southwest point.
 Not shown on A. (Not rivière de la Chûte, S. map). See 93.
142. **Gibbons**; cove, D, B, immediately east of Southwest point. (Not East bay, T.)
143. **Southwest**, point } ; $10\frac{1}{2}$ miles west of Peat point. Also name of light station
Sud-Ouest (pointe) } built in 1831. (Not South West point, D, E, X, B, A, R,
 S; nor Pointe du Sud-Ouest, S; nor West point, T.)
 Geographically descriptive.
144. **Ottawa**, cape, S. $3\frac{1}{2}$ miles north of Southwest point.
 Steamer Ottawa wrecked nearby.
145. **Jupiter**; river, A, R, H, T, S, $5\frac{1}{2}$ miles north of Southwest point. (Not Seal river, B's map of 1732; Observation river, as on D and on old editions, A charts, and Bayfield's Sailing Directions, 1837; R d'Bon Secours, Eman Bowen, map 1752; river Bonsecours, E; R. de Bonsecours, Q; R de bon Secours ou Jupiter's inlet, Carte de Departement de la Marine, 1784; nor Bonsecours or Jupiter river, B).
 NOTE.—The name Bonsecours has undoubted priority but the present name is too firmly fixed to be displaced.
146. **Bonsecours**; bay, at the mouth of Jupiter river. Probably the Sea Cow bay of E. (Not Bonsecour, E).
147. **Jupiter**; cape, S. the sandy cliffs north of mouth of Jupiter river.
148. **MacGilvray**; cape, Z, 3 miles north of Jupiter river. (Not MacGilvery, S.)
149. **MacGilvray**; brook, Z, 5 miles north of Jupiter river. (Not Big brook, S.)
 After a man who lived with Capt. Setter for a long time. See 167.
150. **Fusil** (rivière au) H, S, Z } ; 7 miles northwest of Jupiter river. (Not rivière au Canon G.)
Gun river, T, }
151. **Otter**; river, S, 7 miles east of St. Mary cliff, falls into east end of anse Ste. Anne. (Not rivière à la Loutre ouest, G.) See 106.
152. **Ste. Anne** (anse); cove, $6\frac{1}{2}$ miles east of St. Mary cliff. (Not St. Anne's cove, S; nor St. Ann's cove, R.)
153. **Ste. Anne** (pointe), S; point, $5\frac{1}{2}$ miles east of St. Mary cliff.
154. **Ste. Anne** (rivière) H, S, P; river, falling into St. Anne cove.
 This is probably the Kneeland river of E. and Knesland of D.
155. **Kneeland**; cove, X, $4\frac{1}{2}$ miles east of St. Mary cliff. (Not Knesland cove, B.)
156. **Deer**; river, Z, falls into Kneeland cove. (Not Petite rivière Ste. Anne, S.)
157. **Baillie**; river, W. Vondenvelden map, 1803; W. Sax, map 1829.) 2 miles east of St. Mary cliff. (Not rivière aux Cailloux, S, H.)
158. **St. Mary**, cliff, A, T. } ; cape $17\frac{1}{2}$ miles northwest of mouth of Jupiter river. (Not cap
Ste. Marie (falaise) } Ste. Marie, S.) NOTE.—The name Wright cove appears on
 B, hereabouts, but is not known locally. The name Ste. Marie appears on a French map of 1703 about mid-island.
159. **St. Mary**, river, } ; 1 mile west of St. Mary cliff. (Not St. Marys river, R, T.)
Ste. Marie (rivière) S, P, H. }
160. **Baleine** (ruisseau de la) Z; brook, 4 miles west of St. Mary cliff. (Not ruisseau à la Baleine, S; nor rivière la Petite, P.)
161. **Dennis**; cove, B, shown hereabouts on B's map, also Denny cove D, is 3 miles east of Bessie river. This name is not known locally.
162. **Bessie** river, A, R, T, S } ; 7 miles west of St. Mary Cliff. (Not rivière au Bessie, H.)
Bessies (rivière aux) }
163. **Craie** (cap a la), S, map; cape, $1\frac{1}{2}$ miles west from Bessie river.
164. **Graines** (rivière aux) P, H, river, $2\frac{1}{2}$ miles west of Bessie river. Not Little river, S. Petite nor Dock river, T.)
165. **Curlew**; brook, Z, 5 miles west of Bessie river. (Not la Petite rivière, P.)
166. **Walls**; cove, B, R, T, 5 miles west of Bessie river. (Not anse de Wall, S map, nor Wattes cove, D.)

12 GEORGE V, A. 1922

167. **Setter**; river, Z, 3 miles east of cape Eagle. (Not Duek river, S; nor rivière aux Canards, S, P.)
After an old sea captain who lived there.
168. **Graines** (pointe aux) S; point, $2\frac{1}{2}$ miles east of cape Eagle. (Not Long point, R, T.)
169. **Bear** point, R, S } ; 1 mile east of cape Eagle. (Not pointe de l'Ours, S; nor cap à Ours (pointe à l') S } l'Ours, S; nor Long point, T.)
170. **Eagle** cape, A, R, T, S } ; 10 miles northwest of Beeseie river.
Aigle (cap à l') S }
171. **Les Roselets**, S; conspicuous boulders, 1 mile west of cape Eagle.
172. **Navets** (baie aux); small shoal bay in Ellis bay. (Not baie aux Navots, S.)
173. **White**; cliff, A, $1\frac{1}{2}$ miles north of cape Eagle. (Not falaise Blanche, S; falaise Gamache, S; nor cap Blane, S.)
Descriptive.
174. **Jolliet**; bay, the small bay at the head of Ellis bay, where Jolliet had his settlement on the island.
175. **Gamache**; river, A, R, falls into Jolliet bay from Gamache Lake.
176. **Gamache**; lake, R, T, behind port Menier.
After an old settler almost legendary in association with the island.
177. **Ellis**; bay, A, R, H, T, S, principal bay on the island, between cape Eagle and cape Henry. (Not Ellis cove, D, E, B, X; Gamache bay, R, S; baie Gamache, S; baie de Gamache, H; Grand bay, B, 1732; Grande baie, S; Little port, Q; nor baie Jolliet, Z.)
178. **Menier** (port), A; village and settlement on the east shore of Ellis bay.
After the purchaser of the island and founder of the settlement.
179. **Diane** (rivière) S, brook, falling into Jolliet bay between river Gamache and rivière Plantain.
180. **Plantain** (rivière) S; river, falling into Jolliet bay.
181. **Barbarin**; river, S, falling into Jolliet bay, westward of rivière Plantain.
182. **Henry**; cape, D, E, A, R, T, 2 miles west of cape Eagle. (Not cape Henri, cap Henri, S, nor cape Menier, Z.)
183. **Junction**; cliff, R, S, $3\frac{1}{2}$ miles west of cape Henry. (Not cap à l'Hirondelle, S; nor cap à la Vache, S.)
184. **Fraises** (anse aux) S, Z; cove, $4\frac{1}{2}$ miles west of cape Henry. (Not Strawberry cove, S.)
185. **Anse-aux-Fraises**; settlement in the cove.
186. **Foins** (pointe aux) S; point, 2 miles east of West Point lighthouse.

SESSIONAL PAPER No. 25b

INDEX TO ANTICOSTI ISLAND NAMES

	NUMBER		NUMBER
Acadiens, anse des	55	Châte, ruisseau de la	93

PART IV

PLACE-NAMES ON MAGDALEN ISLANDS, QUE.

COMPILED BY

R. DOUGLAS, M.A.,

Secretary Geographic Board of Canada.

In the first edition, 1837, of "Sailing Directions for the Gulf and River of St. Lawrence," Bayfield, the British Admiralty surveyor, mentions that of earlier charts, those of Major Holland, republished by Des Barres, are the least inaccurate. The Holland survey of the Magdalen islands was made in 1765, the chart of Des Barres was published in 1778 and that of the Admiralty in 1838. It is on these charts that most of the place-names in use to-day are first found. The Admiralty chart is based on surveys made in 1833 by Lieut. P. E. Collins, R.N., under Bayfield's direction. Of it there have been several editions. That consulted by the writer is dated 1916.

The earliest names date from Jacques Cartier's 1534 voyage, namely Brion island and Bird rocks. To Champlain seems to be due the name Magdalen. His 1632 map is the first to show it. It is not possible to identify the names used in the narratives of certain voyages made to the islands between 1591 and 1597 and contained in Richard Hakluyt's "The Principal Navigations Voyages Traffiques and Discoveries of the English Nation." (Glasgow reprint, 1904.)

The descriptions in these voyages are so vague and the distances and directions so indefinite that it is hopeless intelligently to follow the wanderings of the voyagers. Isle Duoron of the voyage of the Bonaventure, 1591, is in all probability Entry island. The harbour of Ramea is probably Basque harbour, and the river where 1,500 sea oxen were killed House Harbour channel. By a vivid stretch of the imagination the sky lines of both Entry and Alright islands might be likened to the French emblem, fleur de lys; Alright island is probably the isle "like unto the Floure de lice." The location of isle Hupp "twentie leagues in circuit and like the edge of a knife" with "neither wood nor grasse" upon it would be near Grindstone island, but the description is more like that of a sand dune. The circumference of Grindstone island is approximately "twenty leagues" but its appearance cannot be reconciled with that of the edge of a knife and as regards vegetation it was, in the days of early settlement, the most heavily wooded island of the group and to-day has scattered groves of stunted spruce and its slopes and meadows are mostly covered with grass and hay. The description of isle Blanche might apply to Alright island whose southeast cliffs are composed of a gray hard sandstone with patches of gypsum, and in some lights this side of the island has a grayish-white appearance. Its cape Alright might be the narrator's Cape du Chapt, as from the haven or anchorage off House harbour its appearance is "great and red towards the Sea." Also, the misleading nature of this shore, "judged by the reason of the highness, of the land, that there had been above thirty fathoms water, which was nothing so;" would apply here, for there is shoal water off here, including Alright reef. The narrator seems to refer to a second isle Blanche at cape Gridley, whose cliffs

TO ACCOMPANY 17th REPORT OF GEOGRAPHIC BOARD OF CANADA

SESSIONAL PAPER No. 25b

have a somewhat grayish appearance. His isle of Cormorants is probably cape Gridley which is shown by Holland as an island. It is not unlikely that before it was inhabited its cliffs were the nesting grounds of cormorants. The second harbour mentioned by the narrator was probably Amherst harbour. Halabolina harbour of the voyage of the Hopewell, 1597, is probably Basque harbour. The other harbour mentioned is probably House harbour and isle Blanch is probably Alright island.

Following are the titles of the principal maps referred to;—

A sketch of the Islands Magdelene in the gulph of St. Lawrence in Latitude 48d 10m north, 1756. (Copy in Dominion Archives, Ottawa.)

A plan of the Magdalen, Brion, Bird, Entry and Deadmans islands in the gulf of St. Lawrence. Surveyed in 1765 under the directions of Captain Holland, Surveyor General of the Northern District of America by Lt. Frederick Haldimand, his deputy. Sd. Samuel Holland, Sd. Peter Frederick Haldimand, his deputy.

The Magdalen Islands in the Gulf of St. Lawrence. J. F. W. Des Barres, 1778.

Isles Magdelaines, golfe St. Laurent levées en 1765. (Undated map, in Dominion Archives), evidently French edition of English one.

Map of the Provinces of Upper and Lower Canada with the adjacent parts of the United States of America. . . . J. Bouchette, H.M. Surveyor General of the Province of Lower Canada. London, 1815.

Carte de la Province de Québec. . . . Département des Terres de la Couronne. Eugène Taché, assistant commissaire, Québec, 1870.

Les Iles-Madeleine. Map accompanying a pamphlet by Senator Pascal Poirier entitled "Voyage aux Iles-Madeleine." Publisher and date of publication not given. This map reproduces the names on the provincial cadastral plans.

Magdalen Islands. Surveyed by Lieut. P. E. Collins, R.N., 1833, Published. . . . Admiralty, April 12th, 1838, No. 1134. (1916 edition).

Cadastral plans published by the Crown Lands Department, Quebec, as follows:—Amherst island, 1875; Grindstone island, 1884; Entry island, 1888; Brion island, 1890; Alright island, 1890; Coffin island, East island, Bird rock and Grosse île, 1890.

In comparing the maps it is seen that quite noticeable changes have occurred in the configuration of the islands since they were first charted. The islands have always been of rock foundation, with a double row of sand dunes connecting them and enclosing lagoons that extend from Amherst island almost to the northeast extreme of the group. In the older maps openings through the north dunes are shown into Basque harbour, House harbour and Grand Entry harbour, today these do not exist, and Egg island, on the south side of Basque harbour, has become part of a continuous dune.

Lieut. Haldimand who made the Holland survey of the islands accompanied his map by a report of some 4,500 words on the islands which is dated from St. John's (Prince Edward) island, September, 1765. In this the walrus or sea cow fishery of the islands which produced 900 barrels of oil in the spring of 1765 is fully described. Both map and report were sent to the Right Honourable the Lords Commissioners of Trade in London.

It may be added that the survey of the Magdalens was part of that of the British Empire in North America undertaken by the government after the treaty of Paris, 1763. Captain Holland, who had served in the army at the siege of Louisbourg, was allotted the northern of the two districts into which the country was divided. Reaching Canada in 1764, he surveyed Prince Edward Island in that year. The Magdalen Islands were surveyed in the spring and summer of 1765 and later in the year Cape Breton Island was surveyed. On the latter survey Lt. Haldimand was drowned, 16 December, by falling through the ice. He was in his 24th year.

During the summer of 1921, a resurvey of the islands was begun by the Department of the Naval Service. But for information supplied by Mr. R. J. Fraser, the officer in charge, the publication of the present list in a complete form would not have been possible. Much assistance has also been received from Mr. Paul Hubert, inspector of schools, Rimouski, a native of the islands who takes great interest in all that pertains to them. He is the authority for the meanings marked "H."

A number of names, mainly of smaller features, given in the list are not shown on the map.

Alright; island, lying east of Grindstone island, also cape, south point of the island and reef of white rocks, two miles eastward.

The name is first found applied to the cape which is called Allwright, Holland map, 1765, Alwright French map, 1765 and Alright 1756 map. Bayfield is the first to use the name for the island. The island is described by Hakluyt, English Voyage, 1591 as "an isle like unto a floure de lice" and named isle Blanche or Blanch, Hakluyt, 1591; Saunders island, Bouchette map, 1815. Sir Charles Saunders was admiral in command of H.M. Ships at the taking of Quebec, 1759. Compare Grindstone island, called Wolfe island after General Wolfe on Bouchette map, 1815. Cap aux Maisons is a French name for the cape and Pierre du Cap aux Maisons for the reef. Pointe Basse is the local name and describes the character of the cape—a low jutting promontory. The cadastral plan, 1890, applies the name Alright to a cape to the west, while locally it is applied to the high cliff to the east. This cliff the cadastral plan calls cap Adèle.

Amherst; island, the most southwestwardly of the Magdalen group, also harbour, east extremity of the island.

After Jeffrey, Lord Amherst (1717-97) Governor General of British North America, 1761; Amherst gave Gridley (cape Gridley) authority to settle on the islands. Called La Magdalene on Champlain map, 1632. The name Amherst island is first found on the Holland map, 1765. The island was considered by the travellers mentioned by Hakluyt as the main portion of Ramea and they had no separate name for it. The name Amherst harbour is found on Holland map 1765. The harbour is called Harbour Ober on 1756 map. The Post Office Guide names the post office at the settlement on the shore of Painechaud cove, Havre-Aubert.

Andromache; rocks, north of Entry island.

Name on Admiralty Chart. Roehes Andromaque is the form on a French chart.

Anthony's nose; cape, Brion island.

Antony's nose on cadastral plan, 1890.

Aubert Harbour } municipality, including Amherst island, Entry Island and Deadman island,
Havre-Aubert } formed 1874.

Aurigny; post office near the Basin, Amherst island, opened 15 September, 1896.

Aurigny is the French name of that one of the Channel islands known in English as Alderney.

Barachois (Le); pond inside the lagoon at the extreme northern end of Grindstone island.

A "barachois" is a pond within a bar of sand, which the sea enters; often situated at the mouth of a stream.

Basin (The) } ; large pond in the south part of Amherst island
Bassin (Le) }

Name used by Bayfield, 1837. Holland map, 1765 calls it Brant pool.

Basque; harbour, between the sandbars connecting Amherst with Grindstone island.

Frequented by Basque fishermen (Hakluyt, 1593). Has displaced the names Hayword, Des Barres chart, 1778; Halabolina, Hakluyt, 1597. The present name is on the Holland map, 1765. Havre aux Basques is the form on the map of the "South Part of Province of Quebec," Quebec, 1914.

Belle (anse); bay, west of cap au Trou, Grindstone island.

Name on cadastral plan, 1884.

Bird }
Oiseaux (roches aux) } ; rocks sixteen miles east of Brion island.

From the immense numbers of seafowl nesting there. Named Isles de Margaulx (Gannets) by Jacques Cartier in 1534; Ye aux Margaulx, Dauphin map of Desceliers, 1546; isles of Aponas, Hakluyt, English voyage, 1591, meaning Great Auk islands. Islands of Birds, Hakluyt, English voyage, 1597, Isle aux oyse, Champlain map, 1632.

Boudreau; island, forming the southern boundary of Oyster pond, Coffin island.

Name on cadastral plan, 1890.

SESSIONAL PAPER No. 25b

Brillant (cap); western cape of Grindstone island.

Name on cadastral plan, 1884.

Brion; island, nine miles north of the main Magdalen group.

Named by Cartier in 1534 *Ile de Bryon*, after his patron Philippe de Chabot, Seigneur de Brion, amiral de France; *Isle Brion* on Champlain map, 1613, often misspelled Brian, Brioch, Bryon and Byron; called Cross island on Des Barres chart, 1778. *Île Brillante* is a modern French name, according to P. G. Roy in "*Les Noms Géographiques de la Province de Québec*."

Cabane (anse à la); bay between South and Southwest capes of Amherst island.

Name used by Bayfield, 1837. From a Micmac Indian cabin, the first house in the region. H.

Canards (anse aux); bay in the lagoon west of Wolf point, Wolf Island.

Name on cadastral plan, 1890. Canard is French for "duck."

Cap-Chat (ruisseau du); brook, flowing into Leslie cove, Grindstone island, $\frac{3}{4}$ mile east of point de l'Echouerie.

Name on cadastral plan, 1884.

Caps (étang des); pond, northwest coast of Amherst island.

Name on cadastral plan, 1875.

Cap-Vert (baie du); bay on west shore of Grindstone island in the lagoon.

Name on cadastral plan, 1884.

Chèvres (île aux); island, off Nelson point, within the entrance to House harbour.

Name on cadastral plan, 1884. Chèvre is French for "goat."

Clarke; bay in the lagoon north of East island.

Baie de Clarek on cadastral plan, 1890.

Clarke; shoal, 9 miles southeast of Old Harry head, Coffin island.

Named 1920 after a resident of Coffin island.

Cochons (île aux); island, House harbour, near the Alright island side inside the lagoon.

Pigs (French, cochons) were kept here in a common park; no fences were required. Poirier map has *île aux Pores*.

Coffin; island, one of the main Magdalen group near its northeast end about twelve miles from Grindstone island.

A fee simple in the Magdalen islands was granted in 1787 to Capt. (later Sir Isaac) Coffin in recognition of his services during the war of the revolution. Coffin island is the name used by Bayfield, 1837; Coffin's is the form on Haliburton's History of Nova Scotia map, 1829. Grosse île and Coffin island together form Coffin's island on Bouchette map, 1815, and are called *île Royale* or Magdalen by Bouchette, 1832.

Columbine; shoals, lying southward off Coffin island.

Name used by Bayfield, 1837. Also known locally as Southwest breaker.

Cormorandière (La); Entry island. The extreme northeast of the island is a high bold cliff, the breeding place of cormorants. Cormorandière is French for cormorant breeding place. Name on cadastral plan, 1888.

Dandy; head, Brion island.

Name on cadastral plan, 1890.

Dauphin; (cap du) cape, the north point of Grosse île.

The name was given by Jacques Cartier, 1534 (cap du Dauphin) after the Dauphin and according to Intercolonial Railway Guide book, 1901, is still used by French-speaking islanders; cap Dolphin, Cartier in Hakluyt; North cape, Bayfield, 1837, etc.

Dauphin (rochers du); rocks, west of cap du Dauphin.

North Cape rocks on Admiralty chart.

Deadman } ; islet, eight miles west of Amherst island, Magdalen group.
Le Corps Mort }

Resembles a dead body laid out for burial, Adams before Quebec Literary and Historical Society, 1850, See Vol. III, 1837. Called *Allezay* by Jacques Cartier in 1534; *Dead Bodys*, Bowen map, 1752; *Le Corps mort*, d'Anville map, 1755; *Deadman's island*, Holland map, 1765; *île du Mort*, Quebec provincial map, 1914.

Demoiselle; conical hill, north east shore of Amherst island.

Name used by Bayfield, 1837. Called Mt. Pleasant, misprint for Pleasant, on Holland map; 1765. There are two smaller hills. The three are sometimes referred to as *Les Demoiselles*.

Diable (cap au); cape, east coast of Entry island.

Shown on cadastral plan, 1884. Not identified.

Doyle; reef, six and three quarter miles from East point, East island.

Name used by Bayfield, 1837. "Examined and laid down by us for the first time."

After a family of this name. II.

East; island, the most northeasterly island of the main Magdalen group, also point, the east extreme of the island.

Names used by Bayfield, 1837.

East; pond, near East point, East island.

Name on Holland map, 1765.

Échouerie (point de l'); point, east of Red cape, Grindstone island.

Name on cadastral plan, 1884.

Échoueries. Six échoueries, or walrus landing places are shown on the Holland map—two on Coffin island, East echouerie just to the east of Old Harry head and La Manche echouerie to the west, a third on Grindstone island near its southern point and three on Amherst, one east of South cape and the other two between South cape and Southwest cape. La Manche echouerie and Grindstone Island echouerie are the only ones now familiar to the islanders. The former is locally known as Grande echouerie and the latter as Petite echouerie. Lt. Haldimand in his description of the seacow fishery already referred to describes an echouerie as follows:—the places where they (seacows) are taken are called echoueries, being a space of ground consisting from 1 to 600 feet in superficies situated upon the top of a bank from 10 to 60 feet high up, which is a natural slope.

Egg
Oeufs (île aux) } ; island, between Basque harbour and Pleasant bay.

Egg on Holland map, 1765. This is now a continuous sand beach. Named from the large quantity of terns' eggs found here in spring; the nests covered the ground from one end to the other of the sand bar. II.

Entry
Entrée (île de l') } ; island, east of Amherst island in the Magdalen group.

Called Entrée on 1756 map. Taché map, 1870; Entry on Holland map, 1765; Des Barres chart, 1778; Bayfield, 1837. Probably île Duoron, Hakluyt English voyage, 1591.

Entry Island; post office near northwest spit of Entry Island.

Étangs (anse aux); bay, west of Red cape, Grindstone island.

Name on cadastral plan, 1884.

Étang-du-Nord; post office and light station in the vicinity of étang du Nord, Grindstone island.

Étang-du-Nord (l'); municipality including Grindstone island, formed 1874.

Étang-du-Nord (baie de l'); bay, southwest shore, Grindstone island.

Firman; cove, southeast of cape Alright, Alright island.

Local name. Also called anse à Elie.

Flagstaff; head, Brion island.

Name on cadastral plan, 1890.

Fort; point northwest point of East island in the lagoon.

Name on cadastral plan, 1890.

Glawson; patch, 5 miles west of cap du Dauphin, Grosse île.

Named 1920 after a resident of Grosse île.

Goodwin; shoal 72 miles south by east of Old Harry head, Coffin island.

Named 1920 after a resident of Coffin island.

Goose; lake, about midway on the sand dune connecting Wolf island and Grosse île.

Name on Holland map, 1765. Known also as Grand lake or Grand étang.

Goulet (Le) } ; A shallow passage through the northwest sand bar joining Amherst and Grind-
Gully (The) } stone island. There was another through the sandbar northeast of Alright
island opposite Wolf island. This passage is now closed but flats near are still called Old
Gully flats.

The sea sometimes overflows the sand-dunes here (II). Shown as a channel on Holland map, 1765.

Grande (baie); bay, north shore of Alright island, in the lagoon. Name on cadastral plan, 1884.

Grand Barachois (Le); north shore of Alright island in the lagoon.

Name on cadastral plan, 1890. See Barachois and Petit Barachois.

Grand Entry; harbour, formed by the lagoon enclosed by Grosse île, East island and Coffin island.

More particularly it is the deep water immediately inside the sand bars at the west end of Coffin island.

Called Grand Entrée, 1756 map; Jupiter's harbour Holland map, 1765 and French map 1765; Bouchette Topographical Dictionary, 1832; Grand Entry harbour, Bayfield, 1837.

Grand Entry; channel leading into Grand Entry harbour. Grand Entrée on Poirier map.

SESSIONAL PAPER No. 25b

Grand Entry; post office at settlement on the sand spit on the east side of the narrow entrance to Grand Entry harbour.

Gridley; cape, on the north side of the entrance to Amherst harbour.

Name on Admiralty chart. In 1762 Captain Richard Gridley, who had served with distinction under General Shirley at the siege of Louisbourg "asked confirmation of a grant of the islands of Madelaine, where he alleged he had made an establishment and improved a considerably fishery for seals and sea-cows." Unfortunately for the perpetuation of his holding, Gridley took sides with the Americans during the revolution. Gridley was a settler on the islands for a number of years. He was there in 1765. In this neighbourhood was Isle of Cormorants, Hakluyt 1591.

Grindstone } ; island, one of the Magdalen group, ten miles northeast of Amherst
Meules (île aux) } island.

Name Grindstone island used by Bayfield, 1837. Probably the isle Hupp of Hakluyt, 1591. Named Wolfe island, Purdy's Cabotia, 1814 and Bouchette map, 1815; île aux Meules, Taché map, 1870; île du Cap aux Meules is the French form used in proclamation of municipality of L'Étang-du-Nord, 1874. "Noms Géographiques de la Province de Québec", Québec, 1921 claims that the island owes its name to the resemblance of two of its hills to haycocks and that the name Grindstone is a mistranslation of the word "meule", which is French for both "grind-stone" and "haycock". However, the English name Grindstone is applied to the cape on Holland map, 1765, and French map of the same date, while the earliest occurrence of the French name for the cape or island is on the Admiralty chart published, 1838.

Grindstone Island; post office on Grindstone island.

Gros cap (Pierre de); reef, four miles north from Étang-du-Nord lighthouse, Grindstone island.

Grosse (île); island, near the northeast end of the main Magdalen group; connected by sand dunes with Wolf island and East island.

Name used by Bayfield, 1837; called Grand île d'Anville map, 1780; Grande île, French map, 1765.

Grosse-île; head, south point of Grosse île in the lagoon.

Name on cadastral plan, 1890.

Gull; a small island, south of Étang du Nord, Grindstone island.

Name used by Bayfield, 1837. Called Seal island on Holland map, 1765, île du Secau, a mistranslation, on French Département de la Marine map, 1780.

Grosse-île (baie de); western bay of Grosse île in the lagoon. Name on Poirier map. Baie de la Grosse-île on cadastral plan, 1890.

Hayre-Aubert; post office on Amherst island.

Herissée (pointe); point with lighthouse on it, west shore of Grindstone island.

Shown on Poirier map. May be cap l'Éperon of Richardson. (Geo. Sur. Rep. 1879-80)
Unnamed on Admiralty chart. The lighthouse has always been known as Étang-du-Nord lighthouse.

Hospital; cape, north extreme of Grindstone island, also bay, east of the cape. Cape name used by Bayfield, 1837. Cape called Fox point on Holland map, 1765. Compare Wolf point. Pointe à l'Hôpital and anse de l'Hôpital are French forms on cadastral plan, 1888.

Tradition runs that the crew of a wrecked ship, found contaminated with smallpox were cared for here by an islander who himself had had the disease.

Hospital; lake, near Hospital cape, Grindstone island.

Name on cadastral plan, 1884.

House }
Maisons (havre aux) } ; harbour, entrance to lagoon between Grindstone and Alright islands.

Called Harbour Maison, 1756 map; Haywood's harbour on Holland map, 1765, which calls the lagoon to the eastward as far as the narrows Flat bay; port Maison, 1765 map; havre des Maisons, d'Anville map, 1780; Haywood or House, Lt. Biddleley before Québec Literary and Historical Society, 1832; Haywood, Bouchette, Topographical dictionary, 1832, House, Bayfield, 1837.

House Harbour } ; municipality including Alright island, Wolfe island, Grosse-île,
Havre-aux-Maisons } Coffin island, Brion island and Bird rocks formed in 1874.

House Harbour; channel, leading into House harbour. Name on Poirier map.

Jaquis; rock, a cable to the eastward of the northeastern point of Entry island.

High rock on Admiralty chart.

Keaten (pointe à); northwest point of Grosse île in the lagoon. Name on cadastral plan, 1890

- La Cyr**; post office, north shore of Coffin island, opened June, 1921.
After Mrs. J. A. Cyr, teacher, Grand Entry.
- L'Anse-a-la-Cabane**; post office on Amherst island.
Anse-à-la-Cabane is better.
- La Peyrière**; post office, le Barachois, Grindstone island, opened 1 October, 1906.
- La-Vernière**; post office on Grindstone island, opened 1 September, 1899.
From the alder trees (vernes) which grow in abundance in the vicinity. H.
- Le Boutiller (île)**; name applied on cadastral plan of Grindstone island, 1884 to the peninsula cut off by étang du Nord and terminating in cap Brillant.
- Les-Caps**; post office on Grindstone island, opened 1914.
From the high cliffs in the vicinity.
- Leslie**; cove, on east shore of Grindstone island.
Name on Admiralty chart. After Wm. Leslie who established a fishing industry here fifty years ago. H.
- Leslie**; post office Grosse île. After R. J. Leslie, ex. M.P.P.
- Long**; point, north point of Coffin island.
Longue pointe on cadastral plan, 1890.
- Long Spit**; ridge of sand extending off East point, East island. Name on Admiralty chart.
- McPhail**; bay, south of Fort point west coast of East island, in the lagoon.
Name on cadastral plan, 1890.
- Magdalen**
Madeleine (Les îles) } ; islands, gulf of St. Lawrence.
From the name, La Magdalene, applied on the Champlain map 1632, to Amherst island, whence it has extended to include the group which has had the following alternative names. Les Araynes, Jacques Cartier, 1535, Isle of Ramea, Hakluyt, 1591-3-7; Isle Ramée, Champlain map, 1613 and Jean Boisseau map, 1643; Isles Ramées, N. Denys, 1672; Isle d'Arènes, Y de Sabloen, Y de Sabloes and Doreau (a corruption of d'Arenes) quoted by Dawson, "The St. Lawrence Basin," p. 137, as early forms; Îles de la Madeleine, Taché 1870; Menquit, and Indian name; and Munagesunok, "The surf-lashed island," Miemac name recorded by Rand.
- Martinique (La)**; name applied locally to a point and a bay north of a channel leading from Pleasant bay into Basque harbour just south of Grindstone island. Name also applied to the channel.
The name île Martinique is shown hereabouts on De Meule map by Franquelin, 1686.
- Meule (cap)**; cape, on east shore of Grindstone island. Grindstone wharf is located here.
Cape Grindstone on Holland map, 1765 and on French map, 1765; cape Meule, Admiralty chart. Cape Moule, Bayfield, 1837. See Grindstone island.
- Meule (roche)**; rock a third of a mile southeast of cape Meule.
Meule rock on Admiralty chart.
- Montagne (la)**; the main ridge running east and west on Amherst islands.
- Mounette**; cape, small rounded cape on west shore of Alright island in House harbour.
After Mounette Thériault, H.
- Narrows (The)**; narrowest part of the channel in the lagoon between House harbour and Grand Entry harbour.
Called Seal channel on Holland map, 1765.
- Negre (le buttecan du)**; sand hillock, southwest of Wolf island.
The legend is that a negro found dead on the shore was buried in the sand. Shortly afterwards he was unburied by the wind which on these shores blows strongly sometimes for weeks. They reburied him. Again he became unburied. He was reburied face downwards. As last the grass started to grow on his grave and he was never seen any more.
- Nelson**; point, western entrance to House harbour, Grindstone island.
Name on cadastral plan, 1884.
- Noddy**; head, Brion island.
Name on cadastral plan, 1875.
- Nord (étang du)**; more northerly of two ponds near Etang du Nord post office, Grindstone island.
- Nord (étang du)**; pond or lagoon on southwest shore of Grindstone island.
Name used by Bayfield, 1837. Called Dog pond on Holland map, 1765.
- North**; dune, the sands between Grindstone island and Grosse île.
Name on cadastral plan, 1884.
- Northeast**; cape, the north extreme in the lagoon of East island.
Name used by Bayfield, 1837.
- Northwest**; cape, with light thereon, Grindstone island.

SESSIONAL PAPER No. 25b

Northwest spit; a long tongue of sand running out from Entry island.

Called pointe Nord on cadastral plan, 1888.

Old Harry; bay in the lagoon on the north side of Coffin island, abreast of Old Harry head.

Called Seacow on Holland map, 1765. The name Seacow is now applied to the bay south of Old Harry head. Baie des Chenaux on cadastral plan, 1890. Present name reported by Department of the Naval Service.

Old Harry; head, east extreme of Coffin island.

Old Harry on Des Barres chart, 1778 and 1765 map. Old Harry head, Bayfield, 1837; Rolph map, 1852.

After a Scotsman named Harry Clarke, long the only resident at the head. The majority of residents near the head to-day are Clarkes. II.

Oldman rock; southeast coast of Entry island.

Oldwoman rock; southeast coast of Entry island.

Two adjacent rocks resembling an old man and his wife. Not known locally; may have been washed away. Referred to by G. G. W. Benjamin in "The Cruise of the Alice May," Century Magazine, April, 1884.

Oyster

Huitres (lac aux) } ; pond, south side of Coffin island.

Name used by Bayfield, 1837. Name still in use, but no oysters found here now.

Painchaud; cove, between Shea point and Demoiselle hill, Amherst island.

J. B. Painchaud resides here. Name on Admiralty chart.

Pearl } ; reef of white-pointed rocks, five miles northeast from Entry island. Les Perles
Perle (la) } on French map, 1765.

Pelées (battes); group of rounded hills on southeast side of Alright island.

Percé (cap); cape, a mile east of South cape, Amherst island.

Name on Rolph map, 1852 and Admiralty chart and cadastral plan 1875. Not used locally.

Petit Barachois (Le); north shore of Alright island in the lagoon.

Name on cadastral plan 1890. See Barachois and Grand Barachois.

Piailleur (cap); cape, south coast of Coffin island. Shown on cadastral plan, 1890, as about $\frac{1}{4}$ mile west of Old Harry head. Not identified.

The name means "bawling" cape, so called from the noise made by the sea as it rushes into an immense hole nearby called "le trou du piailleur." II. There are a number of caves and holes that might answer the description. The shore is being changed by the action of the sea.

Plâtre (anse au); bay near Portage du Cap post office, Amherst island.

Name on cadastral plan, 1875. Plâtre is French for "gypsum."

Pleasant

Plaisance (baie de) } ; bay, enclosed by the main Magdalen group.

The present name appears on the Holland map, 1765. A French chart has baie Plaisante; Taché map, 1870, baie de Plaisance.

Pointe-Basse; post office and government wharf with light on the southeast shore of Alright island.

The wharf is 73 nautical miles west (true) of Cape Alright. St. Lawrence Pilot, 1906 calls it Pointe à Elie. See Alright, cape.

Portage (butte du); hill, on north shore of Amherst island.

Called butte de Portage by Bayfield, 1837.

Portage-du-Cap; post office at étang des Caps on Amherst island.

Red; cape, southwest extreme of Grindstone island. Misspelled Read cape on Holland map, 1765; cap Rouge, French map, 1765.

Descriptive name. Called by French-speaking residents Gros cap. Jacques Cartier's cap St. Pierre, 1534, was probably hereabouts.

Renards (anse aux); bay in the lagoon east of Wolf point, Wolf island.

Name on cadastral plan, 1890.

Richard; point, in the lagoon, west shore of Grindstone island.

Name on cadastral plan 1884.

Rockhill; point, west point of Grosse île in the lagoon.

Name on cadastral plan, 1890. A cliff.

Ronde (butte); hill, on south side of Alright island.

Name used by Bayfield, 1837.

Rouge (cap); cape, south coast of Entry island.

Shown on Poirier map. Not identified.

Rouge (cap); cape, north point of Alright island in the lagoon.

Name on Poirier map.

12 GEORGE V, A. 1922

Rouge (île); small island in House harbour; also small island in lagoon northwest of Rockhill point, Grosse île.

Sable (anse au); bay, southeast coast of Grosse île, in the lagoon.

Name on cadastral plan, 1890.

Sandy Hook; sand reef, running out from the east extreme of Amherst island. La Digue is a French form.

Sandy Hook; channel, between Entry island and Sandy Hook.

Name on Holland map, 1765. La Passe is a French form.

Seacow; bay, south of Old Harry head, Coffin island. The beach or landing place in this bay is known as the Grande éhouverie.

Holland map, 1765, gives the name to the bay between Old Harry head and East point, East island.

Seacow; rock, between West cape and Southwest cape of Amherst island.

Name on Holland map, 1765, which describes it as "constantly covered with sea cows."

Name not known locally.

Seal; island, in the lagoon near Old Harry bay.

Local name. Île aux Loups-Marins on cadastral plan, 1890. Île Jaquis on French map, 1765.

Shag; island, between Coffin and Alright islands on the south side of the sandbars.

Called Shag rock on 1756 map; île aux Cormorans, d'Anville map, 1780. Shag is synonym for cormorant.

Shea; point, four cables northwest of cape Gridley, Amherst island. The site of a Government wharf and light.

Name on Admiralty chart. After the Shea family whose homestead occupies the summit of this cape.

Sillons (Les); sand ridges to the north of Alright island.

Name on cadastral plan, 1890.

South Beach; post office on east shore of Alright island. The name also includes the stretch of sandbars from Alright island to Grand Entry.

South; cape of Amherst island. Site of lighthouse, known as Amherst Island light.

South; dune, the sands between Alright and Coffin island.

Southwest; breaker, name sometimes given to shoaliest part of Columbine shoals, southwest of Old Harry head, Coffin island.

Southwest; cape, southwest point of Amherst island.

Spring; cove, west of Flagstaff head, Brion island.

Sud (baie du); bay, Grindstone island inside the lagoon.

Sud (étang du); more southerly of two ponds near Étang du Nord post office, Grindstone island.

Name on cadastral plan, 1884.

Taureau (falaise au); cliff, half way between cap Meule and Nelson point, Grindstone island.

Cap au Taureau on cadastral plan, 1884.

Tower; rock, of red sandstone joined to the northern end of Entry island.

Name used by Bayfield, 1837. No rock answering the description to-day; the north shore of Entry island is honeycombed with caves and the soft sandstone cliffs are being washed away.

Trou (cap au); cape, on northwest shore of Grindstone island. Name on cadastral plan, 1884. Called cape le Trow by Bayfield, 1837.

Name not known locally, but older residents remember a perpendicular hole on the coast hereabouts which travellers were warned to avoid.

Vert (cap); cape, northeast point of Grindstone island in the lagoon on the northeast side of the island. From the green sward.

The name is loosely applied to include the lesser point immediately south of it which is separately known as Richard point.

West; lake northwest side of Amherst island.

Called West pond on Holland map, 1765. Étang de l'Ouest is a French form.

White Horse; reef, six miles west from Etang-du-Nord lighthouse.

Called Cheval Blanc on Taché map, 1870. A white reef resembling a horse lying down.

Wolf; island, in the northwest face of the Magdalen group, ten miles northeast of Grindstone island and connected with it and Grosse île by a continuous chain of sand dunes.

Wolf; point, southeast point of Wolf island in the lagoon.

Name on Holland map, 1765; Wolfe point, Des Barres chart, 1778 and Bouchette map, 1815; point du Loup, d'Anville map, 1780; pointe aux Loups, Poirier map. Origin is evidently from the animal, not the general. Both Fox point and Wolf point are on 1765 map. See Hospital cape. Maps later than the Holland one apply the name wrongly to a point on the northwest side of the island.

REPORT
OF THE
DEPARTMENT OF MINES
FOR THE
FISCAL YEAR ENDING MARCH 31, 1921

PRINTED BY ORDER OF PARLIAMENT

OTTAWA
F. A. ACLAND
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1921

*To His Excellency Baron Byng of Vimy, G.C.B., G.C.M.G., M.V.O., Governor
General and Commander in Chief of the Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

The undersigned has the honour to lay before Your Excellency, in compliance with 6-7 Edward VII, chapter 29, section 18, the report of the work of the Department of Mines, for the fiscal year ending March 31, 1921.

JAMES LOUGHEED.

Minister of Mines.

REPORT
OF THE
DEPARTMENT OF MINES
FOR THE FISCAL YEAR ENDING MARCH 31, 1921

HON. SIR JAMES LOUGHEED, K.C.M.G., P.C., K.C.,
Minister of Mines,
Ottawa.

Sir,—I have the honour to submit the Annual Report of the Department of Mines for the year ending March 31, 1921.

GENERAL REMARKS

The Department of Mines as originally created in 1907 consisted of two branches, namely, the Geological Survey and the Mines Branch. Several changes have since been made so that the organization now consists of seven distinct units, namely, the Geological Survey, Victoria Memorial Museum, Mines Branch, Explosives Division, Editorial Division, Accounting Division, and the Administrative Division.

The year covered by this report has been marked by a number of important changes in the department which have been due partly to conditions affecting the mining industry throughout the world, and partly to other causes incidental to the passage of time. The resignation and superannuation of R. G. McConnell took effect on March 7 after nearly forty years of faithful and efficient service, first, as geologist in the Geological Survey, and later as Deputy Minister of the Department.

The museum activities of the department were separated from the Geological Survey and William McInnes placed in charge as Director of the Victoria Memorial Museum. He was succeeded as Director of the Geological Survey by W. H. Collins.

On December 15, 1920, Eugeno Haanel retired as Director of the Mines Branch and up to the end of the year his position had not been filled. Other changes in personnel are noted in the reports submitted by the directors of branches.

The losses sustained by the department in technical officers were exceptionally heavy in the early part of this year and the year immediately preceding, amounting in all to twenty, of whom eleven were geologists. These losses were due to the heavy demands during that period made by mining and allied industries for the services of technically trained men. The extraordinary interest in mineral oil resources throughout the world and the urgent desire of certain countries to obtain control of and exploit these oil resources, caused a strong demand for geologists which resulted in the department losing the services of a large proportion of its geological staff, and the high qualifications demanded of our geologists and the long training to which they had been subjected made these men very desirable acquisitions to the staffs of oil mining companies. The universities have also recruited from the technical staff of the Geological Survey to a considerable extent.

The activity in mining generally throughout the greater part of the year 1920 was responsible also for the resignations of a number of engineers and chemists who were

12 GEORGE V, A. 1922

able to find more lucrative positions in commercial work than in government service. This condition, however, has now changed, and for several months past the mining industry has been in a worse state of depression than at any previous period, and virtually the only phases of the industry that are in at all healthy condition are the gold and oil mining industries. The result is that for the time being it is possible to retain the services of technical officers, though as soon as the mining industry recovers from its present state of depression the same difficulties will again arise. If, therefore, the department is going to be able to attract and retain the type of man that is needed, an improvement must be made in the salaries paid. The difference between government salaries and those obtaining in commercial work and even in the universities is at present too great, and unless this is rectified there are bound to be frequent and recurrent changes of personnel resulting in a general lowering of standard both in the class of men employed and in the character of work done. This state of affairs is one that should be avoided if at all possible, since the work of the department is such that only the most highly trained men should be employed, for anything short of the best is worse than none at all.

TRANSFER OF STATISTICS

Statistics of production, consumption, prices, etc., of mineral resources have been kept by the Department since 1907, and previously by the Geological Survey since 1886, and the annual reports have formed a continuous series for thirty-five years. In accordance with the policy of the Government, however, for the centralization of the collection of statistics, an Order in Council was passed on May 22, 1920, transferring to the Dominion Bureau of Statistics all the purely statistical work of this Department. This has been done without any break in the continuity of the work, and in future the Dominion Bureau of Statistics will collect and compile all mining statistics while this Department will concern itself with detailed analyses of the figures for inclusion in annual reports on the mineral industry.

IMPERIAL MINERAL RESOURCES BUREAU

The Imperial Mineral Resources Bureau was organized in London in 1918 and all parts of the British Empire were invited to co-operate in its work. The objects of the Bureau are to collect and disseminate information as to mineral resources throughout the Empire, and to endeavour to make the Empire independent of foreign countries in respect to mineral supplies. Canada is represented on the Board of Governors by Dr. W. G. Miller of Toronto, and the publicity given Canadian mineral resources in London and elsewhere has already resulted to our benefit and will, probably, serve to attract more capital to this country as the work of the Bureau expands and becomes better known.

CHANGE OF QUARTERS

After the main Parliament buildings were burned on February 3, 1916, the members of the Senate and House of Commons occupied the Victoria Memorial Museum, and the Geological Survey staff was forced into temporary quarters in various buildings throughout the city. Parliament returned to the new building early in 1920 and the Museum was then refitted and was ready for reoccupation by the Geological Survey and Museum staff in August of that year. Part of the building formerly occupied by this department was, however, allotted to the National Art Gallery, with the result that the space available for exhibits is now still more inadequate for our requirements.

SESSIONAL PAPER No 26

PEAT INVESTIGATIONS

The Peat Committee, consisting of representatives from both the Dominion Government and the Ontario Government, continued its work in the manufacture of air-dried peat fuel at the bog at Alfred, Ontario.

Two machines were in operation, though not continuously, throughout the season, and nearly 6,000 tons of peat fuel were produced. This was sold for household purposes in Ottawa, Peterborough, and other neighbouring points. The plans of the Peat Committee provide for the combining of the best features of the two machines into a third, which would be built and ready for a try out before the end of the season of 1921. Considerable success has attended these investigations and far greater progress has been made in Canada towards the manufacture of a cheap fuel than in any other country in the world.

THE MINING INDUSTRY

The total value of the mineral production of Canada for 1920 was \$227,859,665, which is greater than the total value reached in any preceding year. This was an increase of about 24 per cent over 1919 and more than 3 per cent over 1918, which was up to 1920 the banner year. Towards the close of the year, however, a depression set in and one after the other mines were closed down until a stage has been reached in the mining industry worse than at any previous time during this century. This condition is, however, only a temporary one, and the mining industry is bound to react with a revival of business conditions in other industries.

An event of far reaching importance in mineral development was the discovery during the year of oil near Fort Norman in the Mackenzie River country, by the Imperial Oil Company. The well at which oil was struck is situated over 1,000 miles from the nearest railway, in country almost uninhabited, but the significance of the discovery can be better appreciated when it is realized that it proves the presence of oil in a formation which covers some thousands of square miles of that northern territory. Its importance is increased by the fact that Canada's total production of oil today is sufficient to meet less than 2 per cent of our requirements; and that we are dependent on imports from foreign countries of over 98 per cent of our consumption of oil. It will, however, be some years yet before the field is proved, transportation difficulties overcome, and oil from the Mackenzie country marketed in our western cities. The department has advised oil-prospecting companies to test the rock formation in the country adjacent to the western end of Great Slave lake, because this appears to be the southern border of the possible oil-bearing Devonian rocks and if oil were found in this part of the field it would be much more available to the markets of this country.

Appropriations for the work of the Department of Mines have not been increased in proportion to the growth of the industry which it is designed to assist, but in view of the heavy burden of debt that the country has to carry it has been the constant endeavour of the heads of branches to avoid increased expenditures and to so organize the work that a larger return is made to the country for the amounts expended. It is satisfactory to record that this endeavour has met with a larger measure of success than might have been expected in view of the increased cost of carrying on field and laboratory investigation.

In all respects the work of the various branches of the department has been carried on in a most efficient and satisfactory manner by the officers in charge.

The reports of the chief officers of the department follow.

I have the honour to be, sir,

Your obedient servant,

CHARLES CAMSELL,
Deputy Minister.

GEOLOGICAL SURVEY

W. H. Collins, Director

ORGANIZATION

During November, 1920, the Museum-building activities of the Geological Survey were in large part transferred to a new branch of the Department of Mines, the Victoria Memorial Museum. The Geological Survey now comprises the following units:

Director, W. H. Collins.
 Geological Division, under the Director.
 Topographical Division, W. H. Boyd, in charge.
 Mineralogical Division, R. A. A. Johnston, in charge.
 Palæontological Division, E. M. Kindle, in charge.
 Borings Division, E. D. Ingall, in charge.
 Draughting Division, C.-O. Sénécal, in charge.
 Photographic Division, G. G. Clarke, in charge.
 Distribution Division, Wyatt Malcolm, in charge.
 Library, Mrs. F. E. Forsey, in charge.

The main part of the institution is located at Ottawa; but for economy and convenience in dealing with the requirements of the western part of Canada a British Columbia branch, under the present direction of J. D. MacKenzie, is maintained at rooms 509-512 Pacific Building, Vancouver.

CHANGE IN PERMANENT STAFF

By the death of W. J. Wilson, palæobotanist, on August 21, 1920, the Survey suffered the loss of one of its oldest and most respected members.

Resignations

L. D. Burling, associate palæontologist.
 Leopold Reinecke, associate geologist.
 J. J. O'Neill, associate geologist.
 Bruce Rose, associate geologist.
 A. O. Hayes, associate geologist.
 E. L. Bruce, associate geologist.
 B. R. MacKay, associate geologist.
 S. J. Schofield, geologist.
 M. Y. Williams, geologist.
 J. R. Cox, topographer.
 F. S. Falcner, topographer.

Drs. Schofield and Williams accepted positions in the University of British Columbia, and Dr. Bruce a position in Queen's University. The other gentlemen accepted employment with various companies engaged in exploration for petroleum and other minerals.

Transfers

Charles Camsell, geologist, was made Deputy Minister of Mines on the resignation of R. G. McConnell.

William McInnes, Director of the Geological Survey, was made Director of the Victoria Memorial Museum.

W. H. Collins, geologist, was made Director of the Geological Survey.

CHANGES IN QUARTERS

Following the burning of the Parliament buildings on February 3, 1916, the Victoria Memorial Museum building was occupied by Parliament, and the Geological

Survey took up temporary quarters in various smaller buildings throughout the city. Parliament removed to its new buildings in the early part of 1920. The Museum building was then refitted and by the latter part of August was reoccupied by the Survey and Museum staffs. The building now houses all the Geological Survey and Victoria Memorial Museum staffs except the Division of Mineralogy and part of the Distribution Division, for which room cannot be made. The Division of Mineralogy has its offices, laboratories, and mineral exhibits at 227 Sparks street. The stock of printed publications and part of the staff of the Distribution Division are housed at 347 Wellington street.

WORK OF THE GEOLOGICAL DIVISION

In conformity with the policy of previous years geological work was carried on throughout Canada. A large share of this work was directed towards the investigation of mineral deposits or of areas of prospective economic interest.

W. E. Cockfield made a detailed investigation of the Keno Hill silver-lead ore deposits near Mayo, Yukon. High-grade ore is being taken from a number of these deposits and much attention is, in consequence, being given the district by prospectors. A detailed geological map of the Keno Hill area and a report dealing with the nature, distribution, and theory of origin of the ore deposits appear in the Summary Report of the Geological Survey, Part A.

S. J. Schofield and George Hanson completed the mapping and study of the ore deposits in the Salmon River district, British Columbia, this work having been commenced in 1919 by J. J. O'Neill. A description of the Premier mine and other ore deposits which are chiefly valuable for their contents of gold and silver is given in the Summary Report, Part A.

Victor Dolmage continued the geological exploration of the coast of British Columbia, upon which he has been engaged since 1918. The season of 1920 was spent on the west coast of Vancouver island between Barkley and Quatsino sounds. Occurrences of gold, copper, iron, malgause, marble, and natro-alunite are reported from this section of the coast in the Summary Report, Part A.

R. W. Brock made a reconnaissance of the country surrounding Eutsuk, Whitesail, and Ootsa lakes, south of the Grand Trunk Pacific railway. Occurrences of zinc blende, galena, and other sulphides carrying low values in gold and silver were noted. An extensive report upon this district appears in the Summary Report, Part A.

W. A. Johnston continued his investigation of the lower part of Fraser river and its delta and of the adjacent country. This work was undertaken in 1919 for the purpose of providing information which would assist the Department of Public Works in improving and fixing the navigable channels of the river. A full report upon Fraser river and its delta is given in Memoir 125, "Sedimentation of the Fraser River delta," recently published.

C. E. Cairnes commenced the geological mapping of the Coquihalla map-area, near Hope, about 90 miles east of Vancouver. A topographic map of the area has already been made by F. S. Falconer, of the Topographical Division of the Survey. A preliminary report upon the district and its gold, silver, and molybdenum and manganese deposits appears in the Summary Report, Part A.

J. D. MacKenzie made a careful examination of the extent and origin of certain deposits of brown iron ore near the headwaters of Taseko (Whitewater) river, Lillooet district, B.C. A topographic base map was prepared at the same time by C. H. Freeman of the Topographical Division of the Survey. Much interest had been aroused by reports of the size of these deposits and the excellence of the ore. A full report upon these deposits is given by Mr. MacKenzie in the Summary Report, Part A, in which he estimates the tonnage of ore at 669,350 tons.

SESSIONAL PAPER No 26

A further report of much scientific interest is made upon the geology of the district traversed between the ore deposits and Fraser river.

W. S. McCann completed the geological mapping of the Bridge River map-area. A complete report, accompanied by maps, has been written and is now awaiting publication.

M. F. Bancroft continued his investigation and systematic mapping of the Lardeau district, B.C. A preliminary report upon the work done in 1920 is given in the Summary Report, Part A.

J. R. Marshall completed the geological mapping of the Upper Elk and Upper Highwood Rivers (Pekisko) map-sheets. The area in question lies along the Alberta-British Columbia boundary, about 60 miles south of the main line of the Canadian Pacific railway. It is part of the great coal-bearing area of this region, and the work was done to ascertain the extent and conformation of the coal seams. A short preliminary report appears in the Summary Report, Part B.

D. B. Dowling reviewed the deep drilling and other prospecting work for petroleum and natural gas in Alberta and Saskatchewan. A report upon the present condition of development of these resources appears in the Summary Report, Part B. A second report upon the deep-lying coal seams of the Souris coal-field, Saskatchewan, appears in the same publication.

G. S. Hume surveyed and mapped the geological formations along the northwest coast of Great Slave lake in continuation of the work of A. E. Cameron, 1916 and 1917. This lies on the eastern margin of the great Mackenzie River basin of Devonian rocks, in which oil is believed to occur in commercially important quantities. Mr. Hume's report in the Summary Report of the Geological Survey, Part B, discusses the possibilities of finding oil at Great Slave lake.

F. J. Aleock continued the exploration of the Precambrian region of northern Manitoba to delimit the areas therein which will be of greatest interest to prospectors. Three short reports upon the work accomplished appear in the Summary Report, Part C.

W. S. McCann spent the first half of the season mapping and investigating the extent, origin, and commercial possibilities of recent discoveries of nickel-bearing sulphides east of lake Winnipeg. These deposits are similar in mineralogical character to the great Sudbury nickel-copper deposits and like them are closely associated with an intrusive body of norite. Consequently, exceptional interest has been taken in them by prospectors. A complete report of Mr. McCann's work, accompanied by maps, appears in the Summary Report, Part C.

T. L. Tanton continued the geological mapping and investigation of the mineral resources of an area lying north and east of Port Arthur, Ontario. Special attention was given to a study of Sibley peninsula close to which lies Silver islet, from which in the seventies \$3,125,000 worth of silver was extracted. An effort is being made by Mr. Tanton to ascertain whether mineralization was not localized along a system of faults which traverse Sibley peninsula. This investigation will be continued in 1921, but a short preliminary statement of results appears in the Summary Report, Part D.

W. H. Collins completed the geological mapping of an area near Michipicoten harbour, Ontario, in which are important deposits of iron ore and pyrite, and some occurrences of gold.

Ellis Thomson began the geological mapping of an area contiguous to that mapped by Mr. Collins, and also containing deposits of pyrite, iron ore, and gold. In both these areas the intelligent prospecting for iron ore and pyrite depends in a large degree upon a knowledge of the folding and faulting of the region.

T. T. Quirke mapped the townships of Hess and Monerchieff, Ontario. A full report upon this work, which is an important contribution to the Precambrian geology of northeastern Ontario, appears in the Summary Report, Part D. The report is accompanied by a geological map.

12 GEORGE V, A. 1922

M. Y. Williams continued his investigation of the oil-bearing possibilities of the James Bay basin. He also completed a more detailed investigation of the oil resources of Manitoulin island. Reports upon both investigations appear in the Summary Report, Part D.

M. E. Wilson commenced the geological mapping and a restudy of the mineral resources of an area near Madoe, Ontario. This district contains an unusual variety of economic mineral deposits, including talc, fluorite, and pyrite. It is also one of the most interesting in Canada from the standpoint of the specialist in Precambrian geology. A full, illustrated account of the fluorite deposits of the district appears in the Summary Report, Part D.

J. F. Wright geologically mapped a Precambrian area near Mallorytown, Ontario, and also made a detailed study of the iron-ore deposit at Delta, Ontario. A preliminary report upon this work appears in the Summary Report, Part D.

Aleph Anrep continued his systematic survey of the peat bogs of eastern Canada. A brief résumé of the work accomplished during 1920 is given in the Summary Report, Part D.

Robert Harvie continued his geological study of the asbestos deposits near Black Lake and Thetford, Quebec. He also examined an occurrence of asbestos in Bonaventure county, Quebec, a short report upon which is given in the Summary Report, Part D.

G. A. Young made an examination of a number of coal seams in Gloucester county, N.B., in which renewed interest has been taken recently. A full report upon these outcrops is given by Mr. Young in the Summary Report, Part E.

E. R. Faribault continued the systematic geological mapping of Nova Scotia, devoting his attention in 1920 to the Berwick and Lakeview map-areas, in Kings and Annapolis counties. A preliminary report upon the geology and the occurrences of gold, manganese, iron ore, antimony, and other minerals appears in the Summary Report, Part E.

TOPOGRAPHICAL DIVISION

W. H. Boyd, Chief Topographer, reports as follows on the work of the year 1920:

FIELD WORK

Upper Kitzault River. W. H. Miller mapped an area of 35 square miles embracing the mining activities in the Upper Kitzault valley. The map will be published on the scale of 1 mile to 1 inch with a 100-foot contour interval.

Fraser River Delta and Vancouver, B.C. A. C. T. Sheppard and A. G. Haultain completed the mapping in connexion with the Fraser River investigation. The result will be a general map of the whole Fraser River delta from the International Boundary line to the north shore of Burrard inlet and from a north and south line through Fort Langley to the strait of Georgia. Pitt river up to Pitt lake was also included. The total area of the map is about 580 square miles. This map will be published on the scale of 1 mile to 1 inch with a contour interval of 40 feet.

A map of the city of Vancouver, scale 1,000 feet to 1 inch with a contour interval of 25 feet, shows all the railways, electric tram lines, streets, roads, and buildings, as well as a great mass of other information, in the area generally spoken of as "Greater Vancouver." This area lies between Burrard inlet and the north arm of Fraser river on the north and south, and between point Grey and Boundary road on the west and east.

Eutsuk Lake, B.C. S. C. McLean completed a survey of Eutsuk lake, Whitesail river, and the western half of Ootsa lake.

SESSIONAL PAPER No 26

Eutank lake is 47 miles long with an average width of $1\frac{1}{2}$ miles and has about 150 miles of shore-line. Whitesail river—including its expansion into Sinclair, or Long lake—is 15 miles long; the western half of Ootsa lake from Ootsa Lake post office to its head is about 22 miles long. In all about 195 miles of shore line traverse was completed.

The work was done in conjunction with the British Columbia Department of Lands, Mr. Swannell, their surveyor in the field, and Mr. McLean collaborating in the work. In this way much time was saved and unnecessary duplication avoided.

Taseko River, B.C. C. H. Freeman completed a map of an area in the valley of Taseko river, B.C. The map comprises an area of 35 square miles and was made for a publication scale of 1 mile to 1 inch with a contour interval of 100 feet.

Mr. Freeman also made a traverse of the trail from Bridge river at Gun creek into the area for the purpose of carrying elevations into the district.

Barkerville, Cariboo. D. A. Nichols mapped an area of 210 square miles around Barkerville, Cariboo, B.C. This map, which embraces the more important creeks where hydraulic and placer operations for gold are being carried on, will be published on the scale of 1 mile to 1 inch with a contour interval of 100 feet.

Thunder Cape, Ont. R. Bartlett mapped about 30 square miles of Thunder Cape peninsula, lake Superior, Ontario. This area includes Thunder cape itself and shows the location of Silver islet. The work was carried out for a publishing scale of 1 mile to 1 inch with a 50-foot contour interval.

Marmora, Ont. E. E. Freeland carried on the work in connexion with the mapping of the area of 250 square miles in the vicinity of Marmora, Ontario. Although the map does not show any relief it shows all railways, roads, towns, dwelling houses, etc., as well as the drainage system. The scale of publication is 1 mile to 1 inch.

Madoc, Ont. R. C. McDonald mapped a similar area adjoining the Marmora area, in the vicinity of Madoc, Ontario. The type of map in these two areas is the same.

Mr. McDonald also completed the triangulation control for the two maps.

Joggins, N.S. K. G. Chipman made a detail map of a strip of country 2 miles wide and 14 miles long extending from Joggins, N.S., in a northeasterly direction. The map includes Macean and Chignecto. This map has been compiled on a scale of 1,000 feet to 1 inch with 10-foot contours.

OFFICE WORK

Briefly, the regular office work of the division consists in assembling and compiling the information obtained in the field into complete manuscript maps of the areas surveyed. After the compilation is completed the maps are "inked-in," generally using three colours to distinguish between the works of man, drainage, and relief. Name sheets are then prepared showing all the names that are to appear on each map and the features to which the names apply. The manuscript map is then ready to pass on for reproduction.

In addition to the regular work, the division completed the preparation of the special maps and diagrams to illustrate the report on the Fraser River investigation.

MINERALOGICAL DIVISION

R. A. A. Johnston, Chief of the Division, reports that office, research, and field work was continued as usual.

EXHIBITION WORK

In regard to the Exhibition of Chemical Industries to be held in New York in September 1921, he writes:

In July, 1920, instructions were received to prepare for a display of Canadian economic minerals at the Seventh National Exposition of Chemical Industries, which is to be held in Eighth Coast Artillery Armory, New York, September 12-17, 1921. Mr. McKinnon was detailed to make collections from a number of localities in Ontario, Quebec, and the Maritime Provinces, and the department was able to secure the services of Mr. W. Thomlinson from August to December for making a collection from important mining centres in the Southern Interior and Boundary districts of British Columbia. Large and representative collections have been brought together by both these gentlemen from the districts under their charge. Some very interesting material has been secured from Yukon owing to the interest taken by Mr. G. P. MacKenzie, Commissioner of the territory; and through the kindly assistance of Professors R. C. Wallace and A. T. Delury, a fine series of specimens has been obtained from some of the latest discoveries in northern Manitoba. A number of private individuals and firms have generally assisted by means of donations or loans.

An advantageously situated block having a frontage of 60 feet and a depth of 14 feet has been engaged and the outlook for a full and representative display of the principal economic minerals of this country is very promising.

PALÆONTOLOGICAL DIVISION

E. M. Kindle, Chief of the Division, reports that he made a trip to southern Florida and the Bahamas early in the winter for the purpose of collecting a series of the calcareous deposits, corals, and recent limestones to be used in Museum exhibits illustrating the formation of limestones.

F. H. McLearn was engaged during the summer in studying the Mesozoic stratigraphy and faunas of the Upper Peace River section of western Alberta.

Miss A. E. Wilson studied the Ordovician sections along the southwest shores of lake Winnipeg.

E. J. Whittaker spent a part of the field season in the upper part of the St. Lawrence valley locating and collecting from the most westerly deposits of the fossils representing the post-glacial marine submergence of parts of eastern Canada.

W. A. Bell resumed in the Nova Scotia coal field a study of the Carboniferous floras and faunas, which had been interrupted by four years of war service.

E. M. Kindle with the co-operation of engineers of the dredging branch of the Department of Public Works made a traverse across lake Ontario from Toronto to Niagara river taking bottom samples at frequent intervals.

The division has been fortunate in securing the co-operation of Dr. C. D. Walcott of the Smithsonian Institution in studying the Cambrian collections made by L. D. Burling while a member of this division.

The memoir on the Arisaig Silurian fauna of Nova Scotia by F. H. McLearn is nearly completed.

W. A. Bell has been engaged on a monograph on the Windsor fauna of Nova Scotia.

The results of research work during the year by Miss A. E. Wilson on Ordovician faunas, and by E. J. Whittaker on Pleistocene faunas are embodied in papers published in Bulletin 33, Geological Survey.

A joint report by E. M. Kindle and T. O. Bosworth on the oil-bearing rocks of the Mackenzie valley appears in the Summary Report, Part B.

Preparatory work has continued throughout the year on several specimens of large vertebrate fossils representing the Red Deer River Cretaceous fauna. The

SESSIONAL PAPER No 26

largest of these, *Gorgosaurus libratus*, a carnivorous dinosaur about 30 feet in length, has been mounted in the exhibition hall of palaeontology, which is being made ready to reopen to the public. A number of smaller specimens have also been prepared and mounted for exhibition by C. M. Sternberg and his assistants.

Donations

The collections of the division have been enriched by the presentation to the Survey of the large and valuable private collection of Ordovician erinoids and other fossils made by the late Walter Billings. The collection was presented by Miss Myra Billings in accordance with the wishes of her brother.

Another notable donation received during the year is the lower jaw of a young mammoth from the Klondike district, Yukon. The thanks of the department are due to the following for donations: Acheson, L., Andrews, W. W., Beede, J. W., Foerste, A. F., Gunter, H., Imperial Oil Co. (per T. O. Bosworth and T. A. Link), Johnston, Miss M. S., Kershner, H. M., LaFerrier, Father, Martin, Bro., Middlebrook, J., Nylander, Olaf O., United States National Museum.

BORINGS DIVISION

E. D. Ingall, Chief of the Borings Division, reports as follows:

The staff of the division consists now of the geologist in charge; one assistant geologist; one museum assistant; one museum helper; and a stenographer.

Removal from the offices on Wellington street to the Victoria Memorial Museum was accomplished without delay and loss, and the work of the division is proceeding as usual.

FIELD WORK

During August and September, J. A. Robert helped with the field work being prosecuted by the Mines Branch along St. Lawrence river.

OFFICE WORK

The work of collecting logs of borings in various parts of Canada was continued during the year, the particulars regarding this work being given in the tabulation below.

	No. of sample bags sent out	No. of samples received	No. of wells from which samples were received	No. of records received	No. of circulars sent out
Maritime Provinces.....	2,850	2,617	19	41	
Quebec.....	200	53	1	15	
Ontario.....	2,300	2,070	16	544	
Northwest Provinces.....	4,300	599	7	635	
British Columbia.....	550	43	1	15	
	10,200	5,382	44	1,250	750

Interpretation of the sets of samples sent in by drill operators for their guidance during the progress of their operations occupied a considerable part of the time.

With the increased staff of the Borings Division now available this co-operation between the division and the public can be extended considerably.

12 GEORGE V, A. 1922

Thanks are due especially to those whose names follow: W. Bell Co., Drilling Co., Montreal; Mr. F. Beauchamp, driller, Montreal; H. Friend, drilling contractor, Aylmer Road, Que.; R. I. Henderson, oil and gas operator, Toronto; H. Cable, drilling contractor, Waterford, Ont.; Blue Mountain Oil and Gas Co., Collingwood, Ont.; Boston Alberta Oil Co., Boston, U.S.A.; Rev. Father Laniel, Vankleek Hill, Ont.; New Brunswick Oil and Gas Co., Moncton, N.B.; D'Arcy Exploration Co., Moncton, N.B.; H. F. Ratheram, drilling inspector, Winnipeg, Man.; Nova Scotia Chemical Co., A. DeBruyne, Aylmer, Que.; Kyto Oil and Gas Co., Sheguindah, Ont.; West Williams Oil and Gas Co., Parkhill, Ont.; Peace River Petroleum, Ltd., A. M. Slack, Peace River, Alberta; Crow's Nest Oil Co., Spokane, Wash., U.S.A.; W. E. McMullen, Dept. Lands and Mines, Fredericton, N.B.; Mr. Kelly, drilling contractor, Ottawa, Ont.; Casper Braun, oil and gas operator, Kitchener, Ont.; Imperial Oil and Gas Co., Toronto, Ont.; Rockwood Oil and Gas Co., Toronto, Ont.; J. H. Macleod, oil and gas operator, Glencoe, Ont.; F. W. James, oil and gas operator, Chatham, Ont.; Geo. Jamieson, Haileybury, Ont.; Brunner Mond Co., Amherstburg, Ont.; E. P. Rowe, manager, Valley Gas and Oil Co., Toronto, Ont.; Dominion tire factory, Kitchener, Ont.; F. J. Carman, oil and gas operator, Glencoe, Ont.; Wm. Welsh, Kincardine, Ont.; T. Papps, driller, Ottawa, Ont.

GEOGRAPHICAL AND DRAUGHTING DIVISION

C.-Omer Sénécal, Geographer and Chief Draughtsman, reports as follows:

Forty-six new maps were published; seventeen maps are, at present, in the hands of the King's Printer for engraving, lithographing, and printing; and forty-four other maps are in progress in the office, including several sheets of the Nova Scotia series, the compilation of which was completed. About one hundred drawings of sketch maps, diagrams, text figures, and miscellanies were also executed for the illustration of geological memoirs, reports, etc.

The chief of this division also performed the duties of a member of the Geographic Board of Canada.

Maps in Hands of the King's Printer, March 31, 1921

Publication number	Title	Date of requisition
155A, 1553	Algoma, Sudbury, and Timiskaming districts, Ontario; scale, 8 miles to 1 inch.....	Dec. 15, 1919
1771	Winnipegosis, Manitoba, soil map; scale, 3 miles to 1 inch.....	Aug. 20, 1920
1802	Upper Whitemouth river, Manitoba, soil map; scale, 3 miles to 1 inch.....	Aug. 20, 1920

PHOTOGRAPHIC DIVISION

G. G. Clarke, Chief Photographer, reports that the following work was done by the Photographic Division during 1920:

Contact prints, ranging from 4 by 5 inches to 36 by 48 inches.....	12,579
Bromide enlargements, ranging from 4 by 5 inches to 40 by 72 inches..	429
Films and plates developed, ranging from 3½ by 4½ inches to 6½ by 8½ inches	3,485
Dry plate negatives, ranging from 4 by 5 inches to 11 by 14 inches	497
Wet plate negatives, ranging from 8 by 10 inches to 24 by 30 inches	165
Prints on zinc plates, ranging from 11 by 14 inches to 24 by 36 inches	42
Proofs from zinc plates, ranging from 11 by 14 inches to 24 by 36 inches	124
Photostat copies, ranging from 7 by 11 inches to 11 by 14 inches....	132
Lantern slides, ranging from 3½ by 4½ inches.....	634
Photographs and titles mounted.....	1,739

DISTRIBUTION DIVISION

Wyatt Malcolm, Chief of the Division, reports that during the fiscal year ending March 31, 1921, 57,435 publications of the Geological Survey, exclusive of the French editions, were distributed. Of these 48,007 were distributed in compliance with written and personal requests, and 9,428 were sent to addresses on the mailing lists.

LIBRARY

Mrs. F. E. Forsey, Librarian, reports that the additions to the library during 1920 were as follows:

Volumes received as gifts or exchanges, including reports and publications of foreign Geological Surveys, together with memoirs, transactions, and proceedings of the scientific societies of Canada and other countries	691
Books purchased	427
Periodicals subscribed for	172
Periodicals received as exchanges.....	49
Volumes bound	485
Pamphlets received	290
Maps received	319
Maps mounted	166

Grateful acknowledgment is made for volumes presented to the library by Sir William Ridgeway, H. F. Osborn, Frank Springer, D. B. Dowling, James Chumley of Glasgow, H. K. Swann, Louis Dupare, Geneva, Dr. Eugene Haanel, Dr. Lomer, Librarian of McGill University; also of photostat copies of valuable records of early travels, presented by the Archives Department, and the Geographic Board of Canada.

The Library is open to the public for reference during office hours, and an increasing number of visitors have availed themselves of this privilege, not only with regard to the books, but also in connexion with the collections of maps and photographs.

VICTORIA MEMORIAL MUSEUM

William McInnes, Director

The erection of the Victoria Memorial Museum into a division of the Department of Mines, separate from the Geological Survey, is the first step toward the creation for Canada of a National Museum that will worthily represent her great natural resources.

As now constituted, the Museum includes Biological, Anthropological, and Palaeontological Divisions. The Biological Division which is under R. M. Anderson, zoologist, as acting chief, includes mammalogy, ornithology, and botany; the Anthropological Division under E. Sapir, ethnologist, covers the whole range of anthropology including archaeology; and the Palaeontological Division under Edward Kindle as Curator includes vertebrate and invertebrate palaeontology.

Owing to the destruction of the Parliament buildings by fire and the consequent necessity of providing housing for the legislature, the Victoria Memorial Museum was vacated and the large collections that had been gathered by the Geological Survey since the inception in 1842 were placed in storage. In the winter of 1920-21 the Session of Parliament was held in the new Parliament building and the Victoria Memorial Museum building became again available, in part, for the Museum. The whole building, which would be all too small to house adequately the exhibits and staff of a National Museum was, unfortunately, not available. One of the exhibition halls previously used was taken over by the National Gallery and the natural growth of the Geological Survey required the apportionment to that branch of a large part of the remaining space.

In the circumstances, therefore, it has been possible to give to exhibition purposes only one hall on the main floor and three on the second floor together with the rotunda on both floors.

An endeavour has been made to install in these halls the best biological, anthropological, and palaeontological exhibits that could be arranged under existing conditions. Many of these are of necessity placed in temporary cases and the halls are generally too crowded for effective display.

The congestion in the halls is apparent to the casual visitor and the unseen congestion—the housing of reference collections and the mass of study material, that in any museum constitute its most valuable possessions—is even greater.

The staff of the Museum divisions were fully occupied during the year in the discharge of the duties of their several positions. Field work in biology and anthropology was carried on in the summer months, and in the winter the results were worked up and prepared for publication or filing for reference.

The need for adequate provision for the proper preservation and storage of valuable collections of material is daily becoming more urgent and considerations of economy should not be allowed to so far influence us as to prevent this provision being made. Many of the specimens now on hand are unique and there is in private hands a large amount of material which would be turned over to the Museum for the benefit of the public if assurance could be given that it would be housed in such a way as to be accessible and safe.

The necessity for the curtailment of expenditure in every possible way in the public service is recognized; but it would be false economy that would detrimentally affect the country's progress, to neglect to provide accommodation to ensure the preservation of material that, once destroyed, can never be replaced.

12 GEORGE V, A. 1922

The auditorium, after being vacated by the House of Commons, was fitted by the Public Works Department with comfortable, fixed seats, accommodating 262; and the gallery was provided with temporary chairs seating 266. A projecting lantern and moving-picture machine made the room available for meetings of scientific societies and for lectures.

Advantage was taken of the refitted hall to hold a series of lectures for adults on scientific subjects by members of the staff of the department, and a series for school children on Saturday mornings. The children's series proved particularly popular the hall being filled to capacity at each lecture, by attentive and receptive children; and on many occasions was so crowded that it was necessary to repeat the lecture twice and even three times during the morning. The Publicity Bureau of the Department of Trade and Commerce helped materially to make the gatherings successful by providing an operator and suitable films.

In addition, permission was granted to various scientific societies, including the Royal Society of Canada, to use the room for meetings.

The department suffered a great loss by the death, on July 18, 1920, of John Macoun, one of the oldest members of the staff. Mr. Macoun joined the Geological Survey as botanist in 1882 and from then to the day of his death devoted himself untiringly to the botanical work of the department.

Through his love for the work, and unsparing efforts, the herbarium now holds an honoured place among the botanical collections in America. By his death and by the death of his son, James M. Macoun, who predeceased him by a few months, the science of botany in Canada has met with a loss than can hardly be over-estimated.

M. O. Malte, agrostologist of the Central Experimental Farm, has acted as honorary curator of the herbarium since Mr. Macoun's death.

ANTHROPOLOGICAL DIVISION

ETHNOLOGY AND LINGUISTICS

Exhibits

E. Sapir, Chief of the Division, reports that the Victoria Memorial Museum building, though no longer occupied by Parliament, has not been in such shape throughout the greater part of the year as to warrant its being formally thrown open to the public. However, visitors to the Anthropological hall have been rather numerous and always welcome. The hall adjoining this has been assigned to the Division of Anthropology for further exhibits. Lack of suitable cases makes it impossible for the present to install a permanent ethnological exhibit in this new hall, but the division is utilizing an old stock of small table-cases for a temporary exhibit of ethnological material from tribes of the plains and the western plateaus, two regions that had been hitherto unrepresented in our public collections. The archaeologist of the division, H. I. Smith, took charge of the supplementary exhibit and is preparing a popular guide-book to serve as a general introduction to the life of our Canadian aborigines, particularly from the point of view of their arts and handicrafts.

Acknowledgments are due to the following for donations of specimens or photographs to the Museum: W. B. Anderson, Iver Fougner, A. J. Matheson, Captain Mills, Geo. P. Phillips, R. Sutherland.

Four anthropological field trips undertaken during the summer evidence progress towards the restoration of pre-war conditions in the Division of Anthropology. Of these one was a combined archaeological and ethnological trip to Bellakula, B.C., undertaken by H. I. Smith. A second was an extensive archaeological field research in southwestern Ontario by W. J. Wintemberg. This trip, as well as the archaeological

SESSIONAL PAPER No 26

part of Mr. Smith's field work, are reported on under "Archæology." C. M. Barbeau undertook an elaborate field reconnaissance of the social organization of the Tsimshian Indians of Upper Skeena river, B.C., continuing work carried out during a previous field trip among the Tsimshian tribes at Simpson. Finally, F. W. Waugh spent another summer among the Ojibwa of Iac Seul, Ont.

E. Sapir spent the greater part of the year in linguistic researches. The large body of Nootka text material is being put in final shape for publication. Considerable progress was made on the grammatical analysis of the Nootka language. A review of Nootka ethnology for the general public was prepared in the form of an ethnological narrative centreing about the life of a single individual. This paper, entitled "The life of a Nootka Indian," was read in part before the Royal Society of Canada (May, 1920), and has been published in "Queen's Quarterly." In the course of the preceding year Dr. J. G. Wolf, interned at Kapuskasing, Ont., working under Dr. F. Boas' direction, had prepared on slips a preliminary dictionary of Wishram, based on Mr. Sapir's "Wishram texts" and on manuscript notes put at his disposal. These slips are carefully revised and supplemented by Mr. Sapir. Full dictionaries of the Chinookan dialects (Chinook, Kathlamet, Wishram) are likely now to be of more than ordinary interest in view of the surprising linguistic status of Chinookan revealed by Mr. Sapir's comparative researches, Chinookan proving to be a member of the Penutian group that extends in a broken line from southern California to British Columbia. Following up previous work on Indian kinship systems (Yana, Kootenay, Nass River), Mr. Sapir undertook a linguistic-sociological review of the kinship systems of Algonkin, Wiyot, and Yurok. The linguistic portion of this paper is completed and confirms Mr. Sapir's hypothesis of the Algonkin affinity of Yurok and Wiyot, two languages spoken in northwestern California. The sociological portion will throw light on a number of kinship developments within the enlarged Algonkin group. The paper on "Nass River terms of relationship" was published in the *American Anthropologist* (N.S., vol. 22, 1920, pp. 261-271). Two papers on the Yana language of California were prepared in the course of the year: "The fundamental elements of northern Yana" and "Test analyses of three Yana dialects." These are to appear in the University of California Publications in American Archaeology and Ethnology. Mr. Sapir has begun a general reconnaissance of the Indian linguistic groups ("stocks") north of Mexico to ascertain what reduction of the more than fifty stocks generally recognized is possible and what light may be thrown by the restored groupings on the earliest aboriginal movements of population. As a preliminary result he finds that it is possible to do with but six main morphologic-genetic groups, which may ultimately be somewhat further reduced. Five of these groups are represented in Canada. One of them, the Nadene (consisting of Haida, Tlingit, and Athabaskan), stands out very distinctly from all the rest and may represent a relatively late wedge from the Asiatic continent into an earlier American distribution of languages. Mr. Sapir is now planning to resume the intensive comparative study, undertaken some years ago, of the Nadene languages, and has made considerable progress towards the composition of a comparative Athabaskan dictionary, a necessary first step in the larger task. It is probable that both the general study of Indian stocks and the more detailed study of Nadene will result in new, and even unexpected, points of view on the linguistic affiliations and early history of the American Indian. A preliminary report on the classification of American languages was given in December, 1920, at the Chicago meeting of the American Association for the Advancement of Science, Section H. It was entitled "A bird's-eye view of American languages north of Mexico" and was illustrated by a coloured map.

Harlan I. Smith spent the period of June 2 to September at Bellakula, B.C., partly on an archaeological reconnaissance but mainly in order to study the material culture of the Bella Coola Indians, one of the most important of the West Coast tribes, but concerning whom relatively little has yet been published. Mr. Smith obtained

very full information on the industrial life of the tribe. A considerable mass of information was also obtained on the material culture of the Carrier band dwelling near the Bella Coola reserves. Mr. Smith's researches were supplemented by a set of ethnological photographs and a valuable collection of ethnological objects.

C. M. Barbeau undertook a seven months' investigation in the field—from June, 1920, to January, 1921—of the ethnography of the Gitksan tribes of British Columbia. The five tribes to which he confined his researches are those of the headwaters of Skeena river, from Hazelton to the Groundhog district and Bear lake, a distance of about 200 miles. Two of these tribes, Qaldo and Anlagasemdkh, have now ceased to exist independently, and their members have scattered among their kinsmen of the more easily accessible villages of Kispayaks, Glen Vowell (a modern settlement), and Gitenmaks (Hazelton). The Kispagag tribe, situated near the junction of Babine and Skeena rivers, is also dwindling in numbers, owing to the same general tendency to renounce isolation and old-time customs. Though his headquarters remained at Gitenmaks (Hazelton), he visited all the other tribes, with the exception of Qaldo. Kispagag and Anlagasemdkh, being situated about 50 miles above Hazelton, on a trail, it was necessary to organize and equip a party for an expedition of about two weeks. A series of potlatches given at Hagwelgate—a Carrier village situated 4 miles from Hazelton, on Bulkley river—were observed and subsequently analysed with the help of participants; and photographs were taken both of a potlatch display and of a secret society (galuhlim) dance. Several other points in the ethnography of those tribes received attention.

D. Jenness, the anthropologist of the Canadian Arctic Expedition, spent the year working up the Eskimo data he had obtained. Two of his reports are now ready for publication, "The life of the Copper Eskimos," a manuscript of 500 pages, and "String figures of the Eskimos," a manuscript of 200 pages. A third report, on Eskimo folk-lore, with texts in the native language, is nearing completion. Mr. Jenness is at present chiefly engaged in working out his grammatical material from Barrow, the Mackenzie delta, and Coronation gulf. The two completed papers have been put into the hands of the Arctic Board, and their publication may be expected in the near future.

F. W. Waugh continued work on his monograph dealing with the folk-lore of the Iroquois. This volume will consist of a large series of folk-tales from the various tribes of the Iroquois Confederacy and of a discussion of such beliefs and practices as come under the general rubric of "folk-lore." During the summer Mr. Waugh spent about two and a half months among the Ojibwa of lac Seul in northwestern Ontario in continuation of work in the same region undertaken during the preceding season.

No anthropological publications have appeared in the course of the year. This failure to continue the Anthropological Series of memoirs and bulletins that was well under way before the war is due not to lack of material but to the present policy of rigid economy in publication expenditures. This policy, if continued in its present form, threatens to render all but useless the work of the Division of Anthropology except insofar as the department allows its anthropological manuscripts to be published by other institutions.

Two manuscripts on the Eskimo, submitted by D. Jenness for publication by the Arctic Board, have been referred to.

The following manuscript, secured as a gift from Dr. F. G. Speck in 1915, has been returned to him for publication elsewhere: "Studies of the Beothuk and Micmac of Newfoundland," 66 pages and 4 negatives.

A portion of the large ethnological manuscript on the Dakota of Manitoba, by Dr. W. D. Wallis, transferred in 1918 and 1919 to the American Museum of Natural History, New York, has been published by that institution in the course of the year: "The Sun Dance of the Canadian Dakota," by W. D. Wallis. (*Anthropological Papers of the American Museum of Natural History*, vol XVI, part IV, 1919, pp. 317-380).

SESSIONAL PAPER No 26

ARCHAEOLOGY

Harlan I. Smith reports that the exhibits belonging to the Geological Survey, Canada, illustrating the prehistoric culture of Canada, and including the earliest known Canadian art and material handiwork, are now open to the public in the Victoria Memorial Museum.

More space is urgently required in order to exhibit the representative selection of the archaeological remains of each of the culture areas of Canada, and especially to make available to commercial designers and manufacturers material which they now express a keen desire to use in producing distinctively Canadian manufactures, to take the place of manufactures involving European decorative designs.

Photographs, rather than drawings, of actual specimens of every type of prehistoric Canadian art, should be prepared as soon as the photographs can be made, to be framed as economic exhibits for Canadian manufacturers and designers, to be given or loaned to the museums, schools of design, art schools, and to various exhibitions throughout Canada. As soon as it is possible to have the services of a plaster worker, casts of these specimens should be made in order that they may be assembled for such an economic exhibit in the Museum, and also for distribution.

A new lecture is now available on Prehistoric Indian art as a source for distinctively Canadian manufactures, illustrated with lantern slides of over four hundred objects.

A more complete stock of lantern slides is required, in order to be able at all times to adequately present the results of archaeological work in Canada by means of public lectures. These may be made largely from the Museum specimens and negatives.

Acknowledgments are due to the following for donations to the Museum: Chapleau, S. J., Clayton, D., Clayton, Mrs. E., Drake, T. G. H., Embury, W. J., Girling, Rev. H., Gordon, H., Gordon, E., Hobson, W. B., Jacobsen, B. F., McMullin, F. E., Nijgard, M., Oatman, A., Sutherland, R., Uren, C., Uren, G., Wood, F. S.

Archaeological reconnaissance was carried on in the Bella Coola area, in British Columbia, by Harlan I. Smith, and both reconnaissance and intensive excavation was carried on in southwestern Ontario by W. J. Wintenberg.

Mr. Smith was in the field carrying on archaeological reconnaissance and ethnological work in the Bella Coola area, British Columbia, during June, July, and August. The Bella Coola Indians are an isolated group of tribes speaking a Salishan dialect, cut off from the larger body of dialects of the same stock, living to the east, in the interior of southern British Columbia, by the Carriers and Chilcats, both of the Athabaskan stock. On the north, west, and south, their neighbours are of a still different linguistic stock—the Wakashan. The Bella Coola are believed to have come from the interior near where their kindred in language now dwell, and to have taken up some of the arts and customs of their sea-coast neighbours. Certainly some of their art work seems to be a poor imitation of that of the neighbouring coast. They met white men first when Mackenzie made the initial journey across Canada to the Pacific coast in 1793, and still treasure the experience. The present Bella Coola are assembled in three main villages. Mr. Smith located the old village sites and many small sites. Some archaeological specimens were collected, petroglyphs and pictographs in red were located, and sketched or photographed, and photographs were taken of all the specimens in three local collections, which probably represent a majority of the less perishable artifacts. These consist chiefly of points chipped from obsidian, celts or adzes, simple hand-hammers oval in section, grooved hammer-heads, some of them sculptured, semi-cylindrical game stones, and perforated stone game disks.

There is no dearth of village refuse in which to carry on future intensive excavation. Permission was secured to excavate some of the best of the sites. No inten-

sive excavation has ever been carried on in the Bella Coola area, which because of its isolation and neighbours presents problems as to their earlier culture and that of their possible predecessors in the area. The material culture of the modern Indians of the region is expressed chiefly in perishable material such as wood, bark, and skin, thus, if the earlier culture were similar we would not expect many artifacts other than those mentioned to endure.

Incidentally a large amount of data was secured regarding the knowledge possessed by both the Bella Coola Indians and visiting Carrier Indians in regard to all the plants, animals, and minerals of the area, a complete knowledge of which would, of course, embrace that of their entire material culture.

W. J. Wintemberg was in the field in southwestern Ontario from July 19 to October 29. He made notes of the more important specimens in Hamilton and other places as far west as Detroit river. He discovered three small Algonkian village sites and visited an ossuary and several supposed artificial mounds near Cayuga, and examined an Algonkian and an Iroquoian site in the vicinity of Port Dover, Norfolk county. He found six large village sites and four smaller sites, apparently of one culture, and two small sites of another culture, near Norwich, Oxford county.

An intensive exploration was made of one of these large sites, known as the Uren site, covering about 20 acres on the farm of Joseph N. Uren. Here were twenty refuse heaps 17 inches high or less. Many artifacts of stone, bone, and antler, and a few of shell, were found. The culture is similar to that of Neutral, Iroquoian sites, elsewhere in southwestern Ontario, except most of the ornamentation on the pottery and the shape of the earthenware pipes. A mixture of Algonkian and Iroquoian styles of ornamentation is found on some pieces of the pottery. Typical Iroquoian styles are found on a few fragments, and typical Algonkian on others. The earthenware pipes are mostly simple, elbow forms, with short stems, none of trumpet shape being found. Evidences of pipes are not numerous, as they are on Iroquoian sites in general. Charred corn and sunflower seeds, many unnotched triangular projectile points chipped from stone, a few notched points, and a bead made of a small ocean shell, were found. No traces of palisades, houses, graves, or other structures were found, although human remains have been plowed up on nearby sites.

Sites in the vicinity of Otterville, Sweaborg, and Tillsonburg, in Oxford county, and Aylmer, St. Thomas, Fingal, and Wallacetown, in Elgin county, were inspected.

To summarize the work in Ontario, Mr. Wintemberg inspected every important site in the tier of Ontario counties bordering lake Eric, except those in Welland county, a large fortified village site, near Clearville, which has been much disturbed by collectors, and one on the McGeachy farm near Chatham. The sites are shallow. Some are of Algonkian culture; others of Iroquoian. In previous years he has inspected every known site in the tier of counties along the St. Lawrence and lake Ontario, from the mouth of Ottawa river to Trenton. This area includes both shallow and deep Iroquoian sites, shallow Algonkian sites, and sites of several undetermined cultures. Intensive exploration was carried on in a typical Iroquoian site near Roebuck in 1912 and 1915; and in the Uren village site of Iroquoian culture, strongly flavoured with Algonkian, this year. There remains to be explored in Ontario the tier of counties from Trenton to Welland county inclusive, and the counties north of the tier bordering the waters of lakes Erie and Ontario, and the St. Lawrence.

The results of intensive work in each linguistic and culture area are useful as standards of reference for other material found in the same area. They are to archæology as topographic control stations are to topography, and faunal lists of a section of one horizon are to palæontology.

SESSIONAL PAPER No 26

Intensive archaeological exploration has been carried on in Canada as follows:

In the Algonkian area at Merigomish, N.S., by Mr. Smith, for the Survey.

In the Iroquoian area at Rockbury, Ont., by Mr. Wintenberg, for the Survey.

In the Salish area of the interior of B.C., by Mr. Smith, for the American Museum of Natural History, New York.

In the Salish area of the southern coast of B.C. (a different culture from that of the Salish area of the interior), by Mr. Smith, for the American Museum of Natural History, New York.

In the Haida area of the northern coast of British Columbia, by Mr. Smith, for the Survey.

There are five linguistic areas in British Columbia, and only five in all the rest of Canada. Four are on the coast of British Columbia. Consequently it is a region which should receive a large proportion of the archaeological exploration of Canada.

FOLK-LORE (1914-1920)

(C. M. Barbeau)

The American natives, in their prolonged and intimate contact with their white neighbours, have assimilated a large number of European notions and technical processes. These intrusive materials are now interwoven in the fabric of aboriginal culture, and it is not always possible for the ethnologist to disentangle the elements and discover their proper historical source. We cannot yet determine, for instance, to exactly what extent the technique of basketry, decorative patterns or designs, woven bands and sashes has been modified under extraneous influence. Folk-medicine, superstitious notions, mythology, and folk-tales have also absorbed a great deal of what at first was not their own.

Field ethnographers, in their hurried gathering of quickly vanishing data, could not deeply concern themselves with such intricate problems. But the time has come when comparative studies force themselves to the foreground. What is aboriginal in origin or what is European are questions that incessantly crop up. For a sound comparative analysis we, of course, are in need of abundant materials from both sources. Much information is available in European museums and libraries, but nowhere are the materials more plentiful, more easily accessible, and more apt to the elucidation of historical problems that concern us than in the very field where the Indians came into contact with the white invaders of various nationalities. We have gradually given more attention, since 1914, to some phases of the European folk-lore lying easily within our reach. Encouraging results induced us to prosecute further our research in a newly discovered domain. From French folk-tales collected at Indian Lorette and also diffused among other American tribes, we passed to folk-songs, technology, and folk-traditions generally, even though in most cases they bore no relation to any Indian data. The impetus has gradually gained momentum until it became clear to us that the resources of Old World folk-traditions in America—be they English, French, Gaelic, Scandinavian, or German—are still vast, unexplored, and a worthy object of study, not only because they may have casually influenced the aboriginal culture, but also for their own sake.

Among the fields for investigation that have come to our attention in Canada the most fruitful are the French, the English (Scotch, Irish), the Gaelic (Scotch), and the Scandinavian. Vast collections of French data have been assembled and are now in the keeping of the Anthropological Division. The work has also been initiated in the English districts, especially Ontario, with promising results.

Folk-Lore Collections

(French)

The Barbeau (C. M.) Collection—

- 250 folk-tales, from the counties of Quebec, Beauce, Charlevoix, Chicoutimi, Kamouraska, Temiscouata, and Gaspé;
 - 1,885 song texts, from the same counties;
 - 1,618 song melodies (of the same texts) recorded on the phonograph;
 - 146 folk-anecdotes, mostly bearing on ancient beliefs and customs, recorded in the counties of Quebec, Temiscouata, Gaspé, Beauce, and Kamouraska.
 - 730 photographs of technical processes, objects, and of people (Quebec, Montmorency, Charlevoix, Chicoutimi, Temiscouata, and Beauce counties);
 - 75 dance tunes, sung or played on the violin, 65 of which were recorded on the phonograph.
- Also considerable materials bearing on the folk technology, "blason populaire" (nicknames), customs, beliefs, sayings, rhymes, and language of the same counties of Quebec.

The Massicotte (E. Z.) Collection—

- 1,727 (possibly more) song texts, collected in Montreal, from singers born in various Quebec districts; Beauharnois, Champlain, Russell, Prescott, Kamouraska, and others;
 - 1,360 song melodies (of the same texts) recorded on the phonograph;
 - 111 beliefs and sayings, collected in Three Rivers (Que.);
 - 58 popular remedies;
 - 175 formulæ, rhymes, and riddles, from western Quebec;
 - 10 (approximately) folk-tales, anecdotes, and texts of various kinds;
 - 30 (approximately) violin and accordeon dance tunes;
 - 20 photographs of old buildings in Montreal; 121 photographs taken in Champlain county.
- Also materials bearing on technology, games, bibliography, and other matters.

The A. G. Collection—

- 248 song texts from Portneuf, Nicolet, and other counties;
- 42 song melodies recorded by ear.

The Lambert (A.) Collection—

- 141 song texts mostly from Berthier, Que., with appended melody recorded by ear;
- 15 folk-tales;
- 3 other spoken texts;
- 18 short satire songs.

The Barbeau-Wyman Collection—

- 60 songs from Temiscouata county, recorded both in text and on the phonograph.

The Tremblay (Jules) Collection—

- 59 song texts recorded in Ottawa;
- 57 melodies of the same songs;
- 2 anecdotes.

The Wyman (Lorraine) Collection—

- 18 songs from Percé (Gaspé) recorded in text, the melodies by ear.

The Cyr (Vre. C.) Collection—

- 56 song texts, recorded at Cowley (Alberta).

The Tremblay (Malvina) Collection—

- 12 folk-tales from Chicoutimi.
- Also many folk remedies, sayings, fragments of songs, and expressions.

The Lanctôt (Gustave) Collection—

- 8 folk-tales from Laprairie (Quebec);
- 9 formulæ;
- 20 song texts, also from Laprairie.

The Lanctôt-Barbeau Collection—

- 50 song texts, copied from a manuscript (Deux-Montagnes, Quebec); 25 of which were recorded on the phonograph.

The Morin (Victor) Collection—

- 4 folk-tales and formulæ from St. Hyacinthe (Quebec).

The Mercure (Geo.) Collection—

- 7 anecdotes from Portneuf county and La Pointe-Gatineau;
- 3 song texts.

SESSIONAL PAPER No 26

The Cloutier (J. E. A.) Collection—

- 5 folk anecdotes from L'Islet county (Quebec);
- 2 song texts.

The Bolduc (Evelyn) Collection—

- 3 folk-tales from Beauce county (Quebec).

Also from *Beaudry (Laurent)*, *Guillot (A.)*, *Garcen (J. B.)*, *Gagnon (Alphonse)*, *Mrs. A. J. Mount-Duckett*, and others—

A certain number of folk-songs, sayings, folk-tales, and manuscripts.

Old manuscript song books—

- 1 "cahier Mizaël Hamelin" (1860, Quebec), deposited by Mr. E. Z. Massicotte;
- 2 old song-books dated 1820-30, deposited by Mr. Massicotte;
- 1 old manuscript of dance melodies, copied *circa* 1830, deposited by Mr. Massicotte;
- 2 books of literary songs copied in 1828, deposited by Mr. Massicotte;
- 3 song books from Sister Ste. Georgia, *circa* 1878, deposited by C. M. Barbeau;
- 3 manuscript books of literary sacred songs, etc., as known about 1878, deposited by C. M. Barbeau.
- 1 song book given by Mr. Benjamin Suite to C. M. Barbeau and also deposited with the others;
- 1 song book loaned for taking copies of songs noted down about 1860, by Mrs. A. J. Mount-Duckett.

(It may be noted that comparatively few of these manuscript songs are actually old folk-songs. However, the books serve to indicate at what date some literary songs were introduced into Canada.)

Totals (approximate)—

- 4,140 song texts, not including those found in the manuscript books, in clippings from old newspapers and other sources;
- 3,037 song melodies recorded on the phonograph;
- 278 song melodies, recorded by ear;
- 280 folk-tales;
- 165 anecdotes;
- 890 photographs;
- A few hundred rhymes, formulæ, and kindred materials;
- 105 dance melodies, most of which were recorded on the phonograph;
- About 200 sayings, beliefs, and
- About 100 popular remedies;
- Also abundant other data on other topics.

*(English and Irish)**The Waugh (F. W.) Collection—*

- 838 formulæ, omens, beliefs, rhymes, and riddles, recorded in Ontario;
- 5 songs and ballads;
- 16 "noodle" stories.

The Wintenberg (W. J.) Collection—

- 653 rhymes, omens, sayings, games, and kindred material from various Ontario counties;
- A few rigmároles, and tales;
- 15 songs and ballads.

The Barbeau (C. M.) Collection—

- 41 folk-songs with texts and phonograph records (Tadoussac and other parts of Quebec, Ottawa, and British Columbia);
- Formulæ, sayings, and kindred material.

The Bleakney (F. E.) Collection—

- 23 songs, formulæ, and games, from Ottawa.

The Mount-Duckett (A. J.) Collection—

- Songs copied from an old manuscript book, written about 1860, in western Quebec, not many of which are folk-songs.
- Also a few formulæ and kindred material.

*(English-Scandinavian)**The Teit (J. A.) materials—*

- "Water beings in Shetlandic folk-lore, as remembered by Shetlanders in British Columbia."

It may be noted that, as folk-lore work had at first no official status in the Anthropological Division, we enjoyed only to a very limited extent the financial support of our institution. Many of the collections have been made privately and without financial help. In the case of Mr. Massicotte, a phonograph, phonograph blanks, and stationery were furnished. And in the summer of 1920, a small appropriation from the Geological Survey, Canada, enabled him to carry on some investigations in Champlain county, Quebec. It was chiefly through personal encouragement, correspondence, and enthusiasm that collaborators were induced to collect for us or to furnish their materials, which are now stored at the Victoria Memorial Museum. As to the writer's surveys (carried on in periods of from two weeks to three months, in 1914, 1915, 1916, 1918, 1919), two of the expeditions were at his own expense, and the three others were partly subsidized by the Geological Survey.

Our task was not complete with the collection of materials. Provision had to be made also for publication. The American Folk-Lore Society, through its editor, Dr. Franz Boas, welcomed our manuscripts for *The Journal of American Folk-Lore*, with the request that we raise funds corresponding to the additional expense incurred. We, therefore, organized the Quebec (in 1915) and Ontario (in 1918) Branches of the American Folk-Lore Society, and managed in various ways to gather the necessary financial help.

PUBLICATIONS

The following articles and publications, marking various stages in our folk-lore enterprise, have been issued since 1916.

"Le folklore canadien-français" by C. M. Barbeau. (*Mémoires de la Société royale du Canada*, mars 1916, pp. 450-481.)

The French volume of *The Journal of American Folk-Lore* for 1916, No. CXI, pp. 1-154, including: 47 folk-tales from Quebec, "Contes populaires canadiens, première série," by C. M. Barbeau. . . ; "Fables, contes et formules," by G. Lanctôt.

"Les métamorphoses dans les contes populaires canadiens," by C. M. Barbeau (*Mémoires de la Société royale du Canada*, mai 1916, pp. 143-160).

"Les traditions orales françaises au Canada," by C. M. Barbeau (*Le Parler Français, Quebec*, mars 1917, pp. 300-318).

The French volume of *The Journal of American Folk-Lore* for 1917, No. CXV, pp. 1-160, including: 27 numbers (folk-tales and rigmoroles) of "Contes populaires canadiens, seconde série," by C. M. Barbeau, and 4 numbers, "Facéties et contes canadiens," by Victor Morin.

"Le pays des gourganes," by C. M. Barbeau (*Mémoires de la Société royale du Canada*, mars 1918, pp. 193-225).

"Nos traditions orales," by C. M. Barbeau (*Revue canadienne*, Montreal, Jan. 1918, pp. 24-33).

Canadian Folk-Lore, pp. 1-201 (reprinted from *The Journal of American Folk-Lore*, vol. 31, for 1918), containing contributions by F. W. Waugh, W. J. Wintemberg, C. M. Barbeau, J. A. Teit, and F. Eileen Blackney.

The fourth Canadian number of *The Journal of American Folk-Lore*, for 1919, No. 123, pp. 1-184, including: Chants populaires du Canada, première série" by E. Z. Massicotte and C. M. Barbeau; "Contes populaires du Canada, troisième série," by E. B., M. T., and C. M. B.; "Croyances et dictons populaires," by E. Z. M.

"The field of European folk-lore in America" presidential address to the American Folk-Lore Society, for 1918 (printed in *The Journal of American Folk-Lore*, April-June, 1919, pp. 185-197).

SESSIONAL PAPER No 26

"Les veillées du bon vieux temps," printed under the auspices of the Montreal Historical Society, 1920; pp. 1-110.

The fifth Canadian number of *The Journal of American Folk-Lore*, for 1920, No. 129, including "Anecdotes populaires du Canada, première série," by C. M. Barbeau, Georges Mercure, and J. E. A. Cloutier.

The sixth Canadian number of *The Journal of American Folk-Lore*, for 1920, No. 130, including French nursery rhymes, folk-songs, "blason populaire" and photographs, by E. Z. Massicotte, Lorraine Wyman, Gustave Lanctôt, C. M. Barbeau, and others.

BIOLOGICAL DIVISION

The members of the staff of the Biological Division since their return to the Victoria Memorial Museum in May, 1920, have been occupied in the fabrication and installation of exhibition groups in the Museum halls. Sufficient progress was made in this work to permit of the halls being opened to the public during the summer, and work is in progress on additional groups which will be placed on exhibition as they are completed. R. M. Anderson, zoologist, Acting Chief of the Division, devoted his time to the administrative work of the division; to the determination and rearrangement of the large mammal collection on hand; and to the correspondence of the division which is always voluminous. Much of Dr. Anderson's time was devoted also to editing the scientific reports of the Canadian Arctic Expedition, of the Southern Division of which he was chief.

P. A. Taverner, ornithologist, and C. H. Young, who acted as his assistant, spent part of the summer of 1920 in field work in the province of Saskatchewan. They succeeded in making a good representative collection of the birds of the districts of Last Mountain and Kutawagan lake. In the late summer Mr. Taverner with Mr. Lloyd of the Department of Parks Branch, made an ornithological reconnaissance of the provinces of Saskatchewan and Alberta, for the purpose of gaining a general knowledge of the faunal conditions in those provinces.

The report of Mr. Taverner, published in 1919, on "Birds of eastern Canada" has been exhausted—both English and French editions—and a second edition is now going through the press. The cardboard-covered copies will be sold at 50 cents and the cloth-covered at \$1.00.

BOTANICAL DIVISION

In May, 1920, the herbarium and offices of the division were removed from temporary quarters in the Lowe-Martin Building on Nepean street, which had been occupied for over two years, to the Victoria Memorial Museum.

M. O. Malte, agrostologist, Central Experimental Farm, and honorary curator of the herbarium, has exercised a general supervision over the work of the division since the death of J. M. Macoun.

A large collection of botanical specimens was received from Finland, also 649 sheets of plants from the United States and a small collection from Quebec. Many botanists and botanical students have taken the benefit of the herbarium during the year for purposes of study and for the comparison of material.

SESSIONAL PAPER No 26

MINES BRANCH

John McLeish, Acting Director

The activities of the Mines Branch were carried on as usual, during 1920, for the greater part of the year under the direction of Eugene Haanel under whose able administration the Branch was organized in 1907 as one of two main branches of the Department of Mines. After nineteen years' service, six years as Superintendent of Mines in the Department of the Interior and thirteen years as Director of Mines Branch, Department of Mines, Dr. Haanel because of failing health accepted retirement from active service and was relieved of duty on December 15, 1920.

On the organization of the Mines Branch in 1907 the staff comprised 21 persons, of whom 7 had been transferred from the Geological Survey, 6 constituting the staff of the Assay Office at Vancouver and 8 the staff of the former Mines Branch of the Interior Department. Of these 21, 13 were technical officers including administering officers, engineers, chemists, and assayers.

In 1920 the staff had increased to 98, of whom 35 were technologists including engineers, chemists, and assayers, 22 clerks, and 41 mechanics, labourers, laboratory assistants, messengers, etc.

Investigations of the mineral resources of the country have been continued as usual to the fullest extent permitted by the available technical staff. But it must frankly be stated that although during the past few years the growth in production and utilization of mine products has been rapid and the demands upon the Department in respect thereto have proportionately increased, the department has been unable to meet those demands owing to the numerous resignations from an already too limited staff.

During 1919 the Mines Branch lost through resignations the services of G. C. Mackenzie, Chief of the Ore Dressing and Metallurgical Division, after ten years service; R. E. Gilmore, research chemist, and T. W. Hardy, F. W. Baridon, and B. P. Coyne, assistant chemists.

During 1920, resignations were submitted by John Blizard, technical engineer in the Fuel Testing Division; K. A. Clark, Chief of the Road Materials Division; R. C. Cantelo, assistant chemist, Fuel Testing Division; Miss M. Young, technical assistant, ceramic laboratories; Wm. Campion, mechanical draughtsman; Miss Westman, library assistant. In March, 1921, Edgar Stansfield, chief engineering chemist of the Fuel Testing Laboratory, resigned.

The loss which the department suffers through the resignations of long-experienced and qualified investigating engineers and research workers is perhaps not fully realized. Such investigators cannot readily be replaced from outside the government service and the resignations of junior as well as senior investigators has militated against the availability of men for promotion. Sufficient recognition has not been, and is not being, given to the value of training and experience; the loss of the experienced research worker means the loss of much time and the cost—or a very inadequate return for—the training, as compared with the return that would accrue with the retention of the officer's services.

Only a small portion of the demands made upon the department for investigations can be undertaken and the services of the engineering staff are in constant demand for information and consultative advice. The necessity for special investigations has been such that much too frequently it has been necessary to set aside and defer one investigation already begun in order to take up another more pressing. As a result several engineers have much uncompleted work on hand, a condition which is neither fair to the officer concerned nor to the interested mining public, and a condition which can be remedied only by increased appropriation and staff.

12 GEORGE V, A. 1922

There are many directions in which the functions of the Mines Branch could with great value to the public interest be carried out much more thoroughly and on a larger and broader basis, but as the present does not seem an opportune time for increased appropriations and as the process of revision of departmental classification and organization is still under way, the subject need not at this point be further enlarged upon.

METAL MINES DIVISION

A. W. G. Wilson, Chief of the Division, has been engaged for some years in the preparation of a comprehensive review of the development of chemical and metallurgical industries in Canada. The investigations upon which this review is based were undertaken to ascertain the nature and extent of the market demands in Canada for minerals and mineral products, and more especially chemical products made from minerals. It is known that Canadian industry requires a great variety of products made from minerals. The demand created by these requirements is satisfied in part by native products, but large quantities of foreign products also are imported. A knowledge of the requirements of industry is necessary before full and intelligent advantage can be taken of our own natural resources. The report now in preparation by Mr. Wilson attempts to review the whole field of industry, as developed in Canada.

A. H. A. Robinson has been in charge of magnetometric investigations of iron ore deposits for some years. His services were loaned to the Department of Mines of Ontario during the months of March and April for the purpose of making a special magnetic examination of an alleged iron-bearing area at Kashawegama lake.

During the regular field season nearly four months were devoted to the investigation of our titaniferous iron resources and the collection of samples for chemical investigation and analysis. The balance of the year was spent in office work.

NON-METALLIFEROUS MINES DIVISION

Howells Frechette, Chief of the Division, had undertaken in 1919 an investigation of the mineral pigments of eastern Canada and many deposits in Quebec were examined and reported upon. In 1920 the work was continued by him in Quebec, New Brunswick, and Nova Scotia. Practically all known deposits of iron oxide and iron-manganese oxide pigments in these provinces were examined and sampled. Much laboratory work has been conducted on the samples collected for the purpose of determining the nature of the pigments and the colours procurable from them by various methods of calcination.

H. S. Spence was engaged in gathering further data on barytes, talc, and fluorite, for the purpose of reports on these minerals. Consequent upon inquiries by the Imperial Mineral Resources Bureau regarding bentonite in Canada, Mr. Spence was instructed to visit, also, the known occurrences of bentonite in Alberta and British Columbia and to secure all the data possible regarding their extent and potential economic importance. Samples were secured in the various localities visited, and investigations of the physical and chemical properties of bentonite are being conducted in the Mines Branch laboratories.

L. Heber Cole was engaged from May 26 to October 20 on a continuation of the investigation of the structural materials along St. Lawrence river. During the first part of the season work was carried on in the vicinity of Cornwall, after which the area situated between Morrisburg and Prescott was examined. The work in the latter part of the season was carried on in the counties of Beauharnois, Huntingdon, Vaudreuil, and Soulanges, province of Quebec.

SESSIONAL PAPER No 26

Joseph Keele was associated with Mr. Cole in this work and a final report has been prepared for the Dominion Power Board at whose request the work was undertaken.

At the request of the Parks Branch of the Department of the Interior, S. C. Ells was instructed to make a further, more detailed examination of the bituminous sand deposits within the areas reserved for the use of the Parks Branch to determine the extent and quality of the sands that are available for mining, and the nature and thickness of the overburden. On the completion of this examination a short period was spent by Mr. Ells in visiting various outcrops of bituminous sand in the McMurray district with a view to making a provisional classification of the various sub-areas represented by these outcrops.

MINERAL RESOURCES AND STATISTICS DIVISION

The staff of this division has as usual been continuously occupied with the duties involved in the collection of statistical and other data respecting the mining and metallurgical industries of Canada, the preparation of the annual reports on mineral production, trade and consumption, supplemented by the preparation of numerous special memoranda, for the information of correspondents, or other government departments, respecting the occurrences of mineral resources and their utilization.

A considerable portion of the time of the Chief of the Division during the past two years has been taken up with duties relating to reclassification and with the duties of the Acting Directorship of the Mines Branch. On this account and to facilitate the more prompt publication of the final mineral-production record the Annual Reports on Mineral Production in 1918 and 1919 were submitted for publication in greatly abbreviated form.

In the completion of the final reports on mineral production A. Buisson has again compiled the statistics with respect to metals and metallic ores, and has prepared the report on production of gold, silver, copper, lead, nickel, zinc, and other miscellaneous metals. He has also revised the list of "Metal Mines."

J. M. Casey has, as usual, compiled all the statistics of the production of non-metalliferous products and structural materials, as well as the records of imports of mineral products, and has prepared for printing the various lists of mine and quarry operators, with the exception of the "Metal Mines" and "Metallurgical Works" lists.

MINERAL RESOURCES INDEX AND RECORDS

Some progress has been made in the development of the Mineral Resources Index referred to in the Summary Report of the Mines Branch for 1919 and previous years and more completely described in the final Report of the Munition Resources Commission, pages 204-208.

NATIONAL EXPOSITION OF CHEMICAL INDUSTRIES

The Department of Mines again shared with the Water Powers Branch of the interior Department a booth space at the Sixth National Exposition of Chemical Industries held at New York, September 20-25. A brief pamphlet on "The Mineral Resources and Mining Industry of Canada" was prepared for special distribution at the exhibition.

12 GEORGE V, A. 1922

CO-OPERATION WITH THE DOMINION BUREAU OF STATISTICS IN THE COLLECTION OF MINERAL PRODUCTION STATISTICS

Pursuant to an arrangement entered into with the Dominion Bureau of Statistics, the complete files of statistical production records for the years 1917, 1918, and 1919 collected by the division were made available to the Dominion Bureau of Statistics, of the Department of Trade and Commerce.

The Statistics Act of 1918 provides for the collection by the Dominion Bureau of Statistics of statistics of production of industry, including the products of all mines and quarries, etc., and the Governor in Council has approved of the centralization of collecting agencies in the bureau.

Arrangements were made in order to effect the transfer of work with the least confusion, for the completion of the collection of statistics covering the year 1920 by the Mines Branch staff, with whom a qualified technical officer of the bureau was to be associated so as to become familiar with the details of method and practice involved; reports on production in 1920 to be completed by the Mines Branch, the Dominion Bureau then to make all necessary preparation for the collection of the statistics of production covering the year 1921, and the collection of monthly records of production of pig iron and steel.

All statistical data thus collected by the Dominion Bureau of Statistics is to be placed at the disposal of the Department of Mines for information and record and for use in the compilation of reports on mineral resources.

ORE DRESSING AND METALLURGICAL DIVISION

On April 1, 1920, W. B. Timm, who was Superintendent of the Ore Dressing and Metallurgical Laboratories for a number of years, and who was Acting Chief of the Division during 1919 and the first three months of 1920, was promoted to Chief of Division.

R. K. Carnochan, assistant mining engineer, ably assisted in the work of the laboratories in carrying out the test work during the year.

The work of the chemical laboratories of the division was performed by H. C. Mabey and R. J. Traill.

No new appointments were made and no temporary assistants were secured to replace the resignations from the staff in 1919. The work of the laboratories was curtailed by not having the necessary technical officers to conduct the test work on hand.

In February a fire destroyed a portion of the laboratories, offices, and workshops, and held up the experimental work to some extent until the buildings could be rebuilt. In the meantime the chemical work was transferred to the chemical laboratories, Sussex street.

During the calendar year, the work consisted entirely of experimental testing of Canadian ores and minerals, and of investigations of the application of ore dressing and metallurgical processes. Twelve ore shipments were received; the test work on some of these is being carried into 1921, and a number of minor tests were conducted.

Mr. Timm visited the sampling plant and testing laboratories of the Ontario Government at Cobalt, Ont., and the Haileybury School of Mines laboratories at Haileybury, Ont., in connexion with the establishment of experimental laboratories in British Columbia. He also visited the Electro-Tin Smelting and Refining works at Brantford, Ont.; the laboratories of the Toronto Power Company, where experimental work was being conducted on the electric smelting of copper, lead-zinc ores and concentrates, and the L. J. Rogers laboratories, Toronto, where flotation work was being conducted in connexion with the application of non-oil flotation to Canadian ores.

SESSIONAL PAPER No 26

FUELS AND FUEL TESTING DIVISION

B. F. Haanel, Chief of Division, reports that the Division of Fuels and Fuel Testing was very seriously handicapped during 1920 by depletions in the engineering and chemical staff. John Blizard, technical engineer, resigned May 1, 1920, to accept a position as fuel engineer with the Bureau of Mines, Washington, D.C. E. S. Malloch, assistant technical engineer, was incapacitated for practically nine months by serious illness. Edgar Stansfield, chief engineering chemist, devoted the major portion of his time to the work of the Lignite Utilization Board to which he has been formally attached. R. C. Cantelo, chemist, resigned at the end of February, and neither this vacancy nor that of the two chemists who resigned in 1919—R. E. Gilmore and T. W. Hardy—was filled during the calendar year. It was consequently impossible, as it was in the previous year, to carry out the programme for which money had been provided.

On March 31, 1921, Mr. Stansfield resigned from the staff of the Division of Fuels and Fuel Testing, Mines Branch, to assume the position of Industrial Research Chemist in the University of Alberta, Edmonton.

INVESTIGATIONS PLANNED

The appropriations for 1920-21 provided for important research work in connexion with fuels, namely—an investigation concerning the combustion of various fuels in furnaces, boilers, etc., for industrial and domestic purposes; the retorting of peat and other fuels high in volatile matter, for the recovery of oils; and the continuation of the investigation now under way concerning the distillation of oil-shales. It is also planned to collect information concerning the methods which are now being employed for utilizing fuels for the production of power for general industrial purposes in Canada and for heating purposes. The necessity for conducting such an investigation was stated by Mr. Haanel in memoranda in which it was pointed out that certain economies in the use of fuels for the generation of power and for general heating purposes might be effected through the erection of central heating and power plants strategically situated with respect to industries and thickly inhabited communities, and that in certain instances hydro-electric energy might be substituted to advantage for steam-power plants now in existence. Without the information which such an investigation should afford, it will be impossible to make recommendations regarding means and ways for more efficiently using fuels for various purposes. Although such an investigation has been planned for some time it has up to the present been impossible to undertake it on account of the depletion of the engineering staff.

DEPLETION OF STAFF

The depletion of the chemical staff also necessitated the temporary abandonment of certain classes of work which have, heretofore, been regularly conducted, namely, the investigation of oils, and other routine work in connexion with fuels—but notwithstanding the serious handicap under which this division laboured, a large amount of routine work was performed in addition to certain valuable research work. The investigation of lignite begun some years ago and on which the Lignite Utilization Board based the practical work in connexion with the establishment of a briquetting plant near Bienfait was practically completed and the report covering this work will be prepared by Mr. Stansfield at the earliest opportunity.

A large amount of work has already been performed in connexion with the utilization of Canadian oil-shales as a source of oil.

12 GEORGE V, A. 1922

INVESTIGATIONS AND EXAMINATIONS MADE BY THE CHIEF OF THE DIVISION

Mr. Haanel in addition to his regular duties of laying out and directing the work of the division has from time to time visited laboratories in the United States where investigations concerning the distillation of coal and oil-shales are proceeding, and has secured information, blue prints, and other data pertaining to the various processes advanced and which give promise of ultimate success. He also witnessed a test conducted at the carbonizing plant of the Pennsylvania Coal and Coke Company at Cresson, Pennsylvania, in which twenty-seven tons of Nova Scotia oil-shales were carbonized in a retort of somewhat novel design; and accepted an invitation from the Trent Process Corporation, Washington, D.C., U.S.A., to inspect their experimental plant for purifying coals high in ash. The officers of this corporation were very courteous and furnished blue prints and other information concerning the apparatus employed in carrying out their process. They also conducted complete tests on several samples of coal comparatively high in ash which had been supplied at the request of the department from British Columbia, Alberta, Nova Scotia, and Saskatchewan (one sample of lignite). The results of these tests will be published in a separate report.

MANUFACTURE OF PEAT FUEL

In addition to the above duties B. F. Haanel has conducted all the secretarial work of the Peat Committee of which he is a member. This has taken a very large part of his time.

REPORTS READY FOR PUBLICATION

A report written by John Blizard on powdered coal is being prepared in this division for publication at an early date, as is also a report of the investigation of commercial samples of lignite and other fuels from western Canada, with a view to ascertaining their value for the production of a power and industrial gas.

CHEMICAL LABORATORIES

Edgar Stansfield reports in respect to the work of the chemical laboratories of the Division of Fuels and Fuel Testing that the adverse conditions for the work of the laboratory, referred to in the 1919 report, were accentuated during 1920. Mr. Stansfield's time continued to be occupied mainly by his duties with the Lignite Utilization Board, R. C. Cantelo left at the end of February to take a position with a commercial firm, and, as no new appointments were made, there were three vacancies on the staff throughout the year and four from March on. J. W. McKinney was temporarily employed for three months during the summer. Changes in laboratory arrangements necessitated transferring the work on mine air to the Sussex Street laboratory and, in June, J. Moran, mine air analyst, was transferred to the Chemical Division.

J. H. H. Nicolls was in charge of work on coal and other solid fuels, and, during the absence of Mr. Stansfield, took general charge of the laboratories. R. C. Cantelo and J. Moran, until they left, were in charge of oil and mine air analyses respectively. A. A. Swinnerton was in charge of work on oil-shale, in which he was assisted by J. W. McKinney for three months.

No increase was made in laboratory accommodation during the year, although several changes were made to increase efficiency.

Comparatively few samples were accepted for analysis during the year, on account of the lack of chemists. Thus after February no oil samples were accepted, and only a limited number of other samples.

SESSIONAL PAPER No 26

Further progress was made with the laboratory scale investigation on carbonization, by J. H. H. Nicolls, R. A. Strong, and others. The scope of this research has been widened to include similar work on peat. Progress was made during the year with work on oil-shale.

MACHINE SHOPS

The equipment has been very largely augmented by lathes, milling machines, drills, etc., obtained through the Soldiers' Civil Re-establishment Department.

CERAMIC DIVISION

Joseph Keele, Chief of Division, reports that the field and laboratory work of the Ceramic Division for the past season consisted of the investigation of raw materials used in the ceramic industries.

A large number of samples of clays and shales were tested for people in various parts of the Dominion, but as most of these samples are not very intelligently collected and the localities from which they came were not very clearly indicated the results of the tests are not recorded.

In view of the fact that most people do not know how to examine and sample a deposit of clay or shale, one of the sections of Mr. Keele's report on investigations during 1920 is devoted to instruction on these points.

The proper sampling of any deposits, especially those liable to variation at depth or those containing impurities, is most important.

Certain clays which might be utilized for the manufacture of pottery were tested in the laboratory. The results will appear in the report above mentioned.

The field work done in 1920 consisted of a continuation of the survey of available structural materials along the St. Lawrence, most of the time being spent in Soulanges, Vaudreuil, and Beauharnois counties, Quebec, and in Glengarry county, Ontario. L. H. Cole was also engaged in this work and a joint report on the resources of the region has been completed.

A short journey was made in August by Mr. Keele to the Missinaibi river in northern Ontario to examine certain deposits of high-grade sands and clays.

Owing to the difficulty of obtaining qualified assistants, the work accomplished by the Ceramic Division both in the field and laboratory was necessarily limited.

ROAD MATERIALS DIVISION

The activities of the Road Materials Division have been curtailed to a certain extent during the present year on account of the resignation of K. A. Clark as Chief of the Division. However, investigations on road materials were carried on in Ontario and in Nova Scotia by the two remaining engineers, Henri Gauthier and R. H. Picher, who worked together.

The first part of the summer was spent between Gananoque and Napanee in Ontario, with headquarters at Kingston. During the balance of the field season investigations were started in Nova Scotia, along the Halifax-Windsor, Halifax-Truro-New Glasgow routes, and in the Annapolis valley.

Since 1914 investigational work on road materials has been undertaken in every province of the Dominion except the Maritime Provinces. In Ontario and Quebec this work has taken the form of material surveys along some of the routes of proposed main provincial highways. All available supplies of materials were then examined, mapped, and such sampling done for subsequent laboratory study as was necessary

12 GEORGE V, A. 1922

to determine the quality of the material and to enable discrimination to be made between good and poor deposits. In the western provinces road material investigations have been more in the direction of trying to determine how the best use can be made of such materials as exist in order to get serviceable results in road building.

Through these surveys the staff of the division was afforded opportunity to become familiar with the local conditions and problems connected with road building in the various provinces. A great deal of information on the relative road-making qualities of a wide variety of materials has been gathered which will be valuable to the highway engineers and contractors of the country.

A final report on the available supply of road material along the Gananoque-Napawee section of the Ontario provincial highway is under preparation.

In compliance with a special request from the Highway Board of Nova Scotia it was found advisable to extend the field work to that province. The work started last summer consisted mainly in the study of the local conditions and in obtaining the information needed by the highway engineers. The routes along which the inspections were made are the Halifax-Truro-New Glasgow highway, the Halifax-Yarmouth highways, via Windsor, the Annapolis valley, and Digby, and via the south shore. Some time was also spent in locating suitable material within hauling distance of the highway between Windsor and Hantsport, and over an area northwest of Kentville, where no suitable material has yet been found.

CHEMISTRY DIVISION

The work of the Division of Chemistry has been carried on as usual under the direction of F. G. Wait, Chief of the Division.

Besides a large number of assays and analyses of ores, minerals, waters, and other miscellaneous mineral products, special investigations were commenced on two items of research—the oxidation of natural gas, and a study of the colloidal properties of bentonite.

The object of the first is to endeavour to evolve a method for the production from natural gas, in which Canada abounds, of methanol (methyl alcohol), formaldehyde, and formic acid, all of which are in ever increasing demand in the manufacturing industries, especially in England, at the present time.

The object of the second investigation will be to ascertain whether bentonite can be successfully used, as is anticipated it may be, in the manufacture of insulation materials, as fillers for textiles, soaps, and leathers, as well as in oil and colour preparations in sugar refining, and in wall-paper printing.

A plan for the study of this material has been mapped out, which it is expected will lead to satisfactory results.

One of the most important properties of bentonite is that of coagulating on the addition of alkali, and other electrolytes. In the course of the investigation, a series of experiments will be carried out to ascertain its behaviour in this regard.

Both these problems, the utilization of bentonite, and the production of methanol from natural gas, have been under consideration by the British Department of Scientific and Industrial Research, and the possibility of Canada completing their solution is hoped for.

The large deposits of bentonite in the western provinces, and our unutilized natural gas resources, will afford unlimited supplies of raw materials, if successful methods of production and treatment can be found. It is desirable that the work should be accomplished without delay, if it is to be of most value.

SESSIONAL PAPER No 26

DOMINION OF CANADA ASSAY OFFICE, VANCOUVER, B.C.

George Middleton, manager of the office, reports as follows:

As a result of the decreased or curtailed production of gold in British Columbia and the Yukon, there has been a falling off annually since 1918 in the gold deposited at this office. During 1918 there were 1,358 deposits of a total value of \$4,099,595.80; in 1919 the number of deposits was 1,391 and the value \$3,547,524.93, and in 1920 there have been 1,346 deposits, amounting in value to \$2,499,174.41.

There were 1,346 deposits of gold bullion melted, assayed, and purchased; the smaller deposits were melted into large bars which were assayed prior to shipment to the Royal Mint at Ottawa; a total of 1,404 meltings and 1,404 assays were required in connexion with the purchase and disposal of the bullion, all assays being run in quadruplicate.

Ten thousand cupels of various sizes were made and 242 pounds of slag treated and the values contained in same recovered.

The aggregate weight of the gold bullion deposits before melting was 150,869.37 troy ounces and after melting 147,718.37 troy ounces, showing a loss in melting of 2.0886 per cent. The loss in weight by assaying was 23.69 troy ounces, making the weight of bullion after melting and assaying 147,694.68 troy ounces, the average fineness of same being 0.814 gold and 0.138½ silver.

The net value of the gold and silver contained in deposits was \$2,499,174.41, the sources of production being as follows:

Source	Number of deposits	Weight		Net value
		Before melting and assaying	After melting and assaying	
		(troy ozs.)	(troy ozs.)	
British Columbia	892	76,413.36	73,882.30	\$1,292,595.66
Yukon	454	74,456.01	73,812.38	1,206,578.75
	1,346	150,869.37	147,694.68	\$2,499,174.41

DRAUGHTING DIVISION

H. E. Baine, Chief Draughtsman, reports that the following maps, diagrams, charts, etc., were published or completed during the calendar year ending December 31, 1920:

Published

No. 532. Map showing deposits of stone and gravel available for highway construction between Cardinal, Ontario, and the Quebec boundary, accompanying report No. 530: "Road materials, Montreal-Toronto highways." October 11, 1920 (out of print); scale 2 miles to 1 inch.

Completed

Map of portion of McMurray district, Alberta, showing provisional classification of principal outcrops of bituminous sand, 4 sheets; scale 40 chains to 1 inch (not for publication).

Map showing position of test pits on portion of Horse River reserve, McMurray, Alberta (not for publication); scale 200 feet to 1 inch.

No. 559. Map showing distribution of sandstone in the vicinity of Ottawa, Ont.; scale 4 miles to 1 inch.

No. 560. Map showing distribution of sandstone in the vicinity of Montreal, Que.; scale 4 miles to 1 inch.

No. 558. Map showing distribution of sandstone in the district north of St. Lawrence river, between Kingston and Brockville; scale 4 miles to 1 inch.

No. 562. Map showing distribution of quartzite in the Kamouraska district, Que.; scale 4 miles to 1 inch.

No. 557. Map showing distribution of sandstone in the district north of Nelles Corners, Haldimand county, Ont.; scale 4 miles to 1 inch.

No. 563. Sketch map of Pilgrim islands, river St. Lawrence, near St. André, Kamouraska county, Que.; scale 1,000 feet to 1 inch.

No. 561. Sketch map of quartzite deposits in the townships of Chavigny and Montauban, Que.; scale $\frac{1}{2}$ mile to 1 inch.

145 mechanical drawings, diagrams, charts, and flow sheets, etc.

110 black and white prints.

250 blue prints.

LIBRARY

Mrs. O. P. R. Ogilvy, librarian, reports that the end of the year 1920 shows a marked growth in the Mines Branch library.

Through the generosity of Eugene Haanel, the retiring director, the library has been enriched by the addition of many scientific books from his valuable private collection.

Important foreign files—broken by the vicissitudes of war—have, during the year, been brought up to date.

EXPLOSIVES DIVISION

Lt.-Col. G. Ogilvie, Chief Inspector of Explosives

This financial year is coincident with the first year of operation of the Explosives Act, which has been administered by the Explosives Division of the department.

The bringing into force of the Act and regulations, affecting as they do parties of various industries and trades, to the large majority of whom they appeared as an entirely new departure—as indeed they were in this country—is in itself a task which has demanded very careful handling. To a considerable degree also, the activities of the division have, of necessity, had to be directed along educative channels. This is readily understood when it is remembered that the absence of any previous legislation governing the conditions of manufacture and storage of explosives has allowed, in many cases, of the development of practices in the handling of these which are fraught with danger not only to the owners or users, but also to the public.

The seventeen factories in operation at the close of the financial year have all been inspected, and licences or continuing certificates issued or prepared for them. The preparation of these involves a study of, and the giving of rulings regarding the erection and layout of plants and the actual processes which may be conducted therein. The quantity of explosives and number of persons permitted to be in each building are determined, and the discipline which will be observed throughout the factory regulated.

In like manner forty permanent magazines and thirty-three temporary magazines have been dealt with. Others are subject of inquiry at present and it is to be expected that still more have yet to be located.

In this matter, and also in that of bringing to the notice of small dealers the requirements of the Act in relation to the keeping of explosives in unlicensed premises, the services of the Royal Canadian Mounted Police have been invaluable. Without their co-operation it would have been impossible to reach, in any reasonable period, the widely scattered users of, and dealers in, explosives. To the prestige of that force and the good judgment exercised by its members must be credited much of the improvement now being effected in the conditions of storage.

Advantage has been taken of such opportunities as have been found, of getting into direct touch with municipal police and fire brigade officers to further an understanding of the aims of the Act, particularly in reference to the regulations governing storage of explosives in unlicensed premises and to their conveyance.

The procedure followed in regard to the importation of explosives is proving satisfactory. As may be seen from the returns published with the report of the division for the calendar year 1920, the quantity of explosives other than required for use in manufacture, and except also fireworks, was very small. Fireworks are, however, largely imported, and the manufacturers of these have been called upon to supply particulars as to the nature and composition of their goods for authorization. It has been found advisable to exclude certain 'Salutes' and compositions containing potassium chlorate and white phosphorus, also, in default of the information required being supplied, to stop the importation of Chinese fireworks with the exception of certain of the smaller types.

Information has been obtained from various sources regarding accidents which have occurred with explosives during the calendar years 1919 and 1920 and this has been condensed and classified according to the causes, and is given in the annual report of the division. In all, records were obtained of sixty-two accidents

12 GEORGE V, A. 1922

in 1919, resulting in the death of twenty-seven persons and injury to forty-one. In 1920, during which year inquiries were extended, eighty-three were traced and these were responsible for the death of thirty-one persons and for injury to seventy-three. Since the coming into effect of the Act, four accidents have formed the subject of special investigation and report.

In the course of the year under review regulations have been issued (Orders in Council Nos. 2601 and 2602) dealing specially with the keeping of fireworks both in large quantities requiring for their storage licenced magazines, and in quantities such as may properly be kept in unlicenced premises. These are less stringent than the corresponding regulations dealing with explosives in general.

The testing of explosives has been proceeded with as rapidly as the facilities will permit of, precedence being given to any new explosives, with which there is no delay, but in this work we are handicapped by the fact that since the first of January the chief explosives chemist has been without an assistant.

Plans have been prepared for the establishment of a testing station where the suitability or otherwise of explosives for use in coal mines may be determined in order that, should provision be made for this service, the necessary equipment may be installed with as little delay as possible.

The staff of inspectors consists only of the chief inspector and one inspector. In the interest of economy the appointment of another inspector was deferred, but the need of such addition being now greatly felt, it is hoped that the staff may be strengthened in the near future.

EDITORIAL DIVISION

William McInnes, Editor-in-chief

The Department issues from time to time, as they can be prepared, reports, memoirs, and bulletins from its various divisions. Memoirs and Bulletins of the Geological Survey and Victoria Memorial Museum are issued under the supervision of F. Nicolas, Editor, and reports of the Mines Branch, under the supervision of Samuel Groves, Editor. In addition to the reports issued in English, many are issued in French, under the supervision of Jobson Paradis, Head Translator. The following lists include the reports published by the department during the calendar year 1920; and the French publications distributed during the year.

GEOLOGICAL SURVEY

English Publications

1723. *Annotated catalogue of and guide to the publications of the Geological Survey, 1845-1917*, by W. F. Ferrier; pp. 1-544; maps, 10; edition, 5,000 copies; published, May 26, 1920.
1773. *Memoir 117. Geological Series 99, Geology and ore deposits of Ainsicorth mining camp, B.C.*—by S. J. Schofield; pp. i-iv, 1-73; plates, 3; figures, 6; maps, 12; edition, 2,500 copies; published, May 25, 1920.
1783. *Memoir 115. Geological Series 97, Geology of Matachewan district, northern Ontario*—by H. C. Cooke; pp. i-ii, 1-60; figures, 5; map, 1; edition, 2,500 copies; published May 26, 1920.
1804. *Summary Report of the Geological Survey, Department of Mines, for the calendar year 1919, Part G*; pp. 1G-23G; figures, 2; edition, 3,000 copies; published, May 3, 1920.
1805. *Summary Report of the Geological Survey, Department of Mines, for the calendar year 1919, Part B*; pp. 1B-53B; figures, 2; edition, 3,000 copies; published, July 16, 1920.
1806. *Summary Report of the Geological Survey, Department of Mines, for the calendar year 1919, Part D*; pp. 1D-21D; figures, 2; edition, 3,000 copies; published, June 25, 1920.
1813. *Summary Report of the Geological Survey, Department of Mines, for the calendar year 1919, Part C*; pp. 1C-23C; figures, 3; map, 1; edition, 3,000 copies; published, August 11, 1920.
1828. *Memoir 121. Geological Series 103, The Malagash salt deposit, Cumberland county, N.S.*—by A. O. Hayes; pp. i, 1-24; figure, 1; maps, 2; edition, 2,500 copies; published, December 23, 1920.
- Report of the Canadian Arctic Expedition, 1913-1918—volume III: Insects—Separates—Introduction and list of new genera and species collected by the expedition*, by C. Gordon Hewitt; pp. 1-11; edition, 3,000 copies; published, December 10, 1920.
- Part I. Lepidoptera*—by Arthur Gibson; pp. 1I-58I; plates, 6; edition, 2,000 copies; published, January 10, 1920.
- Part J. Freshwater coprida*—by C. Dwight Marsh; pp. 1J-25J; plates, 5; edition, 2,000 copies; published, April 21, 1920.
- List of publications of the Geological Survey*; pp. 1-10; edition, 1,000 copies; published, December 3, 1920.
- Report on field study of life histories of Canadian mammals*, by R. M. Anderson. Reprint from the Canadian Field Naturalist, Ottawa; edition, 250 copies; published, February 3, 1920.

French Publications

1770. *Mémoire 114, No. 95, Série géologique, Matériaux de voirie dans la ville et le district de Montréal, Québec*, par Henri Gauthier; pp. i, 1-56; plates, 4; figure, 1; map, 1; edition, 1,000 copies; published, March 6, 1920.

 - Statistical form 19A: Gold, copper, and nickel; published in December, 1920.
 - Statistical form 19A: Gold, copper, and nickel; published in December, 1920.

French Translations

510. *Rapport sommaire de la Division des Mines, du Ministère des Mines, pour l'année civile 1918*; pp. 1-235; figures, 6; diagrams, 9; edition, 1,000 copies; published, July 22, 1920.
521. *La production minérale du Canada pour l'année civile 1918*. Rapport annuel—par John McLeish, B.A.; pp. 1-80; edition, 1,000 copies; published, July 3, 1920.

EXPLOSIVES DIVISION

English Publication

- 1 *Annual Report of the Explosives Division, Department of Mines, for the calendar year 1919*; pp. 1-45; edition, 3,000 copies; published, April 5, 1920.

French Publication

- 2 *Rapport annuel de la Division des Explosifs du Ministère des Mines, pour l'année civile 1919*; pp. 1-52; edition, 1,000 copies; published, July 12, 1920.

FRENCH PUBLICATIONS DISTRIBUTED DURING THE CALENDAR YEAR 1920

Geological Survey

During the year 1920, 16,969 copies were distributed. Of these, 3,617 were distributed in compliance with written and personal requests, and 13,352 were sent to addresses on the mailing lists.

Mines Branch

During the year 1920, 4,010 copies were distributed. Of these, 1,459 were distributed in compliance with written and personal requests, and 2,551 were sent to addresses on the mailing lists.

Explosives Division

During the year 1920, 794 copies were distributed. Of these, 156 were distributed in compliance with written and personal requests, and 638 were sent to addresses on the mailing lists.

SESSIONAL PAPER No 26

ACCOUNTING DIVISION

ACCOUNTANT'S STATEMENT

P. R. Marshall

The funds available for the work and expenditure of the Department of Mines for the fiscal year ending March 31, 1921, were:

	Grant	Expenditure	
		Amount	Total
DEPARTMENT—	\$ c.	\$ c.	\$ c.
Amounts voted by Parliament.....	237,601 67		
Civil list salaries.....		45,397 50	
Lignite Utilization Board.....		140,000 00	
Grant to Imperial Mineral Resources Bureau.....		12,166 67	
Expenses of the Explosives Division.....		11,314 40	
Civil government contingencies.....		3,769 66	
			212,648 23
Balance unexpended and lapsed.....			24,953 44
MINES BRANCH—			
Amounts voted by Parliament.....	429,660 41		
Civil list salaries.....		102,607 56	
Investigation of peat fuel industry.....		32,415 17	
Expenses of fuel testing plant and laboratory.....		30,386 97	
Expenses of ore dressing and metallurgical plant.....		24,116 54	
Cost of living bonus.....		21,682 52	
Investigations of ore deposits and economic minerals.....		18,387 29	
Wages of temporary employees.....		14,733 37	
Publication of reports and maps.....		9,683 26	
Chemical laboratories.....		9,670 07	
Sundry printing and stationery.....		4,436 19	
Miscellaneous.....		3,246 67	
Expenditure chargeable to Superannuation Fund No. 4, Retirement Act.....		966 66	
			272,332 27
Balance unexpended and lapsed.....			157,328 14
DOMINION OF CANADA ASSAY OFFICE—			
Amount voted by Parliament.....	29,282 30		
Earnings.....	12,202 64		
Salaries of staff.....		19,448 02	
Cost of living bonus.....		2,897 30	
Fuel, power, and light.....		1,043 72	
Assayers' supplies.....		1,081 76	
Contingencies.....		768 51	
Premium on bonds.....		600 00	
Electric burglar alarm service.....		360 00	
			26,199 31
Balance unexpended and lapsed.....			15,285 63
